> went up 1 wpm at a time, all the way to 40 wpm (no-one ever managed 40;
> the school record was 38, held by my instructor).

Using that method, I can see why.

Forget the flash cards, stick strictly with sounds. I learned CW when I
was 8 years old. Got it for a merit badge, when in the Boy Scouts. It didn't
hurt that my dad was a ham, as well. But, I learned the code with the
letters spit out around 15 to 20wpm. The spacing was wide, so it was easier
to concentrate and 'hear' the character being sent. This is called (I think)
the Farnsworth Method.

I got the merit badge in the Cub scouts at the ripe old age of 8 years old.
I didn't touch code for another 16 years after. It took me about a week to
refresh myself with the alphabet, numbers and punctuation, when I turned
25, but I was up to speed in that week, told the instructor of the Ham Class
that my dad had enrolled me in (also a member of the local radio club!) that
I wanted to take my Novice test (second week of the course) and absolutely
ACED the CW test and missed a couple of regulation questions. (they asked
about specific band segments that had changed, and I didn't know about).
That was in 84.

By Field Day weekend of 1984, I was heralded as the local "20wpm Novice".
I helped setup and operate a Novice CW station and single handedly, racked up
about half of the score that the teams of CW ops did.

By Field Day of 1985 I was a General class, managing a Slow CW Net I cranked
up on 40m, was a Net Control Station for TEX CW net and was passing traffic
all on CW. I had worked my speed up to 40 to 45wpm and have no doubt that if
I had stayed there, I'd probably still be climbing in speed. As a result, it's
not
a stretch for me to copy 35wpm comfortably.

The main point of this is, the way to get your speed on up there, is to copy the
characters as fast as you can, and then push yourself to copy them faster. Then
have the characters sent to you with a specified amount of spacing. Practice
that
speed until you can copy it perfect. Randomly generated is preffered.

Once you get comfortable with a speed, decrease the amount of spacing between characters.

While you're getting started, I'd recommend some sort of oscillator set up to produce a tone when the key is closed. Practice sending the characters and learn
their sound. Forgot about looking at 'flash-cards' - that's more of a hinderance
than a help.

> but others may have had different experience.

You could say so ;-)

> Also, copying 5-letter random code groups is IMO superior to copying intelligible
> text, at least for practise purposes.

Excellent suggestion! Random Character groups with the letters (after they're learned)
sent as fast as possible. It doesn't hurt to be a little uncomfortable with the speed -
that sets a goal to achieve. Send the characters fast, say 20wpm or better, set the
spacing at 5wpm.

Wait....
I might be getting ahead of myself... I keep forgetting that the only requirement nowadays
is 5wpm. Hell, anyone can -speak- code that fast...

Has anyone ever thought that another 50 years from now, those of us that do know Morse
Code will be considered the then current day 'Wind Talkers'?

That is a blatant assumption and you cannot support it with any
reasonable arguement. CBers are quite happy on (and near) 11 meters;
there's no skip to shoot on FRS or MURS, the range is simply too
limited, and so are the radios.

Preacher John and cranky Bob are good bluddies on 14.313 again. Friggin' Bob hates Republicans and never misses a chance to whine about them and Preacher Bob sits his dumbass on a pulpit and pontificates.
The two are a real pair...pair of losers. It is a good thing God made lots of oxygen...that damn Preacher John sure uses more than his fair share of it! (hint for John...we don't give a crap about your web page or your ugly little grandkids so shut up)

Ol Preacher John sure is full of himself. Look at how he describes himself on his QRZ site. His audio sure as Hell is NOT "mellidluent" but rather annoying and irritating. I guess since nobody else speaks highly of him, that leaves only himself to do so.

.....

Rev. John D. Occhipinti, President of REACH OUT INTERNATIONAL, is known on Amateur Radio as, "John the Baptist", Chaplain of Amateur Radio. John is dedicated to preserving Amateur Radio and serves as an Official Observer, Local Government Liaison and Official Emergency Station for the American Radio Relay League. Brother John is also an accomplished singer, musician and songwriter and enjoys the "audiophile realm" of Ham Radio. His mellifluent tones are an amalgamation of depth, presence and clarity and his superb audio is clean articulate and zero beat, within the legal bandwidth of good Amateur Radio practice.
.....

Who is that gay sounding dude named David? Where is he from???

Just wait, the cbers will be using modded radios with "leaners"
and other splatter boxes on the FRS and MURS frequencies. To them
it will be just other bands they can get on and make a sewer pit
out of just like 11 meters.
```

It's 100% legal for hams to mod type-accepted radios so that they can
operate outside the ham bands. It's not only legal but is encouraged
and supported by none other than the U.S. military. To wit MARS and
the CAP. Also, I believe, to get on the inter-service 5mHz Alaska
Emergency freq.

Good suggestions by the way - anything I've read to date on how to be
successful with CW mirrors what you say there.

Not to detract from your accomplishments at all, but I kinda doubt that
CW or proficient CW ops will ever attain anything near the 'Wind Talker'
status.

Not when any geek with a sound card can copy and send faster than any
human could ever do.

Now, that same geek and his PC running some kinda encryption something
or other, well maybe - but also doubtful. Effective cryptography is
going to be, if not already, as easy to obtain and use as a motor car.

The gay sounding guy is David Tolassi, ex KC1ZQ, now KB1EVE. The ONLY HAM
in history to retest and downgrade.

As for 'John' ,,, his real name is 'John the Blaptist'. As for his musical
accomplishments, he is indeed special. Remember those cute little jingles
you heard all over 75 and 20meters? He wrote and recorded most of them.

He then gave them to his good buddies the 'Stumpjumpers'.......and when
questioned about why he did that, knowing they would be played over the air.
His reply was.....'he had no control of what they did with those tapes'.
Later on he denied even saying that or making the tapes.

John the Blaptist is a discrace to Amateur Radio and his alleged affiliation
with Jesus. If you want to see a hypocrite...look up John N4FZ.

Oh one more thing....his hero is KV4FZ, Hebert L. Schoembohm. To show his
love for Herb, John went out and requested N4FZ for a vanity call. Then
denied doing that. You figure it out.

..Be aware that a gent by the name of Doug Calladonato (njscanner@comcast.net)is selling several early crystal-type scanners (approx. 21 of them..) and, is willfully misrepresenting the condition of these units as "collectible" and in "excellent working condition" to obtain a sale on them.He sold me two that he represented as in "excellent working order" and, that he "tested himself before sending them to me" that are both totally non-working, useless units. I am out $60 and he denies they were non-working at time of sale.Both were recived by myself in defective, improper-working condition....

Upon opening the units, they were filled with poor-quality solder (attempted) repairs and had oibviously been tampered with prior to the sale. The one unit has a squelch that will not close, and the unit wont even scan. The second one has such poor reception as to make it useless. If both units HAD been tested as seller stated, these problems would have been painfully obvious.

I have contacted this gent asking him for a refund and he ignores my efforts entirely. I am posting this to advise any potential customers of this seller to AVOID doing business with him.His actions are obviously dishonest in nature and I have adequate proof in the form oif Emails from him and, two DOA radios to prove it.

Buyers beware.Dont get SCREWED like I did. !!)<:

> morse code. Which is it? Is there any Ham spectrum available without
> licensure?

There's "no code" license. It's usually learning CW that most people find difficult. The only truly "no license" class is FRS, but you'll be limited to half a watt and CB with a limit of 5W. There is GMRS that requires a simple mail-in license that runs in the same band as FRS and limited to 2W.

But to be a ham still requires a license and still requires a test. You can find books as close as your local Radio Shack.

3751. transverter design for 20 meters?

Newsgroup: rec.radio.amateur.misc

I'd like to use a transverter with a 10 meter HTX-100 for 20 and maybe 80 meter operation. Is this possible and where can I find plans?

Thank you,
AJ

I think transverters are used for increasing the working frequency not decreasing it, i.e. passing from HF to VHF. I never saw plans for passing from 10m to 20m or even 80m. The contrary would be easier as 10m is an harmonic of 20m or 80m.

Looking at the band charts, maybe the 70cm band, or higher would be a place to have an expansion of one of those bands, as well as/or possible expansion by .25 or .5 addition to some of the HF bands.

Locally speaking only, 220 is only used for linking/remote reciever type of apps. There just is not enough transcievers available anymore to make me consider getting on that band, unless it is a bundled multibander. Locally speaking 2 meters is the only used vhf/uhf band... 6 is popular during openings and 70 is used for "some" repeaters and linking but otherwise dead like 220.

Right now, I have like about 15 minutes total time to operate on the average day, so I guess I am adding to the lack of usage on selected bands.....

At least in England, there has been kits for allowing 2 m multimodes
(such as FT-290) access to the HF bands using a transverter.

>The contrary would be easier as 10m is an
>harmonic of 20m or 80m.

This is just a situation you try to avoid.

For instance a transmitting converter from 28 Mhz to 144 MHz often
suffers from these harmonics. Assume you want to transmit on 145.100
MHz on a repeater input and you set the HF radio to 29.100 MHz. The
5th harmonic of that is 145.500 Mhz, which falls in the middle of the
FM calling channel :-).

Thus, you have to be very careful to filter out any 5th harmonic from
the HF signal and also take care that the mixer does not generate any
larger amounts of 5th harmonics of the input frequency.

In general you should design the frequencies in such a way that no
harmonics from the low frequency signal or the local oscillator signal
fall close to the desired output frequency band, since it would be
very hard to filter them out, once they have been created.

Toko have these for I.F.'s of 6m or 2m. The difficulty of using 10m
I.F. is that of keeping mixing products out of the TX output. For
Example take IF of 28.000Mhz mixed with 31.5Mhz to give 3.5Mhz
(difference) and 59.5Mhz (sum). The Eighth harmonic of 3.5 is ?? what
?. Now work out other combinations for the n* sum +/- n*diff) etc etc.
And then do the same for all the other HF bands. Not a pretty sight.
The 2m I.F. version would be a lot easier to keep clean.

Completely right. My post was only general.

And I didn't know there was rigs transverting VHF to HF. I thought it was too hard in terms of filtering. Sorry for making confusion.

Something unusual, I find myself agreeing with Phil for the second time this month! Yes, that was the thinking which was passed on to me by two earlier generations, owning and operating a xmitter was an earned privilege. Many explanations and theories have been bandied about as to how and why we are the state we are in today. However, none of that changes the fact that in 1959, when I walked out of the FCC office in NYC, having passed my tests, I thought I had just earned the most treasured privilege in the world! Moreover, a treasured privilege to be protected by obeying all rules and regulations to the letter. As you say, just another old curmudgeion reminiscing about what was. A parting thought, I thought the FCC official who administered my tests, attired in his neat business suit, had to be the most impressive government official on earth and one to be emulated. Unfortunately, I was mistaken, but that's another story not for telling here.

I think I know who that was you are talking about. Think he
got canned by the FCC because he was spending too much time with
ham matters and neglecting work needed for other radio services.
And there were rumors, but that's another story not for telling here....

When was it illegal to "own" one? Use I understand, ownership
in all the dialog I've read hasn't been illegal.

There's also limited use and access to 219-220MHz. Digital modes only,
and we are secondary. And we have to get permission from the primary
users (AMTS) and they usually go into CYA mode and automatically
say no.

Why? There's no reason for linears on 462 MHz; there's no skip. Just
another of your unsubstantiated assumptions. You have proven yourself
to be a moron. Take a seat at the head of the class, dimbulb.

Un Intentionaly speaking with someone and not knowing there location is one thing to reply to or put out a call for skipland is knowingly breaking trying to break the laws no matter how you want to twist it. Planting your dial on 27.555 and making contacts is Illegal as per the FCC, I would call that willful intent, knowingly calling cq dx which illegal op's are doing is soliciting people who are in the distance. Sorry, ground wave doesn't travel 155 miles

> You got a problem with that, Georgie-girl? Tough nookie. So what?

Sure do Dick Head, because it is another assinine comment coming from your keyboard.

Wow, Phil - you hit that one on the head. I remember going into the Buffalo, NY, FCC office on a number of occasions. The first time one walked into that place, your palms would be sweaty. Yes, it was a rare privilege to be allowed the use of a transmitter - and EVERYONE respected the FCC (well, there were a few, but they got popped in a heck of a hurry - there were a lot of monitoring stations back in the 50s and 60s). Yet, eventually, they became friends (still, you respected the heck out of 'em!). I remember when I had taken my 1st class radiotelephone and about 1 week later I had a letter for me from the Buffalo office. What the heck, too early for the ticket what could it be (and I still remember the little note about 'official business' and if one used it for personal use, there was a pretty hefty fine - seems like it was $300 or $500)? It was a note that started 'Dear Jim, it seems you left your red sweater in our office. Shall we send it, or will you call for it?'. Unbelievable. I was going to Buffalo for a pre-induction physical (Vietnam) so I dropped in at the office. There was no identification in that sweater! They remembered me. Made my day ;)

Hey, bully for you, Jeff. I only reached 25 wpm before I graduated, so
obviously the Flash Card method I described is badly flawed. :-) And my
Instructor went from 0 to 38 wpm when he was a student - I guess the
military really didn't know much about teaching us our jobs, huh?

Sarcasm aside, the flash card method did work great for teaching us the
basic sounds. Your dad was a ham, so you had someone who could send the
code, make sure it was being sent at your pace, and if necessary repeat
characters or prompt you. Geordi, the original poster in this thread,
doesn't have that luxury. He needs to get a good foothold by memorising
the basic sounds, and IMO flash cards will work great for that. Once he
gets the basic sounds in his head, he can work on his speed, as you and
I both did.

>I got the merit badge in the Cub scouts at the ripe old age of 8 years old.
>I didn't touch code for another 16 years after. It took me about a week to
>refresh myself with the alphabet, numbers and punctuation, when I turned
>25, but I was up to speed in that week,
>
I hadn't copied much morse at any speed for over 20 years when I got
back into Ham radio this summer; I downloaded a freeware program, fired
it up, and found I could still copy CW at about 17-18 wpm without much
difficulty. Immediately, not after a week to get back up to speed.

So tell me again why my method isn't worth considering? ;-)

--
In accordance with a first aspect of the present invention, there is provided a transportation facilitation device including a circular rim, a bearing in which a hollow cylindrical member is rotatable about a rod situated within the hollow cylindrical member, and a series of connecting members connecting the circular rim with the hollow cylindrical member to maintain the circular rim and the hollow cylindrical member in substantially fixed relation, wherein the rod is positioned on an axis perpendicular to the plane of the circular rim, and substantially central of the circular rim.

Abstract from John Keogh's successful 2001 application for an Australian patent (Innovation Patent #2001100012) for the "Circular transportation facilitation device" aka "wheel".

That would have been nice, if he had. what he did do, is setup a AF signal
generator, and a speaker and the key would make/break the speaker line.

I learned the character sounds on my own. Once I got them down, I was
off and sending. Sending faster than I could recieve, of course ;-) but,
that was how I kept increasing the speed.

Geordi, the original poster in this thread,

Sounds! the ALL TOO IMORTANT key! Recognize the character by it's
SOUND.

The way I shuffle cards, may not be the way -you- shuffle cards, but both
methods get the job done, right?

It's just my personal opinion that there are better ways to learn the code,
than flash-cards. To 'hear' the code, IMO, is better than 'seeing' the code.

Like Dan was saying, basically little ham use in that band area period.
Still possibly thing and exchange for frequencies would be a good idea, but
the hard part is getting both sides to agree in that matter.

Actually, up-conversion has the advantage of fewer potential for birdies
from harmonics of the oscillators. Most of the better transceivers use
an IF higher than the Fo.

I have no experience with the 10m radio you mentioned, but it sounds
like your project has potential. Additional circuitry could be built into a
housing extension, replacing the bottom cover? The down side, It
could cost more than buying a used HF multi-band rig, but that idea
never scared any hot rodders from building. Sounds like a neat
project.

With the numerous spectrum analyzer kits on the web, which one is the best?
I'm interested in ones covering from 1-500 Mhz. Should have reasonable
accuracy and not cost a fortune to assemble.

Thanks, in advance, for your opinions.

AJ

Don't extend the mic. cord.......

seriously try a better system ground. Or maybe even no ground. Some
toriods on the cord may be needed also.

Or for a quick try...if you have a old AM radio around just wrap a few turns
of the cord around it. See if that helps by 'de-tuning' things,

In those days only three types of people owned transmitters -
licensees, soon-to-be licensees (owning but not using the
transmitter), and "bootleggers". It was considered a privilege
to be in the first two categories and a "no no" to be in the
third.

He actually "believes" he is a preacher, but then his world of
reality is as strange as he is. The "ministry" he claims to be
president of is not listed in any business or religious directory. I
know a prominent clergyman in Atlanta, and he has never heard
of any such spiritual organization. It would seem Stumpjumper
#5 (kc3au - n4fz) is so full of shit his eyes are brown.

NEGAT, nougat.
The word is audiofile, as in rasping the spoken word till it sounds like a
hog grunting.

I haven't heard the accused speak, so I am only addressing
AUDIOPHILE (lover of sounds)
AUDIOFILE (Rasper of sounds or storer of sounds)
FWIW
>>

FWIW, if you ever heard those "Fools" on 14.180 testing their audio, you would
caall them "Audiophools"

It may have been "considered" a no-no (third case);
the question, however, was... if "owning"
constituted any violation?

I say it didn't.

Well, your method worked for you and my method worked for me. We both
were able to copy CW at a pretty fair clip, in a relatively short period
of time. Other than that, I think there are too many variables, and far
too little information, to make a decision as to whether either
technique is "better" .

I still would argue that you might have had an advantage that not
everyone has. Also, I don't think a beginner could have gleaned enough
information from your post to replicate your training method.

In accordance with a first aspect of the present invention, there is provided a
transportation facilitation device including a circular rim, a bearing in which a hollow
cylindrical member is rotatable about a rod situated within the hollow cylindrical member,
and a series of connecting members connecting the circular rim with the hollow cylindrical
member to maintain the circular rim and the hollow cylindrical member in substantially
fixed relation, wherein the rod is positioned on an axis perpendicular to the plane of the
circular rim, and substantially central of the circular rim.

Abstract from John Keogh's successful 2001 application for an Australian patent
(Innovation Patent #2001100012) for the "Circular transportation facilitation device" aka
"wheel".

If we are asking for more spectrum elsewhere, how about 4m (70MHz). This band is allocated to hams only in European and Middle Eastern countries, but would be interesting to have here.

EMERGENCY COMMS: NEW DATABASE BEING CREATED

A new ham radio volunteer database is about to become a reality. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the story of how an act of terror lead to its creation:

--

A year ago, when al-Quida terrorists hit in New York City, Pennsylvania and Washington D-C, it was Joe Tomasone, AB2M, who put together an Internet based volunteer registration system. This strategy permitted ham radio volunteers to be quickly credentialed and dispatched to the various disaster sites where they were needed. Last May at the Amateur Radio Newsline sponsored Ham Radio Town Meeting in Dayton Joe explained that the database came about because he wanted to do somthing to help in the wake of the attacks:

--
Tomasone: "Not knowing what else to do I sent an e-mail to Tom Caruba, KA2D, who is the Section Emergency Coordinator for the New Yourk City and Long Island. I said that I know there is nothing that is nothing I can do to help, but let me know if there is somthing I can do to help.

And I expected that maybe he would request for me to make some phone calls or do some health and welfare traffic outside the area because the phones were in scetchy status in the New Yoork City ares. A short time later a request came back that I wasn't sure how to answer. They asked: '...can yoiu make a databse that will track the hudreds of requests we are getting [from hams] to come down and volunteer and can we put that up on the Internet so that it can be accessed.'

I thought about it for a few minutes and I said yes, I think we can do that."

--

Joe Tomasone did do it. The result was a steady flow of volunteers being dispatched when and where they were needed.

--
Tomasone: “On the registration page as many of you were able to see, it asked for basic information such as your name, your call sign, your address, contact information, what ARRL Section you were from and what your availability was. Now once that was put into the database, it was able to be queeried by a number of people who were given access to that portion of the siute. That enabled them to do searches based on a number of criteria.”
--

During his Dayton presentation, Joe mentioned his desire to grow what became known as the World Trade Center Volunteer Database into a general event activation management program for ARES, RACES and SKYWARN activities. Now Joe is about to get that project off the ground. But to do it he needs your help.

Joe tells Amateur Radio Newsline that making it happen will take people and new ideas. To that end, he has created an e-mail mailing list to solicit concepts and volunteers for this project. Anyone who is interested can either sign up directly by sending an e- mail to volreg-request@lists.ab2m.net or by visiting wtc.ab2m.net on the World Wide Web. Please note that their is no w-w-w in that U-R-L. Its simply wtc.ab2m.net.

For the Amateur Radio Newsline, Im Henry Feinberg, K2SSQ, in New York.

--

Dont worry if you missed that U-R-L. We are putting a link to it from our website at www.arnewsline.org. (ARNewsline™)

RADIO LAW: CC&R BILL HR 4720 ATTRACTS ADDITIONAL COSPONSORS

Good news on the legislative front. Five more cosponsors now have signed aboard HR 4720. This is a bill in Congress aimed at providing relief to amateurs faced with private deed covenants, conditions and restrictions when they want to put up antennas.

According to a story in the ARRL Letter, the list of cosponsors is now up to 23 members of the U-S House of Representatives who have agreed to sign on to the measure. This includes two radio amateurs: They are Oregon Republican Greg Walden, WB7OCE and Arkansas Democrat Mike Ross, WD5DVR. Walden was one of the two original cosponsors of HR 4720 with Texas Republican Pete Sessions. Walden and Ross are believed to be the only Amateur Radio licensees in the U-S House of Representatives.

It was New York Democrat Steve Israel introduced HR 4720 back on May 14th. The measure would require private land-use regulators such as homeowners' associations to "reasonably accommodate" Amateur Radio communication consistent with the PRB-1 limited federal preemption. PRB-1 now applies only to states and municipalities. (ARRL)

**

RADIO RECORDS: 24 GHZ RECORD BROKEN

The ham radio distance record for a contact on the 24 Gigahertz band has been broken again. Jeramy Boot, G4NJH, is here to tell us who did it and how:

--
On the 7th of September Dave Robinson, G4FRE, operating as WW2R/5, and Al Ward, W5LUA, made a record-breaking contact on 24,192MHz. Dave was operating portable in EM41HC near Natchez, Mississippi, and W5LUA was operating from his home in EM13QC, at Allen in Texas.

CW signals of 549 were exchanged. The distance, based on six-digit to six-digit grid squares, is 337.3 miles or 542.8 kilometres.

The sked was set up earlier in the week via e-mail with no liaison on any band, including cellular. Attempts to repeat the contact over the same path 12 hours after the initial QSO resulted in no signals being identifiable either way on 10GHz, suggesting the morning QSO was under enhanced tropo conditions.

Jeramy Boot, G4NJH
--

No signals were heard on 2 meters or 70 centimeters at the time of the 24 Gigahertz contact was completed. Previous experiments on 10 gigahertz last July also resulted in no signals being identified. (GB2RS)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Catalina Amateur Radio Association net serving our home -- Los Angeles California.

(5 sec pause here)

**

ENFORCEMENT: 20 METER NET INTERFERENCE

Interference to nets on 20 meters in the South Pacific. Q-News Graham Kemp, VK4BB, reports from Brisbane Australia:

--
20 Meter interference. The Maritime nets on 14.315 MHz are having problems with interference. Chris VK2UW says the ACA have been notified and are monitoring, but a bit of help from Hams re locating the source of the Interference would be appreciated.

It is Man made and is regular both by making noises and CW type transmissions. The nets involved are the Pacific InterIsland Net on 14.315 MHz 0800 Z each night and Tony's Net on 14.315 MHz 7.00am EST each day.

From Q-News Australia, I’m Graham Kemp. VK4BB, reporting for the amateur Radio Newsline.

--

If you hear the interference and can get a bearing on it, please report your findings to your nations Intruder Watch coordinator. In the United States that's the American Radio Relay League. (Q-News)

**

ENFORCEMENT: REPEATER ORDERED OF THE AIR

Back stateside, the FCC has ordered a repeater operator to take his system off the air. It happened in California. The agency's Daryl Duckworth, NN0W, explains the action taken:

--
Duckworth: "A repeater shutdown order was issued to Steven Decho, KE6FX, of Draper Utah regarding operation of his repeater or remote base on Mt. Disappointment in the Los Angeles area. Decho was told in a letter to shut down operation until he either obtained current coordination or submitted a detailed, specific and acceptable plan to the enforcement bureau demonstrating how he would prevent interference to the WA6UZS repeater operation."
--

Late word from the FCC is that Decho has replied to the agency. He has shut down the Mt. Disappointment system. (FCC, RAIN)

**

RADIO SURVEY RESULTS: 1 IN 10 NEVER HEARD OF IRLP

A recent survey conducted by the website Radio-Scanner.co.uk shows that 1 in 10 radio enthusiasts worldwide have never heard of the Internet Radio Linking Project better known as I-R-L-P. The survey did however show that only 20% of radio enthusiasts were against the idea, with a massive 71% backing it. 9% were apparently undecided.

The Radio-Scanner release did not say if the survey was limited to licensed radio amateurs or included others such as S-W-L's and monitoring radio enthusiasts. Also, no data was published regarding knowledge or acceptance of other ham radio Internet linking protocols such as I-Link, Echolink, Hamlink or E-Q-S-O. (Radio-Scanner)

**

RADIO LAW: GROUP WARNS ON NEW BROADBAND REGS

A consumer action group says that some proposed U.S. government policies could harm competition in the broadband Internet market. This says the Consumer Federation of America will result in reducing choices and driving up monthly fees for users who want high-speed access.

The C-F-A contends that by easing regulations on incumbent cable television and local phone companies, the Federal Communications Commission will hasten the demise of independent Internet providers who reach users over existing phone and cable lines. They say that , consumers will suffer as cable and local phone giants that currently dominate the broadband market will no longer be driven to lower prices and create innovative products.

The FCC ruled in March that cable providers do not have to share their systems or provide open access for competing Internet services, and the agency is currently reassessing its line-sharing rules for local-phone giants like Verizon Communications and SBC Communications Inc. (CFA)

**

HAM RADIO HELP: IHS LOOKING FOR VOLUNTEERS

The International Health Service is looking for ham radio volunteers with High Frequency portable operating experience to go to Honduras from February 14 to March 2, 2003. The International Health Service is a non-profit organization based in Minnesota that provides free health care to the people of Honduras. Applications are being taken through the beginning of October. If you are interested please contact John Kirckof, KB0UUP by e-mail to jmkkek@runestone.net or phone him at 320-634-4386. The I-H-S web site can be found at www.ihsofmn.org (HIS)

**

NEW RELEASES: PASSPORT TO WORLD BAND RADIO

Media Network reports that the 2003 edition of Passport to World Band Radio is now available for ordering from Universal Radio. Priced at $15.90, Passport to World Band Radio is the bible of S-W-L's and other radio monitoring enthusiasts around the globe. More information is on the web at www.universal-radio.com. (Media Network)

**

SPECIAL EVENTS: THE COAST GUARD AUXILIARY 63RD ANNIVERSARY ON THE AIR

The U.S. Coast Guard Auxiliary' 63rd Anniversary special event Radio Day is slated for Saturday October 5th. The event will take place at all Coast Guard Auxiliary Districts across the United States. Operations will take place on 40 through 10 meters. Listen for call signs like K1G, N2A, W8E and the like and Q-S-L as directed on the air. (Press release)

**

HAM RADIO IN CYBERSPACE: ARRL CENTRAL DIVISION NOW ON THE WWW

The American Radio Relay League's Central Division now has its own home in cyberspace. Its the creation of Clay Melhorn, N9IO. The good news is that there is no advertising of no pop-ups on this site. Oh yes, you will find it on the web at www.central.arrl.org. (Listener contributed)

**

CONVENTIONS AND HAMFESTS: LIMARC RESCHEDULED

The LIMARC Hamfest that was to be held Sunday September 15th has been rescheduled to Sunday November 10th because Mother Nature would no cooperate. According to Eddie Muro, K2EPM, inclement weather caused the last minute cancellation. Muro adds that the venue will remain the same -- Briarcliffe College in the town of Bethpage New York. More information is on the web at

www.limarc.org. (LIMARC)

**

CONVENTIONS AND HAMFESTS: CSVHFS IN MILWAUKEE

208 people attended the recent Central States VHF Society Conference held in Milwaukee Wisconsin. Conference Proceedings are available for $20.00 shipped domestic United States from the Central States VHF Society in care of Bruce Richardson W9FZ, 2330 Lexington Ave S. #312, Mendota Heights, Minnesota 55120 . And less we forget, next year's conference is in Tulsa Oklahoma on the last weekend of July. (VHF Reflector)

**

HAM RADIO NEWS SERVICES: GB2RS SUBSCRIBABLE LIST NOW ON YAHOOGROUPS

Also. the Radio Society of Great Britain’s weekly news bulletin is now available over a Yahoogroups mailing list. The news is posted over the weekend, after it has been released for non RSGB members. You can subscribe by sending an empty e-mail to GB2RSnews-subscribe@yahoogroups.com

Yahoogroups is also the home of the Amateur Radio Newsline e-mail list you subscribe to it by sending a similar empty e-mail to arnewsline-subscribe@yahoogroups.com. (Listener contributed)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

EMERGING TECHNOLOGY: NEW CATV CHIPS REVOLUTIONIZE SETY TOP BOXES

A new chipset developed in Canada may revolutionize set top T-V converter boxes. The spinoff of this technology could also impact future ham radio gear. Norm Seeley, KI7UP has more:

--
Zarlink Semiconductor of Ottawa Canada has announced availability of a new high performance chipset for tuning analog and digital RF cable TV signals. Zarlink's two-device chipset claims to deliver reception of all analog and digital cable channels, while allowing designers of multi-service cable set-top boxes to shrink tuner designs by 50% and reduce tuner costs by up to 20%.

The Zarlink chipset is comprised of a broadband tuner I-C and a new chip that handles frequency down-conversions and intermediate frequency amplification. Zarlink says that the new I-C’s implement active RF and IF amplification circuitry directly in the silicon wafer structure. In fact, the circuitry inside the count-down integrated circuit eliminates up to 40 external components from high performance, double-conversion tuner designs.

Norm Seeley, KI7UP.
--

The same Zarlink based technology could conceivably be used to shrink the size of other electronic gear that will require advanced R-F signal processing. This could include the next generation of digital communications ham radio gear. Ham gear that could be no bigger than a set-top CATV converter box. (Based on Zarlink release)

**

EMERGING TECHNOLOGY: INTEL TO INTRODUCE 3 GHZ PROCESSOR

Computer industry sources say that Intel may be moving up the introduction of its new 3 gigahertz Pentium 4 processor. Intel had originally planned to introduce the 3.0 gigahertz Pentium 4 processor by the end of the year. The earlier date will give manufacturers an edge in getting machines ready for the Christmas buying season. Intel also is reportedly accelerating the introduction of its 2.80 gigahertz Pentium 4 as well. (Via Internet)

**

RADIO IN SPACE: IO - A JOVIAN TRANSMITTER

From the science page comes word of a kind of natural transmitter in orbit around the planet Jupiter that has no magnetic field. Roy Neal, K6DUE, has more:

--
There are many mysteries in deep space. Men and their machines are hard at work trying to resolve them. At the heart of unmanned space flight, the Jet Propulsion Laboratory, in Southern California is home to the huge antennnas that control the space ships that go out in the attempt to unlock the secrets. It also is home to amateur radio station W6VIO and many of the hams who run the station take part in the deep space endeavours.

The latest report says they have found that IO, a volcanic moon circling the planet Jupiter, transmits charged particles…easily detectable as power and noise. But the moon apparently has no magnetic field. These data were gathered by NASA’s Galileo spacecraft as it orbited Jupiter for the last 6 years.

The discovery took on importance last Fall. The researchers were trying to determine whether the moon created its own magnetic field inside the massive one generated by Jupiter, the largest of all our solar planets. When Galileo crossed the path of a magnetic field connection between IO and Jupiter, suddenly the density of the charged particles through which it was passing increased…but no magnetic field was

detected. Leaving the researchers, in their earthly control room, yet anther puzzle of the universe to solve.

For the amateur radio newsline, Roy Neal, K6DUE
--

More on this fascinating finding is available in cyberspace at www.jpl.nasa.gov/videos/Io (NASA-JPL)

**

INTERNATIONAL - CANADA: VO1MX APPOINTED ASSISTANT DIRECTOR

On the international wire word that Dan Goodwin, VO1MX, of Gander Newfoundland has been appointed as an Assistant Director for the Radio Amateurs of Canada Atlantic Region in Central Newfoundland. Goodwin fills a vacancy that existed in the central region of Newfoundland serving the major centers of Gander and Grand Falls-Windsor. (RAC)

**

INTERNATIONAL - ARGENTINA: HAMS TO GET 136 KHZ ALLOCATION

Hams in Argentina are getting access to the 136 kHz band. Roberto Beviglia, LU4BR, who is the President of the Argentinean national amateur radio society says that his group made the rules change request to the Argentine radio regulatory department. The government agreed. As a result, 135.7 to 135.8 kHz has been initially allocated to that nations amateur service on a secondary basis. (GB2RS)

**

DX

In DX, word that Laurence Howell, GM4DMA, is active as portable 9M6 on the High Frequency bands and 6 meters from Sabah now until the 30th of September. He is there to teach communications theory and to set up a new country headquarters communications base for the youth development charity Raleigh International. (GB2RS)

And the ARRL DXCC desk has announced a new 30 meter DXCC Single Band award. Applications for this award will be accepted beginning on October 1st. The new 30 meter DXCC certificates will be dated, but not numbered. (ARRL)

**

THAT FINAL ITEM: FLYING THE FLAG

And finally this week a look back to the way ham radio commemorated 9-11. This week its the story of two Florida hams who took to the air to fly the flag. In their case it was not by radio but rather in a Cessna 172 aircraft carrying several U-S flags as a part of an event called Flight Across America. The pilot at the controls was veteran aviator Steven Crow, K4CPX:

--
K4CPX: “What they did was to assign somebody from every state to carry their state flag into New York City to be there originally on 911. But they locked down New York City again for 911 so they had to do it a few days early.

Those airplanes that could not come to New York or wouldn’t because there were only fifty airplanes carrying state flags -- they wanted to have an airplane at each airport fly aloft for this commemoration which we did.

Then I came up with the idea of carrying flags for individuals. For people who wanted their flag commemorated with a flight on Flight Across America. So we did and we carried five flags aloft and we put a seal on them and signed them and gave them back to the people after we got back on the ground."
--

Accompanying K4CPX was Wendall Peterson K0REQ as co-pilot and Julius Ehland as the bearer of the flags. And on the morning of 9/11 the three made their way to Punta Gorda's Charlotte County Airport only to find it not to be a great day to venture into the sky:

--
K4CPX: "We went out to the airport anyway and stood around watching the rain sweep through. It is a pretty large airport with 6000' runways and I think we were the only pilots and the only flight that was even there that day."
--

Finally a slight break in the weather:

--
K4CPX: "We hung around and hung around another couple of hours -- all the time watching -- and looking at the RADAR -- and check it and see this stuff coming through. And we found a bit of a hole and decided -- lets jump in and take a quick look from the end of the runway and maybe aloft and maybe we can get the flight in."
--

And that's exactly what they did:

--
K4CPX: "We took off; climbed up to 1000 feet, turned sharply ahead of some heavy weather coming in and came right around the airport and landed on another runway and we were on the ground. We were probably in the air a total of maybe 12 or 13 minutes."
--

The important thing is that the flags were flown and returned to their owners. And while Steve and Wendall did have some 2 meter ham gear on board the Cessna they never bothered to turn it on. This was 9/11 and commemorating the day was what the flight by these two radio amateurs and their friend had really been all about. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that our survey how ham radio is being used by home schoolers is still taking place. If you are a home schooling parent or a student being home schooled, please send your thoughts on the subject by e-mail to newsline@arnewsline.org. So far the responses we have received are very interesting to read.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Ken Locke, N8PJN, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

What would it take to make some sort of suitable sound creating device
(why not get a tone oscillator kit, and learn some theory at the same time? :->)
that makes a sound, and then make/break the sound with a key. You only
hear the sound, when the key is depressed. Of course, I'm speaking of a
J-38 style straight key. Many people don't agree, but being able to SEND
good CW is as important as the ability to receive good CW.

> Well, your method worked for you and my method worked for me. We both
> were able to copy CW at a pretty fair clip, in a relatively short period

Not everyone had a parent that was into Amatuer radio, no - I agree.
Then again, (thankfully) not every Dad was like mine (rest his soul).

Yeah...it is lame Woger for sure. Poor nonentity is crawling up the walls of his mommy's house looking for ways to post. He lost is ISP, got booted from Alopia, and has waaayyy too much time on his hands now. Isn't it great? The filth has finally departed and nobody misses him.
Maybe now he will seek the professional help he so direly needs.

I was not asking, but it seems that if that specific band is dead, maybe an exchange would be more advantageous all the way around. Additions to our existing HF bands would probably not draw many complaints. Never considered the 70mhz allocations but it sounds interesting.

As usual since WW2, other services have completely bypassed ham radio
in innovation. My wireless link up the tower is accessible for about
4 miles if the notebook has a decent antenna on it for 2400 Mhz line
of sight across the river. The kid down the street gets over 400Kbps
downloading through it from my cable internet connection. I can get
over 1Mbps out on the seawall overlooking the river.

In the TRUE spirit of ham radio, without any license at all, take a
look at Hassan's neat wifi link in Egypt:
http://www.d128.com/wireless/
Take a look around at the various links, especially the antennas,
being used by Warchalkers across the planet. This new "broadband
amateur radio" is a LOT of fun, without kissing any old fart's ass at
the ARRL or your local VEC session for permission to operate.....

If you're near the Charleston AFB in N Charleston, SC, my microwave
link is on SSID 3 with cable access. Help yourselves....(c;

Oh, and it's not theft or illegal to warchalk. If anyone doesn't want
outsiders to use their system, it's very easy to just password protect

it and turn off the free access. Most companies don't care. Many
cafe's like Starbucks are adding service to attract customers. With
my homebrew colinear on the notebook, I can get Starbucks' signal over
3 blocks away! I quit carrying the Budweiser Beam around. Too many
funny looks....(c;

Here's some interesting places:
http://www.turnpoint.net/wireless/has.html
http://www.warchalking.org/
http://www.wardriving.com/

Thank yous to all the WiFi suppliers for letting us use a few
megabytes to browse the web and get our emails......(c;

Hello all,

I have some BIG radios to get ready for shipping - DX-100's and the like.

I've heard that some 'pack and ship' places are now doing walk-in 'Foam in Place' packaging for folks, where they shoot the polyurethane goop into a plastic bag surounding the radio for maximum protection.

I've seen guys listing radios for sale with '$20 for Foam in Place packing' added to their shipping cost - seems a fair cost to me for such good packing.

Does anyone know who does this in the Pacific Northwest? Tacoma, specifically. I did a Google search but the search terms are too broad to really narrow anything down.

Any help out there?

thanks,

David Ellison WB7AWK

You might talk to a packaging supplies company that sells the raw
materials for this, and find out if any of their customers offer this
to the public. The Thomas Register (also online) would help find them.

I used to work for a small manufacturing company which had this setup
out on the loading dock.

There is also house insulation done in a similar way, maybe this would
be worth pursuing.
Happy trails,
Gary (net.yogi.bear)

Sandpiper used to have the stuff they use to make their own antennas
available quite
cheaply.

Sandpiper is one if those businesses that could benefit from a web site.
Even just a facsimile of their print catalogue would be useful.

If you just want small amounts you will probably find your local B&Q stock it- mine does. It isn't the cheapest way to buy it but it is convenient!

If you want more just try Yellow Pages under Aluminium Stock Holders- they will usually supply in small quantities or off cuts for cash.

I had to clean many power supplies years ago when the "Foam in Place" had entered improperly sealed power supply storage bags. What a mess. This was during the Mid 80s, and the power supplies were for commercial networking chassis. I had nothing to do with the improperly sealed bag, but they took several "electronic techs" to help clean the power supples.

Be sure that the item is sealed air tight.

3843. HTX-404 Lo Output PWR

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-27 13:21:31 UTC
From: David Shalita <davidr@cnmnetwork.com>
Message-ID: <3D945B26.BB5B0404@cnmnetwork.com>
Source record: 72984

My HTX-404 HT power output is much lower in both high and lower power positions. When operating with 12volt 20AMP bench power supply, output in high power mode is only 1.3 watt. I think it used to make 3 watts or better.

HT seems to be working OK otherwise. Power output is not measurable in low power mode.

Who else besides Radio Shack repairs these HT's?
Can Radio Shack do a decent repair of these HT's?

Thank you for any info.

I've only ever found Al rod and that's only at the B&Q Warehouse stores (not the smaller ones).

If this is the stuff you're talking about, they are appallingly bad at re-stocking. I emptied out all the B&Q's in the London area about 18 months ago :-(

Well my local 'normal' B&Q does rod, tube, and strip in Al, brass, and some composite material (plus others not so interesting to hams). The local radio club did 'clean them out' of the 6mm tube when a load of them built the "BRAT Hunt DF Antenna" but they did recover ;-). Poetic really, the club DF hunts always start in the local B&Q car park.

It does take some practice to get reasonably good at it, and to take
care of the equipment to get good results. A place that has their
people doing 82 different tasks at once may not be the best for this.

As the other poster mentioned, it is very important to wrap your gear
well to keep the foam out of it. It is amazing how just a couple of
drops of the foam mix can expand inside an unrestricted space.

Happy trails,
Gary (net.yogi.bear)

I contacted a local engineering company. They were able to supply,
plus anything he hadn't got he was willing to order. Try Yellow Pages.

Hello Brian

> Well my local 'normal' B&Q does rod, tube, and strip in Al, brass, and
some
> composite material (plus others not so interesting to hams).

Any chance you could point me in the area of the store I should be looking? I've been in the hardware area, generally nearby where the screws and nuts & bolts are.

My experience is that your average B&Q employee responds with a grunt if you're lucky, and then if you're really lucky points you vaguely to nowhere because they really don't know. :-(

BTW, here's one of my creations, courtesy of B&Q http://www.g6lvb.com/dayton_demo_2002.htm made of 4mm Al rod from B&Q. 70cm RHCP yagi, 8+8 elements, tunes to better than 1.1:1 VSWR in the satellite portion of 70cm, under 1.4:1 across the entire band. Plans at http://www.clarc.org/Articles/uhf.htm. I can recommend these antennas if you have a history of antenna failure like I do.

See the threads on the federal gummint complaints about the proposed
60m ham band. See the threads on "harmonizing" the 40m band which go
back 20-25 years and ain't happened yet because of the volume of
complaints from the broadcasters.

> Never considered
> the 70mhz allocations but it sounds interesting.

Guaranteed to be really "interesting", that's TV broadcst channel 4 in
the U.S.

Before you start noodling "allocation tradeoff studies" dial up:

http://www.ntia.doc.gov/osmhome/allochrt.pdf and find out who already
lives there and weigh the prospects of the FCC moving them out of the
way so that we can play there.

222 is for all practical purposes dead because it's the lame 2m
wannabe band, always has been, it offfers nothing 2m does not offer
except somewhat shorter verticals. It has the same +/- propagation and
operational characteristics as 2m has, the same would be true in the
case of having both 50 & 70Mhz bands. There is no point to the
continued existence of the 222 band except as it relates to the usual
ham turfism mindset. Get comfortable with it.

Well in my local store (Gillingham, Kent) it is right next to the items you
list, along with Al and mesh sheets.

I found the 6mm O/D Al tube pretty good and hard enough for my needs- I was
even able to tap it sucessfully for one experiment.
There are 2 tubes- a plain finish @ £1.46 a 1m length and an anodised finish
which is more expensive.

I think it is too hard not to be an alloy- for 'quick lashups' I sometimes
us Al welding rod- that is much softer.

>
> My experience is that your average B&Q employee responds with a grunt if

The older ones are OK but the real problem is the stock control- no concept
of ordering things that seem to be selling out but pack the floor space
with stuff that never seems to move until the next sale.

I'll have a look. I plan to build a 2m and 70cm handheld Yagi like the Arrow one- if I ever I get time for my own projects ;-)

Check out my download page for the 'BRAT Hunt DF antenna' - it has proved very popular and I've yet to have an adverse comment as regards its working.

And make sure all of the cabinet to chassis mounting screws are in place.
I've received numerous heavy boatanchors that had damage due to missing
rear chassis to cabinet mounting screws not in place. Foam is great, but
the radio must be ready for shipping before packing.

It is amazing how badly a lot of items get packed. I take in a lot of e-bay stuff for a friend overseas. I have to repack nearly everything because of the materials being used. I see a lot of damage because wads of paper are used for packing, or the item is so heavy and the box so flimsy that the item drifts to a side and gets banged up. Some people just don't have a clue.

I feel exactly the same way. I think that *most* people don't have a clue as to how much abuse a package can suffer during shipping. UPS had (and may still have) the following packing guideline:

"Make sure that your item(s) when packed will survive a three foot drop onto concrete."

Not coincidentally, the height above ground of the floor of a UPS delivery van is about three feet. I've seen some drivers, in their haste to get unloaded and on their way again, literally kick packages off the back of their vans onto the ground.

So I continue to be amazed at the number of times I receive a heavy and delicate instrument packed in styrofoam pellets, crumpled paper, or styrofoam sheets as the only protection against damage (not to mention the problem of getting the styrofoam "crumbs" out of all of the nooks and crannies of the instrument because the shipper neglected to put it in a protective bag)!

My packing method for valuable and easily damaged items is:

1) Wrap the item in several layers of bubble wrap, paying special attention to display screens, knobs, connectors that project from the panels, etc. These may require protection with extra wrap, foam padding, or heavy cardboard.

2) Put it in a box just large enough to accommodate the wrapped item (no room to shift) and seal securely.

3) Put this box in a box large enough to allow at least 2 inches of space all the way around (at least 4 inches larger in each dimension). Use small styrofoam blocks to keep the inner box centered, then fill completely with peanuts or other padding for protection.

4) Put an extra shipping label inside and seal the box.

Although it requires a little more time (not much, actually) and an extra box, I've never had anything damaged when shipping it this way. It may not be worth doing for a $50 voltmeter, but it sure is for a $10,000 spectrum analyzer!

Foam-in-place is pretty good if done correctly, but be aware that the packing company can set the foam density to a wide range of values, making it more "squishy" or less "squishy." There is an optimal setting based on the weight of the object being supported, but the packers may not adjust as necessary. Rock-hard packing will protect from puncture

and minor crush damage (if thick enough), but does nothing to protect
against impact shock or major crushes. Conversely, packing that is too
soft will allow the item to shift as it compresses the packing, and then
it may end up resting dangerously close to the side of the packing box
with inadequate protection.

You Silly Bastard of the Divine Lady of Perpetual Constipation, Heidi
Klum .JPEG Wackoff Klub. When I look you, I see shite, all I see is some
stray errant uneaten corn. I don't count them, to pluck it out and try
to eat it again, even though it looks perfectly edible. I just let it go.
Wodger Ahhhhhhh. You, Wodger on the other hand, must see an entire fantasy
world sculpted in the
delectable tasty likeness of turds of Heidi Klum. Uh, hand formed (!) and
delivered by divine revelation from a magical mystical place daily for
consumption, like wine and wafers to be transformed into the very body
of the Goddess in your Belly. Soon to even so be resurrected again in
a perpetual cycle of the triumph of life over digestion. Scat of a
Skank for a Schmuck. So my question to you is: What do you do with
your fecal turd grogans when they particularly look like Our Lady
Heidi Klum? Meditate with deep "Oooohhhmmmssss?" in the porcelain
echo chamber shrine? (PFHBLTT!!) Alert the media? Release the
houndsssssssss?
Verily, one blessed with such manna from heaven must indeed be revered
as a True Reliever Believer. May the Clenched Cheeks of Grace from
Our Lordess Heidi Flow Down Upon You In A Religioius Ecstacy
Release, Surpassing even the Parting of Her Red Sea.

Open yer mouth boy! PFHBLTTTTTT!!!!!!!!!!!

And so it is written... so shall it be done.

The 14.313 revival is taking place! I am hearing some of the "Heroes of 14.313" WA4KBX and a guy in 2 land. Keep in mind that Mr. Herb, ex-KV4FZ, just got his renewal approved by Mr. Hollingsworth. Perhaps I could call Hal Turner this week, and get Herb as a guest. Hal could turn his 2 hour show into one big ROLL CALL! It will be such a awesome roll call, that it will melt the mother-board on Hal's computer again!

Take a listen on some of the interesting 75m action. 3.875, 3.855, 3.865 3.898 - all have the promise to keep you laughing till it hurts!

Source record: 72922

You should post to rec.radio.amateur.homebrew for these type of questions. Homebrewing is building and/or designing your own electronics circuits.

Check if all parts are in correctly, including the varicap Use a plastic screwdriver to tune the variable capacitor so you will not be touching the capacitor when tuning it. Touching the variable cap with a metal screwdriver adds additonal capacitance. Try using a bigger capacitor and see if it oscillates without touching it. This may or may not work.

You should not mention the 27MHz (cb band) to a Ham group. 27MHz is looked down on by "Hams". Some Hams mentioned to me they would filter out 27MHz from existing gear, or make it unable to operate at 27 MHz. As proof of this, some catalogs that gear to Hams offer a range of crystal freqeuncies, with a continuous range of values, except the 27 MHz band is not offered.

3887. ADIF format files and online callbook ?

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-30 20:05:36 UTC
From: Mark Turner <markturner2@hotmail.com>
Message-ID: <anaank$2oc$1@news7.svr.pol.co.uk>
Source record: 72930

My logbook is produced in ADIF format, mostly from QSOs automatically logged using MIXW2 then improted into Logger v7.09.

Is there anyway that I can go online and 'fill in the gaps' eg. full name and other info from an online logbook automatically. I know that its possible if I buy a QRZ, Hamcall or Buckmaster CD, but I just wondered if the same thing was also possible online ?

Thank you for any advice.

Mark

More likely shared than taken away completely. Isn't there
a outstanding law which says that, if amateur spectrum is reassigned
to another service, the FCC needs to find equivalent spectrum
elsewhere to replace it? The FCC seems to prefer to avoid this
and so prefers to use sharing, often with Part 15 devices as you
point out, to make better use of the bands which hams underuse.

>In the TRUE spirit of ham radio, without any license at all, take a
>look at Hassan's neat wifi link in Egypt:

>being used by Warchalkers across the planet. This new "broadband
>amateur radio" is a LOT of fun, without kissing any old fart's ass at
>the ARRL or your local VEC session for permission to operate.....

I agree with this, though it is worth while pointing out that it
doesn't seem to be fear of exams or old farts that keep these
operations under Part 15 rather than Part 97. I'd even suggest
that a disproportionate number of people (i.e. more than 1 in 50,
the fraction of the US population with an amateur license) playing
with this stuff are hams, who could run this stuff under Part 97
if they wanted to. The reason it remains a Part 15 hobby almost
exclusively is that high-speed data is really only interesting, both
to users and to experimenters, if there's a connection to the Internet
somewhere, and the lack of control of users, content and encryption use
which this implies makes interesting use under Part 97 essentially illegal.
It is not surprising that Part 15 gets the hobbyists when Part 15 is
interesting while Part 97 is boring.

I have noticed the ARRL becoming a bit hostile to Part 15 uses, however,
complaining about interference and interference potential even on bands
that amateurs only seldom use. I haven't figured out whether this is

a side effect of opposition to proposed and actual use on bands amateurs do use frequently (e.g. 80 meters, 440 MHz), the fact that some of this use is commercial, or the fact that some of these services are attracting hobbyists who, in prior decades, might have become hams instead, but if the latter reason is true I wish they'd instead try to address the usage and content restrictions in Part 97 which make experimentation there so unattractive in comparison.

FOR SALE - ICOM IC-T81A QUAD-BAND FM HANDHELD

SALIENT FEATURES

Ham Bands: 50 Mhz, 144 MHz, 430 MHz and 1.2 GHz
Additional RX Coverage: 76-108 MHz WFM (Broadcast),
118-136 MHz AM, 136-174 MHz FM, 400-470 MHz,
1240-1300 MHz
Power Output: 5W with supplied BP-200 Batteries
1W on 1.2 GHz
Additional technical information available at:
http://www.icomamerica.com

This handheld has had very gentle use and is in virtually new
condition. Comes with original box and accessories i.e.
operator manual, rubber-duckie antenna, wall charger
PLUS A SPARE BP-200 BATTERY (total of two
batteries). Current AES price for the radio is $269.99 and
$85.00 for the extra battery, a total value of $354.99.
BUY IT NOW FOR $235.00 (shipping, if necessary,
will be at the buyer's expense).

Don't let this one get away. 73

Hi All

I have several semi-working and not working sets and am looking for circuit diagrams or hints on repair:

1. Matsushita base MS-0835LB FM midband 67mHz transceiver

2. Yaesu FTC2003 handheld

3. Motorola MT500 handheld

Any help or links where I might get hold of repair info or circuit diagrams for these sets will be appreciated!

Thanks!

Obviously the 220MHz allocation is of great interest to those in the US but it's prospective demise is just indicative of a worldwide situation where governments see the prospect of selling of the bands above 30MHz domestically to the highest bidder.

Latest example of prospective band erosion is the withdrawal of the 70cm amateur band WORLDWIDE. If this goes through then I guess the wall will tumble and no band will be safe. Maybe this will be the price of harmonisation of 40m and opening of new HF slots for amateur radio.

Below is an extract of a posting from the South African national society.

Regards all

Alec Wood M1BNK
Teesside UK

******EXTRACT FROM QNEWS (South African Radio League, SARL)********

70-CM BAND UNDER THREAT AT WRC-03

It has come to the attention of the South African Radio League, SARL that the threat to the 70-cm band WORLD WIDE is once again very real. The SARL has just received a discussion paper which will be tabled at the World Radio Conference next year (WRC-03) which directly targets the portion of 432 to 438 MHz for exclusive use by the planned Earth Exploration Satellite Service (EESS) due to be launched soon.

If this proposal is carried at the World Radio Conference next year it will see this portion of spectrum allocated on a worldwide basis and this spells the death knell of all 70-cm operation.

The SARL is engaged in urgent talks with the SA regulatory body, ICASA, and other interested parties to try and convince them that this would be a severe blow to amateur radio.

The section of the proposal and the motivation is as follows:

Agenda Item 1.38:
'to consider provision of up to 6 MHz of frequency spectrum to the Earth exploration-satellite service (active) in the frequency band 420-470 MHz, in accordance with Resolution 727 (Rev. WRC-2000).'

Background.
According to the United Nations Conference on Environment and Development (UNCED), Rio de Janeiro, 1992, there is an urgent need for assessment and systematic observations of forest cover and rate of forest degradation in tropical and temperate regions. Active space borne sensors (Synthetic Aperture Radars (SARs) are needed to enable the monitoring of forest biomass.
Systems operating on frequencies around 450 MHz can penetrate the canopy of forests, and have the capability to determine the ground-trunk interaction and are in the context of forest cover information of particular importance.
Systems operating at 1,3 GHz, or higher frequencies cannot penetrate the canopy.

The spectrum around 450 MHz is also optimal for monitoring of continental ice and for monitoring of vegetation and soil surfaces for desert and tropical areas.

Probably, as the SARL are saying, "never before have we needed as many amateurs as possible to join and illustrate to the regulatory authority that strength lies in numbers.'

No matter WHERE in the world your tuned to this QNEWS edition, NOW is the time to join YOUR National Society!

> spectrum to the Earth exploration-satellite service
> (active) in the frequency band 420-470 MHz...
> ...Active space borne sensors (Synthetic
> Aperture Radars (SARs) are needed to enable
> the monitoring of forest biomass.

Have the people that want the 6MHz chunk ever heard of 'spread spectrum' ?
They could easily design an adaptive, broadband radar waveform for their
(fleet of) satellite(s) that would be virtually immune to interference and
would also have a very low probability of detection. The technologies are
pretty much off-the-shelf. And why limit themselves to 6MHz ? Take the
full 50 MHz (or more) for their spread spectrum signal.

In other words, the required bandwidth could be shared. There is no need
for anyone to move off of the band. All they need is a secondary or
tertiary or etc. asignment for their little project.

BTW, in the depths of the Amazon (for example), I wonder how many users of
70-cm band Ham radio equipment are licensed Amateur Radio Operators ?
People in the less developed countries tend to use cheap Ham equipment (and
frequencies) for all sorts of purposes. Good luck getting them to QRT...

http://www.altopia.com/polfaq.htm

"Q: What is your policy on cross-posting? (REVISED 12/3/2001)

A: Cross-posting ability is not to be used by customers for the purpose of "cascading", "flaming", or "trolling". We may disable the cross-posting ability of a customer if we believe they are cross-posting with one or more of these purposes."

Yeah, I realize that it says they'll just *disable* the ability to crosspost. Woger gibbered (to me) something to the effect of "I see you lost your Altopia account for crossposting too!"

The dumbshit still thinks I post from "127.0.0.1/localhost" and/or 4ax.com. It's amazing, but there's people out there that you can't even beat a clue into.

You miss the point. 432 MHz is NOT an amateur band, and never
has been, at least in Region 1.

UK amateurs use it on sufferance from the MOD (apparently).

Look up its status.

Message-ID: <Xns929BEFE213C69n3eophotmailcom@64.164.98.29>
Source record: 72852

Over the past year or so, I've picked up several sealed lead acid (SLA) 12V batteries, total of about 200 Ah, with the intent of using them as an emergency power source. I need to come up with a good (read: cheap) way of safely keeping them fully charged. (Changing the charger leads every couple of days is getting tiresome...)

My current shack power is an Astron VS-35M. I was thinking of setting the Astron to 13.6V and using it as a constant voltage charger, with all the batteries wired in parallel. This is the recommended method printed on the side of some of the batteries. (The others give no charging recommendations.)

I did some reading, and read that constant voltage charging should be current limited to C/5, which would be 40A for this bank. (I have my supply limited to 35A.)

Can anyone see any obvious problems with this setup?

Tnx,
Paul N3EOP

Enjoying the ride, OM?

BU...BU...BUWHAHAHAHAHAHAAAA!!!

Friendless, jobless, careerless, womanless, ISPless, respectless,
hopeless, childless, accountless, wifeless, worthless w0ger!!!!!

Can't tell if he's farting, or speaking!

But he has a niiice corn seeds collection!

eBayed your modem yet, w0ger? BWHAHAHAHAHAHAHAHAHAAAAAA!!!

You reap what you sow, ho'! MUWHAHAHAHAHAAHAAH!!!!

'MONISTAT w0ger' is feeling particularly irritable lately as he
has another yeast infection, and has some soreness from his recent
breast reduction procedure.

He also is only available via the newsgroups as he is forced to post
from public access points like libraries, etc. since no ISP exists that
wants him. He is forced to use anonymous remailers due to his personality's
resemblance to sun-ripened dog shit.

Hey, w0ger, what does it feel like to have not one single person on the
planet that likes you?

It must truly suck to be you, w0ger.

Remember....

Hopefully you have told eBay about your experience. You can at least
give the dealer a black mark on eBay which will hopefully warn other
potential customers. And enough black marks can even ban them from eBay.

Source record: 72873

Heard on the rig the other day that Curtains
Boy Woger was spotted exiting the Lavender
Lads club.

He was seen pulling a red wagon, like a Radio
Flyer, and his distended rectum, which resembled
an elephant's trunk, was loafing in the bed of the
wagon as he waddled along...

Think they let him into the public library's computer
area like this? Scary...!

Poor Poor Roger.....as has been that never was.

Jealous old boy? Too bad you weren't in the real military and did anything of value. But in your case you would have come home as a 'friendly fire incident'.

A case of the only Pvt ever fragged by his troop.

Howdy, folks.

This message is about my ham radio resource for those who have WIRELESS access to WML pages. In otherwords, if you have a cellphone or pda that can read WML (like an Ericsson or Nokia, and so forth), or, you use Opera (the Webbrowser), then you can access the special format of the radio pages at http://wap.hfradio.org/ - if you browse that page with a normal webbrowser (say, Netscape or MSIE), you will be redirected to the normal HTML pages at http://hfradio.org

With that said:

I've added a large number of additional DX Cluster pages - spots by band, by special interest (IOTA, Mobile, QRP, and so on), announcements and wwv reports. These WML pages are NOT on my normal site (since they are from the DX Summit site). These pages are an interface for WIRELESS browsers to the DX Summit pages. If you are a wireless device user (cellphone, pda) that can browse WML pages, check out

http://wap.hfradio.org/

There are more resources than just the DX Cluster, by the way. I also provide live propagation data, forecasts, and related information.

I'd love to hear how the WML works on your cellphone or other WML device. I have tried to create pages that render well on all versions, and so forth.

Enjoy.

You forgot the last part of that sentence - ham radio is a hobby that serves a public service. And it is that public service that sets ham radio apart from the other hobby or recreational radio users (CB, GMRS, FRS, or whatever).

And please don't now claim that hams don't do public service, because I know for a fact that large numbers do. In fact, based on my experience, the only hams making these claims are the hams not doing public service themselves (perhaps to justify their own inactivity).

> It can not justify the frequencies it has.

Ham operators don't have to "justify" the frequencies allocated to them. We don't allocate frequencies to ourselves - government agencies do. And it is those agencies that have to justify their decisions to allocate frequencies. And judging from the number of bands and frequencies available to us, they have not had a problem justifying their decisions so far.

> 70 cm should be reallocated to commercial use
> since hams do not deserve it.

A bold statement, Barry, especially when absolutely nothing is offered to back it up. Why don't you explain why we don't "deserve" it? Are you going to claim nobody is using those frequencies? If so, I suggest you listen a little more closely. True, the the band is not being used as much as it could, but the same could have been said about the 6m band a few years ago (a band growing more popular each day).

> They may as well have them since hams do not
> need them.

You consistently refer to hams in the third person. Are you even an ham operator? If not, why is this of interest to you? If you are a ham, why do you have such a negative opinion of your fellow ham operators - and such a destructive attitude towards this radio service? Instead of advocating the removal of our frequencies, why don't you do something more constructive - like actually using the frequencies?

Amateur Radio Newsline™ Report 1311 – September 27, 2002

Amateur Radio Newsline report number 1311 with a release date of Friday, September 27th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Unlicensed stations invade the low end of 20 meters and a tower finding in California highlight this weeks Amateur Radio Newsline report number 1311 coming your way right now.

(Billboard Cart Here)

**

INTRUDER WATCH: WORLDWIDE QRM FROM INDONESIA

Unlicensed stations allegedly operating from Indonesia are causing havoc to the D-X beacon monitoring system on 20 meters. Its interference being heard around the world as we hear from Q-News Graham Kemp, VK4BB:

--
The presence of Indonesian non amateur groups on the various amateur band frequencies in the 40 and 20 meter bands is causing severe concern for all the amateurs of Region 3 and the world over. While they use amateur radio frequencies for their regular communications, you will never miss the many calls for Prayers and the many jokes and Kookaburra pattern of laughing with old men and young ladies together.

The 40 meter band has several channels of 5 kHz intervals from the lower edge and these stations have their breeding grounds here. They graduate to other frequencies and move to 20 meter band, where they are on either side of the International Beacon frequency of 14100 kHz. Many of us in Region 3, cannot monitor any NCDXF/IARU beacons on this frequency.

Even though this QRM from Indonesians has been reported month after month to telecommunications authorities, so far nothing seems to be happening get them off the air.
--

If you hear this QRM, please report it to your nations Intruder Watch coordinator.
(Q-News)

**

RADIO LAW: COURT RULES CITY CANNOT RESTRICT BUSINESS ANTENNA USE

A California Court of Appeals has ruled that a city cannot regulate the type of transmissions that an FCC license holder can broadcast. It also says that a

city ordinance that prohibited a license holder from broadcasting commercially is preempted by federal law. Amateur Radio Newsline’s Bruce Tennant, K6PZW, says what the city of Rancho Palos Verdes was trying to write its own rules on this one:

--
Mark Abrams, WA6DPB, lives in Rancho Palos Verdes California. He is an amateur radio operator and with city approval, Abrams built a 40-foot antenna and 52-foot antenna in the backyard of his home. The city’s approval of the towers was contingent on their use being limited to non-commercial applications only. Abrams is also the owner of a business that sells and services two-way radio equipment and holds 76 licenses issued by the FCC which permitted the use of his antennas for commercial purposes.
--
Abrams: Audio Onlt at www.arnewsline.org.
--

Abrams says that he never used the two city-approved towers to receive or transmit on frequencies for commercial use. Instead, he used portable antennas mounted on tripods in his backyard and on a mobile tower trailer which he parked in his side yard.

But in 1998 and 1999, the City of Rancho Palos Verdes monitored radio transmissions from Abrams's property and detected the commercial use of frequencies. The City stated that these transmissions were in violation of an ordinance that required FCC licensees to obtain a conditional use permit from the city's planning commission to operate commercially.

--
Abrams: Audio only at www.arnewsline.org
--

The City of Rancho Palos Verdes and State of California filed an action seeking an injunction to bar Abrams from, among other things, operating his antennas for commercial purposes. Abrams answered the complaint and filed a cross-complaint of his own. It he claimed that federal law preempted the City's ordinance because it prohibited the use of frequencies allocated to him and his customers by the FCC.

--
Abrams: Audio only at www.arnewsline.org
--

The court says that he can use his antennas for commercial purposes without a city permit. It says that federal law preempts the City's ordinance banning such use because the Rancho Palos Verdes requirement that Abrams obtain a permit to transmit a commercial broadcast was preempted by federal regulation. It says that Abrams's FCC licenses enable him to operate commercially on certain frequencies and the City of Rancho Palos Verdes limitation on his rights are in conflict with federal law. And that’s good news for WA6DPB.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

The Court concluded the City does hold zoning authority, but such authority is limited to the placement, construction, and modification of facilities used for commercial mobile radio services only. (ARNewsline™)

**
RADIO RULES: UPDATE ON NTIA VS. PROPOSED 5 MHZ HAM BAND

Some good news concerning the National Telecommunications and Information Administration opposition to a new Amateur service allocation at 5 Mhz. This from ARRL President Jim Haynie, W5JBP, and General Counsel Chris Imlay, W3KD who say that they are now optimistic about reaching a resolution to issues that could otherwise block plans for the band.

The two met with representatives of the government agency to discuss the NTIA concerns. Haynie says that they came away with a feeling that the NTIA was willing to work with the ARRL to resolve concerns. Until surprise opposition surfaced the FCC appeared to have put ARRL's request for a new, domestic-only, secondary amateur allocation at 60 meters on the political fast track. (ARRL Bulletin)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Three Rivers Amateur Radio Club repeater serving Philadelphia Pennsylvania.

(5 sec pause here)

**
RESCUE RADIO: HURRICANE ISADORE STRIKS

On Tuesday, September 24th, the FCC declared that a general communications emergency existed for Alabama, Florida, Louisiana, Mississippi, and Texas. This as hurricane Isadore approached the region.

The declaration requires amateurs not use 3.873 MHz during hours of darkness and 7.285 MHz during daylight. Both frequencies are to be protected plus or minus 3 kHz. Only amateurs taking part in the handling of emergency traffic are to use these 6 kilohertz slots.

The FCC said the communications emergency could last as long as 14 days but it actually remains in force until its rescinded. Keep an eye on the ARRL website newspages for ongoing updates on ham radio involvement in this emergency. Its in cyberspace at www.arl.org (From ARRL bulletin.)

**

HAM RADIO IN SPACE: V-U-SAT’S MESSAGES FROM ORBIT

A new ham radio satellite to be launched by India wants to carry your message. This, according to VU2NUD who is the coordinator for Amsat-India.

VU2NUD says that V-U-SAT will carry a beacon system with the ability to play back pre recorded messages on command. They will be transmitted in F-M voice

for all the world to hear and your words could be among those it broadcasts from space. Here's how:

Think of short, meaningful and apropos messages no longer than 15 seconds in duration. It could be related to ham radio space operations, amateur satellites, famous quotes, sayings or whatever. Then send it along to VU2SBJ by e- mail to sri@ebhats.com and a copy to ham@vsnl.com. Mark clearly in the subject: Message for Beacon. Then wait to see what V-U-SAT eventually has to say. (ANS)

**

ENFORCEMENT: FCC SETS ASIDE LICENSE RENEWAL

The FCC has notified Scott E. Kamm, of Sioux City Iowa that it has set aside the renewal of his Technician class license grant for N0UGN. The Commission said it took the action based on recent complaints about the operation of Kamm's station and questions regarding his qualifications to be a licensee.

The FCC notes a Warning Notice by the Enforcement Bureau sent to Kamm last February 5th. The agency says that the warning was related to Kamm's alleged use of transmitting equipment on 156.300 and 174.000 MHz without a license, and deliberate interference to an Amateur repeater operating on 146.910 MHz. The letter also pointed out that Kamm's address in the database was incorrect. And subsequent to that warning notice the FCC says that information came to its attention that Kamm had apparently provided radio equipment to an unlicensed minor residing in Waterbury, Nebraska, and had instructed him on how to operate on the Marine Band and other frequencies.

In his February 11th response to the FCC Warning Notice, Kamm denied setting up radio equipment for the minor, and also stated that he had sold all of his radio equipment. But the FCC says that it has all of these complaints under review and that Kamm will be hearing from the agency again in the not to distant future. (FCC)

**

SAFETY ALERT: FLUKE METER RECALL

Test equipment manufacturer Fluke Corporation has announced a voluntary recall of certain models of its digital multimeters. This because of a delay in readings on the A-C scale above 500 volts.

According to a company release, the meters can take more than 18 seconds to reach a final reading. This could lead users to think that the voltage is lower than it actually is.

The meters involved in the recall are models 175, 177 and 179 of which 17000 were sold in the United States. All of the recalled units have a serial number below 79000000 and were sold between January and October 2001. If you have one, please call Fluke toll-free at 800-260-4819 between 8 AM and 7 PM weekdays Eastern time. More information on the recall can be found in cyberspace at www.fluke.com/rma/default.asp. (Fluke press release forwarded by WA6ILQ)

**

SAFETY ALERT: KODAK DC5000 DIGI CAMERA RECALL

A recall on a popular digital camera. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the shocking details:

--
If you own a Kodak brand digital camera model D C 5000, listen up. Eastman Kodak Co. is recalling about 75,000 of these cameras because of a possible manufacturing defect that can cause electrical shock.

According to news reports, the recalled cameras bear the model number DC5000 on the lower front right-hand corner. The cameras also carry a plate on the bottom containing the Kodak product identifier code KJCAA, followed by an eight-digit serial number ranging from 01800001 to 11700825.

The cameras were sold at department, electronic, computer and camera stores as well as mail-order and Web sites from June 2000 through August 2002. Consumers can return the cameras for free inspection and repair by contacting the company at 1-888-793-2977 between 9 a.m. and 8 p.m. Monday through Friday Eastern Daylight Time.
--

Again, if you own one of these cameras, please contact Kodak at 1-888-793-2977 between 9 a.m. and 8 p.m. Monday through Friday Eastern Daylight Time. (Kodak press release)

HAM RADIO ON TV: ICOM JOINS “THE HUMAN RACE”

ICOM America has been named the high frequency communications provider for the television shoe The Human Race. ICOM America has already shipped an IC-706 Mark II G to Boston for use by the show. The IC-706 and additional equipment will be used during an upcoming trek along the actual travel route to be used. The donation is the result of an agreement recently reached between ICOM America's National Sales Manager Ray Novak, KC7JPA, and the shows producer Bill Desjardins, W1ZY. (THR)

**

CONFRENCES: WSWSS IN CERRITOS CA

The Western States VHF-UHF and Microwave Conference is slated for October 11, 12 and 13 at the Sheraton Cerritos Hotel Towne Center in Cerritos California. Hosted by the Western States Weak Signal Society, the conference provides VHF and UHF enthusiasts the knowledge and tools to work DX and contests on 6 meters and up. This years banquet speaker is ARRL 1st Vice-President and VHF/UHF contester Joel Harrison, W5ZN. More information is on the web at www.wswss.org. (WSWSS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

RADIO HISTORY: PEARL HARBOR REPORTER S.K.

He wasn't a ham, but Hugh Lytle was a communicator in his own right. History remembers Lytle as the man whose teletype message provided The Associated Press and the world with the first account of Japan's sneak attack on Pearl Harbor back in 1941.

Lytle was the news services Honolulu correspondent and a reserve Army officer. He was awakened by the Army on December 7th as Japanese planes bombed the U.S. fleet. According to his son David, Lytle quickly left for his A-P office at the Honolulu Star-Bulletin, where he filed a brief account of the attack in progress. He then reported for military duty with the Army.

A few weeks ago on August 16th Hugh Lytle passed away. He was 100 years old. (Published reports)

**

HAM TRAVEL: FREE ACCOMMODATIONS FOR HAMS ON THE GO

From across the Atlantic comes word of an interesting program for hams who like to move around. The International Travel Host Exchange, or I-T-H-E is a program administered by the German national society, D.A.R.C. It provides radio amateurs with the possibility of free accommodation with other amateurs around the world in exchange for other hams offering accommodation to overseas amateurs.

Most International Travel Host Exchange members are in Europe, but there are also amateurs registered in Australia, Canada, India, Indonesia, Japan, Malaysia, New Zealand, Syria, Thailand and the USA. Once registered, postal or e-mail addresses are made available so that contact can be established well before any visit takes place. For more information please contact Thilo Kootz, DL9KCE by e-mail to dl9kce@darc.de.

**

SCIENCE AND TECHNOLOGY: NEW GRAYLINE STUDY REMAILER

A new Internet newsgroup has been set up to discuss and coordinate the current research into greyline propagation by the RSGB Propagation Studies Committee. It is with Yahoo and people can subscribe by sending an empty e-mail to greyline-subscribe@yahoogroups.co.uk

Yahoogroups is also the home of the Amateur Radio Newsline e-mail list you subscribe to it by sending a similar empty e-mail to arnewsline-subscribe@yahoogroups.com. ARNewsline is one word spelled a-r-n-e-w-s-l-i-n-e.

**

HAM RADIO IN SPACE: RS-12/13 - S.K.

The AMSAT News Service and the ARRL Letter both report that the Russian Radiosport RS-12/13 ham satellite appears to have died. Jerry Brown, K5OE, reports he's received word from Russian sources that RS-12/13 went dark as a result of severe solar flare activity in
July and August.

At airtime, efforts are under way to restore the satellite, but hopes for success are dim, according to Brown's Russian acquaintances. RS-12/13 were integrated into the COSMOS 2123 Russian navigation satellite, launched February 5, 1991. It’s beacons have not been heard since August 20. (ANS, ARRL Letter)

**

INTERNATIONAL - AUSTRALIA: CB RULES ARE CHANGING

The Australian UHF CB equipment standard is to change. The new standard will require that CTCSS equipment include facilities to reduce interference to non CTCSS users. Required features include a 'channel busy' warning light and a 'listen before transmit' function. The changes were required by the Australian Communications Authority following changes that legalized CTCSS signaling on UHF CB channels. The A-C-A has also informed the Australian Association of Citizens Band Radio Operators that once the standards are approved by Standards Australia, they will become compulsory for equipment manufacturers. (Q-News)

**

DX

In D-X, word that KF2XN is active as KH2 slash KF2XN from Guam for at least the next month. He operates mostly SSB in his spare time. QSL as directed on the air. (RSGB)

And BI7DX is an Isands on the Air expedition that will operate from Weizhou Island throuhgh the 4th of October. Weizhou Island is located in the Gulf of Tongking in South China with team members comming from four different Chinese provences. The operation will be on SSB and CW from 40 to 10 meters, including the WARC bands. (RSGB)

**

THAT FINAL ITEM: THE BIRDS ARE BACK

And finally this week, our favorite flying T-Hunt is about to start. This, as the famed radio tagged burrowing owls take flight once again. With the details, here’s Joe Moell, K0OV.

--
It's that time again -- migratory birds in the Northern Hemisphere are heading south for the winter. For the fifth year, ham radio operators and scanner fans are being asked to use their equipment to help wildlife biologists figure out the routes and final destinations of endangered Burrowing Owls. In previous

years, hams helped determine that owls hatching during summer months in the Canadian provinces of Saskatchewan and Alberta travel over central states from North Dakota to Oklahoma, ending up in southeast Texas and northern states of Mexico. They sometimes fly over 2000 miles to their winter homes.

There aren't any radio-tagged Canadian owls to listen for this fall, but the University of Arizona is asking for ham help with 53 transmittered owls from eastern Washington state. If you live in the western USA and can receive 150 MHz signals, you could help. Your scanner or extended-range hand-held ham radio transceiver, plus an outside antenna, are all you need to join in. If you have radio direction finding equipment for VHF, so much the better.

For all the frequencies and monitoring information, go to the usual place on the Web, www.homingin.com (HomingIn is one word.) If you aren't on the Web, send postal mail to my callbook address. Again, the Web site is homingin.com

Thanks in advance for your help. From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline

--

Once again, more information is in cyberspace at www.homingin.com. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that our survey how ham radio is being used by home schoolers is still taking place. If you are a home schooling parent or a student being home schooled, please send your thoughts on the subject by e-mail to newsline@arnewsline.org. We will keep the survey going for one more week.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Jim Damron N8TMW and I’m Jeff Clark K8JAC saying 73 and we thank you for listening.

Emergency Situation Report e-mail list for Pennsylvanians

PA-SitRep is a free, 100% non-commercial,
nonprofit, e-mail list and web site.

The PA-SitRep emergency traffic e-mail list is a
tool that will enable you to monitor and report on
major emergency situations throughout the State
of Pennsylvania including weather emergencies,
natural disasters, environmental disasters, civil
disturbances and threats of terrorism, major fires,
and manhunts.

Subscribers are encouraged to utilize their home,
work and cell phone e-mail addresses for receiving
messages from the PA-SitRep e-mail list.

Because messages posted to the list are limitted to
situation reports of MAJOR emergency situations
within the State of PA, message volume on
PA-SitRep is EXTREMELY low.

PA-SitRep is also building a list of PA-SitRep
Contacts, most of whom (25 so far) are Amateur Radio
Operators (http://www.pa-sitrep.com/contact.htm).

PA-SitRep Contacts monitor our higher volume
SitRep/Discussion mail list and post situation
reports ot the discussion list and to the main list.
PA-SitRep Contacts also submit their contact info
for our site and may be contacted for a first
hand situation report should an emergency
situation arise in their area.

Please visit the site to learn more:

http://www.pa-sitrep.com/pasitrep.htm

Thanks. We'll look forward to your participation.

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder

Thanks for looking. I am looking for a manual, schematic or any other info on my Harris (RF Communications) RE 6001 mobile repeater. The boards inside the unit were made by Public Systems of Sunnyvale California. From the code dates on the components it looks to be made in 1977-1978 time frame. It is also currently on 153.83 Mhz. I would like to recycle the receiver and transmitter boards for another purpose.

Message-ID: <e4pspughtl281f7tbq7eqhdeuq7kdi4f6r@4ax.com>
Source record: 72802

Hello fellow hams. Please help me solve this problem...subject says
it all. 20M appears to be the only band I'm having a problem on...
If I leave my stereo on, forget it... I blast myself out of the truck
with the interference. With the stereo off, I still hear my audio
over the speaker system (very heavily distorted).

Ultimately, I want to leave my stereo on, because I run the radio
output into a casette/adapter to play the radio output across my
stereo. As I said, this works great on all bands except 20M

Setup:
Ford F-250 diesel (no ignition noise--SWEET! ;-)
Icom IC-706, barefoot, 100W
SGC SG-230 Coupler
SGC SG-303 Antenna

Radio is wired to the battery directly...

Thanks,
Rich Seifert, KB2ZMF, Co Springs

Hi Brian,

As a working professional metallurgical engineer in the USA, there are many sources of aluminum tubing available at metal warehouses in the USA. After a quick scan using google, I found that Future Metals (www.futuremetals.com/pages/branches/htm) has a UK warehouse in Hampshire. I don't know where Hampshire is relative to your QTH, but they probably have what you need. Beyond metal warehouses, try suppliers of aircraft materials or aircraft salvage yards for aluminum tubing. Metal warehouses will usually sell small amounts (i.e., a couple of meters), but the cost and cutting charge may be dear.

In the USA, suppliers ink stamp their tubing with an ASTM spec number, and in the UK they probably do the same for the appropriate British Standard. Try to get tubing of the 6061 grade in the T6 or T651 heat treatments (6061 T6 or 6061 T651 Marking) since this alloy is easy to machine, highly corrosion resistant unless it's underwater in the North Sea, easy to weld, relatively strong, and generally available.

By the way, what's B&Q? In the USA, we add another B (i.e., BBQ) and eat it as chicken, pork or beef.

Regards,

Les Kramer,

WA3SGZ

The audio amp stages of the receiver must remain on even if the rest is switched off. You are probably getting into it on one band due to resonances somewhere in the audio system.

You could try putting ferrit beads on all the lines going in/out of the entertainment radio in question. Or work out a way to shut off the audio stages when you shut down the radio also.

I have an American beam with a broken boom. For us on the continent it is impossible to get alu.tubing in inches. As everything else is a bit old fashioned in UK, perhaps you even still have tubes in inches so I dont need to get it from USA ???
What say, fellows ?

While tubing (and wood) is not sold in inches in the UK any more (thanks to those bloody Europeans making it illegal to use non-metric measure in EU states) it is still available, it's just labelled in the metric measure. So inch square tubing is 25mm (nom). The (nom) after the 25mm is for nominal, and allows for the difference between 25mm and one inch. It's a bit hit and miss though. I bought three lengths of inch square aluminium tube for an antenna project and found a pronounced difference in the size of one (bought from another supplier) to the other two.

Metric equivalents of imperial measures are only readily available for those things that were "standard" imperial measures, like 4" water pipe, 2"x4" wood joists etc. Unfortunately these old standards are slowly being eroded in favour of close metric ones. For most imperial measurement, the nearest metric size will usually do the job OK, the difference in size will be less than the usual tolerances accepted in hand measuring and cutting.

3966. The Tragedy of Usenet Commons

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-05 14:54:10 UTC
From: "Paul W. Schleck" <pschleck@novia.net>
Message-ID: <3d9efc66$0$98813$45beb828@newscene.com>
Source record: 72809

The following was just posted to comp.dcom.telecom (aka "Telecom Digest). I believe much of what is discussed below is apropos to this newsgroup. It has been clear from as far back as 1998 that there is a need to have a moderated discussion newsgroup for amateur radio (to supplement the existing moderated, bulletin-only newsgroup rec.radio.info). What has always bogged down such a plan in the past is the availability of a half-dozen or so committed people to work through the Request For Discussion and Call For Votes (RFD/CFV) process, as well as set up and run the necessary moderation policies and software. I can certainly volunteer, but I don't want to do it all myself.

Several moderation models are available, including traditional (manually review all posts), self-moderated (first-time posts are filtered out, and responded with a group FAQ and instructions how to register), or a hybrid of the two (automatically approve most material, but reserve the right to filter out inappropriate threads and users). The third option would appear to be best, and most tractable for this forum and potential moderators. Making a rec.radio.amateur.moderated newsgroup avoids the problem of having to convert every existing rec.radio.amateur.* newsgroup to moderated (as just as soon as rec.radio.amateur.misc is moderated, the cockroaches will descend on the other 9 rec.radio.amateur.* newsgroups, just as they descended on rec.radio.amateur.misc when Riley Hollingsworth ran them off the bands). Some will insist, and justifiably so, that some of the special-topic newsgroups that started out as unmoderated, and haven't had as many problems, should continue to be unmoderated.

If there is any interest in undertaking such a project, please contact me at my E-mail address below. Only those with a sincere interest in volunteering as a moderator should contact me at this time.

Common Tragedy

[whitespace] Ilustration
Ilustration by Kevin Banks

Will privatization of the Net spell the end of its gritty common ground?

By Thor Iverson

'ENOUGH," I said to myself. "This is a huge waste of time." I had just spent 15 fruitless minutes on the Usenet newsgroup alt.food.wine and had found absolutely nothing of value. The newsgroup's 150 new messages were a collection of off-topic spam, posts from a psychologically imbalanced individual pretending to represent a winery, and flame wars over that individual. It had been that way for several weeks, and there was no end in sight. Worse, the newsgroup's most informative posters had apparently gone into hiding. I wondered where they had gone and queried one by email.

"We're all on the WLDG--the Wine Lovers' Discussion Group," he said. "Spam-free, 100-percent intelligent wine discussion. Why not join us? The URL is ..."

I checked it out and was instantly hooked. Sure, it was a web-based bulletin board, but I soon found out that among the wine lovers populating the group were several programmers who kept the board running smoothly, avoiding such forums' usual speed problems. And the discussion was superior to anything I'd found on Usenet. The obvious cause seemed to be the board's semi-moderated quality (obnoxious behavior was punishable by banishment at the site owner's discretion), but that proved to be a misread on my part. Faced with the prospect of going back to the free-for-all on alt.food.wine, members policed themselves; potential flame wars were quashed by

public and private messages asking the participants to cool it. A self-imposed atmosphere of civility prevailed, and there was constant, high-quality discussion. I had found my Net oasis.

There's a concept in the physical world known as the "tragedy of the commons." Build a useful public space, and people will come. But the more people use it, the more the value of the space is degraded, until it ultimately fails to fulfill the purpose for which it was created. Thus, success leads inevitably to failure.

The Net is proof that this concept is fully translatable to the digital sphere. A victim of its own incredible success, the Net has seen its once manageable common space glutted with information both relevant and nonsensical. Content fights a losing battle with spam. Flame wars rage unabated on every mailing list, newsgroup, bulletin board and chat room. And each new user unwittingly adds to the problem.

In response, longtime netizens have battled to preserve their "public spaces." Guidelines and rules of conduct--"netiquette"--are a standard part of every access provider's and online service's terms of use. Anti-spam measures, both open and covert, are constantly in use on Usenet newsgroups. And the owners of proprietary chat rooms and websites featuring discussion areas have grown increasingly intolerant of off-topic content and abusive users.

But the Net's decentralized nature, an essential part of its design and one of its most positive features, has--ironically--made this sort of control nearly impossible. The Net is designed to work around information filters, but the design is "dumb"; it doesn't distinguish between useful and useless information. Faced with the degradation of the Net's commons, users have retreated to private spaces--moderated newsgroups, private (sometimes invitation-only) mailing lists and highly moderated web discussion groups. The future of discourse on the Net seems destined to be anything but the freewheeling, open exchange of public ideas it was envisioned to be.

'ENOUGH," J. Michael Straczynski said. "I can't participate in this anymore." The newsgroup rec.arts.sf.tv.babylon5 had long served a dual purpose as a discussion area for fans and a forum for those fans to talk with Babylon 5 creator/producer/writer Straczynski about the show, television production and anything else that engaged their common interest.

But something had gone wrong. A few malcontents had, justifiably or not, chosen to voice their disagreements with Straczynski frequently and publicly. The newsgroup became a battleground, pitting Straczynski and his supporters against the anti-Straczynski crowd and their supporters. So Straczynski bowed out, saying that he didn't have time to respond to all the flame wars and still produce his show.

The newsgroup held a virtual huddle and came up with a plan. The newsgroup as it existed would continue, but two new newsgroups would be created. The first, rec.arts.sf.tv.babylon5.info, would serve only one purpose: the dissemination of essential, official information about the show--air times, production news, merchandise announcements and posts from Straczynski. It would be closed to all posts except those from the few people who had volunteered to repost such information.

The second, rec.arts.sf.tv.babylon5.moderated, was slightly different. It looked a lot like the old newsgroup in terms of content and traffic. But there was an important change: all posts were subject to moderation by a committee. The committee didn't manually approve all posts prior to their appearance on the newsgroup, but since all traffic went through a central point that only the moderators could access, problem posts could be removed and problem users could be identified and filtered. This solved Straczynski's problem, and he returned to the newsgroup.

It didn't solve all the problems, however. The moderation committee was subject to a fairly hazy set of guidelines, which had been set out in the proposal for the creation of the newsgroup (a long and public procedure that most newsgroups must undergo before their appearance on Usenet). And it soon became fairly apparent that they were not filtering by a set of ironclad rules. Worse, posts questioning the moderation policy were themselves rejected as "off-topic." There seemed to be little recourse for the new set of malcontents. But, as the newsgroup functioned smoothly, there was also little protest.

'ENOUGH," said several people at once. "This is ridiculous." The rec.arts.startrek.* hierarchy was the outgrowth of one of the longest-running discussions on the Net, one that had started virtually simultaneously with the birth of the Internet itself. It had reached five newsgroups and was still growing, with as many as 100 posts per group per hour; there was no way any human being could keep up with it all and still hold a job or attend classes. Nor was the level of discussion particularly illuminating. "Voyager sucks" vs. "Voyager rules" was a not uncommon exchange.

A few newsgroup veterans bemoaned the problem and took action. From that action was born an invitation-only mailing list for a few select Trek fans, those with a proven ability to post intelligent and on-topic material. The number of participants was small at first, growing slowly until it reached about 20. The tenor of the discussion was polite and the level of insight high, and the needs of the participants to discuss Trek were met for a long while.

But the discussion slowly and inexorably waned. One culprit was the declining quality of the product under discussion; few of the participants were able to tolerate the inanity of Voyager, so they focused their interest on other, non-Trek pursuits. But there was also another, more insidious problem. For a time, the members of the

private mailing list kept up a low-key participation in the various Trek newsgroups, which led to new contacts and new members. But that eventually ended as well, and the mailing list stagnated. Everyone on the list knew everyone else's opinion on everything, and since there were no new members, there was nothing to fire new discussion. Meanwhile, low-quality discussion continued unabated on the newsgroups; those few who might have qualified for and enjoyed membership in the private list didn't hear about it because the members of that list weren't paying any attention.

[line]

RemarQ exec Bill Lee brings order to the chaos of the Usenet. And someday, he'd even like to build a nice community there

[line]

'ENOUGH," the post thundered. "Who gave you the right to stifle dissent? By what moral authority do you claim absolute power over the content of this mailing list?" It was the latest in a long series of public attacks against the list "owner" (the person charged with administering a mailing list) of Digital Graffiti, the longest-running and largest Led Zeppelin mailing list on the Net. The list had gone through times both good and bad, but its latest administrator had developed a distressing Napoleonic complex. A mild disagreement--hardly the first, or the most virulent, in the list's history--had escalated into a full-fledged flame war, and the list owner had taken sides, threatening to silence those who disagreed with him.

In response to this final attack, the discussion came to an abrupt end with an announcement from the administrator: "By the power vested in me as list owner. Come back when you've learned your lesson." The offending party was booted off the list. Anyone who protested the move was also expelled from the list. Soon, there was no discussion of Zeppelin at all; most of the vocal posters had been banished, and those who remained were too stunned to say anything. Arrogantly asserting that he had to "shepherd the flock," the list administrator unilaterally made the list a moderated one, rejecting and editing posts at his whim.

Of course, the abrupt change from an open list to a moderated one couldn't last long. The expelled members began plotting among themselves, including discontented but not-yet-expelled members of Digital Graffiti in their discussions. Choices were considered, and finally a new mailing list was created as an alternative to the old one. This mailing list, however, had a mission: There was a written and voted-upon charter, a rotating committee entrusted with enforcing that charter and many safeguards against a possible power play by one of those committee members. The list was not moderated, nor was much prohibited by the charter, but membership required a voluntary agreement to abide by the fairly simple rules of the list.

Drawn by the promise of an unmoderated forum that nevertheless had the teeth to deal with severe problems, people migrated in droves to the new list. Eventually, Digital Graffiti ceased to exist, with the administrator still claiming that his "recalcitrant children" were merely misguided.

THE RETREAT of the digerati to mailing lists is ironic, since email is one of the Internet's oldest and most primitive technologies. The promise of Usenet (and ever-more-sophisticated news-filtering technologies to make it manageable)--and, later, of the web and proprietary services' chat technology--made it seem as though simple mail reflectors and text-based communication were headed the way of UHF and the telegraph.

Yet the situation also makes sense. The Net's "tragedy of the commons" is certainly a result of exploding growth, but it is also partially the fault of a technology that enabled before it could control, that allowed before it could limit. Control and limitations are not always required (or desired), but their technologically enforced absence is not always desirable either. People will eventually make their way back to the World Wide Web and Usenet (and whatever is yet to come), but it will not be until technology allows more control over those media.

Of course, control is a two-edged sword. Personal control over content--Usenet's kill files, email filters--is the Holy Grail of moderation technology. Computers are not yet smart enough to allow complete self-moderation, which is where so-called censorware comes in. Programs like NetNanny and systems like AdultCheck are useful for those attempting to exercise some control over the wide-open content of the Net, but they rely on others' decisions about what content is and is not appropriate. And there's still no reliable way to filter information that is simply stupid or uninteresting without resorting to moderation (which carries its own risks, as the previous examples demonstrate).

The most chilling danger is that the flight to private mailing lists, moderated newsgroups and closed websites will exclude those not lucky enough to get in on the ground floor. The Net's public spaces are powerful because they are public, allowing anyone a chance to step up on a soapbox and contribute. But when a forum's best and brightest take their act elsewhere, the original forum's usefulness is greatly diminished. Worse yet, private or moderated forums have a way of becoming closed systems, invisible to anyone not present at their creation and impossible to get into once the creators have left the public forum behind. A new user searching for intelligent discussion of Star Trek on the Net might never find it, simply because he or she doesn't know where to look or whom to ask.

So what's the solution? Taking it as a given that the influx of people to the Net will not level off anytime soon, the answer must be found somewhere other than the subdivision of the Net into partitioned, private, proprietary fortresses of users and content.

Somehow, a way must be found to reverse the tragedy of the commons, to make the Net's public spaces more useful despite the number of people who use them. The answer, then, lies in technology and its applications.

There have been tentative steps in this direction already. Some privately owned forums have given up control to democratically chosen administrators following written guidelines, proving that mailing lists and web discussion groups don't have to succumb to their subscribers. Moderated and limited-content newsgroups (usually those with .moderated or .info at the end of their names) are successful under the same conditions, especially when paired with unmoderated forums that allow completely free discourse to continue. And ever-more-sophisticated filtering technologies, especially those based on software agents, can help separate the digital wheat from the virtual chaff in everything from email to the web. Community-based content selection, in which people rely on one another to sort out the vagaries of the Net (also known as collaborative filtering), is also a promising technology being tried on Usenet and the web.

In the end, the Net's survival as a public medium--rather than a privately held, privately controlled one--depends on the success of these technologies. Net users were able to rise up and help defeat the Communications Decency Act in the same way they collectively were able to create and organize Usenet many years earlier: they worked together for a common cause. With all those people off in their own private domains, the misbegotten offspring of the CDA (or something worse) might arrive and cripple the Net without anyone's even noticing. And that would be a tragedy.

If any of you computer wizz kids actualy knew anything you would note that anyone that is infected by this bugbear will send out anything it decides to.

Yes I had the virus 3 days ago. It is long gone and I do have a working anti-virus program.

If you smart ones would simply insert at the beginning of your address book listing something that when it bounces back you would know you had a virus sneak in then you too could stop it.

Such as 123@thisisavirus.com should do the trick.

Then it wouldn't spread all over hells half acre because of jerks that don't know better.

I did. And I don't know why you JUST got a virus allegedly from ME. I am willing to bet if you follow the 'real' route and not all that fake jibberish in the headers you will find it came from YAHOO. And I have, and never have had an account with them.

Perhaps if you engaged brain before operating mouth you would have an inkling about how this virus works.

It may not even have come from me at all. In fact it probably didn't.

I even got a virus from myself at w4nti@yahoo.com Which I never had. SEE light bulb?

This is just for you Lloyd.

Here are a few more comments you may want to take to heart.

>
****

> Put this entry into your e-mail program's address book.
> Display Name = *virus_trap
> E-mail address = <illegaladdressxyz
>
> Be sure to include the '*' and the '<'. This new entry should show up at
> the top of the list. If an outgoing e-mail message (as created by a virus
> or worm) happens to include this entry, then it will cause an error and
the
> message won't be sent.

==========

Can't see how the above will work. No virus would be stupid enough to
include that entry.

Or have I missed something ?

Reg.

****
Reg,
That entry in your address book will stop most
virus programs that use your address book to resend
it's self. That entry, or one simular to it, will
cause your email program to stop for an error, then
notify you that there's a problem. It's still up to
you to 'cure' the problem by running an anti-virus
program or whatever. All the entry does is prevent a
virus from sending email. You still have the virus.

>Right on.

So let's nail the principle culprit - Windows in whatever form and design dominated by marketing.

The local (Seattle) paper's business section continues to announce new major security breaches in MS client and server software. Warnings have come twice-a-week average for some time now, and weekly for a year before that.

MS has had major problems with their Passport service revealing personal data to simple attacks. MS has also lost its third party designer base to Java or other languages run on Linux. Microsoft's .NET has failed to attract designers who perceive numerous security issues.

Chairman Bill pronounced a war on insecure design about a year ago. Skip forward that same year: low and behold they have a trade show of their PC of the future (about 5 years away) which reportedly lacks security features. The artwork shown in the paper features the glazed expression of the owner sitting about 2 foot back from a 2' X 4' display curved like a windshield (actually quite radical, about 60°). The subtle implication is that the office cubicle will soon shrink to the size of a desktop holodeck.

I once recall an incident in installing Windows 3. I had already been a part of the their beta test, so I knew my system was up to the install. Such smug hubris is inevitably cracked by Microsoft and as testimony, the installation refused to acknowledge my mouse existed. It's always the low tech problems that cripple you. Stumped by this obstacle, I called MS support and we spent an hour re-installing Windows to arrive at the same report: Mouse does not exist. The tech asked what kind of mouse I was using. I replied a Microsoft Mouse. Bingo! The tech dryly reported that Windows did not support my mouse - and he was right.

Nope, it isn't you, Dan. It came from someone who had you in their address book. That is the bad thing about this virus. It makes it look like it is from a particular person, and can cause a lot of hard feelings.

And for allotherestaya, as long as you insist on using the "standard" email program, be prepared to constantly have to defend it against virii. That's just life, and there isn't a thing you can do about it.

Well.... you could just maybe..... change to a mail program that isn't so popular that the bad guys write for it. Heresy, I know! ;^)

It's not Dan's fault. The callbook server QRZ.com got hit
bypassed it's virus scanner. In the meantime it lifted a ton
of e-mail addresses from the server and now sending itself
to everyones address book

For a fix tool (free) go to www.symantec.com

Or you could be running Zone Alarm Firewall and not have the virus
get onto the internet at all, since Zone Alarm blocks the "programs"
access to the internet in the first place.

Yup, that's true. I'm running Zonealarm and a personal proxy server also.
Between that and my refusal to use MS software unless I have to, it
keeps things pretty clean.

Everyone should have Zonealarm.

3991. Free Energy Concentrator

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-06 17:06:57 UTC
From: thomas@asan.com
Message-ID: <2f23ccae.0210060906.8f9ff3c@posting.google.com>
Source record: 72834

Hi,
Has anyone built the Free Energy Concentrator in the Oct. 1999 QST by KB6FPW? What were your experiences?

It is a devie that generates a current from AM broadcast radio transmissions. The article talks about the concentrator developing 2.5w of power when within about 1 mile of a broadcast antenna. It would be nice to pack one along for some extra current/light in the field not to mention the home QTH in NYC surrounded by broadcasters in every band/mode. Additionally a lot of the mountain top/high points I visit seem to have plenty of commerical transmitters near/on them.

Does anyone know of any other type of similar circuit? Perhaps one to milk the FM or WFM broadcast frequencies?

Thanks,
Thomas, N2YTF

Dummy Dan better look before he preaches. Bugbear is a mass-mailing worm
that, once it infects a target system, can log keystrokes, enable a backdoor
trojan, and stop antivirus and firewall programs. It replicates itself by
sending out e-mail to addresses harvested from infected systems using
subject lines such as the following:

A Bugbear removal tool can be obtained from Symantec's web site.
For Dan's followers I should explain that Symantec is Norton. You know,
Norton, the distributor of a fine virus protection program? I didn't include
the URL cuz I figured "Dub Fore En Tee Ah" kin give it to ya'all.

Clearly, with bugbear forging the From line of the email by combining two other addresses, Dan's notion of a bogus address book entry probably won't cause any bounces to your own mailbox at all. They will bounce to the the invalid address instead, and you'll never know the forged email went out. Bugbear uses its own email engine in an attempt to avoid detection by the owner of the machine, so looking at your log files won't work either.
The worm opens a port on the victim machine - port 36794 TCP and searches for
various running processes, stopping them if found. The list of processes includes
many popular AV and personal firewall products.

This remote access server allows an attacker to upload, and download files, run executes, and terminate processes.

It drops a DLL on the victim machine - keylogger related.
This DLL is detected as PWS-Hooker.dll
The worm copies itself to the Startup folder on the victim machine as
***.EXE
(where * represents random character), for example:

Win98 : C:\WINDOWS\Start Menu\Programs\Startup\CUK.EXE
2k Pro : C:\Documents and Settings\(username)\Start Menu\Programs\Startup\CYC.EXE

I included the above for you "blocks of concrete" such as blockhead Dan who just cain't take
no more criticism.
Hey Dan. Better run outside. I think Dimmy just tipped your Porta-Potty over and y'all know what that
does to the grass!!!!!

a suggestion......

It may be a good idea to put Moundsville
Regional Library wise to any alleged abuse of
their services. (hint) It is my knowledge that, in general,
taxpayer funded public libraries take a VERY DIM
VIEW of their infrastructure and services being used for
less-than-noble activities. Often the same will
advise law enforcement in an investigation of
the same...(hint hint) :) :) :) :) :)

Just a general suggestion.
Standard procedures which
applies to just about any public
taxpayer funded library.

HOW can DXCC be "free" if you have to join into an exclusive club within a fraternal org that requests a donation of " ($5,000 - $9,999 donation annually)"

then again....they do say there's one born every minute......

Blasphemy and 10-4!

Jim, if it weren't for DXCC, folks would have to go for some other
magazines DX awards. Even little newspaper print "World Radio" has a
DX award.

> Come on, Mikey. You stand corrected, now admit it.
> You too, Danny Boy.

Bugbear spoofs email addresses. If you don't believe me, check:

http://www.pcmag.com/article2/0,4149,590320,00.asp

If you don't believe them, go to:

http://securityresponse.symantec.com/avcenter/venc/data/w32.bugbear@mm.html

It's all there, but if you just want to read the relevant part:

Quote from page... It then uses its own SMTP engine to send itself to
all email addresses that it finds. The worm also can construct addresses
for the "From:" field using information that it harvests from the
infected computer. For example, the worm may find the addresses a@a.com,
b@b.com and c@c.com. The worm could create an email message addressed to
a@a.com and spoof the "From:" address, so that it appears to come from
c@b.com. The spoofed address can also be a valid email address that the
worm finds on the system.

Amateur Radio Newsline™ Report 1312 – October 4, 2002

Amateur Radio Newsline report number 1312 with a release date of Friday, October 4th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new world-wide threat to ham radio on 70 centimeters tops this weeks Amateur Radio Newsline report number 1312 coming your way right now.

(Billboard Cart Here)

**

RADIO REGULATIONS: A WORLDWIDE CHALLENGE TO 70 CM

If you operate on 70 centimeters anyplace in the world, listen up. Your future access to that band is in peril. Q-News Graham Kemp, VK4BB, has the details on how a proposed satellite system could run hams off of the band:

--
It has come to the attention of the South African Radio League, SARL that the threat to the 70-cm band -- world wide -- is once again very real. The SARL has just received a discussion paper which will be tabled at the World Radio Conference next year -- WRC-03 -- which directly targets the portion of 432 to 438 MHz for exclusive use by the planned Earth Exploration Satellite Service or EESS, due to be launched soon.

If this proposal is carried at the World Radio Conference next year it, will see this portion of spectrum allocated on a worldwide basis and this spells the death knell of all 70-cm ham radio operation.

The section of the proposal and the motivation is as follows: Agenda Item 1.38: '...to consider provision of up to 6 MHz of frequency spectrum to the Earth exploration-satellite service active in the frequency band 420-470 MHz, in accordance with Resolution 727 that was revised at WRC-2000.
--

But why target the Amateur Radio allocation at 70 centimeters? The researchers who want it say its the only frequency that will work. Again, Q-News Graham Kemp, VK4BB:

--
According to the United Nations Conference on Environment and Development -- UNCED -- held in Rio de Janeiro in 1992, there is an urgent need for assessment and systematic observations of forest cover and rate of forest degradation in tropical and temperate regions. Active space borne sensors Synthetic Aperture Radars (SARs) are needed to enable the monitoring of forest biomass.

Systems operating on frequencies around 450 MHz can penetrate the canopy of forests, and have the capability to determine the ground-trunk interaction and are in the context of forest cover information of particular importance.

Systems operating at 1.3 GHz, or higher frequencies cannot penetrate the canopy. The spectrum around 450 MHz is also optimal for monitoring of continental ice and for monitoring of vegetation and soil surfaces for desert and tropical areas.
--

More on this story in future Amateur Radio Newsline reports. (Q-News, SARL, ARNewsline™)

**

HAM POLITICS: HAM-CONGRESSMAN APPOINTED TO KEY HOUSE SUBCOMMITTEE

Back here in the U-S-A the ARRL Letter reports that Oregon Republican Congressman Greg Walden, WB7OCE, has been appointed to fill a vacancy on the House Subcommittee on Telecommunications and the Internet. Walden is one of only two amateurs in the U-S House of Representatives, and his appointment to the key House panel dealing with communications matters is considered good news for the ham radio community. Walden's selection was announced by Republican House Energy and Commerce Committee Chairman Billy Tauzin of Louisiana. (ARRL)

**

RADIO LAW: CONGRESS MANDATES DIGITAL ANTI-PIRACY

Meantime, congressional lawmakers have ordered the Federal Communications Commission to mandate technology preventing digital TV signals from being hooked up to the Internet and made vulnerable to piracy. The directive is viewed as a major victory for Hollywood film makers and other copyright owners at a time when the music business is being ravaged by Internet piracy. (Published news reports)

**

RADIO LAW: FEDERAL COURT RULES IN RF BRAIN CANCER CASE

A Federal District Court has dismissed an RF related mobile telephone brain cancer suit. According to the C-G-C Communicator, the court ruled that the plaintiffs had not provided any reliable and relevant scientific evidence to prove their case. The complete finding can be found in cyberspace at http://www.mdd.uscourts.gov/Opinions152/Opinions/newman0902.pdf (CGC Communicator)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the KA5GLX repeater serving Clear Lake Texas.

(5 sec pause here)

**

RESCUE RADIO: HAM RADIO READY FOR HURRICANE LILI

Following quickly in the wake of Hurricane Isidore, a Category 2 storm named Lili made its way across western Cuba and then took aim at the U-S Gulf Coast shoreline. Amateur Radio Newsline's Don Wilbanks, KC5MFA, has more from New Orleans:
--

According to an ARRL Bulletin, the Hurricane Watch Net and W4EHW at the National Hurricane Center in Miami are again gathering ground-level reports using ham radio for communications into and out of the affected areas.

The Hurricane Watch Net is currently activated on 14.325 MHz with traffic coming in from numerous stations. Meantime W4EHW continues to exchange meteorological data and Spanish advisories with Cuban amateurs. Many of the reports received via ham radio have proven to be valuable to forecasters at the National Hurricane Center.

Right now all eyes are on Lili as she makes her way toward the U-S mainland. On Wednesday October 2nd the FCC declared a communications emergency as Lili approached the Louisiana and Texas shoreline. As we go to air, all hams not directly involved in hurricane related emergency communications are required to avoid using 7.285 MHz daytime and 3.873 MHz from sundown to sun up. These frequencies are protected plus or minus 3 kHz. The FCC declaration will remain in effect until rescinded and could be in effect for as long as two weeks.

Monitoring the storm and ham radio traffic from one of Lili's probable targets near New Orleans, I'm Don Wilbanks, KC5MFA, reporting.
--

Official advisories on Lili and other tropical storms can be found at the National Hurricane Web site. Its in cyberspace at www.nhc.noaa.gov. Late breaking ham radio operational advisories are at www.arrl.org. (ARRL, others)

**

SPACE AND SCIENCE: HURRICANE LILI CAUSES SHUTTLE LAUNCH DELAY

And a potential threat from Hurricane Lili to the Mission Control Center at Johnson Space Center in Houston has forced a delay in the launch of the STS-112 shuttle mission. Atlantis and its six member crew are now slated to lift off no earlier than 1800 to 2200 GMT on Monday October 7th. Once on-orbit, Atlantis will deliver the S-1 Truss to the International Space Station. The crew will perform three spacewalks at the station and will transfer supplies and equipment between the two vehicles. (NASA)

**

RESCUE RADIO: VK HAMS THERE AS PHONES GO OUT

Amateur Radio has come to the rescue after the town of Bindoon in Western Australia was isolated by communications failure.

For reasons yet to be explained, the failure of the phone system on Sunday September 22nd was total. Both mobile and fixed services went dead. No calls were possible.

A ham radio knight in shining armor in the form of VK6HGM rode to the rescue. Actually he drove to a hilltop and used the Roleystone repeater on 146.700 MHz in the hills above the city of Perth to report the telephone outage. This of itself is quite a feat, as both Bindoon and Roleystone are in the Darling Mountain Range and are out of line-of-sight from one another.

Be that as it may, the call for assistance was answered by VK6AX. He had telephone service and used it to alert the authorities and brought about a happy end to the story. Within half an hour, all telephone services in Bindoon were back on line.

**

ENFORCEMENT: NET UNDER FCC SCRUTINY

Turning to news from the FCC, word that the agency is taking a close look at a 20 meter net and its control operator. The FCC's Daryl Duckworth, NN0W, explains:

--
"The Enforcement Bureau has opened an inquirey into the Mobile Emergency and County Hunters Net operating on 14.336 Mhz. We have requested that James Grandinetti, who uses the call signs KZ2P and K2JG to respond to seven complaints about the operation of the net. The Enforcement Bureau also requested documentation supporting the club call sign of K2JG which is assigned to the Atlantic Amateur Association."
--

The FCC's letter to Grandinetti alleges that he harassed certain operators and banned other hams from using 14.336 MHz while he was operating as a net control station. The letter told Grandinetti that the frequency 14.336 MHz is a shared amateur frequency. As such, the operation of a net on that frequency conveys no greater rights regarding its use by Grandinetti than any other licensed radio amateur. Grandinetti was given the customary 30 days to reply.

**

ENFORCEMENT: PRIVILEGES REINSTATED

And still in the enforcement arena, some good news for a Martinsville Virginia ham. Again, the FCC's Daryl Duckworth, N-N-Zero-W:
--
"We notified Theodore Crutchfield, K4TFC, that since he has taken and passed an Element 1 code test as requested, his license remains Extra class and that he is in good standing."
--

By way of background, back on December 20, 2001, the FCC had notified Crutchfield that it was requiring him to re-take Amateur Element 1 under the supervision of the W4VEC Volunteer Examination Coordinator. This, on or before February 15th of this year. Crutchfield appeared for the exam session but did

not pass. As a result, he was notified on July 16th that the Wireless Telecommunications Bureau would downgrade his license from Extra to Technician Class. A few days later on July 21st, Crutchfield successfully completed an Element I examination in Roanoke, Virginia. Now, as Daryl Duckworth put it, Crutchfield remains Extra Class and his license is in good standing with the FCC.

**

RADIO ACCIDENTS: HAM INJURED IN TOWER ACCIDENT

A Michigan ham has been seriously hurt in a tower fall. According to an Internet report from Allen Stap, N8OKU , the accident involved the removal of a 160 foot tower.

Stap says that the top 120 feet was removed without incident. Daylight ran out so removal of the remaining 40 feet was deferred to the following morning. On inspection, the last 40 feet appeared to be safe and the removal work began. But the base of the tower broke apart and the tower fell with the ham on board. It landed on a polebarn with the ham crushed between the tower and the roof.

The accident happened near the town of Lawton. The ham involved was not identified by full name or call sign but was described as a long time and experienced tower climber. His injuries included a broken jaw, two broken arms and a broken leg. The good news is that he is expected to make a full recovery after extensive rehabilitation.

**

RADIO ACCIDENTS: NEBRASKA TOWER COLLAPSE KILLS TWO

And a 1,965-foot television tower collapsed Tuesday September 24th in a western Nebraska field. Two workers were killed and three others were injured.

The tower was located near the town of Hemingford. A spokesman for its owner, Duhamel Broadcasting Enterprises of Rapid City, South Dakota, said two of the workers were repairing the roof of the near-by transmission building. The others were strengthening the tower so it could be equipped with high-definition television antennas.

The structure was built in the late 1960’s and was used to transmit the signal for Scottsbluff television station KDUH throughout most of the states panhandle area. It and was the tallest structure in Nebraska, and was some 500 feet taller than the Sears Tower in Chicago and 700 feet higher than the Empire State Building in New York. The cause of its collapse is not yet known. (K0NEB)

**

OPERATING EVENTS: ARRL DEVELOPING JOTA DATABASE

Jean Wolfgang, WB3IOS, of the ARRL Field and Educational Services Department writes to say that the League has set up a first ever scouting Jamboree On The Air event database. It comes as the result of requests to Jean from scouting

groups looking for hams who plan to offer their services to the event. You can register your JOTA event by taking your browser to the rather complex U-R-L you will find on the web at http://www.arrl.org/FandES/ead/jota.html. T his years Jamboree On The Air takes place October 19th and 20th, local time. (ARRL)

**

OPERATING EVENTS: SHIPS ON THE AIR

The USS Cassin Young, a museum ship in Boston on a turn around cruise will operate an Amateur Radio station from her radio room during the voyage on Saturday, October 12th. Operators will pass commemorative US Naval style messages between that ship and the USS Salem. The Salem is another museum ship berthed in Quincy Massachusetts. Operation will be on 20 and 40 meters. For a commemorative certificate send an SASE and a copy of the message you hear to Bob Callahan, W1QWT, 56 Acorn Street, Scituate, Massachusetts 02166. And less we forget, of the two ships involved the USS Cassin Young is a Destroyer and the USS Salem is a heavy cruiser. (W1QWT)

EMERGING TECHNOLOGY: THE SCIENCE REPORT

Two interesting items from this weeks science page. Here are Jim Damron, N8TMW and Jeff Clark, K8JAC.

--
EMERGING TECHNOLOGY: TECHNO-JUNK PILING UP

A new study called Waste in the Wireless World: The Challenge of Cell Phones says that 130 million wireless devices will be discarded annually in the United States. This equals 65,000 tons of two-way radio garbage.

The study makes several recommendations regarding both the design of cell phones and the disposal of them. It says that the use of toxic substances in them be reduced. It also suggests that device standardization be implemented so users are not forced to purchase new phones when they change service providers or for travel. Finally, the study says that cellular telephones should be

designed for disassembly, reuse and recycling.

It should be noted that the study was limited to cellular phones and other two way radio devices. It does not include the tons of VCR’s and TV sets that are disposed of each year. (Supplied by several ARNewsline(tm) listeners)

**

EMERGING TECHNOLOGY: BARCODES CAN SAVE LIVES

You know those bar codes that grocery workers scan to let you know how much your cereal costs? Well, hospitals are now using the same technology to help save lives, thanks to a computerized medication system. A nurse scans the bar code on a patient's I-D bracelet, along with a bar code found on the medication itself before administering the drug. This enables the computer to verifies and checks the bar codes to make sure the patient is getting the correct medication. A green signal tells the nurse it's okay to precede. An error warning, and red signal, alerts the nurse if something's not right.

To date, only about two percent of the nation's medical facilities use bar code technology to verify medication administration, but that number is expected to rise. Statistics show the system prevents anywhere from 84 to 264 potential errors a week at one hospital alone. (Science Today)
--

More emerging technology news, next week.

**

SPACE AND SCIENCE: JAPAN DELAY COMPLETION OF ISS MODULE

Completion of the international space station hit another snag. This as Japan's cash-strapped space program announces that it would delay launch of the bus-sized research module it is building for the project.

The research capsule called Kibo is the only part of the space station developed and run by an Asian country. It was scheduled for launch sometime in 2004. Liftoff of that module is now planned for April 2005 at the earliest. (Published reports)

**

INTERNATIONAL - GERMANY: DDH47 CELEBRATES 50 YEARS OF SERVICE
November 8th and 9th will see a special station on the air from Pinneberg Germany. This as Weather Service's station DDH47 will be operating crossband on 147 kHz and listening on 80, 40 and 20 meters CW to celebrate its 50th anniversary of the service. Slow speed Morse transmissions to North America are also planned. (G4NJH)

**

INTERNATIONAL: FIRST UK TO VE CONTACT

Sunday, September 22nd marked the 84th anniversary of the first radio message from the United Kingdom being received in Australia. On the 22nd of September

1918, a message of goodwill was sent in Morse code from the Marconi station located near Caernarfon. The callsign was M-U-U, and the 200-kilowatt transmitter was on 21 kHz, a wavelength of 14,300 meters. The signal was received at
Wahroonga near Sydney by Sir Ernest Fisk, an Englishman who had served under Marconi in England. The message of goodwill was published the following day on the front pages of the Australian morning newspapers. (GB2RS)

**

DX

In DX, word of the first 6 Meter contact from Afghanistan. Nick Peckett, G4KUX, writes that he made what he says is the first-ever contact on 6 metes from Kabul at 15:15 UTC on Tuesday
the 24th of September. Peckett, operating as YA4F, contacted YF1OO in Indonesia. G4KUX says that he hopes to be able to give many others their first opportunity to contact Afghanistan on 6 meters over the next few weeks. (GB2RS)

And lower in frequency, TM4ENN is a special event station in France to commemorate the 60th anniversary of the creation of the 'Normandy Niemen' air flotilla by General de Gaulle. It will be active on 40, 20, 15 and 10 meters internationally. QSL direct with an stamped and self addressed envelope to F6BZH, or via the bureau. (GB2RS)

**

THAT FINAL ITEM: BY-BY BETAMAX

And finally this week, a legend is being put to rest. After twenty-seven years in production Sony Corporation says that it will finally put its famed Betamax tape format to bed forever. Our producer Bill Pasternak, WA6ITF, takes a nostalgic look back:

--
Its said that Betamax opened the world of home video as the first practical consumer format. Sony, J-V-C and Panasonic first tried with the famed 3/4 inch U-Matic machines, but consumers were reluctant to buy a videotape machine that was bigger than most T-V sets of that era and looked more at home in a television station than their livingroom.

My own first home VCR was a Sony SL-7200 Betamax. It would record a whole hour of pretty high quality video and audio on a tape cassette that was only 3 1/2 by 6 inches in size. I paid almost $2000 for the machine and each cassette cost me close to $25. That was in the late 1970’s and despite loosing the 1980’s video format war to VHS, Betamax held on as a niche product all these years.

Now, according to Larry Bloomfield’s Tech Notes news service, Betamax for consumer use is being phased out. This is because of the new consumer digital tape formats like Mini D V that are literally delivering a death blow to Betamax’ future prospects.

Sony reportedly will manufacture only 2,000 more Betamax machines before discontinuing the product altogether. But Beta will live on in the world of television journalism. Thats where a spinoff tape format called Betacam with suffixes like S-X and S-P became the defacto news gathering videotape of choice and have remained so for the past decade and a half.

With an SL 7200 Betamax still sitting someplace out in the garage -- gathering dust -- I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.
--

And you thought that the Betamax died a quiet death many years ago!
(Tech-Notes, ARNewsline™)

4007. QRM ? No more QRM !?

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-07 17:19:28 UTC
From: lombryt@hotmail.com
Message-ID: <db35a0c.0210070919.70aa6ab6@posting.google.com>
Source record: 72750

Hi,

Using a 35m longwire (sloper), a mix of indoor/oudoors antenna, I experiment much QRM in my LX appartment, S5-7 or even above S9 on all HF bands.
I did several "measurements" using my TS570D RTX in a (trans)portable configuration - it is rather heavy with a mini dry battery but that works fine, Hi, - and I discovered what I suspected : the QRM I am experimenting is well located one floor up (generated by a air conditionner probably) and vanishes a few meters from the home.

As suggested a UK OM, I experiment well QRM not QRN, hopefully in a way.

Now what to do ? How can I suppress it from my radio ? How can I determine if they are direct waves, omnidirectional waves, or something else in order to know my "ennemy" ? Is there a way to determine that ?

NB. Correct me if necessary, but if this QRM is directional I could suppress it using devices like MFJ noise canceler and similar products that cancel QRM in phase opposition (using a second antenna as reference).
But if the QRM is omnidirectional there is no solution excepting moving away from the source.

Now that I know where does the QRM come from, in both cases is a dipole cut on specific bands be of some use to reduce such QRM in place of my longwire that capture all noises (if I well understood a multiband dipole catches less QRM than a vertical and of course than a longwire, so I hope such antenna could help me in solving my problem if I place it outside, in the opposite corner from the source noise, about 25m away) ? I think it is an utopic solution, do you confirm... (:-(()

What's your advice : the MFJ, a dipole, give up and go away from the QRM source... (a good idea to work during field days ! I pleasant but this is very frustrated)

Thanks for comments

73

WHAT??? You think as a USA ham for 52 years is going to donate five to ten grand to an organization that has done little for my hobby except dumb it down and trying now to eliminate CW so their off-shore advertisers can build cheaper radios that only operate FM or SSB? Not me Buddy, I wasn't born in England, you know!

Looks like it's time for some more
cooooooooooooorn seeeeeeeeeeeeeds!

w0ger was overheard singing his song on the HAM bands. What sounded like a canine in distress was in the background as well. Police later discovered a passed out Dalmation with a ruptured and bleeding rectum laying in the human feces strewn backyard of w0ger wUsswoman.

Observe:

Ay, yi yi yi!
My name is 'Cunt Yeast Wiseman'.

And yes, it is true
That my dick smells of poo
I have Keyboard Courage
But will run far from you...

Ay, yi yi yi!
I dream of sex with Joe Theisman.

I lame post and drool spittle
'Cuz my dick is so little
I'm gay with no life
and my Mom is my wife...

Ay, yi yi yi!
My Dad's name was 'John', and never 'Wiseman'.

There will be no more HAMfests
because of my breasts,

4012. Re: QRM ? No more QRM !?

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-07 22:28:56 UTC
From: Dan/W4NTI <w4nti@mindspringnospam.com>
Message-ID: <ant1qu$6ig$1@slb3.atl.mindspring.net>
Source record: 72755

How about telling your neighbor his machine is probably seriously defective
and will be shorting out soon ??

The MFJ may or may not work. It is probably generating hash via the air and
via the lines.

Only real solution would be to elliminate the source of the noise.

Dan/W4NTI

If that is what you believe, Walt, you might be getting most of your information from American TV. I might add that the only place on the earth I've ever been served luncheon meat sliced thinly enough to read a newspaper through it was in England.

stay away from me. but there are lots of gays and lesbos in PUT. they talk about paking fudge and fork'd tounges all the time. check out the romance screwing in a popup thred they have there now.

4017. Beta testers needed for tk7, new software for ICOM IC-Q7A

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-08 15:25:20 UTC
From: "Bob Parnass, AJ9S" <usenet1@parnass.org>
Message-ID: <3da2f900$0$1454$272ea4a1@news.execpc.com>
Source record: 72760
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment,rec.radio.scanner,alt.radio.scanner

tk7 is a new, open source software for the ICOM IC-Q7A
wide coverage walkie-talkie.

I wrote tk7 using the Tcl/Tk language
so it would work in Linux, MacOS X, BSD, UNIX, Windows (95 and later),
etc. I've used tk7 on Linux and Windows 98SE but want to confirm
that it works ok on Windows XP, Windows ME, Windows 95, and Windows 2000.

tk7 lets you:

(1) Read a memory image from the IC-Q7A walkie-talkie, from a native
tk7 file or from a Q7 file created using Goran Vlaski's
IC-Q7 Programming Utility for Windows.

(2) Display and edit settings from a memory image using a graphical
user interface, then write it back to the radio or save it
in a file.

(3) Import memory channel information from a .csv (comma-separated
file).

(4) Extract memory channel information from a memory image
and export it to a .csv (comma-separated values) file.

(5) Sort memory channels by frequencies within one or both banks.

This is an experimental version of tk7 and is
designed only for the USA version radio, though it may
work with other versions.

I need beta testers who own an IC-Q7 radio and interface cable
to test whether tk7 will read data from the radio, display
it correctly on the graphical user interface, and write data
back to the radio correctly.

You can learn about and freely download a beta test version of tk7
from my home page:

http://parnass.com

I don't warrant the software, though it will cost you nothing.
Thanks.

The only difference between the American and other cultures is that we not only openly admit that fact, we print it on t-shirts and sell them.

We must travel in different circles, heh heh. Our luncheon meat was
served in a very chilly house in Dorchester by a Canon Roberts.

> The USA, on the other hand, is the only country I know where more food

We have no need to demonstrate it to each other. Maybe you've just seen
the red carpet rolled out for those visitors who come from places where
the luncheon meat is thinner than the lettuce leaf. Our rationing ended
with VJ Day.

That's it! A little sawdust, a little pork fat, a dessicated pickle, some
salt, mustard and ketchup, a smiley-faced clown and a lot of hype. You now
have a high-profit, high-cholesterol Kiddie Meal.

4029. FS Mint Kenwood TS-711A 2 mt All Mode with Tone

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-09 15:33:00 UTC
From: Charles Hugg <chashugg@earthlink.net>
Message-ID: <M_Xo9.17998$IV3.1735695@newsread1.prod.itd.earthlink.net>
Source record: 72771

:
I have for sale a mint Kenwood TS-711A 2 Meter All Mode Transceiver. This one is as new. Used very little, not a mark on it. It runs 25 watts and has the hard to find CTCSS Tone Board installed so you can select any of the Repeater Access Tones. It also comes with the Kenwood MC-48B Mic with UP/Down Buttons and 16-Key DTMF Pad. This is a $70 option. Standard equipment on this transceiver include: dual VFOs, Digital Display,40 Memories, Variable RF Output from 2 to 25 Watts, IF Shift, and Build in AC Power Supply(Operation on 12 Volts is also possible). Everything works great, including the memory backup battery. I do not have the manual, but I believe these are available to download from the internet. Price is $495 plus shipping from 79602. Thanks, Charlie Hugg, K5MBX

4030. Icom IC-730 questions

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-09 15:38:36 UTC
From: Al <al210@Qhamster.foxhollow.ca>
Message-ID: <n7j8qu04oqkq3bs7rjrv17hc8av8nreiqq@4ax.com>
Source record: 72772
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

I recently brought out my old IC-730 and have a couple of questions,
if anyone can help.

1) The pre-amp relay is prone to failure. There is reference on
Icom's website to a factory modification. Apparently this mod puts a
small current through the contacts to keep them clean.
Can anyone provide me with details on this mod?

2) The memory operation seems strange. I have mis-placed my
operator's manual, but the service manual briefly states:

"WRITE: By pushing this button, A VFO's frequency is written into
memory, or one VFO's frequency is transferred to the other VFO."

"MEMORY: Push this switch when you wish to write a frequency into
memory, or to call a memorized frequency."

For me, using 20m as an example, pressing WRITE always puts 14098.5
into VFO, clearing whatever was in the VFO.
Pressing MEMORY just recalls 14098.5.

If anyone could describe or better still email me a scan of memory
operation from the operators manual it would be greatly appreciated.

73, Al

Gentlemen As a former Brit I still retain my love of experimenting
with
antennas and thus over the years have accumulated quite a pile of
aluminium tubing.This pile is being shipped off to the scrapyard by my
grandaughter because I have little use for it anymore.
The reason from moving away from aluminium is that I find telescopic
fishing poles to be much more available,less expensive, can be
extended to over
320 inches aside using aluminium in the boom area, Can use wire inside
or aluminium paper on the outside so the basic rod material used lasts
for ever because modification to length over experimental time does
not damage the pole itself.
P.S.
When an ice storm comes along the rod believes it has caught a fish,
it bends as all fishing rods do and the ice slides off !

Tune to the freq. press memo then write. Now release the memo button and
tune with the VFO to whatever, when you want to go back to the memorized
freq. it will be there in memo mode.
How many times can the word "memo" be used in a question?
I'm the 3rd owner of my 730 and it seems to have the new relay for the
preamp, but the amp itself went out so I had to use a TenTec kit preamp
inline. I couldn't find the right transistors.
If you find the relay mod for the contacts, please forward them. I'd
like to try it.
I don't know about the VFO swapping, I never really used VFO-b or split.

I have 60 feet of Rohn 25 available in North Jersey. This is a package deal which includes:

One top section with rotor plate and guy brackets
Five regular sections
One short roof mount base with foot plates
One ground mount base plate
One house bracket
And, Three philystran guy cables with attached hardware.

This is pickup only as I no longer have a truck to transport it in.

I will take $350 for the whole package or possibly trade for something of equal value.

73, de Rich

Hey Al. Have a 730 here too. I'm the second owner, well that I know
of! I've had one relay replaced but still have on that needs to go.
Sticks every few times that I key down. Annoying!

I DID find the mod that you need. Requires 3 resistors, 1 inductor
and 1 cap. This is the page that I found it on, for reference:

http://www.angelfire.com/biz2/mts/updates.html

But here is the direct link to the file that you need:

http://www.angelfire.com/biz2/mts/images/730preamp.jpg

I printed it out just in case the anglefire site goes down! I haven't
done the modification here yet though. Don't know if I will attempt
it (with my only radio) or pay someone who does it for a living.

Hope this helps!

Thanks. That helps clear up the memory issue.
It had not occurred to me to use the 2 buttons together. I had
pressed each separately, so that only one button at a time was pressed
at a time. In retrospect, the manual descriptions are accurate.

I figured out the VFO part as well. Pressing WRITE (MEMORY not
pressed) will write the other VFO's frequency to the current VFO. It
does not swap VFO's or otherwise change the other VFO.

If I discover the relay mod, I'll let you know.

Hi Al,
The memory button must be in before you press the write button. The confusion comes because the radio will change to the freq. currently in memory when you press the memory button, but will change back to the VFO frequency when you press write.
For the preamp mod, go to:
http://www.angelfire.com/biz2/mts/images/730preamp.jpg

Hello everyone

While looking at the list of Callsign Trustees with 2 or more calls at:
http://www.ah0a.org/FCC/Clubs5.htm
I put a number of the calls in the Repeater search engine at:
http://www.artscipub.com/repeaters/showrepeaters.asp

I noticed that a number of the clubs listed in the top 10% of the list
do not have a repeater listed even though they are listed as
networked clubs, repeater groups, systems and associations.
I found that to be really strange.. Dont you?
Then I looked at some of the club names and calls
This is what I found.
1) A number of different clubs have the same prefix's.
I find that confusing as it must be hard in that area
that quite a number of groups have the same suffix calls..
2) Some of the names of the clubs just scream out "Question Me"
These clubs that are named after sports heroes, the trustee or
their qth address, or other names such as the Jammers for Jesus
or the Richard Burton ARC (both who are finally being questioned
by Riley).
3) A number of different clubs that have the same issuance date
for the callsigns.. Is that strange that the boards and members
of these clubs can all agree on their calls at the same time?
4) If some of these trustees are supposed to monitor the repeaters
and other transmissions of these clubs, it must be hell to monitor
5 different repeaters at once to police the frequencies.

Ham Radio is supposed to take care of itself.. It seems that the only times
Riley
and others have anything s after pressure has been applied by many
individuals or threats of government intervention by political officals
has been used as a last result.

I know of a few cases where Riley has questioned calls and clubs in this
matter and has taken action.. That has to be applauded.
Of course there are the clubs that have provided the correct information
of the groups existance and even though these clubs have constitutions,
membership lists, participated in contests and other social events,
and even issued nice membership certificates, these clubs were
not viewed as offical due to public misguided pressures.

Riley has alot to do to clean up this hobby and he needs our help.
Some of the things that need to be done is
1) The clean up of the repeaters and airways of Jammers and

action taken when such offenders have been identified.
(In South Florida a number of offenders have been identified, taped
claiming that they were the jammer, and have been verified
but credible folks such as offical observers, ect but nothing has been
done by the FCC. And We are not talking about Flippo.)
2) Actions taken by League Officals and other Amateurs who conduct
VEC exams, Emergency Coordinators ect, that violate laws, the amateur
code and even normal decency standards that nothing is done by the
amateur Supervisory folks (ARRL, Riley ect) until threats of
legal intervention are involved.
3) The groups on the airwaves who believe that they own their
frequency because the repeater is there or that their net happens
there daily (10-10 anyone?) who do nothing when their members
openly jam QSO's on such frequency in a malicious manner..
I have been in a number of QSO's and have listened to them also.
Then these folks have the audacity to claim that the stations in the
QSO are openly Jamming them because of being on their frequency.
4) These clubs that have to be questioned.. I have written to Riley
about a few clubs that are very suspicious due to content (some on
a personal family level) and even one that on Usenet posted the true
nature of their club.. Some of these clubs have a smearing nature to
destroy certain hams and have posted that.. even using previous calls
of that ham to ensure that.

Perhaps all of this is too much for Riley to handle?
I am not here to bash Riley but if it takes public pressure to get
things to happen, perhaps we should let Riley know of this concern
so we can get action taken before this hobby gets an even blacker eye.
Some of these actions and officals belong back on CB.

You can write Riley at rhollings@fcc.gov

Im not out to start a flame war or anything which is why I didnt name
names or clubs but you can search on groups.google.com of such
occurances of what I listed above.. One such example is
"Something Smells in West Palm Beach" about a VEC exam about 4 years ago
where a handicapped VE was intimidated by the Head VE and others in the
hopes of chasing the ham from the hobby.
Riley does a good job and is not to be bashed by this letter but this
is written with the hopes that Riley will realize what the ham community
is concerned about and will focus his efforts.

If you have any questions, email me and we can discuss.. there is no need
to get into name callings or anything else.

oh yeah,
you can do that. 2 things:
1. your amp won't last long
2. you stand a real good chance of getting slightly dead as a result of either the x-ray pulse from the tubes or the resultant electricity jumping around the room in an uncontrolled manner.

Technomage

Although for the specific instances you mention below the following isn't true, did you also check the "ampr.org" domain and packet BBS lists for these club calls? I am aware of a couple of club holders which don't have [voice] repeaters but are digital/packet organizations and therefore use their club calls on packet stations... Also in my area, the ATV'ers may have a club call or two for ATV operations which may not be in that database you searched.

However, in contrast to your callsign grabbing argument, some of the grabbers have used these calls on operational machines (e.g. W6NUT), so merely checking against a repeater database isn't conclusive either.

>I noticed that a number of the clubs listed in the top 10% of the list

Clearly, callsign grabbing.

>2) Some of the names of the clubs just scream out "Question Me"
>These clubs that are named after sports heroes, the trustee or
>their qth address, or other names such as the Jammers for Jesus
>or the Richard Burton ARC (both who are finally being questioned

...There's no law against being an asshole!

>3) A number of different clubs that have the same issuance date
>for the callsigns.. Is that strange that the boards and members
>of these clubs can all agree on their calls at the same time?

Did you look back for the original licenses for these clubs? Or are you merely looking at their current vanity-calls? How many of the latter correspond to the

opening of each vanity-call gate? There are reasons why this may be so....

>4) If some of these trustees are supposed to monitor the repeaters
>and other transmissions of these clubs, it must be hell to monitor
>5 different repeaters at once to police the frequencies.

Only if several (3+) are active at the same time. It's quite easy to monitor several repeaters while they're idle. Additionally, who said that the callsign trustee must be the one monitoring - "control operators" may exist....

I recently read a post where a gentlemen is using a Wavetek Sam I catv analyzer as a 4-400 Mhz spectrum analyzer at low cost. Is this possible and how does such a unit compare with regular commercial spectrum analyzers? I'd like to find out a little more about this unit... is it solid state, can it be used at 50 ohm impedance, accuracy specs, step attenuator, easily serviced, etc.... so I'd appreciate any such posts from someone using this unit as an RF analyzer.

Thanks,
AJ

4049. Ham Band PC Based Tuners

FM and AM radio tuners are readily available as plug ins for Personal Computers. There is not much circuitry on the cards. I would love to purchase a ham band or general coverage type receiver for my PC. Ten-Tec has a great unit but it is outboard. It costs $300.00 U.S. funds.

http://www.tentec.com/TT320.htm

Download the demo software. Really well designed.
Looking for an economical unit that fits inside my PC.

It's not going to be nearly as good as a spec analyzer. You can see spurs
and harmonic and non-harmonic distortion with a real SA,and better
accuracies. The SAM is basically a freq-tuned voltmeter.Made for 75 ohm
impedances,that's what cable is. You could use a 50-75 ohm pad,but accuracy
will suffer.
(I used to work for the company that Wavetek bought,that made the SAM
meters. Mid-State Electronics, ;-))

I'd buy one of those inexpensive SA's before I'd spend any money on a
SAM,if you want a RF analyzer.

4053. IC-728 Icom impressions?

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-12 11:18:14 UTC
From: Maurizio Bonfanti <maurizio.bonfanti@libero.it>
Message-ID: <WxTp9.20751$RO.496634@twister1.libero.it>
Source record: 72695

Any impression about this rig?

Maurizio

4054. Re: IC-728 Icom impressions?

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-12 12:27:05 UTC
From: "Joe S." <joe@schlatter.org>
Message-ID: <ao94f602llj@enews3.newsguy.com>
Source record: 72696

I have an IC-729 -- it's the same as the 728 except that the 729 has 6 meters in addition to HF.

The 728/729 is a basic HF transceiver:
-- 100 watts SSB and CW
-- 10 watts AM
-- 25 watts FM
-- covers all HF bands
-- general coverage receiver
-- 2 VFOs
-- 10 memories
-- works split
-- pass-band tuning
-- noise blanker
-- power output adjustable 5 watts to full output
-- computer control (need to purchase the optional Icom CT-17 interface)

The rig DOES NOT have:
-- VOX (optional VOX available as an outboard unit powered from the mic connector)
-- built-in keyer
-- built-in antenna tuner
-- notch filter

It comes standard with a SSB IF filter. There are two optional CW filters available, 500 Hz and 250 Hz. These filters are no longer available through Icom but they do show up on Ebay from time to time.

I have the 250 Hz CW filter in mine. At the time I bought the IC-129, I bought the Icom PS-55 power supply and AT-150 antenna tuner.

The 728/729 is comparable to the IC-735, without the internal VOX, optional internal keyer, and notch filter.

I have owned the 729 since 1992 and have been very pleased with the rig. I use a PK-232MBX and run HF packet and RTTY with it, as well as CW and SSB.

The 728/729 is not an FT-1000, not an IC-756, not a Ten-Tec Omni -- but it does not carry the price tag those rigs have. Good basic rig.

--

Regards,
Joe S.

4055. Antenna MADE for AO-40!

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-12 13:27:02 UTC
From: G Rollins <address@mysite.com>
Message-ID: <po8gqukvc36l660iigvuecgnonnblkjdfa@4ax.com>
Source record: 72697

I got tired of straining to hear signals from AO-40 with my barbecue grill dish and developed a circular polarized antenna that WORKS! I talked a manufacturer into producing small quantities of these specialized AO-40 antennas, and I am now making this antenna available to the amateur radio community. It is an offset parabolic and there is NO aperture blockage of the incoming signal. Plus, you can connect your downconverter directly to the feed with no signal line loss. Extremely efficient, this antennas design includes many advantages over other dishes. I have current stock and most orders ship the same or next business day. The 3' N3IYR dish outperforms any other commercially available AO-40 antenna. Please visit my web site and look my antenna over. Leave me a comment if you like, or ask any questions you might have.

No you should not use it as spectrum analyzer unless you only need a very simple, low resolution and poor accuracy analyzer.
Bye.

Ok, guys. What would be examples of good, used, lower cost rf analyzers that I could look for that wouldn't break the bank. Say 500 Mhz bandwidth (150 Mhz minimal acceptable).

I haven't studied UWB yet, so I can't comment on it except to say that what I have read so far sounds promising. I have long been an advocate of wideband schemes as an interference-resistant and generally robust technology.

IBOC (In-Band On-Channel) digital -- AM or FM -- is essentially a turkey, technically. It's inferior in almost every way to a dedicated digital system in a dedicated digital band. And furthermore, it will inevitably degrade service for analog listeners, especially those listening to weak or distant stations close in frequency to local stations.

The main reason IBOC is promoted is because a new dedicated digital band would level the playing field: the present 250-Watt AM daytimer, once ensconced in the new band, would have just as clear and clean a signal as the 50-Kw clear channel or the high-power FM -- just as good fidelity, the same coverage, and 24-hour operation. Just like your website is equally clear and just as accessible as NBC's.

A dedicated digital band might also be scalable and allow many more channels for the listener -- hundreds, thousands perhaps. Probably enough to allow public access (in which anyone can be a broadcaster for free or nearly free) on an even greater scale than does cable television.

And that would mean more competition for the big-money men.

And it would mean that competition would now be _purely_ on the basis of programming, not the sheer signal superiority which the money-men have paid for.

The money-men want to preserve the signal inferiority of their smaller competitors. IBOC does that. They want to maintain the high

economic hurdle to becoming a broadcaster. IBOC does that.

With all good wishes,

My reading is that on AM it occupies three times the bandwidth, the
station's own 10kHz slot and two adjacent ones, from the point of
view of what gets clobbered.

The technical documents talk about adjacent channel splatter but
it means interference from the other stations to the digital one.
A point of view seems to have been overlooked here.

I am curious what the hybrid AM does with synchronous detectors, or
receiving in SSB.

On my radio today, I can hear in the daytime a station on every
10 kHz channel, with few exceptions. If a digital station goes
from -15kHz to +15kHz it takes out the the carrier and both sidebands
of the station on each side.

In the iBiquity .pdf it says the major digital energy is dumped into
the outer sidebands to avoid disturbing the station's own analog
carrier and sidebands. Of course that means it disturbs the adjancent
stations more.

I don't understand the bandwidth plots; they're pulling a fast one
with units. The carrier can't be measured in the same units as
the sidebands, because one is in watts and the other is in watts
per hertz.

All the docs agree they go from -15 to 15 kHz though.

Well,there's the TEK 1401 or 1401A,that was designed to connect to the 323
scope and had BW up to 500Mhz(can be used with other scopes,too).

Or there's a 7K mainframe(7603) and a 7L12 or 7L13 SA plug-in,which goes
10Khz-1.8Ghz.Or find a 2710,2712 portable SA,looks like a 2213 scope,goes

to IIRC,1 Khz-1.8Ghz.There's several HP analyzers available used,too,but I don't know model numbers for HP. You need to peruse a few used Test Equipment company catalogs. Google ought to turn up several.

There's also an inexpensive SA I've seen listing for about $1500 new,I believe it comes from Taiwan,and marketed under several companies name 'brands'.I saw them in hobby electronics mags like Nuts&Volts.

SA's are not cheap.

I was aware of all that, though your "no greater bandwidth" claim is highly suspect in actual practice, with imperfect antennas and transmitters; and the power density at the bandwidth extremes is greater with IBOC even in theory. Listening to weak adjacents _will_ be impaired; bet on it.

The only reason to go with less-than-optimal digital techniques like IBOC is to preserve the investments of those with superior facilities in the existing bands. The little guy remains squashed, and the small AM station is still stuck with nighttime problems and limited bandwidth compared with FM.

Going to a new even-playing-field all digital band would _not_ induce compatibility problems, since receiver manufacturers could add the new band about as easily as they can add the new multiple-mode sophisticated decoding schemes necessary for the IBOC rube-goldberg approach. So there would be AM/FM/Digital radios for as long as people wanted them, and there would be _no_ new high-risetime digital modulation occupying the existing bands, which would remain pristine and might even eventually become cleaner as some broadcasters shut down their analog facilities in coming decades.

[...]

It might fly since there's so much money behind it. The great fear
of the money-men is that a new even playing field will be created so
that small broadcasters will have equal signals to the ones for
which the big boys paid tens or hundreds of millions of dollars.
Can't have that! Enter IBOC as the "solution."

With all good wishes,

Remember folks.. radio is there not for the good of the public.. it is there to provide advertising bandwidth for those with money who want to make more money...

Way back when Con Edison was selling dirt cheap packages of electricity eaters to the public.. Think it was an AM/AM radio, toaster, iron, maybe a coffee maker. Can't make money on selling electric power if consumers don't have enough electric appliances.

Just like the DirecTV DBS dish in 1994 would cost you $700, today it will cost you $25 or perhaps even free because the money is in the subscription.. not the hardware..

So in digi and analog radio the money is in selling ad time and pounding the listening public with jingles and born again diatribes. I'll buy my first IBOC radio when they go for $25 at the local WalMart.. Otherwise I plan to steer clear of version 1.0.0

Steve

Who cares? If I want music I listen to CD's. The only time my Right-Wing
ears listen to standard AM radio is to hear what Rush has to say. Nothing
else on AM radio is of any import. (Ditto-Head Whacko, you say?)
FM? Again, who cares? Nuthin' there but a bunch of rap crap..."groid" music
right from the mean streets of Detroit. Dreadlocks, baggy jeans,
six-fingered simians grabbing their testicles while bopping about with
shapely white chicks...NOT my style.
Digital? Heh...it will only be more of the same. To heck with version 1.0.0
or any other version for that matter.
OK, you self-righteous LIberals...take me to task for my statements. Tell me

off. Have at it.
(not that I give a hoot)

In the September and October 1989 issues of Radio-Electronics, there is an article by Fred Baumgartner on a build-it-yourself spectrum analyzer. The "hard part" is done by a Zenith TV tuner module that converts 50-600 Mhz to 63 MHz (Channel 3) output. This is followed by a TDA7000 FM receiver chip. There is a 555 to generate the swept tuning voltage for the tuner and another oscillator for sync. They were selling a complete kit of parts for $187 in 1989, which is around $280 today.

4078. DSP Processor - REVIEW/OPINION - Timewave DSP-599zx

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-13 15:09:00 UTC
From: riffin-rich <riffin-rich@cantspam.me>
Message-ID: <ji2jquo5ccbkl9d1ukf1ldmtvrnmnb5on6@4ax.com>
Source record: 72721
Cross-posted to: rec.radio.amateur.dx;,rec.radio.amateur.equipment;,rec.radio.amateur.misc

Hello all. I had to write about my experience...sorry for the potentially off-topic and long post, but, so many of you are concerned about improving your system's performance.

I just received my "used" Timewave DSP-599zx yesterday (I paid $240). I set it up last night and I believe it is simply FANTASTIC! I don't know how I've done without it for this long. Period. (And the unit I bought doesn't even have the improved version 5 noise-reduction firmware installed). I'm using an original ICOM IC-706 (with no built-in noise reduction) so, you may need to temper my input if you have a very modern built-in DSP radio, but know I did numerous internet searches and found in many places that the built-in DSP's on modern radios are reportedly outperformed by separate DSP processors like the Am-Com Clear Speach and the Timewave DSP.

So, I actually purchased a "Am-Com Clear Speach II" DSP speaker about 2 weeks ago. I used it for 2 nights and promptly called Am-Com for a refund. I paid $169 for the unit...free shipping...and I can't tell you how disappointed I was (for that price). While the processor did work okay, I had no control over anything except "on and off." I personally think the case and the speaker are very cheap...I'd probably have kept it if I had only paid $59 ... but not $169. Crazy. (No flames intended to anyone that has one and likes it...this is just my opinion.)

Back to the Timewave DSP-599zx. It's a whole different class of processors--it simply cannot be compared to the Am-Com. It is an audio processor--you plug the output of your radio's external speaker jack into the input of the Timewave and the output of the Timewave to your external speaker OR plug 1/4" headphones into the unit. It needs 12v DC power...and poof--you're on! Note that you'll need to wire-up your own (or buy a) simple cable (a 1/8" male phono plug to an RCA connector) to go from your radio's external speaker jack to the Timewave's RCA input.

Additionally, you can process your microphone input for transmit if you'd like. I personally haven't yet, but, I will eventually use the bandpass filters to tweak my audio to punch my XMT audio through pile-ups in the future. It's got two inputs for two different radios--you can switch between them from the front panel. It's got variable band-pass filters, variable strength noise cancellation, variable strength noise blanking, variable strength AGC, variable tone and variable strength tone suppression, six memories for your favorite settings depending on the situation, etc.. And then there's CW and

DATA modes (I'm not a data-mode type of guy so I don't plan to use this anytime soon, though, I am intrigued.) Check it out at www.timewave.com

Note: The opinions represented above are my own. I do not work for Timewave or any company even remotely associated with the sale of radios, DSP processors, electronics, etc.. I am not selling anything on E-Bay or any other auction site, nor do I know anyone that is selling anything on any auction sites. ;-) I'm not sure if I missed any other relevant disclaimers--but consider them added if you'd like. My opinion is above-board--there is no conflict of interest whatsoever. ;-)

SDARS gets a hundred channels into the space of 2 TV stations. The
FCC could've come up with enough spectrum to do digital right. The
NAB wanted no new stations and fought all schemes except the clearly
inferior IBOC.

No such thing exists. Ever try raising a control op? A trustee?
Those are figment definitions in Part 97. You could make a career of
not being answered on coordinated repeaters. Shut them all down. Let
spirited no-coders make some use of the bands.

Brian

>station.

This is only minmally true if we're talking about the MW AM band. Right now AM stations are allocated 20 kHz (i.e. +/- 10 kHz) wide channels, which half-overlap adjacent frequencies. The all-digital IBOC flavour fits in this channel width, but the hybrid version is 50% wider, with sidebands out to +/- 15 kHz which fully-overlap adjacent frequencies. More than this, as a practical matter the energy in the spectrum of a regular analog AM signal is normally reduced beyond about +/- 4 kHz (less so if the content is music, but much more so if it is talk), while the spectrum from the digital stuff is flat all the way to within 500 Hz of the band edge, which in the hybrid case is +/- 15 kHz away from the carrier.

> It functions in much the same way as CD digitized audio (96
>or 48 KHz sampling, for FM stations), and utilizes advanced
>compression techniques to keep the digital portion unobtrusive in the
>hybrid scheme.

For AM the codec data rate seems to be the same in both the hybrid and all-digital cases, but the digital portion in the hybrid case is made unobtrusive by putting some of the energy beyond the +/- 10 kHz analog channel limits. It isn't all that unobtrusive, thoough, since they also hard-limit the analog audio bandwidth to +/- 5 kHz or +/- 8 kHz to reduce its impact on digital stuff inside the +/- 10 kHz channel. And the hybrid scheme limits the redundancy in the digital signal, so it seems like the end result is crappier analog audio and less-robust digital audio. You don't get something for nothing.

> The hybrid broadcasts (simultaneous broadcasting of
>both digital and the original analog signal) will start first, because
>they are backward compatible with current receivers. If IBOC is
>well-accepted, the intent is for some FM stations to eventually move
>to all digital mode.

The same is apparently true for AM stations. The problem with that, however, is that there's already an open International Standard for all-digital radio at frequencies below 30 MHz making its way through the ITU-R which this proprietary all-digital format appears not to be compatible with. In fact, while it's hard to tell, they make it sound like even the codec is incompatible (no references to ITU MP? formats, thier latest coding reference is dated 1971). Since the ITU carries more weight in more places than the FCC does, I assume we'll eventually now have two digital formats in use in the MW bands world wide.

>Texas Instruments is manufacturing VLSI chip sets which can decode
>IBOC broadcasts, and a number of manufacturers are planning to offer
>receivers based upon the TI chip set. The receivers should appear
>on the market within a few months or less. Estimated additional costs
>are well under $50 US.

No DRM support in the same chip? Does that mean I'll need two digital radios, one for the USA and one for countries choosing an ITU standard?

>Will it fly? That's another topic. But does it work as advertised?
>
>Yes indeed. I've listened to it at the Advanced Computer Specialist
>seminars in Huntsville, and it's awesome.

Did they advertise anything about how well skywave digital in the MW band worked? I had some hope for DRM, since the MW format wasn't a whole lot different than the SW format where skywave performance is obviously a big concern, but for this stuff it seems like it wasn't a design constraint.

4090. FS: Old Radio Books

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-14 13:25:02 UTC
From: oldbooks78@aol.com
Message-ID: <20021014092502.20410.00002040@mb-ch.aol.com>
Source record: 72733

I currently have for sale the following old radio-related books. Postage is $2 for the first book and $1 for each additional item (Media Mail within the US, at cost elsewhere). The books are:

Graham, Frank D. "Audels Radioman's Guide, Modern Radio Practice" Theo. Audel & Co., 1932. Tan cloth covers over flexible boards. The book is about 250 pages in length (pages are numbered oddly, making a total count difficult). A nice early vintage radio book, illustrated throughout. Clean with no page tears or pen marks except for a gift inscription inside the front cover. Cloth covers show some spotting and light staining from age, but not bad at all. Available for $12.

ARRL "The ARRL Antenna Book, 13th Edition" American Radio Relay League, 1977. The 336 page softbound book is in about very good condition. Clean with no page tears or pen marks. The covers show a bit of wear from previous use, but not bad at all.A comprehensive treatment of radio antennas. Available for $7.

Jordan, Edward C.; Paul H. Nelson; William Carl Osterbrook; Fred H. Pumphrey; Lynne C. Smeby; and W.L. Everitt (editor) "Fundamentals of Radio" Prentice-Hall, 1944. The 400 page hardbound book is in good+ condition, clean with no page tears or pen marks except for a previous owners name inside the front cover. Gray cloth covers with some minor spotting on the front cover, otherwise nice. A nice early radio related text. Available for $10.

Siegel, Hy "All About CB Two-Way Radio" Radio Shack, 1976 Soft Cover. The 112 page softbound book is in very good condition, clean with no page tears or pen marks. Nicely illustrated. Available for $5.

US War Department "Technical Manual - Radio Fundamentals, TM 11-455" U.S. GPO, 1941. The 140 page softbound book is in fine condition, fresh and clean inside and out except for a previous owners name on the front cover. A nice WWII vintage radio manual. Available for $10.

Federal Telephone and Radio Corporation "Reference Data for Radio Engineers, Second Edition" Federal Telephone and Radio Corporation, 1947. The 322 page hardbound book is in good+ condition. Clean with no page tears or pen marks except for a previous owners name and address inside the front cover. "The present edition has been greatly enlarged and a subject index included. Chapters on transformers and room acoutics have been added. The material on radio propagatiion and radio noise has been revised. The data on cathode-ray tubes have been considerably expanded." Available for $8.

Everitt, William Littell "Communication Engineering" McGraw-Hill, 1937. The 727 page hardbound book is in about very good condition. Clean with no page tears or pen marks except for a previous owners name and address inside the front cover, and a few passages underlined in pencil. A nice early text on the

science of the radio. Available for $9.

Measurements Development Laboratory of the Sperry Gyroscope Company "Microwave Transmission Design Data" Sperry Gyroscope Company, 1944. Publication No. 23-80. The 215 page hardbound book is in very good condition, clean with no page tears or pen marks, and a strong binding. Originally issued during WWII as a "confidential" document. Chapter topics include General formulae for concentric lines; Attenuation in concentric lines; Reflections and impedance matching; General formulae for wave guides; Attenuation in wave guides; Reflections and impedance matching in wave guides; Wave guide tees and bends; Wave guides filled with dielectric material; Dielectric material: Cavity resonators; and Measurement techniques. A neat early book on ultra-high frequency radio waves. Available for $10.

If interested in any of the above, please email to "Oldbooks78@aol.com" to reserve. Thanks.

Dave

Ham radio hurt itself by not changing with the times.
Now their reaping the fruits of stagnation because
of the historical official policies of a certain "non-profit"
publishing house in Conn. It's too late boys! Ham clubs
are dying, hamfests are dying. I told an ARRL director
back in **1981** to drop the code and look for
ways to incorporate the first computers into ham radio.
He looked at me and sneered at my thought of dropping
CW and said "..what relavance do computers have to
do with ham radio?" (after all...I was just a 16 year old
"kid" - he asked me that with a sneer also and he and
his group of cheap-ass old farts thought my comments
were quite amusing at the time - oh well.)

And yet, here you are, 21 years later, on a ham radio newsgroup. Just passing by, or did you finally dig in and do whatever you needed to meet the standards for the license?

Or did you wait until they lowered the standards to your level. People like that are waiting for medical standards to be lowered the same way too, so they can become doctors without having to do all that icky stuff that has no relavence to modern medicine.

You will find those types in all age groups. Amateur radio is really a starting point. What you do from there is up to you. I saw a post from an individual on another site stating that he could type 50 words per minute and the small keys on his miniature whatever kept him from typing. I hated to break his bubble, but some years back I could send and receive Morse faster than he can type. No big deal, I suppose. Myself, I simply use 440 FM from an HT. Yeah, maybe it looks geek (I do NOT carry it everywhere) ... but when the telephones went out at my employers and everyone was scrambling to borrow someone else's cellphone I couldn't resist. I went to the locker and pulled out the HT. Turned up the volume, hit some buttons, and up came the dial tone. Placed me call and enjoyed every minute of it. You'd be surprised. A lot of folks sneer at the over 50 set .... yet a group I am heavily involved in has a few of us over 50 year olds. You'd be surprised at the help that group has given other concerning computers. Protocols, addressing, interrupts, you name it. The common thread (and a few of us have passed Morse code tests) is that those who have been willing to learn continue to enjoy learning. That, my friend, is what seperates the folks who generally do well and those who don't. You happened to run into a few that probably stopped once they passed one test and no longer want to learn. They are likely not doing too well.

4097. Yaesu ATAS-100 Antenna QUESTIONS

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-14 21:24:55 UTC
From: Mike Green KQ6MU <radiotek@pacbell.net>
Message-ID: <fgdmqucbbks3hi7bis9k9pn0qnucldja8m@4ax.com>
Source record: 72640

Greetings,

I have some questions regarding the Yaesu ATAS-100 Mobile Antenna.

I just purchased the Yaesu FT-100D to use in my car (Ford Escort). I used the FT-100 when riding with a friend, and it seemed to perform well and the ease of operation with the ATAS-100 was exciting and simple.

Questions:

1) Antenna Mount Choices: Now, I really do not want to drill holes or anything that would damage the vehicle. I am looking at the Lakeview Quad Magnet Mount or Super Quad Magnet Mount on the Mag-mount side, the Trunk Lip or License Plate Mount (Lakeview) for more security knowing the antenna won't fly away.

I am aiming towards the Mag-Mounts, at this time. Will the Quad Magnet mounts have enough strength to hold this antenna to the vehicle? I would like to use it on the center of the roof, or, if necessary, on the trunk lid. Will the wind load (80-90 MPH max on the road) cause the mount to detach, or does it have sufficient holding strength?

2) PERFORMANCE: I have read tons of review on eHam, and would like to receive a few more. The reason(s) why I am choosing the ATAS-100, is due to ease of operation and decent efficiency. I don't want an antenna that will be cumbersome or "offensive." I think other Screw Driver Antennas (such as Don Johnson's Screw Driver) would be a little too large for this car to handle without a lot of construction work with the mount. Also, I don't want to stop and replace a jumper or resonator to change bands. Pros and Cons would be great!

That about does it, and I thank you for taking your time to assist me on my HF Mobile Setup. I can't operate from my home, so this is the next best thing. See ya'll on the Air & 73!

Hans,

While I think the original post was a bit 'adversarial' to ham radio, I DO agree with the BS from the movie 'Frequency'. No, I didn't see it. The story line and the teasers I saw just didn't excite me at all.

But, I found the reaction of a lot of HAMs to be objectionable. There were guys out there thinking that the movie will be the savior of declining ranks. Clubs were even setting up stations and displays for ham radio at some of the theaters. Geesh, IF I had gone to the movies and if I ran into one of those setups, I would have made SURE I hid any external indication I was a HAM.

Subject to review by an Adminstrative Law Judge, then by the
Commission en banc, then by the US Court of Appeals, then by the
Supreme Court of the US.

That's why you don't see a lot of sanctions levied for that
specific violation.

I have to agree with your point about the movie to a large degree. The movie did kind of make it look like people never use amateur radio anymore, or that ham radio is some kind of relic from the past that has been pushed aside by the computer age. In all fairness though, if you rent the DVD they do have a nice segment about ham radio operators on there that makes the hobby look pretty good.

I need no lie. Here's under what condition and where:

In both cases, the communication was also asking for a call to 911:
- By the Ontario, CA airport on I-10, on a repeater: 146.820, to report

a stalled vehicle in a middle lane. Occurred in September 2000 - on the second Friday after Labor Day; forget the exact date - about 4:30pm.
- In West Los Angeles, on 146.670, to report an injury traffic accident. This one was over 5 years ago and at night.

However, in both cases, I asked for a CP and I GOT A RESPONSE. The 146.820 machine is monitored by someone who works for the Highway Patrol, and the 146.670 was at that time the "Henry Radio" repeater, back when they still had a real sales business, not just manufacturing as they do today.

4106. WTB: NON-working scanner for PARTS.....

WANTED TO BUY...A NON-working older ELECTRA/Bearcat base scanner, model BC-20/20 (preferred) OR an older NON-working Electra/Bearcat BC-220 base scanner FOR PARTS. Need the FACEPLATE to replace broken one on mine that the USPS "killed" with a FORKLIFT!!! Will buy either JUST the faceplate OR the entire NON-WORKING scanner for parts but....the faceplate MUST be complete, intact, not cracked or broken, and in VERY good to EXCELLENT condition (no deep gouges, scratches, etc., but OK for faded silver paint around edges...)as it is THE part I'm seeking. Will pay decent price for the right one. IF POSSIBLE, pic of your unit would be MUCH appreciated WITH your Email reply. Please remember I want to REUSE the faceplate so it MUST be restorable, VERY intact, AND USEABLE !!I will answer ALL replies. Also have some vintage scanner parts for trade/barter to "sweeten" the deal as well IF DESIRED...LMK your needs.Otherwise, will buy radio or faceplate only outrite from you.

THANKS IN ADVANCE to all who reply. (<:

Would have helped if they had done more research and used a
Heathkit transceiver instead of just a receiver as the rig.

No wonder he sneered at you - computers were already in many ham shacks in 1981. There were code programs for both the Commodore and Apple II. I used one with an Apple II Plus and a shortwave receiver while in Germany.

License study guides were already starting to appear (mostly word processing files at the time, though one Apple II version even included graphic files). Radio Shack (Tandy) had several ham related programs for their computers. Even the little Sinclair had several ham radio programs, including a nifty little log book program for field trips - you could later transfer the data to your regular computer's database using tabbed-delimited text files (a friend had it and I showed him how to transfer the data).

The Osborne computer came with several ham radio programs from the factory, including an early attempt at an antenna design program. I played with those programs in a computer store I managed at the time.

Mike, positive promotion can offset the negative stereotypes people see on television and in the movies. If we sit back while "Hollywood" paints us as relics of the past, that is exactly what more and more people will think.

Movies have been doing that for decades - in an early scene from the 194x movie, "The Thing from Outer Space," the radio operator is using a Hallicrafters receiver to transmit messages (with no microphone in sight - he's talking into the front of the radio).

The latest variation uses "customer service," "system administrator," or
some variation of that, at the receiver's server as the email address,
claims to contain a tool to check & remove this virus, and urges subscribers
to use it immediately. I received two like this in the last week.

CW was dropped years ago to get into ham radio (no code technician). We
got bunches and bunces of new callsigns now....such as loser Lllllooooyyyddd.
But where is the quality?

You cain't blame it ALL on the ARRL. You can blame it on groups like BARF,
Stumpjumpers, K1MANs QRM Casts, and the FCC for twenty years of no
inforcement.

Not to mention trash such as the no ball no call types that are everywhere.

If you shop around, you should be able to find a decent HP 141T spectrum analyzer system that goes to 1250 MHz for under 500 dollars. A far cry from the SAM and the kits.

Probably they used it as it "looked" more like a ham rig than
say an old Kenwood.... Also there were scenes where the
rig gets damaged and via time warp fixes itself. A subchassis
got bent and straightened itself out. Also whatever they had in
the props department or could find quickly on ebay.

At least they didn't use a Radio Shack or Cobra CB rig.....

..Be aware that a gent by the name of Doug Calladonato (njscanner@comcast.net)is selling several scanners (approx. 21 of them..) and, is willfully and maliciously misrepresenting the condition of these units to obtain a sale on them.He sold me two that he represented as in "excellent working order" and, that he "tested himself before sending them to me" that are BOTH totally non-working, useless units. I am out a SUBSTANTIAL SUM OF $$$ and he denies they were non-working at time of sale.Mr. Calladonato outright lied and denied several Emails he initially sent me that represented theses radios I got from him as TOTALLY WORKING UNITS...he says one thing IN PRINT in the original Emails then DENIES IT in the later ones..even tho' I have it IN PRINT IN MY FILES FROM HIM !! (???!!)

Upon opening the units, they were filled with poor-quality solder (attempted) repairs and had obviously been tampered with prior to the sale. The one unit has a squelch that will not close, and the unit wont even scan. The second one has such poor reception as to make it useless. If both units HAD been tested as seller stated, these problems would have been painfully obvious.
I have contacted this gent asking him for a refund and he ignores my efforts entirely. I am posting this to advise any potential customers of this seller to AVOID doing business with him Currently, I am in the process of legal action againt this crook.His actions are obviously dishonest in nature and I have adequate proof in the form of Emails from him and, two DOA radios to prove it.

Buyers beware AVOID THIS CLOWN !!.Dont get SCREWED like I did by this jerk !)<:

You're obviously a very lucky man. Would you pick 5 for me?

My VX5R is acting up, The 2m works fine, however, 6m only puts out
about 25mw even when set on HI pwr. And worse, 70cm won't work at all! The
pwr meter comes on for a second then goes away(no output what so ever!).
Receive works fine on all freq. ranges.
I have eliminated common problems like: poor ant and power conx., low
batt pwr, and shorted coax. All of these have been ruled out as the problem.
I have done a full reset of the cpu without any change other then the chance
to rethink my memory setup. Into a dummy load I have found that 70cm will
work outside of the ham band (above 460MHz and below 390Mhz). With a sightly
lower RF output (expected). At first I thught it was some kind of SWR
foldback, So I tried several different ant's. No such luck.
So here the screwdriver cometh... After a very thorough visual
inspection, And I do mean THOROUGH! I found NADA, ZIP, ZILCH.
No parts where burnt, no conectors misplaced.
My next thought, the finals. It can't be 2m works fine so does UHF
non-ham and by the way there is only ONE! What happened to push-pull? My
only guess is the CPU in some way. I am at a total loss of ideas, PLEASE
HELP! I'M BEGGING!!!!!

Hrm.. Some definitions:

Transsexual: Someone who believes they were born the wrong gender, and a exchange done to change their gender.

So a transsexual homo would be, then, for example, a man who's been changed to a woman, and likes women. Therefore a Lesbian, or a straight woman?

Does it really matter, though?

PRO-43 scanner in good condition with all original equipment. box, and manual. This unit is serial #045210 but has not been modified. Some people consider this one of the best handheld scanners ever made. Please email if interested or for questions. Asking $160 shipped to your home in CONUS.

What's the date code (a sticker inside the battery compartment...should
be something like 2A4)?

But even that doesn't result in the FCC taking action. Look at the Southern
California situation, especially concerning certain operations that concentrate
around certain repeaters (but of course, not limited to such examples).

Yes, I have begun to look around for one of these 140/141T's. My only
concern here would be how it would hold up, especially being used. Also,
how easy/difficult is it to service yourself if the need arose?

AJ

My best advise is to send the unit to Yaesu for repair. I had a problem with poor FM reception, and it came back in perfect shape. I don't know if you bought a new U.S. model, or if you bought your rig second hand. The export models have different programming. It is possible to freeband this model so it can be used on all 2 meter and 440 frequencies.

Here is a website with a lot of info on the VX-5R.

http://www.icongrp.com/~sllewd/vx5rmain.htm

You should buy or build the data cable. The ADMS1-E kit can be purchased. It has the cable and software. I don't use the ADMS software. I use the free EVE software for programming the rig.

There is limited information available on the alignment mode which is acheived by holding the Band+TXPO+0 while turning on. This will give access to the power settings on each band.

The 141's ect are reliable and eminently servicable. They are full of
metal sheeting, PCB's, wires, transistors, diodes, resistors, cap's
and L's.
The service manuals are superb.

Note though, that the initial mixer frequencies are -high- and would
need capable test gear to fault find in these areas.

5 lottery numbers. You got two control ops to talk to you in
emergencies over a five year period. That's pretty good luck in
anyone's book.

This coming Sunday.... The seasons last...

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday October 20th 2002
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

********** $1 buyers discount with hard copy of this notice ************

<<<<<<<<<<<<<<<<<<<<<<< cut here >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>

Mail the coupon below by the 5th of the month to be a Prepaid Vendor.

FLEA at MIT 2002 Rates

SELLERS

This year each vendor must have a Cambridge Vendor License.
We will do all the paperwork to get the one day Cambridge licenses.
To keep the spaces affordable we are discounting your first space.
To use your spaces the named vendor MUST be present.
Rates include one admission per space.

Advance $17 First space - includes $10 Cambridge Vendor License
$12 Additional Spaces
Must be received by the 5th of the month.

Gate Admission $20 First Space - includes $10 Cambridge Vendor License
$15 Additional Spaces
Admission is after the prepaid vendors

Early Bird Buyer -Admission after the prepaid vendor line is admitted. ~ 7:15AM
** You may not sell. **
$15 per person at the gate.

Talking of service manuals do HP sell them for anything, I have an 8591E with a power supply fault and I can't fix the thing. Does anyone know how much they cost or how to get them.

4144. Touch lamp EMF damaging to nearby equipment?

Hello. I have a small touchlamp, with 3 brightness settings. I've heard from other newgroups that touchlamps radiate an EMF/EMI field which can interfere with radio equipment.

I often store electronic stuff mere inches from the lamp, like my cellphone, Zip disks, MP3 player, etc. Can any equipment like this, turned on or off, be damaged (even slightly) by remaining near a touch-lamp for long periods of time?

Thanks!

-Mike Shiva

I'm afraid this isn't true. Read the white papers on
http://www.ibiquity.com .

In the FM paper.. Figure 6 shows the digital sidebands of the hybrid (simultaneous analog/digital) occupying the area between 129 and 198KHz either side of center channel. The bandwidth of the hybrid signal is thus 2x198 or 396KHz. An FM channel is 200KHz wide, so the FM-IBOC hybrid waveform definitely occupies more bandwidth than is allotted to the analog station.

Now, the digital sidebands *are* 23dB lower in amplitude than the analog signal. For a 100,000-watt FM station, the lower digital sideband is 500 watts and the upper digital sideband is also 500 watts. 500 watts is still quite a bit of power, especially if the station's antenna is 300m above ground.

The bandwidth of the "FM" digital-only signal (Figure 8) is identical. They just fill in the center portion (occupied by the analog signal in the hybrid waveform) with more digital subcarriers.

In the AM paper, look at Figure 2. The digital sidebands extend to 14.7KHz either side of center channel. The bandwidth of this signal is 2x14.7 or 29.4KHz. An AM channel is 20KHz wide, so the AM-IBOC hybrid waveform also definitely occupies more bandwidth than is allotted to the analog station.

(note that even in analog, AM signals "spill over" into the adjacent channels)

The AM digital sidebands are 30dB lower in amplitude than the analog signal. For a 50,000-watt AM station each digital sideband would be 50 watts. (still capable of going pretty far when hooked to a good antenna)

The "AM" digital-only signal (Figure 3) is actually narrower than the hybrid signal - actually does fit within the spectrum currently allotted to the analog signal.

---

http://groups.yahoo.com/group/amstereoforum/message/4782 has a link to a recording of WOR-710 extending across 6:15pm. (6:15 is official sunset in New York in October - it's when daytime-only stations must leave the air, and when daytime-only IBOC tests must cease) It's surprisingly dramatic. IMHO if WOR's IBOC is working properly, many stations are going to have a hard time convincing themselves to use it.

Johnny Is Marching Home

So, you know cop killer bush has no evidence to back up his allegations against Iraq, while Saddam repeatedly offers Americans to come look anywhere, and nazi bush refuses the offer, instead lies to all Americans through corporate control as US being worthless without meaning, without soul as himself, lacking purpose but for destruction of our Humanity as unworthy to hear from. Mr. bush tells US secretly, he wishes to sacrifice at minimum, hundreds of thousands of American soldiers in a criminal war against our dying Planet, 60 countries, without following evidence to substantiate his claimed to be therefor super evil allegations, nor, will he practice legal due process as a terrorist in Our names by flying the American flag as a true Patriot would. Destroy nazi bush and rumsfeld the traitors today, and be loved by every American principle of Freedom, as Justice for US all. Or be a lifeless coward to watch the bushmob steal not only from our dumb dorky soldiers to be wasted as sadistic murdering tommy frank savages, to be not defenders of the faith or the hopes for a better future, but also from our murdered sons and daughters, who could have, at one day, understood the principles of Freedom and Justice, present in the forgotten American Constitution as worth fighting for to be protected as ourselves always. Mr. bush the demon, is not my false deity, as he is irrationally insisted by the American corporate cult product schedule to be so. CBC and CNN we all witness as Humanity daily, refuse to ever cover the corporately mandated bushmob atrocities, as documented facts that steal real lives. Our Mr. bush Jr. has shown little of no concern for the living people in Afghanistan left alone without an American commitment to protect our lives, or feed their families, now prepared to waste hundreds of billions against the starving in Iraq over something planned close to thirty years by criminal occupation. Their strategy, like in Afghanistan, is to put worthless nazi slave soldiers on the front oil pipe lines only, while murdering students and teachers who would have suggested clean hydrogen is practically free nazi dum fuk scums. You think if

Saddam was murdered, the rest of our Humanity the whole world over, would allow like a cowardly corporate american slave whore, Mr. bush, rumsfeld, and tommy franks, to give all of the Iraqi resources, to the murderous criminal thieving intolerant evil fascist israeli government of nazi bigot human haters, without objections from G of all beings? Holy Jewish Jihad Jesus! We notice the corporate news agenda to rob from US all, our commitment to human rights, is to never inform our communities as publicly aware, that nazi amerika, blocks food and medicine from ALL the Iraqi people, but yet will afford our time to propagandize our community with bushmob lies, left uncorrected. Has Ramsey Clark ever been offered as a legitimate voice of opposition, to clarify our positions? Does Ramsey Clark speak untruths, like bush does to kill and plunder the American People? You'd imagine, if CNN was truly American, they would tell Americans importantly, bush has no evidence to conclude OUR position, and murdered thousands in New York City, while Saddam offers the World to witness the falsehoods of the bushmob to come see for ourselves, or just simply give some attention to bush's true evilness he spouts as his own. The bushmob is tirelessly working to undermine the UN peace effort, by trying to suggest, if the World community should get the weapon inspectors in before mindless nazi forces get there to blindly murder and terrorize further, untold thousands in Iraq, slave boy Powell wants inspectors to include armed nazi soldiers, planes ready to bomb civilian targets, and openly, secret spies to be criminals! Something any legitimate inspector would appose as a ridiculous proposal, undermining of the peace initiative to be a Just cause, and the UN as an INTERNATIONAL BODY. And, as so should, motivate wimp ass Kofi to vocally detest on behalf of US people he claims to represent as a living person. Europe reports as human, while CNN as traitors to all of Humanity refuse to offer the facts. CNN sees no responsibility to protect America, or our soldiers as worthy the effort to address their real concerns regarding Our... Godly is Justice Freedom thing, or this all powerful Mr. Wizard person even. LOOK, THINK... I'm telling people around the world, Mr. bush and rumsfeld are documented to have murdered Americans at 9/11 to thwart Enron's impending CRIMINAL bankruptcy, while, I've repeatedly demanded their immediate arrest or execution by the lovers of Humanity, and don't you think that would make for a legitimate National news story? ("The Dabhol Working Group", cheney's secret energy meetings with Enron, public threats against God as Justice through the

Taliban, BND, September 9 war plan, Ahmad and Ahmed, and, AMERICAN FBI and CIA investigations.) Why not? Because I am relying on the evidence like a Police Officer does, as it is related to Justice indivisible as ourselves, THE ACTUAL FACTS JACK, and CNN doesn't truly want American soldiers to know who's dying for who. Myself, as the dreamy Saviour, am open for dialog, discussions with what we can measure and what we can not, debate to put to shame any even on the Nature of truth and deception, God, and this Universe, something CNN refuses to all American Patriots as worthy of deliberation. Like with economics, or basic high school maths. I've personally contacted the CEOs of both, CBC, and CNN, who have decided with intent to ignore Our concerns. Look, one of the first things bush did when he stole the Presidency, was steal fifty billion American tax dollars from our grandmothers, and don't you think that would make for your National news interest?, as a soldier worth giving your life away to bush for? You know, Mr. bush, the super evil, false deity, anti-Christ of biblical folklore? So unbelievably vile and putrid, the Son of Man as God's only true born Son, has to come down here to defend myself as all of Creation exists for this day. Mr. bush's american whores would work to decimate the Constitution and sacrifice humanity as Jesus on the cross, and ask US why?, without listening? CNN won't allow amerika to be America, but for to be misrepresented as slaves to die by corporate command, through the evil practices of the unholy and criminal dictates of Our Mr. bush Jr., traitor to US all. The Messiah asks the American people to stand up for themselves as a nation of individuals, to demand equal access to our rights for freedom, by reaching out to our neighbors as soldiers and police officers, to break through Our international media controls at CNN headquarters, that silence our concerns as the living to be justly represented. We demand the immediate firing of Water Issacson, and Sid Beddington, and Johnny wants Our voices heard now on our Public airwaves! A word of wisdom: I wouldn't tick off our King like this for much longer bushmobsters, you don't want to see the Family, US, losing our patience by getting really wrangled up with little corporate america's false deity of hatred towards the makeitwithart living John man. Johnny'd rather have American men find courage somewhere to stand up for themselves against being robbed of their generosity, but Jesus Christ all mighty, if there is no real Manly men in corporate america, we'll just have to come down daring to make all doze men look like the weak

twerpy cowards they are to be deprived so sleepy, as too afraid of their own little shadows to protect the once great American dream for Humanity. I thought I knew America, my father thought he knew America, and bush, the treasonous unelected fascist nazi mass murdering savage criminal, he don't know the America we believed we are of once.

Again, I can not stress enough to the truly proud and strong American People in the NRA, bush's criminal evil, and those who support him factually against Justice and Freedom in Congress and the Senate through the prepared before hand, unread Patriot Act, and for approving an unrepresentative blatant criminal war as clearly the evil doers, is really happening. CNN refuses to report in American survival interests, while we now know, bush and rumsfeld hold little reservation murdering American citizens or soldiers, Police Officers, Fire Fighters, if it then means they can steal further our life's purpose, and pursuit of happiness by fair play as Justice instills for all. Mr. bush openly lies as a demon to our world deliberately while smirking, counting on CNN at the National level, not correcting his treason against the entire human race, leaving US isolated as individuals, with potential doubt always ever present. But, we can indeed measure, and verify irrespective of bias or ideology. A fence that is seven feet tall, is a fence seven feet tall. And, when demon bush advocates the murder of innocent people to steal our life savings while destroying the living economy, people do actually suffer and die. Forget about my fanciful dreams to be a party King, and think about your own future and family as we exist in reality, dying unjustly at the hands of the anti-Christ through corporate cult america that sacrifices themselves even included as unworthly to what? They glorify dumminess, as an attribute for success, sacrificing our dying freedoms to be heard as the still barely living with concerns. Gee, and you wonder why they take half of life's investment to bankers as sacrifice for nothing...

I beg you, to forward this paper to all you know who should consider this for themselves.

The war criminals, Mr. bush, rumsfeld, and tommy franks, must be arrested or executed by True American Patriots immediately. The three traitors to humanity, that not only have advocated in your name, the murder of US as innocent people, but have also perpetrated the criminal acts. Leaving US to judge themselves, as they have judged, to be treated as they wish to continue

treating Ourselves, or Just you alone, with Rights granted by living as freedom to be so. God or no God. Mr. bush, rumsfeld, and tommy franks will immediately be arrested, or executed by True American Patriots to stop further bloodshed of our Humanity, as their real destruction of the American Dream for all as evidenced to be criminals under the Constitution, is found to be evidenced by all who understand so.

Glory be to God in the highest order, and if I should die tomorrow, I'll know I fought to the best of my love for living in a world where accidents do happen. If my life should grow unable to win our wager, and I lose all my fortune to the anti-Christ, Our Mr. bush Jr., my wanting for a better world will have never diminished. I'll know that I accepted to do what I could to the best of my giving. I can only hope these words, were enough thought as worthy of sharing to others, who believe in themselves to read this far in agreement with me.. I make a pretty damn good King eh?

Without risk, we would have nothing to be thankful for. Do not be afraid of living for freedom my friends, for most FBI officers support freedom for America, and so too do soldiers. Those who don't are generally weak, stupid, incompetent, and very very slow without God in their hearts, or will to be brave. Mr. bush and rumsfeld don't want to arrest the true culprits by following the available criminal leads for 9/11, and it doesn't take much figuring to understand why. We are all angered by Mr. bush Jr., and the contempt he and rumsfeld has shown for all those fallen murdered in America and Afghanistan.

And, just recently in Indonesia, a claim that al-Qaeda would attack a civilian target like the bushmob does advocate as practiced, and Laden repeatedly condemns, is again, with not even a thread of evidence offered on CBC to conclude such a statement that was made officially, shows a contempt for the rules of Justice to be practiced rightly by the ruler, and likely, staging the criminal investigation to go nowhere. Or, conversely, this sniper killing civilians in America, being a reflection of the Nation's true american bushmobster will to innocent good people going unreported elsewheres. The sniper is only a small taste my friends of bush's america as God is my witness. Mr. bush, america's false deity that corporate america puts all of every America's blind faith into as slaves without rights through Justice, had no interest in arresting himself and rumsfeld for 9/11, instead, with corporate

america backing bush's further criminal intentions, dropped over 4000 bombs on Afghanistan, including a 14 ton bomb on Kabal. (The brave Taliban, we remember, were supporting the arrest of the actual culprits responsible. A no no to the bushmob circle.) Or like tommy's death squads against Afghan children for Enron, Afghans, who bush and rumsfeld murdered close to

100,000

without CNN daily coverage, as blamed for 9/11 without following the evidence and closing investigations, practicing a war planned terrorist strategy existing at the WhiteHouse it did, two days prior without able excuse anywhere to be found. A junta dictatorship of pure evilness. How stupid and cowardly does an American soldier have to be, before they stand up as one in defense for their own family? Like the Taliban would have?

Look at the American military usenet groups to read for yourself regarding Our Mr. bush Jr., little of no disagreement is found with what I have written so far. Sure, corporate america will continue to try, by illusion, to have US all believe we are the minority to stand with conviction to protect ourselves as Humanity. However, the free communications that our internet provides, clearly indicate our truer positions as not entirely devoted to self destruction by ignorance, and criminal behavior against ourselves by dictatorship under the anti-Christ. Help destroy bush, and be loved by all as yourself to be cared for as heard from. As King, I am so much looking forward to retiring as soon as humanly possible, counting on yourself eventually to believe also, for a real better future by only simply trying to win the day for everyone.

Can somebody please help ourselves for living's sake?

Johnny Wizard

Bonus Track

Did you know, factually, no bull, the national debt accrued through the dilution as willed from Currency, is what is owed to the Nation, not the bankers? The creation of government debt is done by the willed devaluation of your earnings. See, it is a loan made in our names to the banker for ourselves. The public loan is actually made, when the banker is granted as doing so privately. It is not the magician banker who we must

pay for nothing, it is the banker who owes the nation as the loan was to begin with to be legitimized by any national policy. Wealth taken as not earned, comes from those who work honestly getting jipped. So, I propose a private banker swindle tax, to cover the administrative costs of running openly public funded gambling enterprises, with 100% cash payouts to actually thwart our falling economies, then, maybe the corporate news industry will see a responsibility to measure how much a lottery official pays themselves secretly with our banked interests accruing. Our governments should be providing what services we want, and are willing to pay for. Stealing from the desperately poor to pay even more as servitude to our further ineptness, is not only firmly established as illegal, but also makes no sense to most anyone I'd bet. Example: VLT's payout 96% as advertized, well not truly, the math as counted says 30% before expenses, but who of the general corporate TV intellect, has our time to figure it honestly? See, it is easy to understand a criminal offence is taking place, but because the corporate mandate is to keep the public more ignorant than Our Mr. bush Jr. on everything as a monetarily rewarding experience, (Larry King is a millionaire) the corporate cult products refuse to practice the interests of Justice for our values to protect our living standards. Accordingly, bush murdered all those New Yorkers for whatever ill reason (who really cares) as the anti-Christ, and corporations refuse to follow the story as evidenced impartially. Too much work for no pay, but the expense is risked by the loss of investment in Humanity to be defended. This is why CNN won't even defend their fellow corporate cult members who lost their human lives at the World Trade Center. Who really cares?, for the value of innocent life?, Your Mr. bush Jr.???

--

My Divine Right

Destroy bush and rumsfeld now American Patriot soldiers, fire fighters, and NRA members. We all notice CNN and CBC management refuse to allow open discussions on the documented facts outlining the cop killers, bush and rumsfeld treasonous behavior against the great American people, deliberately forestalling their criminal arrests for the mass murders of US as innocent in America. (Or even the recent broken elections in Florida.) Again, I repeat, I've spoken to corporate cult Americans, Leon

Harris, Bill Hemmer, Daryn Kagan, Sid Beddington, and Walter Issacson, just to name a few at CNN. All forementioned cowards, who would watch Americans be robbed and murdered, and do nothing to protect ourselves, are personally aware the bushmob was warned of the terrorist plot specifically, the fact that Laden investigations were blocked by the WhiteHouse, while the bushmob in Enron interests, developed a war plan with General Ahmad to invade Afghanistan, for an oil pipe line on a premise of blaming Laden for whatever without evidence as US innocent, a documented truth that existed also just prior to 9/11, a strategy confessed to fully implemented, demanding the bushmob not follow the criminal leads, that point to themselves as traitors. Like the bad bush act on 9/11. (emperors-clothes.com) No arguments are given against what I have spoken on, nor am I even being adressed by our corporate standards as inter-nationally responsible. Why? Largely, because, we are adressing what is as documented to be true, irrespective of ourselves as opinion, Justice infinite as indivisable, like the stars in the sky, while the corporate news machine is refusing to be our own as legit. Mr. bush, the anti-Christ, and rumsfeld did 9/11 to kill ourselves to steal Constitutional American values, with their silence only further implicating themselves to the doubters. Neat eh? (I'm also playing the Creator, who just wants to be at peace with ourselves as equals.) As for Iraq, it was the American administration that removed the inspectors from doing their, going very successful job, not Saddam, while the corporate media continues to allow cheney, the evil nazi fascist bassturd, to keep intentionally lying to American soldiers regarding the facts, like US Air Force Response, so the bush regime can throw away their lives as worthless, without meaning. (Agreed, on general terms, American soldiers are deeply ignorant and cowardly as cheney continually attests, but they are still preparing for death, and I understand many can read human, and haven't been hiding in a undisclosed location without a television, or newspaper these last few months.) The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly. 250,000 troops are planned to criminally invade YOUR humanity, against now near SIXTY countries, representing around 2,083,093,468 people and counting, (that also includes

freedom fighters, bikers, the Mob, and Jack), US, clearly aware of bush and tommy franks nazi plans, like in Afghanistan. To kill indiscriminately, while running death squads murdering innocent families, including your children. As for Saddam gassing the two guerilla groups called Kurds, who were fighting to murder in a war on behalf of Iran in 1988, labeled by American murdering nazi savage bush, Saddam's "own people", here is what the most definitive document on the issue states. It's a 1990 Pentagon report, published just prior to the invasion of Kuwait. Its authors are Stephen C. Pelletiere, Douglas V. Johnson II, and Leif R. Rosenberger, of the Strategic Studies Institute of the U.S. War College at Carlisle, Pennsylvania.

...

Iraqi Power and U.S. Security in the Middle East

Excerpt, Chapter 5

U.S. SECURITY AND IRAQI POWER

Having looked at all of the evidence that was available to us, we find it impossible to confirm the State Department's claim that gas was used in this instance. To begin with there were never any victims produced. International relief organizations who examined the Kurds -- in Turkey where they had gone for asylum -- failed to discover any. Nor were there ever any found inside Iraq. The claim rests solely on testimony of the Kurds who had crossed the border into Turkey, where they were interviewed by staffers of the Senate Foreign Relations Committee.

We would have expected, in a matter as serious as this, that the Congress would have exercised some care. However, passage of the sanctions measure through the Congress was unusually swift -- at least in the Senate where a unanimous vote was secured within 24 hours. Further, the proposed sanctions were quite draconian (and will be discussed in detail below). Fortunately for the future of Iraqi-U.S. ties, the sanctions measure failed to pass on a bureaucratic technicality (it was attached as a rider to a bill that died before adjournment).

It appears that in seeking to punish Iraq, the Congress was influenced by another incident that occurred five months earlier in another Iraqi-Kurdish city, Halabjah. In March 1988, the Kurds at Halabjah were bombarded with chemical weapons, producing a great many deaths. Photographs of the Kurdish victims were widely disseminated in the international media. Iraq was blamed for the Halabjah attack, even though it was subsequently brought out that Iran too had used chemicals in this operation, and it seemed likely that it was the Iranian bombardment that had actually killed the Kurds.

From another American government report:

"Blood agents [i.e., cyanogen chloride] were allegedly responsible for the most infamous use of chemicals in the war--the killing of Kurds at Halabjah. Since the Iraqis have no history of using these two agents--and the Iranians do--we conclude that the Iranians perpetrated this attack."

--

The New York Times reported on corporate America's war project SHAD, where during the Vietnam war, 4000 U.S. sailors were gassed deliberately by Republicans with gruesome biological toxins, including sarin.

As for proving that something is not secretly hidden by a nation as millions.. practically impossible! You can't ever conclusively prove that something isn't secretly hidden from perception by variables admittingly, unknowable. (For whom would be there to secretly watch the watchers?) When, and under what madness of bush tyranny as enslavement of our human species, would anyone be able to try standing up in Iraq or elsewheres and state, there is no Anthrax anywhere hidden secretly to kill bush, the false deity super evil anti-Christ with? Never I declare as the Son of Man, will evil bush escape the wrath of our fury as this Universe is, however, it is the supporters of bush's irrationality with our poltical will unchallenged by corporate standards, as these nazi monster, lawless American cop killers wish to use to terrorize 60 nations of almost 2 billion innocents without any evidence with. With an intent to use a paultry 250,000 criminal nazi soldiers mindlessly stupid on drugs probably, while corporate America won't give anyone two minutes nationally to speak on the clear strong factual evidence implicating bush and rumsfeld for murdering over 3,000 AMERICAN flag wavers in Yew York City? Destroy American traitor bush now!!! The sanctions against the poorest of poor in Iraq are also irrational. The Republicans state the innocent people of Iraq must be denied food and medicine to starve and die because, they are practically politically powerless to change their state to be attacked as the unrepresented, while stating Saddam, if he could, wouldn't help them survive as a nation as the Republican justification to terrorize millions, while cheney skirts U.N. sanctions to sell Saddam whatever supplies privately in secret? So the suffering of Iraqis, is rightly attributed on American terrorist activity by all Iraqis, as the direct cause, working directly against the Republicans publicly stated

purpose to commit such criminal intent. Example: If a well spoken father who may not like the policies of Saddam should go to the hospital with his child, he is told the bush clan wish his family death and suffering by American will for being born to our world in Iraq as human. The oil for food program however, is intelligently based, but it's purpose is defeated with the Republican atrocities to blindly murder US with. The demands for the betterment of the Iraq people through national oil sales, would make sense, if they weren't directly suffering under assault by the same terrorist network cancer cell that denies themselves inalienable rights to life as our own. Like pathetically weak as unrepresented American cowardly soldiers, who were provided no evidence to back up the evil bushmob's criminal allegations, then went murdering tens of thousands of innocent people in Afghanistan on the brink of starvation, instead of killing the documented child killer, heroin pusher, tommy franks, or bush and rumsfeld for 9/11 in America. Just on bush's behavior on the day in question, being left unreported by CNN dictates, should say much to everyone.

Joint Chiefs of Staff Chairman General Richard Myers told reporters at the National Press Club about Iraq's enormous unknown stockpiles of !secret! corporate american warfare weapons, "It does not take a lot of space for some of this work to go on. It can be done in a very, very small location," he said. "The fact that you can put it on wheels makes it a lot easier to hide from people who might be looking for it. So, yes we have evidence." Evidence of what? Nations with trucks should be nuked? Richard Myers is a nazi warmongering irrational fukhead, who wishes the murder of countless thousands, if not millions in AMERICA, who should be fired today. You see the nazi bassturd, you fire him, do you hear me People? AMERICA? Johnny...? Mr. Myers, your fired!

--

While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. Guardian Wednesday 7, 2001 - "FBI claims bin Laden inquiry was frustrated"

George Tenant must be questioned on these matters, and
his relationship to General Ahmad, then arrested
regarding his inaction on the insider stock traders for
9/11. If neither happen in a timely fashion, he too,
will be destroyed by US American Patriots for treason.

Excerpt From:

NY Newsday
U.S. Hypocritical on Human-Rights Abuses
by Marie Cocco

...
America's new business partner, Uzbekistan's president
is brutal, and very bad.

The State Department human rights report says the former
Soviet republic now "is an authoritarian state with
limited civil rights ... Both police and the
National Security Services routinely tortured, beat and
otherwise mistreated detainees to obtain confessions ...
Police also used suffocation, electric shock, rape
and other sexual abuse. Neither the severity nor
frequency of torture appeared to have decreased during
the year."

What increased was American aid. It tripled to $160
million, the payoff for allowing U.S. military staging
areas for the war in neighboring Afghanistan. President
Islam Karimov was welcomed to the White House. In July,
Treasury Secretary Paul O'Neill traveled to Tashkent and
praised Karimov's "efficient leadership."

Bush has singled out one despot for removal.

He says he has many reasons for invading Iraq. Without
a look at some secret new evidence the administration
may or may not have about Saddam Hussein's arsenal, it
is not possible to find truth. That is how the White
House wants it.

From a smart thinking, great commenting archive
sifting site somewhere titled,

Print Think

...
Bush planned Iraq 'regime change' before becoming President
By Neil Mackay, Sunday Herald

A SECRET blueprint for US global domination reveals that President
Bush and
his cabinet were planning a premeditated attack on Iraq to secure

'regime
change' even before he took power in January 2001.

The blueprint, uncovered by the Sunday Herald, for the creation of a
'global
Pax Americana' was drawn up for Dick Cheney (now vice- president),
Donald
Rumsfeld (defence secretary), Paul Wolfowitz (Rumsfeld's deputy),
George W
Bush's younger brother Jeb and Lewis Libby (Cheney's chief of staff).
The
document, entitled Rebuilding America's Defences: Strategies, Forces
And
Resources For A New Century, was written in September 2000 by the
neo-conservative think-tank Project for the New American Century
(PNAC).

The plan shows Bush's cabinet intended to take military control of the
Gulf
region whether or not Saddam Hussein was in power.

(snip)

The PNAC report also:

(snip)

- hints that, despite threatening war against Iraq for developing
weapons of
mass destruction, the US may consider developing biological weapons --
which
the nation has banned -- in decades to come. It says: 'New methods of
attack
-- electronic, 'non-lethal', biological -- will be more widely
available ...
combat likely will take place in new dimensions, in space, cyberspace,
and
perhaps the world of microbes ... advanced forms of biological warfare
that
can 'target' specific genotypes may transform biological warfare from
the
realm of terror to a politically useful tool'

--

Now, as for the corporate world telling US, we believe
Laden is guity without evidence: A reasonable person
doesn't have the justification to believe the
unsubstantiated verdict. This is why the fascists at
CNN propagandized, TERRORIZED, the American public by
falsely alledging that Laden threatened to nuke America,
or that he stated to murder any or all Americans like a
bush would. Laden, like Saddam, or Arafat never was

actually quoted to be that ignorantly stupid as a leader trying to communicate to the People, but for by CNN, and the sharon types regarding "Palestinians", as a lie to themselves to excuse their responsibility to ourselves as the humans. But EVEN IF TRUE, wouldn't make Laden responsible for every wrong doings the bushmob was actually responsible for, like robbing all Americans of their livelyhoods, unreported by CNN of course, to leave ourselves to fall victim by the bush regime as shysters pirating America, by shredding the Holy Constitution. However, Laden has skated near with the label "Jew", to be of the criminal, intolerant, offensive, fascist, bigoted jewish Israeli government, that imprisons or murders real Jews for being JUST that. Rabbi Hillel would be jailed by sharon in the israel of today. Wise Muhammad teachings cover this dumb Jew Christian thing well, as us all suffering by the illiterate evil dumbfuks who ignore ourselves, to steal our established values, while CNN, like Art Bell, forbids debate on their irrational falsehoods, refusing to protect the FBI, or the American flag through practicing censorship, while advocating murder, as Art Bell, the traitor, does almost daily, while hanging up every human caller. Next, CNN will be blaming ALL the poor and starving in the third world, for secret Pentagon frauds through the removal of the False Claims Act. As, the American nation contributes the least to the world in aid, in relation to the GNP. (The give and take.) 5 billion a month to not feed, but murder innocent people in Afghanistan? Destroy bush now, and be loved by all as God.

Hey, great! You've actually read this far. Say, listen... Google, for one reason or another censors my, and who knows who elses, posts for fear from the bushmob. The bushmob through Google 'Groups' has no problem with posts encouraging war crimes by bigots, but my rational posts regarding the nature of Justice, they have determined for US, is inappropriate, while bush prepares to criminally war our world to actually do so as an unelected mass murdering nazi savage. So I ask you to have faith in living, and give us your thoughts on this for yourself. When it's reposted, it makes it far more difficult to disect from public viewing, and gives the likely good people at Google, a viable excuse to not continuing to do so against our better interests. To comment this post with whatever position you may have regarding these important subjects, doesn't mean you agree that we are God, or I'm simply Johnny Wizard, but for open free communications regarding the true political state of ourselves worth being heard from.

Murdering innocent people for evil bush and rumsfeld to steal from ourselves, is a sacrifice in cowardice, I for one, refuse to stand for as the living. How about you? Public rebutals regarding my supreme stupidity are found in alt.sercurity.terrorism.

Thanks friend,

Johnny Wizard

Up to You

Look, american service personnel aren't even American enough to publicly defend their treasonous behavior against the good old red, white, and blue. Why? Cowards. We all know the bushmob has tirelessly worked to steal American service personnel's pensions, savings, and lives as worthless of protection, while counting on every American Soldier as Police officer, to not arrest the bushmob ourselves for 9/11 in New York, and the war crimes committed against the innocent in Afghanistan. Mr. tommy franks, the heroin pusher, tells dumfuk soldiers to kill innocent humans, and American soldiers aren't there anywhere to protect themselves? Sadistic nazi war criminal rumsfeld tells us all openly, he wishes to persecute those he knows to be innocent as a true nazi did. With all the blessings of sharon naturally. Why do American soldiers not protect America? Or know the Constitution as Holy? Too weak, stupid and cowardly I told you Johnny. They sit terrified, unwilling to stand for their country, while demon bush and rumsfeld decimate my economy with a regressive tax swindle, and in addition, criminal thefts through the Pentagon and Social Security, while publicly planning to war two billion people of

US

for no good reason but for sacrifice to corporate america's false deity, the anti-Christ, Our Mr. bush Jr.. While we now all also know, to not only rob, but murder thousands of Americans too, as fair play by the bush backed terrorist protocol, exposes Our Mr. bush Jr. as the most heinously evil demon humanity has ever witnessed factually. All evidenced and everything. So, will Americans live up to protecting their dying rights,

or will bush, the anti-Christ, succeed to further steal our God sworn, Patriotic duty to protect our own humanity? Will bush succeed in destroying civilization, or will we succeed in destroying pathetic criminal pirate nazi traitor bush, by the will of our own survival to continue as the People?

The godless corporations refuse me to speak publicly in our defence naturally, and people generally, seem to concur as stupidity, to sacrifice their own families purposefully for the banker buildings, while putting their religious faith into corporate dictates for slavery. I am not myself to be G in all worlds, nor, am I all dreams to be so undesirably. I am just a super human being as space time continuum, day tripping all alone, wondering about prospects for a world in which I can live with. I love life, and our ailing planet, but maybe, I did get this story line wrong somewhere, and got taken away too far in fantasy. Maybe, bush's humanity as it exists here in reality, is a nightmare not worth saving for yourself being.. CNN and CBC do work against our communities, documented everyday, by their continual refusal to cover our top priority issues. Corporate radio programs primarily, but not always, insist on only hiring semi-literate ignorant bigot whores as fascist degenerates, who insist on disallowing open communications, or learning to learn with the community, while advocating the murders of American service personnel and innocent civilians, as a patriotic duty to not live up to our personal responsibilities as a member of society. It is all up to ourselves to fight for peace, or be slaughtered on Coast to Coast's alter of apathy to not care so for living justly. We are not at war with ourselves, or a third of humanity as cheney and bush repeatedly claim, but with the warmongers, who wish US all harm, to steal our human values of love and understanding, good will, and compassion. With evil bush, cheney and rumsfeld figuring, there is no way for US all to stand up for yourself, under the banner of Justice as freedom for all. Well, I say, nuts. If God can do it, and I can do it, so can you true! Help yourself up please won't you do it as us living already? Or, maybe for beer?

Please do not allow the bushmob to murder millions. The fears to stand proud as Americans, are the fears to stand proud with Love as ourselves being the Universe. Boo! That wasn't so scary, was it? Again, traitors bush and rumsfeld must be immediately arrested for 9/11, and tommy franks, for war crimes in Afghanistan. Like Now.

Always forever, the one and only,

Johnny Wizard

All at Once

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other.

So, Mr. bush Jr. tells you, we're either with us, or with the terrorists. Hmmm. As a member of the general public, bush, as himself, has no more rights to speak openly as the person I am, and therefor, I will except his proposal on equal grounds to communicate freely. So, I'm either with yourself as a would be, could be anyone is, or your factually documented as an unbelievably super evil, anti-American mass murdering fascist dictator, war criminal terrorist recruiter, as the, golly gee, actual, must be for real, warmongering anti-Christ from this Book by John then eh?... No? You, what do you figure Mr. bush Jr.? Can you hear humanity calling you out to publicly explain your vast stupidity? Politics has it as our mutual understanding, loyalty to life through law as living is civilization. Law, as is the only true measurement of freedom for ourselves to know so. Are you alone on this too? Ha, er... um, anyway..

Nobody would want our lives or freedom stolen, simply by living to not deprive those same rights from others. So we form Governments, and have loyal police officers to practice our will as ruled out to the best of our ability.

We need a new national news format to make for this information age approaching, that sets a high priority on ourselves as concerned about where we are going. The Constitution is not just a jumble of tossed blurbs, telling of a day when people didn't care for living as America in spirit also, the Constitutional rights of Justice stand strong through good reason, and are easily defended up at the national news desk, we're sure to say eventually, if we only had the show for something. While we wait, corporate america prepares to never have Chomsky aired, or legitimate critics as the voices for freedom by representation, to gain ourselves progress as we would normally on Watt's happinin for real man. You know, the awesome power of communication, and Chomsky, being a best seller over and over like that, or Ron Paul being a Republican citizen, committed to working for Americans as a true Patriot would under the flag? The

Constitutional rights of Justice stand strong through good reason. Ashcroft is truly incompetent. His failure to grasp why a democracy would choose to treat all people fairly, as duly protected with a system of laws practiced to find governing with, leaves us instead as, the ancient bushmob vision of injustice against ourselves that he fails to confess as us innocent until understood otherwise. The crusades were a lesson we never want to be learning over, with Our Mr. bush Jr. at our wills demanding a crashed course we've done and learned from already. I think Ashcroft's personal turn to criminality for America, has to do with sabotaging that FBI investigation, and the fair play consequence of us People arriving to communicate him to justice on behalf of the Nations with questions that need immediate answers. Sabotaging the FBI was not due from insufficient funding, or failure to connect the dots ever as investigators.

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other. Right? Save America for your own sake Americans! The strength is within ourselves to make this a better world for living.

As you are,

Johnny Wizard.

From: TOMPAINE.com

Is It Not True?
Questions On Iraq From A GOP Congressman

Ron Paul is an M.D. and a Republican Member of Congress from Texas

Editor's Note: Texas Republican Rep. Ron Paul read the following to the House of Representatives, September 10, 2002.

Soon we hope to have hearings on the pending war with Iraq. Here are some questions I would like answered by those who are urging us to start this war:

1. Is it not true that the reason we did not bomb the Soviet Union at the height of the Cold War was because we knew they could retaliate?

2. Is it not also true that we are willing to bomb Iraq now because we know it cannot retaliate -- which just confirms that there is no real threat?

3. Is it not true that there are those who argue that even with inspections we cannot be sure that Hussein might be hiding weapons, and at the same time imply that we can be more sure that weapons exist in the absence of inspections?

4. Is it not true that the U.N.'s International Atomic Energy Agency was able to complete its yearly verification mission to Iraq just this year with Iraqi cooperation?

5. Is it not true that the intelligence community has been unable to develop a case tying Iraq to global terrorism at all, much less the attacks on the United States last year? Does anyone remember that 15 of the 19 hijackers came from Saudi Arabia and that none came from Iraq?

6. Was former CIA counter-terrorism chief Vincent Cannistraro wrong when he recently said there is no confirmed evidence of Iraq's links to terrorism?

7. Is it not true that the CIA has concluded there is no evidence that a Prague meeting between 9/11 hijacker Atta and Iraqi intelligence took place?

8. Is it not true that northern Iraq, where the administration claimed Al Qaeda were hiding out, is in the control of our "allies," the Kurds?

9. Is it not true that the vast majority of Al Qaeda leaders who escaped appear to have safely made their way to Pakistan, another of our so-called allies?

10. Has anyone noticed that Afghanistan is rapidly sinking into total chaos, with bombings and assassinations becoming daily occurrences; and that according to a recent U.N. report the Al Qaeda "is, by all accounts, alive and well and poised to strike again, how, when, and where it chooses?"

11. Why are we taking precious military and intelligence resources away from tracking down those who did attack the United States -- and who may again attack the United States -- and using them to invade countries that have not attacked the United States?

12. Would an attack on Iraq not just confirm the Arab world's worst suspicions about the United States? And isn't this what bin Laden wanted?

13. How can Hussein be compared to Hitler when he has no navy or air force, and now has an army one-fifth the size of 12 years ago, which even then proved totally

inept at defending the country?

14. Is it not true that the constitutional power to declare war is exclusively that of the Congress? Should presidents, contrary to the Constitution, allow Congress to concur only when pressured by public opinion? Are presidents permitted to rely on the United Nations for permission to go to war?

15. Are you aware of a Pentagon report studying charges that thousands of Kurds in one village were gassed by the Iraqis, which found no conclusive evidence that Iraq was responsible, that Iran occupied the very city involved, and that evidence indicated the type of gas used was more likely controlled by Iran not Iraq?

16. Is it not true that anywhere between 100,000 and 300,000 U.S. soldiers have suffered from Persian Gulf War syndrome from the first Gulf War, and that thousands may have died?

17. Are we prepared for possibly thousands of American casualties in a war against a country that does not have the capacity to attack the United States?

18. Are we willing to bear the economic burden of a 100 billion dollar war against Iraq, with oil prices expected to skyrocket and further rattle an already shaky American economy? How about an estimated 30 years occupation of Iraq that some have deemed necessary to "build democracy" there?

19. Iraq's alleged violations of U.N. resolutions are given as reason to initiate an attack, yet is it not true that hundreds of U.N. resolutions have been ignored by various countries without penalty?

20. Did former President Bush not cite the U.N. resolution of 1990 as the reason he could not march into Baghdad, while supporters of a new attack assert that it is the very reason we can march into Baghdad?

21. Is it not true that, contrary to current claims, the no-fly zones were set up by Britain and the United States without specific approval from the United Nations?

22. If we claim membership in the international community and conform to its rules only when it pleases us, does this not serve to undermine our position, directing animosity toward us by both friend and foe?

23. How can our declared goal of bringing democracy to Iraq be believable when we prop up dictators throughout the Middle East and support military tyrants like Musharaf in Pakistan, who overthrew a democratically elected president?

24. Are you familiar with the 1994 Senate Hearings that revealed the United States. knowingly supplied chemical and biological materials to Iraq during the Iran-Iraq war and as late as 1992 -- including after the alleged Iraqi gas attack on a Kurdish village?

25. Did we not assist Saddam Hussein's rise to power by supporting and encouraging his invasion of Iran? Is it honest to criticize Saddam now for his invasion of Iran, which at the time we actively supported?

26. Is it not true that preventive war is synonymous with an act of aggression, and has never been considered a moral or legitimate U.S. policy?

27. Why do the oil company executives strongly support this war if oil is not the real reason we plan to take over Iraq?

28. Why is it that those who never wore a uniform and are confident that they won't have to personally fight this war are more anxious for this war than our generals?

29. What is the moral argument for attacking a nation that has not initiated aggression against us, and could not if it wanted?

30. Where does the Constitution grant us permission to wage war for any reason other than self-defense?

31. Is it not true that a war against Iraq rejects the sentiments of the time-honored Treaty of Westphalia, nearly 400 years ago, that countries should never go into another for the purpose of regime change?

32. Is it not true that the more civilized a society is, the less likely disagreements will be settled by war?

33. Is it not true that since World War II, Congress has not declared war and -- not coincidentally -- we have not since then had a clear-cut victory?

34. Is it not true that Pakistan, especially through its intelligence services, was an active supporter and key organizer of the Taliban?

35. Why don't those who want war bring a formal declaration of war resolution to the floor of Congress?

No Telling

Destroy bush and rumsfeld now! Look, the terrorist network runs out of CNN and CBC, both willingly advocate criminal intentions against our community interests, by censorship and dissin' information. (Video Lottery Terminals eat at our souls, and destroy our economy. 100% payouts must be demanded, anything less, is a perpetration that does not stand up to sound fiscal management.) The management of the networks, Walter Issacson and Sid Beddington of CNN, Israel Cinman, Robert Habinovitch, and David Cochten of CBC, are all our humanity's enemy, as the true harborers of terrorist activity, evil scum to US all. These monsters refuse to allow reporters open public discussions on the true current political state of OUR affairs, protecting their false deity, the anti-Christ, Our Mr. bush Jr. from immediate arrest or execution, for perpetrating 9/11, now getting away with open deceit as unchallenged with OUR facts, perverting America's democracy into in junta dictatorship. CBC and CNN play our nations as unworthy of deliberation, while censoring OUR ELECTED officials. Like the recent Florida election. Or those in the American government, responsible for managing to barely protect Social Security, that bush has now illegally had removed from their jurisdiction, while silently telling all Americans, he'll manage to rob from us in secret without telling anyone. Arron Brown, like Larry King, feels the Social Security of our soldiers is unimportant as newsworthy, nor their lives as worth protecting. Or how about when bush stole 50 billion tax dollars from American families, and stated, he wasn't accountable to the people as a legitimate leader? No fukin kidding! Unaccountable to no one evil nazi murderer bush thinks America will not stand up for ourselves without godless national news coverage, nor will American men be brave enough to stand strong to protect their own bereaving families. Again, the bushmob not only threatened directly the Taliban with war in July 2001, for not siding for Enron's interests, but was also caught with the 9/11 war strategy fully developed two days prior to the event in question. Why would Laden, or the Taliban give bush a justification to follow through on his evil nazi threat? How could the irrational, illogical, lawless criminal dumfuk bush, have attacked the students

of Afghanistan, then let tommy franks run death squads to murder defenseless children, without 9/11 I ask you? Gee, the Taliban sided for the better pipe line contract for the interest of their nation, and turned down bribes to sell out their brethren, therefor, the bushmob as Enron can steal and murder anyone they want to because, Americans refuse to uphold their own Constitution, of which, true American Patriot Soldiers it was rumored at one time, used to actually give pledge to with their lives if necessary in protection, while crying through a salute to the flag, that bush and ashcroft now spit on deliberately, challenging US to come down there ourselves personally, because Americans, are so unbelievably cowardly! Again, the pension money stolen from American families through Enron is sitting in the Cayman Islands, and the biggest crook of them all is Thomas White, bush's Secretary of the Army. (Thomas, as Secretary, does the financial paper work for the US Army, in case you didn't know.)

As for evil dumfuk rumsfeld's statement to justify our unjustified incriminations, "The absence of evidence is not evidence of absence.", no it's not, nor is it impossible that every real man alive will destroy rumsfeld ourselves, before he continues to murder us all irrationally for possiblilities we could maybe might do. Mr. rumsfeld tells us he would without reason to claim so, steal and murder from ourselves as established innocent, of which he himself, would even contend as the criminal! To have rotten rumsfeld tell us he has a belief in our names to persecute innocent people, because he can't substantiate any evidence factually, gives himself no honest justification to hold such a position against our better interests. So goes to show, rumsfeld, the nazi, is a war criminal! Then, of course, there was the statements rotten rumsfeld made, that enrages every loyal member of the NRA when communicated clearly, where rotten rumsfeld stated, that of the Taliban prisoners held illegally at Guantanamo Bay, that even if they were honestly tried, and found innocent in an American court of Law as judged by our peers publicly, rumsfeld would still fight our humanity as a terrorist, and refuse their release as farmers with beards, or protectors of our communities. Or like ashcroft said about terrorists not deserving the same Constitutional Justice protections as everyone else, like facing their accusation in a public court of law to defend themselves against alegations made in our names. What is it then nazi bassturds, is ashcroft saying people in other nations should be terrorized, or is he saying american

criminals are getting away unaprehended?

Destroy rumsfeld now American Patriots!

www.washingtonpost.com/ac2/wp-dyn/A38441-2002sep4?language=printer

To persecute our humanity for no other reason, but for rumsfeld's paranoia with what is possible, or fear of reprisals for 9/11 by real American Patriot Soldiers, would mark himself openly as a terrorist to everyone, threatening US all with murder for crimes he says he has no evidence to back up as alleged. Mr. rumsfeld, like ashcroft and bush, is a traitor to the Constitution of America, and every living soul in this Universe! While WE know, he didn't go to the NMCC on 9/11, where he knew, and was reminded, he was supposed to be. While WE know, there was no public evidence linking Laden or the Taliban secretly either according to the British Parliment, at the time he ordered the blanket killing of Afghans, (who as a Nation, like "Omar the Just" were in support of following the criminal leads to arrest the true evil doers, (true American Justice!)), as the reason offered to stop all investigations by hiding most of all the evidence that would jeopardize his, and bush's security as demons of pure nazi filth, traitors to US all as the living to be humans. Like the eight black boxes, cockpit recordings, testimony from the ATC, FAA, NORAD, the Air Force, Building Seven, the FBI (Rowley and General Ahmad) and the CIA (Insider trading on the airline companies testified to not be connected to Laden). Or like flight manifests, with the alleged high-jackers who boarded without tickets, using stolen names of people either still alive, or mostly from Saudi Arabia. Gee, why would, would be terrorists steal passports they didn't need, of American trained Saudi national pilots, if they didn't want to be discovered as American trained Saudi national pilots? Why plan to high-jack planes from faraway Boston? Why did the Ladens fly out of America at bush's request right after 9/11 from Boston too? Hmmmm. How is it possible for a terrorist to board a commercial plane without purchasing a ticket? AND, how would the two fbi officers (James Woods), and three cia officers responsible for 9/11 investigations, be able to conclude the false names of the suspects, if they weren't on the manifest? Destroy bush now and be loved by all as God!

Yours truly,

Johnny Wizard

All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as

the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of aluminum pipes that could be used in the manufacture of a

centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community. We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks

in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to
find out what the ultimate disposition of these weapons programs
are and if Iraq has no weapons of mass destruction program, thank
goodness, we just diffused a war. And I think that's a good thing
worth trying to do.

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both
the CIA and Israel that Middle Eastern terrorists were
``planning to hijack commercial aircraft to use as
weapons to attack important symbols of American and
Israeli culture.'' This intelligence reportedly came
from Echelon, a high-tech electronic surveillance system
used by the intelligence agencies of several nations to
glean through electronic communications for certain
keywords. It was first reported by the German daily
newspaper, Frankfurter Algemeine Zeitung on September
13. Its sources were reportedly from the BND itself.
(Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert
11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin
1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global -
Intel, the original source of information actually came
from Israeli Mossad agents operating in the U.S. who
had infiltrated al Qaeda. According to his account the
Mossad also informed British and Russian intelligence
about the attacks, who then in turn notified the CIA.
Thomas's sources are allegedly informants within the
Mossad itself.

As of April 22, 2002, no challenges to this information
has been reported. ...

--

Also, it has also been alledged that the German
embassador Ischinger, On Monday 6, August, 2001, had met
bush personally, and during that meeting, the Bundesamt
fur Verfassungsschutz [German domestic secret service]
and BND [Bundesnachreichtendienst, German foreign secret
service] finding was once again reiterated in person.

--

! ! ! ! N E W S F L A S H ! ! ! !

September 12, 2002 NewsNight with Arron Brown

Scott Ritter - "The job is to disarm Iraq, not to penetrate Iraq to take advantage of the unique access enjoyed by the inspectors to go after Saddam. The United States took advantage of the information we collected, and also used the weapon inspections as a Trojan horse, inserting a signals intelligence operation which was used to collect information about the security of Saddam in a manner that was totally inappropriate, and had nothing to do with disarming."

Richard Butler - "I was in meetings with United States officials. This isn't some great Revelation. Where I rejected what they proposed, on this ground, That my mandate was to seek to disarm Iraq. And were our program, to be used for other purposes, to seek to change the government in Iraq, or national purposes, the interests of the United States, then THAT WOULD HAVE VESICATED, SHREDDED, WHAT WE WERE ABOUT."

Scott Ritter - "On seven separate occasions from November 1997 to August 1998, with inspection proposals signed by Richard Butler, authorized to proceed in Iraq, the United States intervened to manipulate these inspections, stop them all together, to alter their timing, Richard Butler succeeded to this"

Mr. Butler, did not refute, with his repeated opportunity, Ritter's documented as fact, with the paper work to prove it, allegations of american corruption succeeding, in fact, repeatedly, Butler refused to answer the direct question, on wether, he, Mr. Butler, abdicated his responsibility to our world community, and sided instead to bow as a fascist coward to CRIMINAL american sabotage regarding the U.N. resolution inspection's process.

Gee, no wonder Saddam has concerns for his people...

A worthwhile note also, is during CNN new briefs on Saddam's recent comments, never once was it said, that Saddam alleges to our world, bush murdered New Yorkers for financial gain, as he did factually claim, and I do too, as the evidence is unmistakable. Mr. bush, the super evil anti-Christ, and too, Mr. rumsfeld, the sadistic nazi dumbfuk, must be immediately arrested, or executed by Patriot American Believers, so we may begin to get this PUBLIC court case regarding the facts on the mass murder of AMERICANS under way. I wanna lead the prosecutor's team!!! (I am now officially excepting book offers.)

--

Here To Tell It Like We Is

So, the bush regime knows that Saddam has no nukes, but as any person could, maybe at sometime in the future would target general populations, of which Saddam has stated to be rationally stupid, immoral and evil. A tactic that bush, as america, says without pause to reflect, would do so in our stolen names is plausible with him in power as a degenerate. The bush regime also thinks Saddam does indeed have biological weapons, and has so for decades but never used them, as the only affordable balance to the militarization of the region. Namely, to counter the Israeli government's corrupt political position of American funded bigotry and lawless behavior, on claims God gave them a right as criminals apparently, to deprive Christians a right to live justly, to own property, or use public roads even, and that most of Iraq should too, be stolen by force like hitler did, as hitler did measure also, all Jews, by the same level of intolerance, ignorance and barbarity sharon does of US as Palestinians, you know, Catholics, Muslims, Jews and Atheists, absent love for ourselves as understanding, godly, and principally innocent until proven otherwise. Mr. sharon is not Jewish, nor is anyone else allowed to practice as such in the Likud party. But anyway, Saddam is no Saint, however, no evidence exists that Saddam has ever used bio warfare weapons on his own people, while Our Mr. bush Jr., is documented factually, as a murdering demon of evilness clearly paraded before ourselves by corporate command, as a supposed representation of OUR civilization's true will. As Our Mr. bush Jr. works diligently to destroy our lives through fraudulent means, counting on US not trying to save Ourselves by following the truth to set US free. A Republican who without laughing, demanded law enforcement agencies not follow the ample criminal evidence to arrest the true perpetrators of 9/11, but instead, urged the closing of investigations, while top secretly, implicated bin Laden without evidence he couldn't divulge, of which the British government ended up doing so for the love of our selves, comprising of only, general maybe if's, of which only could, can, and does, jeopardize bush, cheney and rumsfeld by taking such a secret, now public position against our interests to kill us as the innocent with. Which is truly why bush rumsfeld and cheney are warmongering as despicable savages. 5 billion dollars in humanitarian aid is being blocked by the bush regime to enter Iraq, like food and medicine. The bush regime demands children be starved and not receive treatments for ailments, such as aspirin for headaches, or as

cancer from the devastation the families of Iraq are still suffering through, since the last time a bush's american criminal military force dumped tons of radioactive waste in the region, while murdering indiscriminately ourselves as anyone, because principally, toxic American soldiers, like the American people, hold the title of the highest illiteracy levels of the developing world, which brings them as consequence, the worst health care providers to themselves as discounted, corporately mandated as unworthy to understand their own behaviors, so they can be even further rooked as shysters. Over two million people have died directly because of American aggression against the practically defenseless in Iraq, who the bush regime even claims, have little of no power to change the political landscape, based in loose tribal ethics as protections, that has been as such, for approximately 4000 years. And as American traitor war criminal rumsfeld proclaimed, since american aggression has continued against Iraq over the last twelve years, so too, has their economy been devastated, and as consequence, the attraction to keep the more literate as wealth driven from remaining, has waned. But what can bush offer Iraq, indeed to our world my friends? Just murder US people for stolen cash profit, is clearly his only motivation, as a tyrant dictator far worse than Saddam has ever been. Mr. bush indicates he knows nothing of economics, or the important function of law to protect our societies, so what if he should kill Saddam, and maybe a million Iraqi people, then what? He hasn't thought that far, and clearly, due to his evilness we witness daily, couldn't care less. CNN and other corporate professionals refuse to tell the blood sucking, carcinogenic, corporate American real fast news blips, of causes they as a nation in total celebrated televised ignorance, have committed against the Iraqi struggling to survive People, and indeed around our world likewise. As was the bush regime's unreported support of the overthrow of democratically elected Chavez in Venezuela, who incidentally, as one of the very few, holds a perfect human rights record, unlike America, who is the only nation, the World Court has convicted by factual documented evidence, to be a terrorist state. There is no record of Saddam murdering millions of Iraqis, while targeting innocent children, but there is to the illegitimate bush family, and nazi soldier tommy franks intentions, the most despicable savage to ever don an American uniform, who would now have us all believe, such a evil strategy of criminal wrong doing, is the only option, to better the lives of

those who barely survive from American oppression in Iraq as it is. What form of governance would bush be suggesting? Would it be like bush squandering almost 7 trillion dollars in bad business decisions for our futures as he has set forth for America already? Or maybe something like the new criminal heroin pushers in Afghanistan as foreigners? Costing the American nation, who holds the title of highest rates of human depravation in the industialized world, and highest percentage of imprisoned per populace in all recorded history, 5 billion dollars every month to prop up sales in narcotics, and terrorist handbooks? Where political opponents who criticize the Karazi regime are murdered, for factually claiming the political aims of Karazi are not representing US people as the children? Or as evil bush, who would boldly lie to the face of God, that there were no girl schools in Afghanistan under the Taliban, while secretly thanking sadistic scum bag American traitor, mass murdering savage, wimp ass drug dealing coward tommy franks, for specifically targeting those very schools, women reporters, Mosques, red cross units, literate tribal leaders, men with beards, and children, while labelling all of Our humanity who would fight against injustice his enemy? Or that bush would dare still attempt to get away undamaged by the real men of this world, to spout his venom hatred for humanity to what must be drugged out to be so cowardly American soldiers, by lying to US as the demon of pure evilness we all witnessed, that heroin cultivation wasn't factually outlawed by the Taliban officially following Allah, leaving no position as God's will to back track politically on later? American military analysts, including the CIA and former secretary of Defense, William Cohen, claim Iraq is no threat to it's neighbors, as so too, does no nation in the region support bush's warmongering. In Congressional hearings last week, former UN arms inspector Scott Ritter courageously stated what many Americans believe, but rarely if never mentioned by corporate news standards as the will of the people, "A handful of ideologues have hijacked the national security policy of the United States for their own ambitions." Ritter insisted Iraq was no threat to the U.S. or the Mideast, and later offered that cheney be forced by Americans on mass, to offer evidence to his bogus, make believe accusations, that he wishes to use to actually murder thousands, if not millions of US REAL PEOPLE. Our axis of evil, bush rumsfeld and cheney, do not want renewed inspections of Iraq, they only want war to murder ourselves, and to create instability in our world through fear to prevent

their rightful capture for 9/11, while we all are expected to sit back as corporate standard fascist cowards, to pretend bush was actually elected as President in America, because actual poll counts were forbidden to be publicized, therefor, he may have won our approval to use nukes against anyone for whatever. With CNN, the Commie Nazi Network, telling us we as the civilized are also convicted to poll, that evidence is no longer a requirement to convince US who is criminally insane, in this nightmare of criminal bush family evilness, hell bent on destroying your world, and everything WE, as The People, have struggled so hard to protect. It would seem any world threat of terrorism, would be surely from a nation like bush's America. A cowardly nation that demands we as humanity, be deprived the guiding principles of Justice like they in weakness had abdicated as no longer their own as unfairly represented, leaving as slaves the bush regime to rob us all of our Freedoms, as a rule of Law instills such as in the Declaration of Independence, the Bill of Rights, and the American Constitution. All now trashed by Ashcroft, as clear criminal intent to obstruct Justice as the American dream for everyone.

E-mail this to somebody for Christ states,

yours truly,

Johnny Wizard

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters

told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

Weak Pathetic Coward Nazi bassturds

American soldiers are weak pathetic coward nazi bassturds. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and

thefts against the innocent, because soldiers are too weak as colateral damaged disfunctional illiterates, to stand up proud for the American people as equals. Under the Bill of Rights, as justice for US all, truly brave and strong, as the saviours of ourselves to be free as individuals, humanity, WE will never surrender as slaves to the false diety, anti-Christ, Our Mr. bush Jr.. The lawless nazi facists mass murdering tyrants, Mr. bush, bogus cheney, and rumsfeld, are the ememies of America as the free world, who as WE, will no longer except lying down to the continuing corporate silence of surrender, to take us as dead and forgotten, as not worth our time of day, to stand for yourself, as a living breathing human.

Johnny has spoken to several hundred at CBC and CNN including the CEO's of both, regarding the evidence that no one has yet, suggested they find any contention with. Destroy bush and rumsfeld American Patriot Soldiers, and be loved by all as family.

Destroying the evil doers

I am reaching out to you regarding an extremely serious life and death, Heven or Hell kind of development, that I can only encourage you to investigate on your own to form your own conclusions, but firstly some background. As you should already be aware, NBC was recently provided top secret, presidential directive, war strategy documents, outlining a plan to invade Afghanistan, with a pre-requisite strategy, of blaming Bin Laden for a crime, but providing no evidence, existing as these documents did, two days prior to 9/11. When NBC contacted the WhiteHouse regarding these revelations, not only were they compelled to admit the paper work was legitimate, but, what can only best be described as pure evil stupidity disguised to nobody, confessed to fully implementing. That's right. Confessed to implementing a strategy that demands the bush regime not follow the actual criminal leads, to arrest the true perpetrators, for a crime that hadn't even yet taken place, but that bush was prepared for, to gain access into Afghanistan for bush and his Enron friends to rob even more futher from US all. (According to the FBI and the CIA, al-Qaeda is headquartered in Saudi Arabia.) In addition to this, if you remember when bush told us he wasn't going to rely on the criminal evidence persay, but knew top secretly better than everybody else does, that for sure Bin Laden was guilty, while working to close 9/11 investigations and seizing as much evidence from law enforcement as possible?

Well, the British government, God love'em, has now made those documents public, and guess what? There is no evidence present in those papers, and the only security they seem to jeopardize, is that of our Mr. bush Jr.'s. Also, the FBI now inform us, that bush passed secret directive, W199I, just prior to 9/11 forbidding law enforcement officers from pursuing Bin Laden and al-Qeida investigations, of which John O'Neil, head of investigations for the FBI resigned in disgust over, while also being informed by the BND (Germany's CIA), that on June, 6th, 2001, they contacted the bush regime stating that they were highly aware of a mossad al-Qeida terrorist plot, to highjack American airliners to be flown into land marks. You know... Satan forbid, bush would of been compelled to actually have to arrest Bin for a criminal offence, (as we do remember the Taliban offered.) thwarting his intentions, of watching Americans been murdered in the thousands, so he could then gain access into Afghanistan, prop up the northern alliance, who still practice Sharia law, with the bush bonuses of selling heroin, and most importantly, building this bush Enron LNG pipeline to rob even more further from US all. All these points stand as documented facts, not opinion, speculation, conjecture or theory. However, CNN's blitzer, the nazi sympathizing fascist coward, refuses to inform Americans about the bush regime stealing their livelihoods, while propagandizing the American public, that they instead, should as cowards, watch the bush regime murder millions more in their own names, while stealing pensions and life savings from their own families without legal representation. I call upon all peoples, to recognize CNN's refusal to live up to their responsibilities to protect the American flag, and upon all it represents, Freedom, as is, Justice for US all. Where a person accused of a criminal offence without evidence, is clearly innocent, and where real soldiers, would now fully support following the criminal leads, of which there is plenty, to arrest to true perpetrators, of the 9/11 attack upon our better judgement. How did al-Qaeda sabotage the Moussaoui warrant? Mr. bush and rumsfeld must immediately be arrested, to face trial for crimes against our humanity, taken down by true American Patriots, committed to democracy, and the protection of ourselves slaughtered by CNN as worthless on their alters of apathy, and misgivings about our winning this war for everyone.

(links snpd)

What do you know?

Hi everyone, so, what do we know? Mr. bush made plans to attack Afghanistan just prior to 9/11, for not signing a contract with CentGas, which would have given Enron access to LNG. For without, they as members of the bushmob, would face their impending criminal bankruptcy, revealing they were stealing from any as all Americans, their life savings. Without the illegal war against the struggling to be better Taliban, the bushmob would have been exposed without fear by America, and soon, we would have all faced a bright new day understanding further, the importance of Justice for humanity as ourselves deserving not to be robbed from.

None of the evidence indicated Afghanistan, and by bush running without judgement with his plan made prior, showed a willingness to not apprehend the true culprits, while warmongering a fury in bigoted corporate America, to attack our humanity without thinking, or understanding the reasons why the American Constitution holds still respect, for it's wisdom granting protections to the people as we are, individuals with rights to be represented as equals under the law, in defence against the evils of humanity, of which, our Mr. bush willingly as a demon, works to destroy US as the too weak and cowardly as terrified to know better to speak up for themselves rightly.

We now have learned just recently by NBC, there was a thought out, secretly planned arangement two days prior to 9/11 regarding the Taliban being asked to hand over Bin without any evidence, knowing full well, that under such an agreement, the Taliban, believing in God and finding a Justice system through communicating, as they had during the Clinton Administration, would refuse rightly again, outlining the anti-Christ's entry to commit crimes against our humanity, with a plan that didn't need ajusting to falsely implicate the innocent of our world as Bin still is. Then Mr. rumsfeld. Mr. rumsfeld, the murdering nazi savage, on the one hand, told us the Taliban would execute their own men for leaving the fight to protect our world from heroin, and on the other hand, says they need with everyone else to be murdered without any questions asked. Ever I guess rumsfeld the dumbfuk figured. (Forgive my language Mr. Brown, but I'm supposed to set a few bad examples.) As an evil bush mobster, rumsfelds incompetent, like really dumb, and a mass murdering savage criminal, unable to cover his treason against the American people in New York City, now trying to bribe America's commanding officers to sell out American interests like tommy franks. We are all wondering just what are the percentages in the American forces regarding the

protection of America, the Nation? Or will they be like the northern alliance still as ignorant and evil to rob and murder further from our humanity, Justice, freedom, and liberty? Americans, like our corporate news services in Canada also, are expected to not report the murder of ourselves in Afghanistan, excusing their contempt for themselves as God, to name ourselves, demonized willingly trying to take you to sacifice your rights as censored for bush to steal from our families escaping prosecution. I call news agencies, who as individuals, see no responsibility to ourselves as community. I recieve only refusals as excuses to deny ourselves equal access. Why? They, like deer caught in the headlights, or swimming in the, it feels so good to be taken banker advertising, leave us to only death to others they see not as themselves, be it thousands or millions, than allow me to enter as simply a concerned man named John to speak factually as documented, calling for the immediate arrest of bush and rumsfeld the murderers, to escape further bloodshed. Or, I'm baselessly insulted without argument, ouch, or dismissed as alarmist for screaming for the stopping of the murder of US as really dying, while my, how am I going to survive job prospects go vanishing, because of my excellent research abilities on behalf of the humans.

CBC in Washington just refuses to report as Canadians.

Figuring what? If they just leave me to go it alone, It'll be left looking only stupid? Mankind? Those that struggle to stop me from speaking truly, do so almost always without stated reason, while advocating, you, my reader, to sit back and watch others sitting back like would be yourself without thinking, to be robbed your freedoms as earnings by the bushmob shysters. Check out the advertised to be a public bulletin board at reston.com, post something critical of the nazi, our Mr. bush jr., if there is something not yet removed by the censor, to witness for yourself, what it means as american, to sacrifice your soul for evil. The corporate cult professionals expect us general masses to be sacrificed for bush, the evil anti-Christ. This is why again, I call on the rare truly brave and strong soldiers in America, for America, The People, in this trying time, to take down bush and rumsfeld who are escaping the criminal arrests as our top suspects for 9/11, otherwise, as they are, they will continue in corporate bred fear against ourselves destroying American values like legal due process, indeed our world's freedoms, while advocating huge thefts and wars against us as innocent paying, or disspossesed as

unrepresented by the corporate establishment of ignorance and greed. How do American soldiers feel about sacrificing their lives to sell heroin, and steal oil, to likely pollute the region as Dutch shell would as they do murder civilian protestors with Tony in Britian harboring them? Killing for the World Bank who will pocket the paid expenses while indebting the impoverished nation? As death squads against freedom as cowards? You'd think if they were going to kill anyone in Afghanistan, it would be the terrorist leader, heroin pusher, tommy franks and his northern alliance business partner mercenaries, like the brave Taliban would have to protect us innocent all over the world, no? The truth is in while the cowards pretend. You know Dad, I'm beginning to suspect american nazis on our planet, don't actually know us too well as the humans yet...

Wide Open

All American people, police officers and soldiers hear this out please. Mr. Mueller has shown no commitment to represent the FBI. He has made no responsible public mention of the investigations regarding General Ahmed, and his connection to Mr. Atta, nor Odigo's two hour warning. He has not mentioned the investigations regarding the Israeli spy ring done by the FBI, and it has been only FOX News, the DEA, and their spokesperson Rogenc Waite, who have been able to get around Mr. Mueller's contemptuous silence for America, while bushmobster Susan Dryden, states we are all an urban myth. The FAA, NORAD (Canada's arm), Mike Vreeland, the CIA even, and several responsible military and civilian air traffic controllers, and a great many others disagree with CNN's refusal to mention our public statements against bush and rumsfeld's contentions. Never mind Police Commissioner Bernard Kerik who was handed Atta's passport by someone not named yet, of which Kerik stated "Apparently, it must have fallen into the air just as the crash occurred, surviving the almost 1000 degree heat of the fire, then came across a strong wind to blow it several blocks away." With loose papers between the pages of the passport even surviving the gusts. Now we witness the corporate cultists, desperate to contain us with the magic bullet theorists, we're expected to believe 2000 degrees actually is the only way possible, as impossible to prove scientifically. Also remember, the buildings weight were bore by interconnecting columns of steel through a central core design named "tube within a tube", not like a simple toothpick project laid out by fancy computer grapics, that neglect the actual blue print designs, as thought

through since before the Roman Empire. If still so though, how then can the desperate doubters explain building Seven, or maybe Six, not struck by planes, but fell just the same without melted bricks?, of glass? As also reported, Atta actually taking the time to pack, yes that's right, pack his suicide letter is too stupid for even the average American intellect. Nevermind the sneaky suspected terrorists arguing over a parking space restricted at the airport yelling. Or, Mr. Mueller's ATM picture of a 'highjacker' who was already dead while the picture was supposedly taken. Hmmm... dead men as the terrorists named Mohammad or something like that.. Jesus! Then finding out according to James Woods, the double agent actor, bush's Mueller had secretly, only two officers responsible for following more than 30,000 selective as important leads over a crime of such magnitude. Bing bing bing bing bing bing bing bing bing bing bing bing bing bing bing bing.. Hey... Did you hear that? We see the weakness of the many stuck as bushmobsters, like possibly completely innocent Myers, and his inability as cowardice to speak out regarding his political position as responsible to America, likewise as so many others, showing no concern for the nation as US people. Typical of a usual ignorant fascist right winger sellout like bush has been his entire career to his barely living self of evilness never before witnessed. And, I could go on for twenty more pages on the motives, Enron, and the proven to be criminals at the Pentagon, with the official corporate news story failing the simplest of scrutinies.

Reminder: first tower was struck at 8:45, second, 9:03.

Airports were closed at 9:17, but the soon to be shot down flight 93 calls in at 9:50 apparently according to rumsfeld, asking for permission to do a u-turn, fly east an hour and a half, to land in WASHINGTON? (two planes don't seem to have highjackers on them, and I guess the plan got messed with the remotes somehow.) While the Bin Laden family is preparing to leave America at bush's request, to escape any questioning, regarding the soon to be blamed Holy man Bin Laden, without evidence by the Washington Post in the late edition of Sept. 11th, by the surprisingly thoughtful monster henry kissinger, while CNN reports a story unbiasedly in the forth party apparently, (heard it from a friend who heard it from a friend...) of a call just received to their private newsroom from somebody somewhere to whomever, about friendly, er.. no mean Muslims on board, pre-activating pay phone services without doing so, or so we can only guess, a falsehood truly painful to relay completely.

Mr. bush and rumsfeld killed those good Americans in New York, and must not under any circumstances be allowed to continue as escaped leaving the scene, to repeat offend against ourselves, who under these circumstances, must not be taken as granted by Chris at MSNBC. I have repeatedly offered my position of responsible debate with any corporate cultists, that refuse to represent our democracies being toppled into lawless dictatorship. Why does corporate America refuse to report on elected Congressman Kucinich? Again, Mr. bush and rumsfeld need to be immediately arrested or executed as traitors by the brave and true, strong and righteous. We need to seize all available evidence that Mr. Mueller has stolen, like airport video tapes, as well as recordings done from within the airliners. Or provide me, Mr. death, to testify to the recorded gruesomeness as unbearable. Anyone in the bushmob who stands in our way to do so, must as will be also found guilty of treason by all the loyal American people. I call on all police agencies, ball clubs, loggers, swank hotel clerks and the PTA, to pull together under this banner, and make the world something better for everyone, before getting back to wrestling amongst ourselves over what have you. Mr. bush's evil is very real, in this time I, as a strange voice from the wilderness, who does not make your decisions to do the right things for yourself, plead for you to do so as you should. Get off your ass. I mean, who and for what are our soldiers still killing people for in Afghanistan? The heroin dealing puppet government of foreigners with the World Bank are in place losers, and do I understand they have already spent near a 100 million dollars of ours on things like 3 million school text books for practical terrorism from the eighties, while leaving so called heroin addict alliance forces happy to oblige without 'official' pay checks. CBC in Canada shamed the world by running a propaganda piece on school funding, but neglected to mention the 'new' books, just like the 'old' books came from the bushmobsters again, also with CBC 'pretending' to not know that the Taliban had begun girl schools in Afghanistan, a story that had already been almost correctly covered by the Washington Post, amazingly about a month ago, albeit, without the girl schools element, but Jeeze, the truth seems to be finding it's way, despite the tommy franks grouped with the northern alliance targeting youths who can read as the enemy Taliban right? Mr. bush displays a hatred expressed against our entire human race as himself, to kill us all truly as his position, that he in self contempt, refuses to acknowledge, while we further fall

dying unjustly, for who I ask you? Mr. bush has actually publicly positioned himself to state he does not support effective treatments for cancer. Why? Because there is no money or ours as tax payers to steal from. Deception is an element of all living truth, and evil secretly is just being openly stupid like bush is, (you can't pretend insight as wisdom truly), leaving the biggest secret being, here is but only one, you too, as we all share nothing as no secret in silence as a reflection of all living dreams. GOD IS AMAZING. There is no spoken answer to the question of a mystery asking as forever endlessly, as life could be unbelievably fantastic at a level of real world sustainability, but you know what my friends? Nobody at corporate mind control seems to care, but only to say how wrong we all are on everything, by people who do not know any better for trying to do nothing. Do not know any better. No argument, no science, no reason, just almost as robots working for the death machines in cowardice and self loathing against ourselves not represented. I, as the make believe Creator, attempting to represent freedom of will eternal, can't help hate and despise bush, your false deity as much as any real man would, I'm sorry. News corporations refuse me a voice as the publics, and have so for years to also our acclaimed scientists, political writers, mathematicians and historians, while Mr. bush as the super dumb anti-Christ of evil incarnate, demands openly in OUR public arena, I not be allowed to live my life in unity, as an individual god seeking a potential Heaven for myself singularly, doing my own thing naturally. Mr. bush demands by threat of murder, I relinquish my equal rights, to become his willing slave. Mr. bush demands I not be permitted to protect myself in a true democracy as Justice for all. (Mr. bush, you either understand us as fairly to be equals with justice as anyone, or your threatening our freedoms as a criminal terrorist without room for argument.) Mr. bush demands I fear his murder rampages against the innocent, as would be myself, still living to say, NEVER! Never would I lie to myself like a cowardly American soldier to bomb innocent villagers to waste billions, before killing tommy franks for ordering me to do so. Never would I lie to myself like a cowardly American soldier to bomb innocent people in Bagdad to kill people, before killing tommy franks, cheney, bush, rumsfeld, or even Mr. Powell if need be. Don't like Saddam? Well, talk to him openly about freedom for ourselves then. Talk to the people of Iraq, and on what we together, can do to make life better. What is it about the functioning government in Cuba,

that could be made better as measured? Why not? Because then it would be understood, bush is a savage criminal, and incompetent as wrong and seriously evil to all of US. As he clearly knows nothing about Justice and freedom, or economics as he currently is destroying the economy of America, while cashing in our real lives creating hardship, as only ideology. I mean, removing the cash from our streets, while stealing billions for himself as a degenerate man! (Our wealth is not infinite, nor do the hungry, have magically, meals mysteriously appear in front of them.) He wasn't elected, falling short by more than 600,000 votes before demanding the halt to counting, and is a nazi murdering traitor who speaks only of his stupidity, while robbing America as our world, of Justice to be free and living godly.

(snp)

Thank you for everything,

Johnny wizard

(snpd)

(snpd)

It's Nothing - Mr. bush and rumsfeld are traitors to every American, as they are both guilty of war crimes against humanity. Where are the American soldiers to arrest or kill them both as murderers trying to escape the wrath of the American Constitution's protection of the masses under Justice, that they are attempting to destroy as ignored against the interests of mankind? Again, bush had no evidence against Bin, for a crime he demands we not know the perpetrator of, by attempting to stop, or not address the criminal investigations completed already. With the corporated cultists cashing out hard working American tax payers by labeling us all, as not caring to be biased. Telling our soldiers to attack without thinking, the third world Taliban government for asking about evidence as a true American, Allah, Christ, or Buddha would, ending the heroin trade, and attempting with communications, something better for the people of Afghanistan. Mr. Mueller has informed us, as one more informed than any other who meets with George Tenet every day, the only evidence we have implicates bush and rumsfeld for 9/11, and soldiers have yet to stand for America to destroy bush and rumsfeld,

the murdering bassturds desecrating our judicial process. Why? Nazi cowards, not willing to protect the American flag, while watching their own families be robbed of their life savings and pensions through Enron, and open Pentagon frauds, while bush, the anti-Christ, hopes soldiers will learn from the bankruptcy, for next time, while we, as humanity, watch the Republican Congress today, allow the thieves to escape, with, MAYBE, a fine, while walking away with billions stashed away secretly in the Cayman Islands, or left responsible for secret Army financing, like Thomas White, as their two timing Secretary. It's too bad we can't separate American soldiers, by who wish to uphold the American Constitution as Justice for all, and those sadistic savages like rumsfeld who enjoy murdering innocent people while stealing from everyone our humanity, then we would have a real war of good as powerful, against the extremely weak and pathetic illiterate nazi cult scum, eh? I mean, if you actually knew who the soldiers were as responsible for bombing villages in Afghanistan, and red cross units, literate tribal leaders, or having 40,000 surrendered given to be murdered, wouldn't you as a real American Patriot Soldier, just kill tommy franks, bush and rumsfeld the nazis without thinking twice? I mean, to be humane or godly? See my friends? We will see again, no traitor to America offer an actual public argument to their position of ourselves to not communicate freely with our facts, but will without reason, demand we not be able to truly, like CNN, MSNBC, CBS, Art Bell, Reston.com and the like, while attacking ourselves personally for demanding we no longer be murdered for the evil bushmob, who ignore our concerns as legitimate under universal law actually existing, as not heard from really dying, deprived equal say as the Bill of Rights still demands. See? American illiterate evil nazi scum, think the all mighty as this Creation will be made only to suffer and die as murdered by the weak, dispossessed and cowardly, so sharon the bigot racist parasite can rob and murder innocent persons as Catholics, Muslims, Atheists and Jews forever and ever, financed by corporated nazi cult Americans left in the dark until their bitter enlightenment, about who lives the airwave as true to be ourselves. Justice infinite as indivisible shall prevail as a Heaven or Hell, you decide. I am calling for the immediate imprisonment or death sentence, to the proven to be world terrorists without given argument against, who admittingly have committed the deliberate mass murders of US as innocent, sharon, bush, rumsfeld, and tommy franks. Forty dollars for bush and rumsfeld, ten for tommy franks, and the

Jews of God's creation will wake I'm sure, to deal with the nazi bigot ariel sharon, without further going payment. They advocate as demons, enemies of US all, the murder of innocent people, of which we must no longer allow. I'm available for debate or interview, of which news corporations refuse to grant. Just as they do on every other serious life affirming issues. Our nations greatest, most popular scientific and political writers are barely, if never even acknowledged. Many have read my words, yet next to none argue in disagreement, but for insult lacking reason. Why? Because some people are just stupid, and as in open polite discourse are exposed to be carbon copy right wingers suffering under suggestion to do nothing to help themselves. Like, how does someone argue burned jet fuel smoldering, could reach a temperature of 2000 degrees Celsius, in an area of standard building construction not melting before steel would? Or, because someone commits a crime in New York, or did years ago because they were beaten down as deprived human rights and had all their property stolen, sharon can then excuse himself to murder anybody else he wishes, maybe hundreds or thousands more to steal their lives and prosperity? How does Mr. bush jr., the anti-Christ, get away saying we're all against him discarding the rule of law to find ourselves not to be equals under God with his tyranny of injustice and slavery, that he expects every nation to suffer under in fear while he attempts to plunder and murder everyone as evil incarnate? Digesting fluoride for no other known or unknown reason to science kills us, and nobody else says different, so why must CNN insist we keep doing it by not covering the facts documented for decades? I say, who cares why right wingers want to destroy our eternal Universe as themselves unworthy, let's just stop doing it today okay? because it makes us look really really stupid to the other civilizations of our Universe that don't practice censorship of our advancements in science as know how. What an embarrassment. Why as so does CNN refuse all the other crimes committed by Republicans to go unheeded as recognized? Like the denial of equal rights to non-jews in Palestine? I don't know, let us just work to make our world a better place for all. I want my own show. Why does the American Coast to Coast radio network forbid all intelligent discussions to protect American values, as repeatedly offering no comment allowed to understand this dying bit? Scared of the Lord really getting angry?

In It for US

Your either with US as equals under a rule of law as Universal Justice, or your a mindless slave whore sacrificing your soul for bush, the anti-Christ, who will as he continues, stealing and murdering from our families without any good reason, or provocations as evil incarnate he is to US all. A murdering nazi demon of evilness never before known. As he as shown, he would steal from every American, Justice, Freedom, and Liberty, while only saying, no he's not, as who knows how many are illegally arrested as disappeared, and he funnels billions of real American worker tax dollars into criminal thefts through the Pentagon. The False Claims Act. Like he has polluted ourselves in Texas, as he directly supported the murder of tens of thousands in Afghanistan without evidence, stolen tens of billions from Americans for himself, and fought against smart and healthy universal heath care as educated, and continues to support the legal inaction against Enron, who fleeced any American pensions they could get a hold on, of which the biggest criminal in the Enron debacle, outside of Ken Lay is Thomas White, who he has made no indications of arresting, or even firing, as the Secretary of the Army. Mr. bush gave his buddy Krongard the right to murder any law abiding American citizen as soldier, and escape criminal conviction, a traitor to America is our Mr. bush jr., Constitutionally, plain and simple. A nazi warmonger, who wishes to murder millions with nuclear weapons, a savage, a monster. A demon who has placed in his secret administration, those responsible for the death squads of Nicaragua, and the shipments of cocaine into America, to increase crime against every community, while his supporters support the school of the Americas, by removing free speech from those who wish to point to those Republicans ultimately responsible for harbouring real terrorism, (Mr. bush Sr.) according to Sergant Chuck Couglin of the Milwaukee Sheriff's Department. He has also said he wishes no interest in stopping his increase in the heroin trade. He, as pure evil, who holds practically no deception to ourselves if you'd only listen, has destabilized the world in his commitment to the destruction of our legal due process, by suggesting his entourage, can not be found guilty of any crimes against our humanity, of which they spout like rumsfeld in silence to torture, and murder those known by all to have committed no offense, through now military dictatorship, of which, true Americans will not allow him to take US further, I will not stand for it, nor should you as a Patriot

soldier protecting the flag. I demand again, the immediate arrest of bush and rumsfeld for crimes against humanity, in New York City and Afghanistan, or their rightful execution by all free thinkers in America who own firearms, and can read of our stories not present by the corporate establishment. Mr. bush and rumsfeld expect every single human on our planet to relinquish our rights as living human beings. Mr. bush had no qualms about doing business with the Taliban in August, if they would only, by bribe, collectively sacrifice their interests in serving for their country, as bush has done to America for his entire career degenerating. Mr. rumsfeld asked our living World for the murder of "Omar the Just", for the only reason of requesting evidence. Bin Laden, as we all remember, offered his arrest to authorities upon the showing of any evidence, for a crime he stated was no part of, including all the other baseless claims made by the Clinton administration, who too, could not arrest Bin Laden then either, when he sat in jail for 47 days uncharged waiting. Which is how we know again, Mr. bush is directly involved in NYC, as would too, as have to be, rumsfeld to let the towers fall, but too stupid evil they both are, to not know the wise intentions of America's founding fathers, or myself as the Messiah, Johnny Wizard. For as we knew, all the planted evidence and otherwise, that was publicly available, pointed only to bush and rumsfeld for not seeking who was responsible, only to leave blame quickly as not possible, on a Nation accused without evidence, that had a month prior been planned to rob and murder from for Enron was desperate to hide their crimes against every American dollar. All documented. Kill bush and rumsfeld on site American soldier, and be loved by all as Saviour.

---- A Better Way

(snpd)

Mr. Mueller, the head of the FBI, who meets everyday with George Tenet, the head of the CIA, stated recently after reviewing his quoted statements stated, actually they as officers of our laws have no evidence whatsoever connecting anyone but the bushmob to the terrorist acts in New York City, testifiable through the public information given by ourselves, the DEA, the CIA, and the FBI in our fields, of which Mr. Mueller seems completely absent minded of publicly speaking anyway. Look see for yourself.

''In our investigation, we have not uncovered a single piece of paper -- either here in the United States or in the treasure trove of information that has turned up in Afghanistan and elsewhere -- that mentioned any aspect of the Sept. 11 plot,''

(snpd)

(snpd)

The Messiah vs. sharon, bush, and rumsfeld

(snpd)

Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning. I have spoken to the Secret Service in person, and all who read this can be assured, so has mr bush scumball jr. by the date this is posted, and as he continues to pretend to not have, only further shows his contempt for your life and Justice for our communities. For bush's contempt for the American constitution as Justice and freedom is ungodly to every proud American police officer and citizen the world over. Mr. bush must be arrested for his terrorist crimes in New York City immediately, for the evidence of his and rumsfeld's criminal behavior is overwhelmingly censored by CNN and the other corporate cult cogs, who refuse to protect Americans as ourselves, the dying community falling unheard from. The patriot act will be rescinded, unless anyone can actually provide a counter argument as to it's purpose other than to destroy our freedoms, while the bushmob continues to rifle our pocket books.

(snpd)

Who is Who?

(snpd)

Freedom is only garnered through Justice for all equally.

"Patriotism is the last refuge of a scoundrel" wrote Samuel Johnson, and he wasn't just mixing words. Patriotism is not about mindlessly as cult slaves obeying bush the unellected nazi fascist criminal dictator, it is about protecting freedom for all as democracy demands by law. Ours. Mr. bush has said that if we, as Nations, don't agree with himself as world dictator, removing the guiding principles of constitutional Justice as freedom for all instills, while actively destroying America and murdering innocent

people for no crimes who struggle now only to survive from his criminal tirades, advocating torture while declaring wars against anyone poor and unrepresented, with a complete disrespect for all human life, and our courts of Law, has clearly stuck himself to be our enemy everywhere, as being evil personified, which inextricably demands his immediate incarceration for the crimes he is committing against ourselves as a true terrorist without question, no? The bushmob desecrate the ideals of freedom, Justice and democracy garnered by truth as our own being to be individuals, and is exalted by CNN claiming to be representing ourselves while watching us be robbed and murdered as stolen from openly. Mr. Turner, you have terribly disappointed our world in this great time of need for ourselves as humanity.

Again, all relevant evidence, circumstantial and otherwise, regarding the WTC terrorist act, points to the bushmob, and rumsfeld especially. (snpd) Flight 11, all ticket sales are accounted. How did terrorists board without purchasing tickets? No, the airline industry did not take the names off the lists on Sept. 11, as too on the 12th they confirmed so with a small correction, but if they had, how then would, or could, the desperate doubter explain strange flight 77 from the same company, which does leave room for terrorists to be on board with the given total. Oh... I think I know. Two flights had duped terrorists hired by the bush wrecked state department, explaining the State Department connected money transfer discovered by the good FBI to the head terrorist, Germany's Mr. Atta, unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far, and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly

have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker. Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information. "No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or "Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46. Also, explaining the now no longer strangeness of why bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle,

and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming. hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring, drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,(We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't

exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the Republican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical Republican, only offered bribes to officials from Afghanistan to hurt their nation they, as the Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to gramm's assault, leaving many out of work to get swindled even further by Republican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe

pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to

actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage, THE MONTH BEFORE IN AUGUST, why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent matters.

"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions." - Agatha Christie

... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National Guard Andrews Air Force Base to fly ... a protective cover over Washington, D.C." ...

An insert:

The following letter by former U.S. Attorney General Ramsey Clark has been sent to all members of the UN Security Council, with copies to the UN General Assembly. Please circulate.

September 20, 2002

Secretary General Kofi Annan
United Nations New York, NY

Dear Secretary General Annan,

George Bush will invade Iraq unless restrained by the United Nations. Other international organizations--including the European Union, the African Union, the OAS, the Arab League, stalwart nations courageous enough to speak out against superpower aggression, international peace movements, political leadership, and public opinion within the United States--must do their part for peace. If the United Nations, above all, fails to oppose a U.S. invasion of Iraq, it will forfeit its honor, integrity and raison d'etre.

A military attack on Iraq is obviously criminal; completely inconsistent with urgent needs of the Peoples of the United Nations; unjustifiable on any legal or moral ground; irrational in light of the known facts; out of proportion to other existing threats of war and violence; and a dangerous adventure risking continuing conflict throughout the region and far beyond for years to come. The most careful analysis must be made as to why the world is subjected to such threats of violence by its only superpower, which could so safely and importantly lead us on the road to peace, and how the UN can avoid the human tragedy of yet another major assault on Iraq and the powerful stimulus for retaliatory terrorism it would create.

1. President George Bush Came to Office Determined to Attack Iraq and Change its Government.

George Bush is moving apace to make his war unstoppable and soon. Having stated last Friday that he did not believe Iraq would accept UN inspectors, he responded to Iraq's prompt, unconditional acceptance by calling any reliance on it a ``false hope'' and promising to attack Iraq alone if the UN does not act. He is obsessed with the desire to wage war against Iraq and install his surrogates to govern Iraq by force. Days after the most bellicose address ever made before the United Nations--an unprecedented assault on the Charter of the United Nations, the rule of law and the quest for peace--the U.S. announced it was changing its stated

targets in Iraq over the past eleven years, from retaliation for threats and attacks on U.S. aircraft which were illegally invading Iraq's airspace on a daily basis. How serious could those threats and attacks have been if no U.S. aircraft was ever hit? Yet hundreds of people were killed in Iraq by U.S. rockets and bombs, and not just in the so called ``no fly zone,'' but in Baghdad itself. Now the U.S. proclaims its intentions to destroy major military facilities in Iraq in preparation for its invasion, a clear promise of aggression now. Every day there are threats and more propaganda is unleashed to overcome resistance to George Bush's rush to war. The acceleration will continue until the tanks roll, unless nonviolent persuasion prevails.

2. George Bush Is Leading the United States and Taking the UN and All Nations Toward a Lawless World of Endless Wars.

George Bush in his ``War on Terrorism'' has asserted his right to attack any country, organization, or people first, without warning in his sole discretion. He and members of his administration have proclaimed the old restraints that law sought to impose on aggression by governments and repression of their people, no longer consistent with national security. Terrorism is such a danger, they say, that necessity compels the U.S. to strike first to destroy the potential for terrorist acts from abroad and to make arbitrary arrests, detentions, interrogations, controls and treatment of people abroad and within the U.S. Law has become the enemy of public safety. ``Necessity is the argument of tyrants.'' ``Necessity never makes a good bargain.''

Heinrich Himmler, who instructed the Nazi Gestapo ``Shoot first, ask questions later, and I will protect you,'' is vindicated by George Bush. Like the Germany described by Jorge Luis Borges in Deutsches Requiem, George Bush has now ``proffered (the world) violence and faith in the sword,'' as Nazi Germany did. And as Borges wrote, it did not matter to faith in the sword that Germany was defeated. ``What matters is that violence ... now rules.'' Two generations of Germans have rejected that faith. Their perseverance in the pursuit of peace will earn the respect of succeeding generations everywhere.

The Peoples of the United Nations are threatened with the end of international law and protection for human rights by George Bush's war on terrorism and

determination to invade Iraq.

Since George Bush proclaimed his ``war on terrorism,'' other countries have claimed the right to strike first. India and Pakistan brought the earth and their own people closer to nuclear conflict than at any time since October 1962 as a direct consequence of claims by the U.S. of the unrestricted right to pursue and kill terrorists, or attack nations protecting them, based on a unilateral decision without consulting the United Nations, a trial, or revealing any clear factual basis for claiming its targets are terrorists and confined to them.

There is already a near epidemic of nations proclaiming the right to attack other nations or intensify violations of human rights of their own people on the basis of George Bush's assertions of power in the war against terrorism. Mary Robinson, in her quietly courageous statements as her term as UN High Commissioner for Human Rights ended, has spoken of the ``ripple effect'' U.S. claims of right to strike first and suspend fundamental human rights protection is having.

On September 11, 2002, Colombia, whose new administration is strongly supported by the U.S., ``claimed new authority to arrest suspects without warrants and declare zones under military control,'' including ``[N]ew powers, which also make it easier to wiretap phones and limit foreigners' access to conflict zones... allow security agents to enter your house or office without a warrant at any time of day because they think you're suspicious.'' These additional threats to human rights follow Post-September 11 ``emergency'' plans to set up a network of a million informants in a nation of forty million. See, New York Times, September 12, 2002, p. A7.

3. The United States, Not Iraq, Is the Greatest Single Threat to the Independence and Purpose of the United Nations.

President Bush's claim that Iraq is a threat justifying war is false. Eighty percent of Iraq's military capacity was destroyed in 1991 according to the Pentagon. Ninety percent of materials and equipment required to manufacture weapons of mass destruction was destroyed by UN inspectors during more than eight years of inspections. Iraq was powerful, compared to most of its neighbors, in 1990. Today it is weak. One infant out of four born live in Iraq weighs less than 2 kilos,

promising short lives, illness and impaired development. In 1989, fewer than one in twenty infants born live weighed less than two kilos. Any threat to peace Iraq might become is remote, far less than that of many other nations and groups and cannot justify a violent assault. An attack on Iraq will make attacks in retaliation against the U.S. and governments which support its actions far more probable for years to come.

George Bush proclaims Iraq a threat to the authority of the United Nations while U.S.-coerced UN sanctions continue to cause the death rate of the Iraqi people to increase. Deaths caused by sanctions have been at genocidal levels for twelve years. Iraq can only plead helplessly for an end to this crime against its people. The UN role in the sanctions against Iraq compromise and stain the UN's integrity and honor. This makes it all the more important for the UN now to resist this war.

Inspections were used as an excuse to continue sanctions for eight years while thousands of Iraqi children and elderly died each month. Iraq is the victim of criminal sanctions that should have been lifted in 1991. For every person killed by terrorist acts in the U.S. on 9/11, five hundred people have died in Iraq from sanctions.

It is the U.S. that threatens not merely the authority of the United Nations, but its independence, integrity and hope for effectiveness. The U.S. pays UN dues if, when and in the amount it chooses. It coerces votes of members. It coerces choices of personnel on the Secretariat. It rejoined UNESCO to gain temporary favor after 18 years of opposition to its very purposes. It places spies in UN inspection teams.

The U.S. has renounced treaties controlling nuclear weapons and their proliferation, voted against the protocol enabling enforcement of the Biological Weapons Convention, rejected the treaty banning land mines, endeavored to prevent its creation and since to cripple the International Criminal Court, and frustrated the Convention on the Child and the prohibition against using children in war. The U.S. has opposed virtually every other international effort to control and limit war, protect the environment, reduce poverty and protect health.

George Bush cites two invasions of other countries by Iraq during the last 22 years. He ignores the many scores of U.S. invasions and assaults on other countries in Africa, Asia, and the Americas during the

last 220 years, and the permanent seizure of lands from Native Americans and other nations--lands like Florida, Texas, Arizona, New Mexico, California, and Puerto Rico, among others, seized by force and threat.

In the same last 22 years the U.S. has invaded, or assaulted Grenada, Nicaragua, Libya, Panama, Haiti, Somalia, Sudan, Iraq, Yugoslavia, Afghanistan and others directly, while supporting assaults and invasions elsewhere in Europe, Asia, Africa, and the Americas.

It is healthy to remember that the U.S. invaded and occupied little Grenada in 1983 after a year of threats, killing hundreds of civilians and destroying its small mental hospital, where many patients died. In a surprise attack on the sleeping and defenseless cities of Tripoli and Benghazi in April 1986, the U.S. killed hundreds of civilians and damaged four foreign embassies. It launched 21 Tomahawk cruise missiles against the El Shifa pharmaceutical plant in Khartoum in August 1998, destroying the source of half the medicines available to the people of Sudan. For years it has armed forces in Uganda and southern Sudan fighting the government of Sudan. The U.S. has bombed Iraq on hundreds of occasions since the Gulf War, including this week, killing hundreds of people without a casualty or damage to an attacking plane.

4. Why Has George Bush Decided The U.S. Must Attack Iraq Now?

There is no rational basis to believe Iraq is a threat to the United States, or any other country. The reason to attack Iraq must be found elsewhere.

As governor of Texas, George Bush presided over scores of executions, more than any governor in the United States since the death penalty was reinstated in 1976 (after a hiatus from 1967). He revealed the same zeal he has shown for ``regime change'' for Iraq when he oversaw the executions of minors, women, retarded persons and aliens whose rights under the Vienna Convention on Diplomatic Relations of notification of their arrest to a foreign mission of their nationality were violated. The Supreme Court of the U.S. held that executions of a mentally retarded person constitute cruel and unusual punishment in violation of the U.S. Constitution. George Bush addresses the United Nations with these same values and willfulness.

His motives may include to save a failing Presidency which has converted a healthy economy and treasury

surplus into multi-trillion dollar losses; to fulfill the dream, which will become a nightmare, of a new world order to serve special interests in the U.S.; to settle a family grudge against Iraq; to weaken the Arab nation, one people at a time; to strike a Muslim nation to weaken Islam; to protect Israel, or make its position more dominant in the region; to secure control of Iraq's oil to enrich U.S. interests, further dominate oil in the region and control oil prices. Aggression against Iraq for any of these purposes is criminal and a violation of a great many international conventions and laws including the General Assembly Resolution on the Definition of Aggression of December 14, 1974.

Prior regime changes by the U.S. brought to power among a long list of tyrants, such leaders as the Shah of Iran, Mobutu in the Congo, Pinochet in Chile, all replacing democratically elected heads of government.
5. A Rational Policy Intended to Reduce the Threat of Weapons of Mass Destruction in The Middle East Must Include Israel.

A UN or U.S. policy of selecting enemies of the U.S. for attack is criminal and can only heighten hatred, division, terrorism and lead to war. The U.S. gives Israel far more aid per capita than the total per capita income of sub Sahara Africans from all sources. U.S.-coerced sanctions have reduced per capita income for the people of Iraq by 75% since 1989. Per capita income in Israel over the past decade has been approximately 12 times the per capita income of Palestinians.

Israel increased its decades-long attacks on the Palestinian people, using George Bush's proclamation of war on terrorism as an excuse, to indiscriminately destroy cities and towns in the West Bank and Gaza and seize more land in violation of international law and repeated Security Council and General Assembly resolutions.

Israel has a stockpile of hundreds of nuclear warheads derived from the United States, sophisticated rockets capable of accurate delivery at distances of several thousand kilometers, and contracts with the U.S. for joint development of more sophisticated rocketry and other arms with the U.S.

Possession of weapons of mass destruction by a single nation in a region with a history of hostility promotes a race for proliferation and war. The UN must act to reduce and eliminate all weapons of mass destruction,

not submit to demands to punish areas of evil and enemies of the superpower that possesses the majority of all such weapons and capacity for their delivery.

Israel has violated and ignored more UN Resolutions for forty years than any other nation. It has done so with impunity.

The violation of Security Council resolutions cannot be the basis for a UN-approved assault on any nation, or people, in a time of peace, or the absence of a threat of imminent attack, but comparable efforts to enforce Security Council resolutions must be made against all nations who violate them.

6. The Choice Is War Or Peace.

The UN and the U.S. must seek peace, not war. An attack on Iraq may open a Pandora's box that will condemn the world to decades of spreading violence. Peace is not only possible; it is essential, considering the heights to which science and technology have raised the human art of planetary and self-destruction.

If George Bush is permitted to attack Iraq with or without the approval of the UN, he will become Public Enemy Number One--and the UN itself worse than useless, an accomplice in the wars it was created to end. The Peoples of the World then will have to find some way to begin again if they hope to end the scourge of war.

This is a defining moment for the United Nations. Will it stand strong, independent and true to its Charter, international law and the reasons for its being, or will it submit to the coercion of a superpower leading us toward a lawless world and condone war against the cradle of civilization?

Do not let this happen.

Sincerely,

Ramsey Clark

Your best bet is to hunt up an old 486 or something, load it
up with DOS, and run it that way.

I can tell you from personal experience that Motorola has not
updated very many of their RSS packages to reflect increases in CPU
speed. Make that 'hardly any.' This is why older computers are still
very useful.

Good luck.

Was in the LA area back in 1996, and the machine on 147.435, well,
don't let the young kids listen. I understand Riley is on that case now.
Don't know if it is better now or not.....

Wouldn't most uncoordinated repeater problems be solved with
the use of directional antennas to null the coordinated machine
and its service area, and
maybe PL or anti-PL installed on the uncoordinated machine?

And if the band is that crowded, is that machine really necessary?

One of these repeaters, currently calling itself W6NUT, is probably active about
75% of the time. That's one of the "bad" ones.

No.

>And if the band is that crowded, is that machine really necessary?

If crowded, then yes. However, if significantly overlapping, the inteference
pattern degrades both.

Another "I'll believe anything" idiot. Just when did Saddam say
inspectors could come to Iraq and inspect without any
restrictions?
Why don't you go live in Iraq if you think things are so terrible
here and so great there? I am sure you and Saddam would get along
just fine and we won't miss you one bit. Need help packing?

I was thinking of the case where there is just some fringe overlap.
Anyway, I don't have a machine and not looking to put one up.
Would need to get some expert help if I did want to.

A Google search (HP +8591E +manual) turned up loads of service manual
suppliers for the HP8951E. Pick one local to your neck of the woods.
regards
john

I thought a corner reflector would be about perfect.

> And if the band is that crowded, is that machine really necessary?

The ones there now are coordinated and unused. Would an uncoordinated
yet used repeater be such a big problem?

Perhaps time sharing would be a solution.

Mike the ATAS-100 will not work with a magnet mount base. For the antenna
to work you need a very good ground at the antenna. Another mounting
problem is the antenna's vertical lower part can not be close to any metal,
if so the antenna will not tune. I've used my ATAS-100 for a while now and
don't think it could perform any better.

Silent Key NF3Q/W3HBC

(09/29/2002) Hilory Bracken Cox, Age 52, of Austin, Texas, formerly of Murrysville, Pennsylvania, passed away on Thursday, September 26, 2002. He is survived by his father, H. Bracken Cox; and his brother, Edward Warren Cox of Austin, Texas. He was preceded in death by his mother, Margaret Geyer Cox; and his paternal grandfather, George W. Cox of Pennsylvania. Hilory was born in South Charleston, West Virginia, on May 10, 1950, and graduated from Franklin Regional High School in Murrysville, PA. After graduation, Hilory traveled the Northeastern and Central United States as a musician playing the piano, keyboard and singing with several different bands. He also ran the sound system each week at Newlonsburg Presbyterian Church for a number of years. What Hilory enjoyed most was his family and friends, making music, working with computers, and Amateur Radio. He also loved animals and animals loved him. He earned his first Radio license in 1963 before he graduated from high school. He was very active in Amateur Radio in the Pittsburgh area and earned an Extra Class FCC license, W3HBC, NF3Q. Hilory was a member of the Masonic Valley Lodge No. 613, F. and A.M. in Turtle Creek, PA; Newlonsburg Presbyterian Church in Murrysville, PA; the Amateur Radio Emergency Service (ARES) in Pittsburgh, PA, and in Austin, TX; North Hill Amateur Radio and Skyview Amateur Radio in Pittsburgh, PA; and was a life member of the American Radio Relay League (ARRL). In November, 2000, Hilory and his father, Bracken, moved to Austin, TX, from Murrysville, PA. They are currently living in Austin, TX.

Johnny is King

Bush, the uncommunicative unelected war criminal nazi savage traitor, anti-Christ American cop killer and destroyer of Our Living Human Rights through Justice granted for the giving by existence, agrees actually with me as Johnny, that Our task is to "fully and finally eliminate a real threat to world peace and to America."

Here are some more quotes of corporate america's false deity, that corporate america demands Americans blindly put their faith into unquestioningly as slaves to suffer for nothing but evil stupidity.

"I think if you know what you believe, it makes it a lot easier to answer questions. I can't answer your question." - Reynoldsburg, Ohio, Oct. 4, 2000

"Redefining the role of the United States from enablers to keep the peace to enablers to keep the peace from peacekeepers is going to be an assignment." - Interview with the New York Times, Jan. 14, 2001

"The great thing about America is everybody should vote." - Austin, Texas, Dec. 8, 2000

"They want the federal government controlling Social Security like it's some kind of federal program." - Debate in St. Charles, Mo., Nov. 2, 2000

"It's not the governor's role to decide who goes to heaven. I believe that God decides who goes to heaven, not George W. Bush." - Our Mr. bush Jr., corporate america's, American murdering false deity nazi demon, in the Houston Chronicle.

Send bush straight to death for escaping his public trial immediately, and be loved by all as thankful.

Cheers!

Johnny Wizard

White House 'exaggerating Iraqi threat'

Bush's televised address attacked by US intelligence

Julian Borger in Washington
Wednesday October 9, 2002
The Guardian

President Bush's case against Saddam Hussein, outlined in a televised address to the nation on Monday night, relied on a slanted and sometimes entirely false reading of the available US intelligence, government officials and analysts claimed yesterday.

Officials in the CIA, FBI and energy department are being put under intense pressure to produce reports which back the administration's line, the Guardian has learned. In response, some are complying, some are resisting and some are choosing to remain silent.

"Basically, cooked information is working its way into high-level pronouncements and there's a lot of unhappiness about it in intelligence, especially among analysts at the CIA," said Vincent Cannistraro, the CIA's former head of counter-intelligence.

In his address, the president reassured Americans that military action was not "imminent or unavoidable", but he made the most detailed case to date for the use of force, should it become necessary.

But some of the key allegations against the Iraqi regime were not supported by intelligence currently available to the administration. Mr Bush repeated a claim already made by senior members of his administration that Iraq has attempted to import hardened aluminium tubes "for gas centrifuges, which are used to enrich uranium for nuclear weapons". The tubes were also mentioned by Tony Blair in his dossier of evidence presented to parliament last month.

However, US government experts on nuclear weapons and centrifuges have suggested that they were more likely to be used for making conventional weapons.

"I would just say there is not much support for that [nuclear] theory around here," said a department of energy specialist.

David Albright, a physicist and former UN weapons inspector who was consulted on the purpose of the

aluminium tubes, said it was far from clear that the tubes were intended for a uranium centrifuge.

Mr Albright, who heads the Institute for Science and International Security, a Washington thinktank, said: "There's a catfight going on about this right now. On one side you have most of the experts on gas centrifuges. On the other you have one guy sitting in the CIA."

Mr Albright said sceptics at the energy department's Lawrence Livermore national laboratory in California had been ordered to keep their doubts to themselves. He quoted a colleague at the laboratory as saying: "The administration can say what it wants and we are expected to remain silent."

There is already considerable scepticism among US intelligence officials about Mr Bush's claims of links between Iraq and al-Qaida. In his speech on Monday, Mr Bush referred to a "very senior al-Qaida leader who received medical treatment in Baghdad this year".

An intelligence source said the man the president was referring to was Abu Musab Zarqawi, who was arrested in Jordan in 2001 for his part in the "millennium plot" to bomb tourist sites there. He was subsequently released and eventually made his way to Iraq in search of treatment. However, intercepted telephone calls did not mention any cooperation with the Iraqi government.

There is also profound scepticism among US intelligence experts about the president's claim that "Iraq has trained al-Qaida members in bomb-making and poisons and deadly gases".

Bob Baer, a former CIA agent who tracked al-Qaida's rise, said that there were contacts between Osama bin Laden and the Iraqi government in Sudan in the early 1990s and in 1998: "But there is no evidence that a strategic partnership came out of it. I'm unaware of any evidence of Saddam pursuing terrorism against the United States."

A source familiar with the September 11 investigation said: "The FBI has been pounded on to make this link."

In making his case on Monday, Mr Bush made a startling claim that the Iraqi regime was developing drones, or unmanned aerial vehicles (UAVs), which "could be used to disperse chemical or biological weapons across broad areas".

"We're concerned that Iraq is exploring ways of using these UAVs for missions targeting the United States," he warned.

US military experts confirmed that Iraq had been converting eastern European trainer jets, known as L-29s, into drones, but said that with a maximum range of a few hundred miles they were no threat to targets in the US.

"It doesn't make any sense to me if he meant United States territory," said Stephen Baker, a retired US navy rear admiral who assesses Iraqi military capabilities at the Washington-based Centre for Defence Information.

Mr Cannistraro said the flow of intelligence to the top levels of the administration had been deliberately skewed by hawks at the Pentagon.

"CIA assessments are being put aside by the defence department in favour of intelligence they are getting from various Iraqi exiles," he said. "Machiavelli warned princes against listening to exiles. Well, that is what is happening now."

Johnny Is Marching Home

So, you know cop killer bush has no evidence to back up his allegations against Iraq, while Saddam repeatedly offers Americans to come look anywhere, and nazi bush refuses the offer, instead lies to all Americans through corporate control as US being worthless without meaning, without soul as himself, lacking purpose but for destruction of our Humanity as unworthy to hear from. Mr. bush tells US secretly, he wishes to sacrifice at minimum, hundreds of thousands of American soldiers in a criminal war against our dying Planet, 60 countries, without following evidence to substantiate his claimed to be therefor super evil allegations, nor, will he practice legal due process as a terrorist in Our names by flying the American flag as a true Patriot would. Destroy nazi bush and rumsfeld the traitors today, and be loved by every American principle of Freedom, as Justice for US all. Or be a lifeless coward to watch the bushmob steal not only from our dumb dorky soldiers to be wasted as sadistic murdering tommy frank savages, to be not defenders of the faith or the hopes for a better future, but also from our murdered sons and daughters, who could have, at one day, understood the principles of Freedom and Justice, present in the forgotten American Constitution as worth fighting for to

be protected as ourselves always. Mr. bush the demon, is not my false deity, as he is irrationally insisted by the American corporate cult product schedule to be so. CBC and CNN we all witness as Humanity daily, refuse to ever cover the corporately mandated bushmob atrocities, as documented facts that steal real lives. Our Mr. bush Jr. has shown little of no concern for the living people in Afghanistan left alone without an American commitment to protect our lives, or feed their families, now prepared to waste hundreds of billions against the starving in Iraq over something planned close to thirty years by criminal occupation. Their strategy, like in Afghanistan, is to put worthless nazi slave soldiers on the front oil pipe lines only, while murdering students and teachers who would have suggested clean hydrogen is practically free nazi dum fuk scums. You think if Saddam was murdered, the rest of our Humanity the whole world over, would allow like a cowardly corporate american slave whore, Mr. bush, rumsfeld, and tommy franks, to give all of the Iraqi resources, to the murderous criminal thieving intolerant evil fascist israeli government of nazi bigot human haters, without objections from G of all beings? Holy Jewish Jihad Jesus! We notice the corporate news agenda to rob from US all, our commitment to human rights, is to never inform our communities as publicly aware, that nazi amerika, blocks food and medicine from ALL the Iraqi people, but yet will afford our time to propagandize our community with bushmob lies, left uncorrected. Has Ramsey Clark ever been offered as a legitimate voice of opposition, to clarify our positions? Does Ramsey Clark speak untruths, like bush does to kill and plunder the American People? You'd imagine, if CNN was truly American, they would tell Americans importantly, bush has no evidence to conclude OUR position, and murdered thousands in New York City, while Saddam offers the World to witness the falsehoods of the bushmob to come see for ourselves, or just simply give some attention to bush's true evilness he spouts as his own. The bushmob is tirelessly working to undermine the UN peace effort, by trying to suggest, if the World community should get the weapon inspectors in before mindless nazi forces get there to blindly murder and terrorize further, untold thousands in Iraq, slave boy Powell wants inspectors to include armed nazi soldiers, planes ready to bomb civilian targets, and openly, secret spies to be criminals! Something any legitimate inspector would appose as a ridiculous proposal, undermining of the peace initiative to be a Just cause, and the UN as an INTERNATIONAL BODY. And, as so should, motivate wimp

ass Kofi to vocally detest on behalf of US people he claims to represent as a living person. Europe reports as human, while CNN as traitors to all of Humanity refuse to offer the facts. CNN sees no responsibility to protect America, or our soldiers as worthy the effort to address their real concerns regarding Our... Godly is Justice Freedom thing, or this all powerful Mr. Wizard person even. LOOK, THINK... I'm telling people around the world, Mr. bush and rumsfeld are documented to have murdered Americans at 9/11 to thwart Enron's impending CRIMINAL bankruptcy, while, I've repeatedly demanded their immediate arrest or execution by the lovers of Humanity, and don't you think that would make for a legitimate National news story? ("The Dabhol Working Group", cheney's secret energy meetings with Enron, public threats against God as Justice through the Taliban, BND, September 9 war plan, Ahmad and Ahmed, and, AMERICAN FBI and CIA investigations.) Why not? Because I am relying on the evidence like a Police Officer does, as it is related to Justice indivisible as ourselves, THE ACTUAL FACTS JACK, and CNN doesn't truly want American soldiers to know who's dying for who. Myself, as the dreamy Saviour, am open for dialog, discussions with what we can measure and what we can not, debate to put to shame any even on the Nature of truth and deception, God, and this Universe, something CNN refuses to all American Patriots as worthy of deliberation. Like with economics, or basic high school maths. I've personally contacted the CEOs of both, CBC, and CNN, who have decided with intent to ignore Our concerns. Look, one of the first things bush did when he stole the Presidency, was steal fifty billion American tax dollars from our grandmothers, and don't you think that would make for your National news interest?, as a soldier worth giving your life away to bush for? You know, Mr. bush, the super evil, false deity, anti-Christ of biblical folklore? So unbelievably vile and putrid, the Son of Man as God's only true born Son, has to come down here to defend myself as all of Creation exists for this day. Mr. bush's american whores would work to decimate the Constitution and sacrifice humanity as Jesus on the cross, and ask US why?, without listening? CNN won't allow amerika to be America, but for to be misrepresented as slaves to die by corporate command, through the evil practices of the unholy and criminal dictates of Our Mr. bush Jr., traitor to US all. The Messiah asks the American people to stand up for themselves as a nation of individuals, to demand equal access to our rights for freedom, by reaching out to our

neighbors as soldiers and police officers, to break through Our international media controls at CNN headquarters, that silence our concerns as the living to be justly represented. We demand the immediate firing of Water Issacson, and Sid Beddington, and Johnny wants Our voices heard now on our Public airwaves! A word of wisdom: I wouldn't tick off our King like this for much longer bushmobsters, you don't want to see the Family, US, losing our patience by getting really wrangled up with little corporate america's false deity of hatred towards the makeitwithart living John man. Johnny'd rather have American men find courage somewhere to stand up for themselves against being robbed of their generosity, but Jesus Christ all mighty, if there is no real Manly men in corporate america, we'll just have to come down daring to make all doze men look like the weak twerpy cowards they are to be deprived so sleepy, as too afraid of their own little shadows to protect the once great American dream for Humanity. I thought I knew America, my father thought he knew America, and bush, the treasonous unelected fascist nazi mass murdering savage criminal, he don't know the America we believed we are of once.

Again, I can not stress enough to the truly proud and strong American People in the NRA, bush's criminal evil, and those who support him factually against Justice and Freedom in Congress and the Senate through the prepared before hand, unread Patriot Act, and for approving an unrepresentative blatant criminal war as clearly the evil doers, is really happening. CNN refuses to report in American survival interests, while we now know, bush and rumsfeld hold little reservation murdering American citizens or soldiers, Police Officers, Fire Fighters, if it then means they can steal further our life's purpose, and pursuit of happiness by fair play as Justice instills for all. Mr. bush openly lies as a demon to our world deliberately while smirking, counting on CNN at the National level, not correcting his treason against the entire human race, leaving US isolated as individuals, with potential doubt always ever present. But, we can indeed measure, and verify irrespective of bias or ideology. A fence that is seven feet tall, is a fence seven feet tall. And, when demon bush advocates the murder of innocent people to steal our life savings while destroying the living economy, people do actually suffer and die. Forget about my fanciful dreams to be a party King, and think about your own future and family as we exist in reality, dying unjustly at the hands of the anti-Christ through corporate cult america that

sacrifices themselves even included as unworthly to what? They glorify dumminess, as an attribute for success, sacrificing our dying freedoms to be heard as the still barely living with concerns. Gee, and you wonder why they take half of life's investment to bankers as sacrifice for nothing...

I beg you, to forward this paper to all you know who should consider this for themselves.

The war criminals, Mr. bush, rumsfeld, and tommy franks, must be arrested or executed by True American Patriots immediately. The three traitors to humanity, that not only have advocated in your name, the murder of US as innocent people, but have also perpetrated the criminal acts. Leaving US to judge themselves, as they have judged, to be treated as they wish to continue treating Ourselves, or Just you alone, with Rights granted by living as freedom to be so. God or no God. Mr. bush, rumsfeld, and tommy franks will immediately be arrested, or executed by True American Patriots to stop further bloodshed of our Humanity, as their real destruction of the American Dream for all as evidenced to be criminals under the Constitution, is found to be evidenced by all who understand so.

Glory be to God in the highest order, and if I should die tomorrow, I'll know I fought to the best of my love for living in a world where accidents do happen. If my life should grow unable to win our wager, and I lose all my fortune to the anti-Christ, Our Mr. bush Jr., my wanting for a better world will have never diminished. I'll know that I accepted to do what I could to the best of my giving. I can only hope these words, were enough thought as worthy of sharing to others, who believe in themselves to read this far in agreement with me.. I make a pretty damn good King eh?

Without risk, we would have nothing to be thankful for. Do not be afraid of living for freedom my friends, for most FBI officers support freedom for America, and so too do soldiers. Those who don't are generally weak, stupid, incompetent, and very very slow without God in their hearts, or will to be brave. Mr. bush and rumsfeld don't want to arrest the true culprits by following the available criminal leads for 9/11, and it doesn't take much figuring to understand why. We are all angered by Mr. bush Jr., and the contempt he and rumsfeld has shown for all those fallen murdered in America and Afghanistan.

And, just recently in Indonesia, a claim that al-Qaeda would attack a civilian target like the bushmob does advocate as practiced, and Laden repeatedly condemns, is again, with not even a thread of evidence offered on CBC to conclude such a statement that was made officially, shows a contempt for the rules of Justice to be practiced rightly by the ruler, and likely, staging the criminal investigation to go nowhere. Or, conversely, this sniper killing civilians in America, being a reflection of the Nation's true american bushmobster will to innocent good people going unreported elsewheres. The sniper is only a small taste my friends of bush's america as God is my witness. Mr. bush, america's false deity that corporate america puts all of every America's blind faith into as slaves without rights through Justice, had no interest in arresting himself and rumsfeld for 9/11, instead, with corporate america backing bush's further criminal intentions, dropped over 4000 bombs on Afghanistan, including a 14 ton bomb on Kabal. (The brave Taliban, we remember, were supporting the arrest of the actual culprits responsible. A no no to the bushmob circle.) Or like tommy's death squads against Afghan children for Enron, Afghans, who bush and rumsfeld murdered close to

100,000

without CNN daily coverage, as blamed for 9/11 without following the evidence and closing investigations, practicing a war planned terrorist strategy existing at the WhiteHouse it did, two days prior without able excuse anywhere to be found. A junta dictatorship of pure evilness. How stupid and cowardly does an American soldier have to be, before they stand up as one in defense for their own family? Like the Taliban would have?

Look at the American military usenet groups to read for yourself regarding Our Mr. bush Jr., little of no disagreement is found with what I have written so far. Sure, corporate america will continue to try, by illusion, to have US all believe we are the minority to stand with conviction to protect ourselves as Humanity. However, the free communications that our internet provides, clearly indicate our truer positions as not entirely devoted to self destruction by ignorance, and criminal behavior against ourselves by dictatorship under the anti-Christ. Help destroy bush, and be loved by all as yourself to be cared for as heard from. As King, I am so much looking forward to retiring as soon as humanly possible, counting on yourself eventually to believe also, for a real better future by only simply

trying to win the day for everyone.

Can somebody please help ourselves for living's sake?

Johnny Wizard

--

Bonus Track

Did you know, factually, no bull, the national debt accrued through the dilution as willed from Currency, is what is owed to the Nation, not the bankers? The creation of government debt is done by the willed devaluation of your earnings. See, it is a loan made in our names to the banker for ourselves. The public loan is actually made, when the banker is granted as doing so privately. It is not the magician banker who we must pay for nothing, it is the banker who owes the nation as the loan was to begin with to be legitimized by any national policy. Wealth taken as not earned, comes from those who work honestly getting jipped. So, I propose a private banker swindle tax, to cover the administrative costs of running openly public funded gambling enterprises, with 100% cash payouts to actually thwart our falling economies, then, maybe the corporate news industry will see a responsibility to measure how much a lottery official pays themselves secretly with our banked interests accruing. Our governments should be providing what services we want, and are willing to pay for. Stealing from the desperately poor to pay even more as servitude to our further ineptness, is not only firmly established as illegal, but also makes no sense to most anyone I'd bet. Example: VLT's payout 96% as advertized, well not truly, the math as counted says 30% before expenses, but who of the general corporate TV intellect, has our time to figure it honestly? See, it is easy to understand a criminal offence is taking place, but because the corporate mandate is to keep the public more ignorant than Our Mr. bush Jr. on everything as a monetarily rewarding experience, (Larry King is a millionaire) the corporate cult products refuse to practice the interests of Justice for our values to protect our living standards. Accordingly, bush murdered all those New Yorkers for whatever ill reason (who really cares) as the anti-Christ, and corporations refuse to follow the story as evidenced impartially. Too much work for no pay, but the expense is risked by the loss of investment in Humanity to be defended. This is why CNN won't even defend their fellow corporate cult members who lost their human lives at the World Trade Center. Who really cares?, for the

value of innocent life?, Your Mr. bush Jr.???

Johnny Wizard

--

My Divine Right

Destroy bush and rumsfeld now American Patriot soldiers, fire fighters, and NRA members. We all notice CNN and CBC management refuse to allow open discussions on the documented facts outlining the cop killers, bush and rumsfeld treasonous behavior against the great American people, deliberately forestalling their criminal arrests for the mass murders of US as innocent in America. (Or even the recent broken elections in Florida.) Again, I repeat, I've spoken to corporate cult Americans, Leon Harris, Bill Hemmer, Daryn Kagan, Sid Beddington, and Walter Issacson, just to name a few at CNN. All forementioned cowards, who would watch Americans be robbed and murdered, and do nothing to protect ourselves, are personally aware the bushmob was warned of the terrorist plot specifically, the fact that Laden investigations were blocked by the WhiteHouse, while the bushmob in Enron interests, developed a war plan with General Ahmad to invade Afghanistan, for an oil pipe line on a premise of blaming Laden for whatever without evidence as US innocent, a documented truth that existed also just prior to 9/11, a strategy confessed to fully implemented, demanding the bushmob not follow the criminal leads, that point to themselves as traitors. Like the bad bush act on 9/11. (emperors-clothes.com) No arguments are given against what I have spoken on, nor am I even being adressed by our corporate standards as inter-nationally responsible. Why? Largely, because, we are adressing what is as documented to be true, irrespective of ourselves as opinion, Justice infinite as indivisable, like the stars in the sky, while the corporate news machine is refusing to be our own as legit. Mr. bush, the anti-Christ, and rumsfeld did 9/11 to kill ourselves to steal Constitutional American values, with their silence only further implicating themselves to the doubters. Neat eh? (I'm also playing the Creator, who just wants to be at peace with ourselves as equals.) As for Iraq, it was the American administration that removed the inspectors from doing their, going very successful job, not Saddam, while the corporate media continues to allow cheney, the evil nazi fascist basstурd, to keep intentionally lying to American soldiers regarding the facts, like US Air Force Response, so the bush regime can throw away their lives

as worthless, without meaning. (Agreed, on general terms, American soldiers are deeply ignorant and cowardly as cheney continually attests, but they are still preparing for death, and I understand many can read human, and haven't been hiding in a undisclosed location without a television, or newspaper these last few months.) The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly. 250,000 troops are planned to criminally invade YOUR humanity, against now near SIXTY countries, representing around 2,083,093,468 people and counting, (that also includes freedom fighters, bikers, the Mob, and Jack), US, clearly aware of bush and tommy franks nazi plans, like in Afghanistan. To kill indiscriminately, while running death squads murdering innocent families, including your children. As for Saddam gassing the two guerilla groups called Kurds, who were fighting to murder in a war on behalf of Iran in 1988, labeled by American murdering nazi savage bush, Saddam's "own people", here is what the most definitive document on the issue states. It's a 1990 Pentagon report, published just prior to the invasion of Kuwait. Its authors are Stephen C. Pelletiere, Douglas V. Johnson II, and Leif R. Rosenberger, of the Strategic Studies Institute of the U.S. War College at Carlisle, Pennsylvania.

...

Iraqi Power and U.S. Security in the Middle East

Excerpt, Chapter 5

U.S. SECURITY AND IRAQI POWER

Having looked at all of the evidence that was available to us, we find it impossible to confirm the State Department's claim that gas was used in this instance. To begin with there were never any victims produced. International relief organizations who examined the Kurds -- in Turkey where they had gone for asylum -- failed to discover any. Nor were there ever any found inside Iraq. The claim rests solely on testimony of the Kurds who had crossed the border into Turkey, where they were interviewed by staffers of the Senate Foreign Relations Committee.

We would have expected, in a matter as serious as this, that the Congress would have exercised some care. However, passage of the sanctions measure through the Congress was unusually swift -- at

least in the Senate where a unanimous vote was secured within 24 hours. Further, the proposed sanctions were quite draconian (and will be discussed in detail below). Fortunately for the future of Iraqi-U.S. ties, the sanctions measure failed to pass on a bureaucratic technicality (it was attached as a rider to a bill that died before adjournment).

It appears that in seeking to punish Iraq, the Congress was influenced by another incident that occurred five months earlier in another Iraqi-Kurdish city, Halabjah. In March 1988, the Kurds at Halabjah were bombarded with chemical weapons, producing a great many deaths. Photographs of the Kurdish victims were widely disseminated in the international media. Iraq was blamed for the Halabjah attack, even though it was subsequently brought out that Iran too had used chemicals in this operation, and it seemed likely that it was the Iranian bombardment that had actually killed the Kurds.

From another American government report:

"Blood agents [i.e., cyanogen chloride] were allegedly responsible for the most infamous use of chemicals in the war--the killing of Kurds at Halabjah. Since the Iraqis have no history of using these two agents--and the Iranians do--we conclude that the Iranians perpetrated this attack."

--

The New York Times reported on corporate America's war project SHAD, where during the Vietnam war, 4000 U.S. sailors were gassed deliberately by Republicans with gruesome biological toxins, including sarin.

As for proving that something is not secretly hidden by a nation as millions.. practically impossible! You can't ever conclusively prove that something isn't secretly hidden from perception by variables admittingly, unknowable. (For whom would be there to secretly watch the watchers?) When, and under what madness of bush tyranny as enslavement of our human species, would anyone be able to try standing up in Iraq or elsewheres and state, there is no Anthrax anywhere hidden secretly to kill bush, the false deity super evil anti-Christ with? Never I declare as the Son of Man, will evil bush escape the wrath of our fury as this Universe is, however, it is the supporters of bush's irrationality with our poltical will unchallenged by corporate standards, as these nazi monster, lawless American cop killers wish to use to terrorize 60 nations of almost 2 billion innocents without any evidence with. With an intent to use a paultry 250,000 criminal nazi soldiers mindlessly stupid on drugs probably, while

corporate America won't give anyone two minutes nationally to speak on the clear strong factual evidence implicating bush and rumsfeld for murdering over 3,000 AMERICAN flag wavers in Yew York City? Destroy American traitor bush now!!! The sanctions against the poorest of poor in Iraq are also irrational. The Republicans state the innocent people of Iraq must be denied food and medicine to starve and die because, they are practically politically powerless to change their state to be attacked as the unrepresented, while stating Saddam, if he could, wouldn't help them survive as a nation as the Republican justification to terrorize millions, while cheney skirts U.N. sanctions to sell Saddam whatever supplies privately in secret? So the suffering of Iraqis, is rightly attributed on American terrorist activity by all Iraqis, as the direct cause, working directly against the Republicans publicly stated purpose to commit such criminal intent. Example: If a well spoken father who may not like the policies of Saddam should go to the hospital with his child, he is told the bush clan wish his family death and suffering by American will for being born to our world in Iraq as human. The oil for food program however, is intelligently based, but it's purpose is defeated with the Republican atrocities to blindly murder US with. The demands for the betterment of the Iraq people through national oil sales, would make sense, if they weren't directly suffering under assault by the same terrorist network cancer cell that denies themselves inalienable rights to life as our own. Like pathetically weak as unrepresented American cowardly soldiers, who were provided no evidence to back up the evil bushmob's criminal allegations, then went murdering tens of thousands of innocent people in Afghanistan on the brink of starvation, instead of killing the documented child killer, heroin pusher, tommy franks, or bush and rumsfeld for 9/11 in America. Just on bush's behavior on the day in question, being left unreported by CNN dictates, should say much to everyone.

Joint Chiefs of Staff Chairman General Richard Myers told reporters at the National Press Club about Iraq's enormous unknown stockpiles of !secret! corporate american warfare weapons, "It does not take a lot of space for some of this work to go on. It can be done in a very, very small location," he said. "The fact that you can put it on wheels makes it a lot easier to hide from people who might be looking for it. So, yes we have evidence." Evidence of what? Nations with trucks should be nuked? Richard Myers is a nazi warmongering

irrational fukhead, who wishes the murder of countless thousands, if not millions in AMERICA, who should be fired today. You see the nazi basstard, you fire him, do you hear me People? AMERICA? Johnny...? Mr. Myers, your fired!

--

While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. Guardian Wednesday 7, 2001 - "FBI claims bin Laden inquiry was frustrated"

George Tenant must be questioned on these matters, and his relationship to General Ahmad, then arrested regarding his inaction on the insider stock traders for 9/11. If neither happen in a timely fashion, he too, will be destroyed by US American Patriots for treason.

Excerpt From:

NY Newsday
U.S. Hypocritical on Human-Rights Abuses
by Marie Cocco

...
America's new business partner, Uzbekistan's president is brutal, and very bad.

The State Department human rights report says the former Soviet republic now "is an authoritarian state with limited civil rights ... Both police and the National Security Services routinely tortured, beat and otherwise mistreated detainees to obtain confessions ... Police also used suffocation, electric shock, rape and other sexual abuse. Neither the severity nor frequency of torture appeared to have decreased during the year."

What increased was American aid. It tripled to $160 million, the payoff for allowing U.S. military staging areas for the war in neighboring Afghanistan. President Islam Karimov was welcomed to the White House. In July, Treasury Secretary Paul O'Neill traveled to Tashkent and praised Karimov's "efficient leadership."

Bush has singled out one despot for removal.

He says he has many reasons for invading Iraq. Without
a look at some secret new evidence the administration
may or may not have about Saddam Hussein's arsenal, it
is not possible to find truth. That is how the White
House wants it.

...
Bush planned Iraq 'regime change' before becoming President
By Neil Mackay, Sunday Herald

A SECRET blueprint for US global domination reveals that President Bush and his cabinet were planning a premeditated attack on Iraq to secure 'regime change' even before he took power in January 2001.

The blueprint, uncovered by the Sunday Herald, for the creation of a 'global Pax Americana' was drawn up for Dick Cheney (now vice- president), Donald Rumsfeld (defence secretary), Paul Wolfowitz (Rumsfeld's deputy), George W Bush's younger brother Jeb and Lewis Libby (Cheney's chief of staff). The document, entitled Rebuilding America's Defences: Strategies, Forces And Resources For A New Century, was written in September 2000 by the neo-conservative think-tank Project for the New American Century (PNAC).

The plan shows Bush's cabinet intended to take military control of the Gulf region whether or not Saddam Hussein was in power.

(snip)

The PNAC report also:

(snip)

- hints that, despite threatening war against Iraq for developing weapons of mass destruction, the US may consider developing biological weapons -- which the nation has banned -- in decades to come. It says: 'New methods of attack -- electronic, 'non-lethal', biological -- will be more widely available ... combat likely will take place in new dimensions, in space, cyberspace, and perhaps the world of microbes ... advanced forms of biological warfare that can 'target' specific genotypes may transform biological warfare from the realm of terror to a politically useful tool'

--

Now, as for the corporate world telling US, we believe
Laden is guity without evidence: A reasonable person
doesn't have the justification to believe the
unsubstantiated verdict. This is why the fascists at
CNN propagandized, TERRORIZED, the American public by
falsely alledging that Laden threatened to nuke America,

or that he stated to murder any or all Americans like a bush would. Laden, like Saddam, or Arafat never was actually quoted to be that ignorantly stupid as a leader trying to communicate to the People, but for by CNN, and the sharon types regarding "Palestinians", as a lie to themselves to excuse their responsibility to ourselves as the humans. But EVEN IF TRUE, wouldn't make Laden responsible for every wrong doings the bushmob was actually responsible for, like robbing all Americans of their livelyhoods, unreported by CNN of course, to leave ourselves to fall victim by the bush regime as shysters pirating America, by shredding the Holy Constitution. However, Laden has skated near with the label "Jew", to be of the criminal, intolerant, offensive, fascist, bigoted jewish Israeli government, that imprisons or murders real Jews for being JUST that. Rabbi Hillel would be jailed by sharon in the israel of today. Wise Muhammad teachings cover this dumb Jew Christian thing well, as us all suffering by the illiterate evil dumbfuks who ignore ourselves, to steal our established values, while CNN, like Art Bell, forbids debate on their irrational falsehoods, refusing to protect the FBI, or the American flag through practicing censorship, while advocating murder, as Art Bell, the traitor, does almost daily, while hanging up every human caller. Next, CNN will be blaming ALL the poor and starving in the third world, for secret Pentagon frauds through the removal of the False Claims Act. As, the American nation contributes the least to the world in aid, in relation to the GNP. (The give and take.) 5 billion a month to not feed, but murder innocent people in Afghanistan? Destroy bush now, and be loved by all as God.

Hey, great! You've actually read this far. Say, listen... Google, for one reason or another censors my, and who knows who elses, posts for fear from the bushmob. The bushmob through Google 'Groups' has no problem with posts encouraging war crimes by bigots, but my rational posts regarding the nature of Justice, they have determined for US, is inappropriate, while bush prepares to criminally war our world to actually do so as an unelected mass murdering nazi savage. So I ask you to have faith in living, and give us your thoughts on this for yourself. When it's reposted, it makes it far more difficult to disect from public viewing, and gives the likely good people at Google, a viable excuse to not continuing to do so against our better interests. To comment this post with whatever position you may have regarding these important subjects, doesn't mean you agree that we are God, or I'm simply Johnny Wizard, but

for open free communications regarding the true political state of ourselves worth being heard from. Murdering innocent people for evil bush and rumsfeld to steal from ourselves, is a sacrifice in cowardice, I for one, refuse to stand for as the living. How about you? Public rebutals regarding my supreme stupidity are found in alt.sercurity.terrorism.

Thanks friend,

Johnny Wizard

Up to You

Look, american service personnel aren't even American enough to publicly defend their treasonous behavior against the good old red, white, and blue. Why? Cowards. We all know the bushmob has tirelessly worked to steal American service personnel's pensions, savings, and lives as worthless of protection, while counting on every American Soldier as Police officer, to not arrest the bushmob ourselves for 9/11 in New York, and the war crimes committed against the innocent in Afghanistan. Mr. tommy franks, the heroin pusher, tells dumfuk soldiers to kill innocent humans, and American soldiers aren't there anywhere to protect themselves? Sadistic nazi war criminal rumsfeld tells us all openly, he wishes to persecute those he knows to be innocent as a true nazi did. With all the blessings of sharon naturally. Why do American soldiers not protect America? Or know the Constitution as Holy? Too weak, stupid and cowardly I told you Johnny. They sit terrified, unwilling to stand for their country, while demon bush and rumsfeld decimate my economy with a regressive tax swindle, and in addition, criminal thefts through the Pentagon and Social Security, while publicly planning to war two billion people of

US

for no good reason but for sacrifice to corporate america's false deity, the anti-Christ, Our Mr. bush Jr.. While we now all also know, to not only rob, but murder thousands of Americans too, as fair play by the bush backed terrorist protocol, exposes Our Mr. bush Jr. as the most heinously evil demon humanity has ever

witnessed factually. All evidenced and everything. So, will Americans live up to protecting their dying rights, or will bush, the anti-Christ, succeed to further steal our God sworn, Patriotic duty to protect our own humanity? Will bush succeed in destroying civilization, or will we succeed in destroying pathetic criminal pirate nazi traitor bush, by the will of our own survival to continue as the People?

The godless corporations refuse me to speak publicly in our defence naturally, and people generally, seem to concur as stupidity, to sacrifice their own families purposefully for the banker buildings, while putting their religious faith into corporate dictates for slavery. I am not myself to be G in all worlds, nor, am I all dreams to be so undesirably. I am just a super human being as space time continuum, day tripping all alone, wondering about prospects for a world in which I can live with. I love life, and our ailing planet, but maybe, I did get this story line wrong somewhere, and got taken away too far in fantasy. Maybe, bush's humanity as it exists here in reality, is a nightmare not worth saving for yourself being.. CNN and CBC do work against our communities, documented everyday, by their continual refusal to cover our top priority issues. Corporate radio programs primarily, but not always, insist on only hiring semi-literate ignorant bigot whores as fascist degenerates, who insist on disallowing open communications, or learning to learn with the community, while advocating the murders of American service personnel and innocent civilians, as a patriotic duty to not live up to our personal responsibilities as a member of society. It is all up to ourselves to fight for peace, or be slaughtered on Coast to Coast's alter of apathy to not care so for living justly. We are not at war with ourselves, or a third of humanity as cheney and bush repeatedly claim, but with the warmongers, who wish US all harm, to steal our human values of love and understanding, good will, and compassion. With evil bush, cheney and rumsfeld figuring, there is no way for US all to stand up for yourself, under the banner of Justice as freedom for all. Well, I say, nuts. If God can do it, and I can do it, so can you true! Help yourself up please won't you do it as us living already? Or, maybe for beer?

Please do not allow the bushmob to murder millions. The fears to stand proud as Americans, are the fears to stand proud with Love as ourselves being the Universe. Boo! That wasn't so scary, was it? Again, traitors bush and rumsfeld must be immediately arrested for 9/11,

and tommy franks, for war crimes in Afghanistan. Like Now.

Always forever, the one and only,

Johnny Wizard

All at Once

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other.

So, Mr. bush Jr. tells you, we're either with us, or with the terrorists. Hmmm. As a member of the general public, bush, as himself, has no more rights to speak openly as the person I am, and therefor, I will except his proposal on equal grounds to communicate freely. So, I'm either with yourself as a would be, could be anyone is, or your factually documented as an unbelievably super evil, anti-American mass murdering fascist dictator, war criminal terrorist recruiter, as the, golly gee, actual, must be for real, warmongering anti-Christ from this Book by John then eh?... No? You, what do you figure Mr. bush Jr.? Can you hear humanity calling you out to publicly explain your vast stupidity? Politics has it as our mutual understanding, loyalty to life through law as living is civilization. Law, as is the only true measurement of freedom for ourselves to know so. Are you alone on this too? Ha, er... um, anyway..

Nobody would want our lives or freedom stolen, simply by living to not deprive those same rights from others. So we form Governments, and have loyal police officers to practice our will as ruled out to the best of our ability.

We need a new national news format to make for this information age approaching, that sets a high priority on ourselves as concerned about where we are going. The Constitution is not just a jumble of tossed blurbs, telling of a day when people didn't care for living as America in spirit also, the Constitutional rights of Justice stand strong through good reason, and are easily defended up at the national news desk, we're sure to say eventually, if we only had the show for something. While we wait, corporate america prepares to never have Chomsky aired, or legitimate critics as the voices for freedom by representation, to gain ourselves progress as we would normally on Watt's happinin for real man. You know, the awesome power of communication, and Chomsky,

being a best seller over and over like that, or Ron Paul being a Republican citizen, committed to working for Americans as a true Patriot would under the flag? The Constitutional rights of Justice stand strong through good reason. Ashcroft is truly incompetent. His failure to grasp why a democracy would choose to treat all people fairly, as duly protected with a system of laws practiced to find governing with, leaves us instead as, the ancient bushmob vision of injustice against ourselves that he fails to confess as us innocent until understood otherwise. The crusades were a lesson we never want to be learning over, with Our Mr. bush Jr. at our wills demanding a crashed course we've done and learned from already. I think Ashcroft's personal turn to criminality for America, has to do with sabotaging that FBI investigation, and the fair play consequence of us People arriving to communicate him to justice on behalf of the Nations with questions that need immediate answers. Sabotaging the FBI was not due from insufficient funding, or failure to connect the dots ever as investigators.

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other. Right? Save America for your own sake Americans! The strength is within ourselves to make this a better world for living.

As you are,

Johnny Wizard.

From: TOMPAINE.com

Is It Not True?
Questions On Iraq From A GOP Congressman

Ron Paul is an M.D. and a Republican Member of Congress from Texas

Editor's Note: Texas Republican Rep. Ron Paul read the following to the House of Representatives, September 10, 2002.

Soon we hope to have hearings on the pending war with Iraq. Here are some questions I would like answered by those who are urging us to start this war:

1. Is it not true that the reason we did not bomb the Soviet Union at the height of the Cold War was because we knew they could retaliate?

2. Is it not also true that we are willing to bomb Iraq now because we know it cannot retaliate -- which just confirms that there is no real threat?

3. Is it not true that there are those who argue that even with inspections we cannot be sure that Hussein might be hiding weapons, and at the same time imply that we can be more sure that weapons exist in the absence of inspections?

4. Is it not true that the U.N.'s International Atomic Energy Agency was able to complete its yearly verification mission to Iraq just this year with Iraqi cooperation?

5. Is it not true that the intelligence community has been unable to develop a case tying Iraq to global terrorism at all, much less the attacks on the United States last year? Does anyone remember that 15 of the 19 hijackers came from Saudi Arabia and that none came from Iraq?

6. Was former CIA counter-terrorism chief Vincent Cannistraro wrong when he recently said there is no confirmed evidence of Iraq's links to terrorism?

7. Is it not true that the CIA has concluded there is no evidence that a Prague meeting between 9/11 hijacker Atta and Iraqi intelligence took place?

8. Is it not true that northern Iraq, where the administration claimed Al Qaeda were hiding out, is in the control of our "allies," the Kurds?

9. Is it not true that the vast majority of Al Qaeda leaders who escaped appear to have safely made their way to Pakistan, another of our so-called allies?

10. Has anyone noticed that Afghanistan is rapidly sinking into total chaos, with bombings and assassinations becoming daily occurrences; and that according to a recent U.N. report the Al Qaeda "is, by all accounts, alive and well and poised to strike again, how, when, and where it chooses?"

11. Why are we taking precious military and intelligence resources away from tracking down those who did attack the United States -- and who may again attack the United States -- and using them to invade countries that have not attacked the United States?

12. Would an attack on Iraq not just confirm the Arab world's worst suspicions about the United States? And isn't this what bin Laden wanted?

13. How can Hussein be compared to Hitler when he has no navy or air force, and now has an army one-fifth the size of 12 years ago, which even then proved totally inept at defending the country?

14. Is it not true that the constitutional power to declare war is exclusively that of the Congress? Should presidents, contrary to the Constitution, allow Congress to concur only when pressured by public opinion? Are presidents permitted to rely on the United Nations for permission to go to war?

15. Are you aware of a Pentagon report studying charges that thousands of Kurds in one village were gassed by the Iraqis, which found no conclusive evidence that Iraq was responsible, that Iran occupied the very city involved, and that evidence indicated the type of gas used was more likely controlled by Iran not Iraq?

16. Is it not true that anywhere between 100,000 and 300,000 U.S. soldiers have suffered from Persian Gulf War syndrome from the first Gulf War, and that thousands may have died?

17. Are we prepared for possibly thousands of American casualties in a war against a country that does not have the capacity to attack the United States?

18. Are we willing to bear the economic burden of a 100 billion dollar war against Iraq, with oil prices expected to skyrocket and further rattle an already shaky American economy? How about an estimated 30 years occupation of Iraq that some have deemed necessary to "build democracy" there?

19. Iraq's alleged violations of U.N. resolutions are given as reason to initiate an attack, yet is it not true that hundreds of U.N. resolutions have been ignored by various countries without penalty?

20. Did former President Bush not cite the U.N. resolution of 1990 as the reason he could not march into Baghdad, while supporters of a new attack assert that it is the very reason we can march into Baghdad?

21. Is it not true that, contrary to current claims, the no-fly zones were set up by Britain and the United States without specific approval from the United Nations?

22. If we claim membership in the international community and conform to its rules only when it pleases us, does this not serve to undermine our position, directing animosity toward us by both friend and foe?

23. How can our declared goal of bringing democracy to Iraq be believable when we prop up dictators throughout the Middle East and support military tyrants like Musharaf in Pakistan, who overthrew a democratically elected president?

24. Are you familiar with the 1994 Senate Hearings that revealed the United States. knowingly supplied chemical and biological materials to Iraq during the Iran-Iraq war and as late as 1992 -- including after the alleged Iraqi gas attack on a Kurdish village?

25. Did we not assist Saddam Hussein's rise to power by supporting and encouraging his invasion of Iran? Is it honest to criticize Saddam now for his invasion of Iran, which at the time we actively supported?

26. Is it not true that preventive war is synonymous with an act of aggression, and has never been considered a moral or legitimate U.S. policy?

27. Why do the oil company executives strongly support this war if oil is not the real reason we plan to take over Iraq?

28. Why is it that those who never wore a uniform and are confident that they won't have to personally fight this war are more anxious for this war than our generals?

29. What is the moral argument for attacking a nation that has not initiated aggression against us, and could not if it wanted?

30. Where does the Constitution grant us permission to wage war for any reason other than self-defense?

31. Is it not true that a war against Iraq rejects the sentiments of the time-honored Treaty of Westphalia, nearly 400 years ago, that countries should never go into another for the purpose of regime change?

32. Is it not true that the more civilized a society is, the less likely disagreements will be settled by war?

33. Is it not true that since World War II, Congress has not declared war and -- not coincidentally -- we have not since then had a clear-cut victory?

34. Is it not true that Pakistan, especially through its intelligence services, was an active supporter and key organizer of the Taliban?

35. Why don't those who want war bring a formal declaration of war resolution to the floor of Congress?

Published: Sep 17 2002

No Telling

Destroy bush and rumsfeld now! Look, the terrorist network runs out of CNN and CBC, both willingly advocate criminal intentions against our community interests, by censorship and dissin' information. (Video Lottery Terminals eat at our souls, and destroy our economy. 100% payouts must be demanded, anything less, is a perpetration that does not stand up to sound fiscal management.) The management of the networks, Walter Issacson and Sid Beddington of CNN, Israel Cinman, Robert Habinovitch, and David Cochten of CBC, are all our humanity's enemy, as the true harborers of terrorist activity, evil scum to US all. These monsters refuse to allow reporters open public discussions on the true current political state of OUR affairs, protecting their false deity, the anti-Christ, Our Mr. bush Jr. from immediate arrest or execution, for perpetrating 9/11, now getting away with open deceit as unchallenged with OUR facts, perverting America's democracy into in junta dictatorship. CBC and CNN play our nations as unworthy of deliberation, while censoring OUR ELECTED officials. Like the recent Florida election. Or those in the American government, responsible for managing to barely protect Social Security, that bush has now illegally had removed from their jurisdiction, while silently telling all Americans, he'll manage to rob from us in secret without telling anyone. Arron Brown, like Larry King, feels the Social Security of our soldiers is unimportant as newsworthy, nor their lives as worth protecting. Or how about when bush stole 50 billion tax dollars from American families, and stated, he wasn't accountable to the people as a legitimate leader? No fukin kidding! Unaccountable to no one evil nazi murderer bush thinks America will not stand up for ourselves without godless national news coverage, nor will American men be brave enough to stand strong to protect their own bereaving families. Again, the bushmob not only threatened directly the Taliban with war in July 2001, for not siding for Enron's interests, but was also caught with the 9/11 war strategy fully developed two days prior to the event in question. Why would Laden, or the Taliban give bush a justification to follow through on his evil nazi threat? How could the irrational, illogical, lawless criminal dumfuk bush, have attacked the students

of Afghanistan, then let tommy franks run death squads to murder defenseless children, without 9/11 I ask you? Gee, the Taliban sided for the better pipe line contract for the interest of their nation, and turned down bribes to sell out their brethren, therefor, the bushmob as Enron can steal and murder anyone they want to because, Americans refuse to uphold their own Constitution, of which, true American Patriot Soldiers it was rumored at one time, used to actually give pledge to with their lives if necessary in protection, while crying through a salute to the flag, that bush and ashcroft now spit on deliberately, challenging US to come down there ourselves personally, because Americans, are so unbelievably cowardly! Again, the pension money stolen from American families through Enron is sitting in the Cayman Islands, and the biggest crook of them all is Thomas White, bush's Secretary of the Army. (Thomas, as Secretary, does the financial paper work for the US Army, in case you didn't know.)

As for evil dumfuk rumsfeld's statement to justify our unjustified incriminations, "The absence of evidence is not evidence of absence.", no it's not, nor is it impossible that every real man alive will destroy rumsfeld ourselves, before he continues to murder us all irrationally for possiblilities we could maybe might do. Mr. rumsfeld tells us he would without reason to claim so, steal and murder from ourselves as established innocent, of which he himself, would even contend as the criminal! To have rotten rumsfeld tell us he has a belief in our names to persecute innocent people, because he can't substantiate any evidence factually, gives himself no honest justification to hold such a position against our better interests. So goes to show, rumsfeld, the nazi, is a war criminal! Then, of course, there was the statements rotten rumsfeld made, that enrages every loyal member of the NRA when communicated clearly, where rotten rumsfeld stated, that of the Taliban prisoners held illegally at Guantanamo Bay, that even if they were honestly tried, and found innocent in an American court of Law as judged by our peers publicly, rumsfeld would still fight our humanity as a terrorist, and refuse their release as farmers with beards, or protectors of our communities. Or like ashcroft said about terrorists not deserving the same Constitutional Justice protections as everyone else, like facing their accusation in a public court of law to defend themselves against alegations made in our names. What is it then nazi bassturds, is ashcroft saying people in other nations should be terrorized, or is he saying american

criminals are getting away unaprehended?

Destroy rumsfeld now American Patriots!

www.washingtonpost.com/ac2/wp-dyn/A38441-2002sep4?language=printer

To persecute our humanity for no other reason, but for rumsfeld's paranoia with what is possible, or fear of reprisals for 9/11 by real American Patriot Soldiers, would mark himself openly as a terrorist to everyone, threatening US all with murder for crimes he says he has no evidence to back up as alleged. Mr. rumsfeld, like ashcroft and bush, is a traitor to the Constitution of America, and every living soul in this Universe! While WE know, he didn't go to the NMCC on 9/11, where he knew, and was reminded, he was supposed to be. While WE know, there was no public evidence linking Laden or the Taliban secretly either according to the British Parliment, at the time he ordered the blanket killing of Afghans, (who as a Nation, like "Omar the Just" were in support of following the criminal leads to arrest the true evil doers, (true American Justice!)), as the reason offered to stop all investigations by hiding most of all the evidence that would jeopardize his, and bush's security as demons of pure nazi filth, traitors to US all as the living to be humans. Like the eight black boxes, cockpit recordings, testimony from the ATC, FAA, NORAD, the Air Force, Building Seven, the FBI (Rowley and General Ahmad) and the CIA (Insider trading on the airline companies testified to not be connected to Laden). Or like flight manifests, with the alleged high-jackers who boarded without tickets, using stolen names of people either still alive, or mostly from Saudi Arabia. Gee, why would, would be terrorists steal passports they didn't need, of American trained Saudi national pilots, if they didn't want to be discovered as American trained Saudi national pilots? Why plan to high-jack planes from faraway Boston? Why did the Ladens fly out of America at bush's request right after 9/11 from Boston too? Hmmmm. How is it possible for a terrorist to board a commercial plane without purchasing a ticket? AND, how would the two fbi officers (James Woods), and three cia officers responsible for 9/11 investigations, be able to conclude the false names of the suspects, if they weren't on the manifest? Destroy bush now and be loved by all as God!

Yours truly,

Johnny Wizard

All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as

the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of aluminum pipes that could be used in the manufacture of a

centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community. We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks

in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to find out what the ultimate disposition of these weapons programs are and if Iraq has no weapons of mass destruction program, thank goodness, we just diffused a war. And I think that's a good thing worth trying to do.

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both the CIA and Israel that Middle Eastern terrorists were ``planning to hijack commercial aircraft to use as weapons to attack important symbols of American and Israeli culture.'' This intelligence reportedly came from Echelon, a high-tech electronic surveillance system used by the intelligence agencies of several nations to glean through electronic communications for certain keywords. It was first reported by the German daily newspaper, Frankfurter Algemeine Zeitung on September 13. Its sources were reportedly from the BND itself. (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global - Intel, the original source of information actually came from Israeli Mossad agents operating in the U.S. who had infiltrated al Qaeda. According to his account the Mossad also informed British and Russian intelligence about the attacks, who then in turn notified the CIA. Thomas's sources are allegedly informants within the Mossad itself.

As of April 22, 2002, no challenges to this information has been reported. ...

--

Also, it has also been alledged that the German embassador Ischinger, On Monday 6, August, 2001, had met bush personally, and during that meeting, the Bundesamt fur Verfassungsschutz [German domestic secret service] and BND [Bundesnachreichtendienst, German foreign secret service] finding was once again reiterated in person.

--

! ! ! ! N E W S F L A S H ! ! ! !

September 12, 2002 NewsNight with Arron Brown

Scott Ritter - "The job is to disarm Iraq, not to penetrate Iraq to take advantage of the unique access enjoyed by the inspectors to go after Saddam. The United States took advantage of the information we collected, and also used the weapon inspections as a Trojan horse, inserting a signals intelligence operation which was used to collect information about the security of Saddam in a manner that was totally inappropriate, and had nothing to do with disarming."

Richard Butler - "I was in meetings with United States officials. This isn't some great Revelation. Where I rejected what they proposed, on this ground, That my mandate was to seek to disarm Iraq. And were our program, to be used for other purposes, to seek to change the government in Iraq, or national purposes, the interests of the United States, then THAT WOULD HAVE VESICATED, SHREDDED, WHAT WE WERE ABOUT."

Scott Ritter - "On seven separate occasions from November 1997 to August 1998, with inspection proposals signed by Richard Butler, authorized to proceed in Iraq, the United States intervened to manipulate these inspections, stop them all together, to alter their timing, Richard Butler succeeded to this"

Mr. Butler, did not refute, with his repeated opportunity, Ritter's documented as fact, with the paper work to prove it, allegations of american corruption succeeding, in fact, repeatedly, Butler refused to answer the direct question, on wether, he, Mr. Butler, abdicated his responsibility to our world community, and sided instead to bow as a fascist coward to CRIMINAL american sabotage regarding the U.N. resolution inspection's process.

Gee, no wonder Saddam has concerns for his people...

A worthwhile note also, is during CNN new briefs on Saddam's recent comments, never once was it said, that Saddam alleges to our world, bush murdered New Yorkers for financial gain, as he did factually claim, and I do too, as the evidence is unmistakable. Mr. bush, the super evil anti-Christ, and too, Mr. rumsfeld, the sadistic nazi dumbfuk, must be immediately arrested, or executed by Patriot American Believers, so we may begin to get this PUBLIC court case regarding the facts on the mass murder of AMERICANS under way. I wanna lead the prosecutor's team!!! (I am now officially excepting book offers.)

--

Here To Tell It Like We Is

So, the bush regime knows that Saddam has no nukes, but as any person could, maybe at sometime in the future would target general populations, of which Saddam has stated to be rationally stupid, immoral and evil. A tactic that bush, as america, says without pause to reflect, would do so in our stolen names is plausible with him in power as a degenerate. The bush regime also thinks Saddam does indeed have biological weapons, and has so for decades but never used them, as the only affordable balance to the militarization of the region. Namely, to counter the Israeli government's corrupt political position of American funded bigotry and lawless behavior, on claims God gave them a right as criminals apparently, to deprive Christians a right to live justly, to own property, or use public roads even, and that most of Iraq should too, be stolen by force like hitler did, as hitler did measure also, all Jews, by the same level of intolerance, ignorance and barbarity sharon does of US as Palestinians, you know, Catholics, Muslims, Jews and Atheists, absent love for ourselves as understanding, godly, and principally innocent until proven otherwise. Mr. sharon is not Jewish, nor is anyone else allowed to practice as such in the Likud party. But anyway, Saddam is no Saint, however, no evidence exists that Saddam has ever used bio warfare weapons on his own people, while Our Mr. bush Jr., is documented factually, as a murdering demon of evilness clearly paraded before ourselves by corporate command, as a supposed representation of OUR civilization's true will. As Our Mr. bush Jr. works diligently to destroy our lives through fraudulent means, counting on US not trying to save Ourselves by following the truth to set US free. A Republican who without laughing, demanded law enforcement agencies not follow the ample criminal evidence to arrest the true perpetrators of 9/11, but instead, urged the closing of investigations, while top secretly, implicated bin Laden without evidence he couldn't divulge, of which the British government ended up doing so for the love of our selves, comprising of only, general maybe if's, of which only could, can, and does, jeopardize bush, cheney and rumsfeld by taking such a secret, now public position against our interests to kill us as the innocent with. Which is truly why bush rumsfeld and cheney are warmongering as despicable savages. 5 billion dollars in humanitarian aid is being blocked by the bush regime to enter Iraq, like food and medicine. The bush regime demands children be starved and not receive treatments for ailments, such as aspirin for headaches, or as

cancer from the devastation the families of Iraq are still suffering through, since the last time a bush's american criminal military force dumped tons of radioactive waste in the region, while murdering indiscriminately ourselves as anyone, because principally, toxic American soldiers, like the American people, hold the title of the highest illiteracy levels of the developing world, which brings them as consequence, the worst health care providers to themselves as discounted, corporately mandated as unworthy to understand their own behaviors, so they can be even further rooked as shysters. Over two million people have died directly because of American aggression against the practically defenseless in Iraq, who the bush regime even claims, have little of no power to change the political landscape, based in loose tribal ethics as protections, that has been as such, for approximately 4000 years. And as American traitor war criminal rumsfeld proclaimed, since american aggression has continued against Iraq over the last twelve years, so too, has their economy been devastated, and as consequence, the attraction to keep the more literate as wealth driven from remaining, has waned. But what can bush offer Iraq, indeed to our world my friends? Just murder US people for stolen cash profit, is clearly his only motivation, as a tyrant dictator far worse than Saddam has ever been. Mr. bush indicates he knows nothing of economics, or the important function of law to protect our societies, so what if he should kill Saddam, and maybe a million Iraqi people, then what? He hasn't thought that far, and clearly, due to his evilness we witness daily, couldn't care less. CNN and other corporate professionals refuse to tell the blood sucking, carcinogenic, corporate American real fast news blips, of causes they as a nation in total celebrated televised ignorance, have committed against the Iraqi struggling to survive People, and indeed around our world likewise. As was the bush regime's unreported support of the overthrow of democratically elected Chavez in Venezuela, who incidentally, as one of the very few, holds a perfect human rights record, unlike America, who is the only nation, the World Court has convicted by factual documented evidence, to be a terrorist state. There is no record of Saddam murdering millions of Iraqis, while targeting innocent children, but there is to the illegitimate bush family, and nazi soldier tommy franks intentions, the most despicable savage to ever don an American uniform, who would now have us all believe, such a evil strategy of criminal wrong doing, is the only option, to better the lives of

those who barely survive from American oppression in Iraq as it is. What form of governance would bush be suggesting? Would it be like bush squandering almost 7 trillion dollars in bad business decisions for our futures as he has set forth for America already? Or maybe something like the new criminal heroin pushers in Afghanistan as foreigners? Costing the American nation, who holds the title of highest rates of human depravation in the industialized world, and highest percentage of imprisoned per populace in all recorded history, 5 billion dollars every month to prop up sales in narcotics, and terrorist handbooks? Where political opponents who criticize the Karazi regime are murdered, for factually claiming the political aims of Karazi are not representing US people as the children? Or as evil bush, who would boldly lie to the face of God, that there were no girl schools in Afghanistan under the Taliban, while secretly thanking sadistic scum bag American traitor, mass murdering savage, wimp ass drug dealing coward tommy franks, for specifically targeting those very schools, women reporters, Mosques, red cross units, literate tribal leaders, men with beards, and children, while labelling all of Our humanity who would fight against injustice his enemy? Or that bush would dare still attempt to get away undamaged by the real men of this world, to spout his venom hatred for humanity to what must be drugged out to be so cowardly American soldiers, by lying to US as the demon of pure evilness we all witnessed, that heroin cultivation wasn't factually outlawed by the Taliban officially following Allah, leaving no position as God's will to back track politically on later? American military analysts, including the CIA and former secretary of Defense, William Cohen, claim Iraq is no threat to it's neighbors, as so too, does no nation in the region support bush's warmongering. In Congressional hearings last week, former UN arms inspector Scott Ritter courageously stated what many Americans believe, but rarely if never mentioned by corporate news standards as the will of the people, "A handful of ideologues have hijacked the national security policy of the United States for their own ambitions." Ritter insisted Iraq was no threat to the U.S. or the Mideast, and later offered that cheney be forced by Americans on mass, to offer evidence to his bogus, make believe accusations, that he wishes to use to actually murder thousands, if not millions of US REAL PEOPLE. Our axis of evil, bush rumsfeld and cheney, do not want renewed inspections of Iraq, they only want war to murder ourselves, and to create instability in our world through fear to prevent

their rightful capture for 9/11, while we all are expected to sit back as corporate standard fascist cowards, to pretend bush was actually elected as President in America, because actual poll counts were forbidden to be publicized, therefor, he may have won our approval to use nukes against anyone for whatever. With CNN, the Commie Nazi Network, telling us we as the civilized are also convicted to poll, that evidence is no longer a requirement to convince US who is criminally insane, in this nightmare of criminal bush family evilness, hell bent on destroying your world, and everything WE, as The People, have struggled so hard to protect. It would seem any world threat of terrorism, would be surely from a nation like bush's America. A cowardly nation that demands we as humanity, be deprived the guiding principles of Justice like they in weakness had abdicated as no longer their own as unfairly represented, leaving as slaves the bush regime to rob us all of our Freedoms, as a rule of Law instills such as in the Declaration of Independence, the Bill of Rights, and the American Constitution. All now trashed by Ashcroft, as clear criminal intent to obstruct Justice as the American dream for everyone.

E-mail this to somebody for Christ states,

yours truly,

Johnny Wizard

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters

told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

Weak Pathetic Coward Nazi bassturds

American soldiers are weak pathetic coward nazi bassturds. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and

thefts against the innocent, because soldiers are too weak as colateral damaged disfunctional illiterates, to stand up proud for the American people as equals. Under the Bill of Rights, as justice for US all, truly brave and strong, as the saviours of ourselves to be free as individuals, humanity, WE will never surrender as slaves to the false diety, anti-Christ, Our Mr. bush Jr.. The lawless nazi facists mass murdering tyrants, Mr. bush, bogus cheney, and rumsfeld, are the ememies of America as the free world, who as WE, will no longer except lying down to the continuing corporate silence of surrender, to take us as dead and forgotten, as not worth our time of day, to stand for yourself, as a living breathing human.

Johnny has spoken to several hundred at CBC and CNN including the CEO's of both, regarding the evidence that no one has yet, suggested they find any contention with. Destroy bush and rumsfeld American Patriot Soldiers, and be loved by all as family.

Destroying the evil doers

I am reaching out to you regarding an extremely serious life and death, Heven or Hell kind of development, that I can only encourage you to investigate on your own to form your own conclusions, but firstly some background. As you should already be aware, NBC was recently provided top secret, presidential directive, war strategy documents, outlining a plan to invade Afghanistan, with a pre-requisite strategy, of blaming Bin Laden for a crime, but providing no evidence, existing as these documents did, two days prior to 9/11. When NBC contacted the WhiteHouse regarding these revelations, not only were they compelled to admit the paper work was legitimate, but, what can only best be described as pure evil stupidity disguised to nobody, confessed to fully implementing. That's right. Confessed to implementing a strategy that demands the bush regime not follow the actual criminal leads, to arrest the true perpetrators, for a crime that hadn't even yet taken place, but that bush was prepared for, to gain access into Afghanistan for bush and his Enron friends to rob even more futher from US all. (According to the FBI and the CIA, al-Qaeda is headquartered in Saudi Arabia.) In addition to this, if you remember when bush told us he wasn't going to rely on the criminal evidence persay, but knew top secretly better than everybody else does, that for sure Bin Laden was guilty, while working to close 9/11 investigations and seizing as much evidence from law enforcement as possible?

Well, the British government, God love'em, has now made those documents public, and guess what? There is no evidence present in those papers, and the only security they seem to jeopardize, is that of our Mr. bush Jr.'s. Also, the FBI now inform us, that bush passed secret directive, W199I, just prior to 9/11 forbidding law enforcement officers from pursuing Bin Laden and al-Qeida investigations, of which John O'Neil, head of investigations for the FBI resigned in disgust over, while also being informed by the BND (Germany's CIA), that on June, 6th, 2001, they contacted the bush regime stating that they were highly aware of a mossad al-Qeida terrorist plot, to highjack American airliners to be flown into land marks. You know... Satan forbid, bush would of been compelled to actually have to arrest Bin for a criminal offence, (as we do remember the Taliban offered.) thwarting his intentions, of watching Americans been murdered in the thousands, so he could then gain access into Afghanistan, prop up the northern alliance, who still practice Sharia law, with the bush bonuses of selling heroin, and most importantly, building this bush Enron LNG pipeline to rob even more further from US all. All these points stand as documented facts, not opinion, speculation, conjecture or theory. However, CNN's blitzer, the nazi sympathizing fascist coward, refuses to inform Americans about the bush regime stealing their livelihoods, while propagandizing the American public, that they instead, should as cowards, watch the bush regime murder millions more in their own names, while stealing pensions and life savings from their own families without legal representation. I call upon all peoples, to recognize CNN's refusal to live up to their responsibilities to protect the American flag, and upon all it represents, Freedom, as is, Justice for US all. Where a person accused of a criminal offence without evidence, is clearly innocent, and where real soldiers, would now fully support following the criminal leads, of which there is plenty, to arrest to true perpetrators, of the 9/11 attack upon our better judgement. How did al-Qaeda sabotage the Moussaoui warrant? Mr. bush and rumsfeld must immediately be arrested, to face trial for crimes against our humanity, taken down by true American Patriots, committed to democracy, and the protection of ourselves slaughtered by CNN as worthless on their alters of apathy, and misgivings about our winning this war for everyone.

(links snpd)

What do you know?

Hi everyone, so, what do we know? Mr. bush made plans to attack Afghanistan just prior to 9/11, for not signing a contract with CentGas, which would have given Enron access to LNG. For without, they as members of the bushmob, would face their impending criminal bankruptcy, revealing they were stealing from any as all Americans, their life savings. Without the illegal war against the struggling to be better Taliban, the bushmob would have been exposed without fear by America, and soon, we would have all faced a bright new day understanding further, the importance of Justice for humanity as ourselves deserving not to be robbed from.

None of the evidence indicated Afghanistan, and by bush running without judgement with his plan made prior, showed a willingness to not apprehend the true culprits, while warmongering a fury in bigoted corporate America, to attack our humanity without thinking, or understanding the reasons why the American Constitution holds still respect, for it's wisdom granting protections to the people as we are, individuals with rights to be represented as equals under the law, in defence against the evils of humanity, of which, our Mr. bush willingly as a demon, works to destroy US as the too weak and cowardly as terrified to know better to speak up for themselves rightly.

We now have learned just recently by NBC, there was a thought out, secretly planned arangement two days prior to 9/11 regarding the Taliban being asked to hand over Bin without any evidence, knowing full well, that under such an agreement, the Taliban, believing in God and finding a Justice system through communicating, as they had during the Clinton Administration, would refuse rightly again, outlining the anti-Christ's entry to commit crimes against our humanity, with a plan that didn't need ajusting to falsely implicate the innocent of our world as Bin still is. Then Mr. rumsfeld. Mr. rumsfeld, the murdering nazi savage, on the one hand, told us the Taliban would execute their own men for leaving the fight to protect our world from heroin, and on the other hand, says they need with everyone else to be murdered without any questions asked. Ever I guess rumsfeld the dumbfuk figured. (Forgive my language Mr. Brown, but I'm supposed to set a few bad examples.) As an evil bush mobster, rumsfelds incompetent, like really dumb, and a mass murdering savage criminal, unable to cover his treason against the American people in New York City, now trying to bribe America's commanding officers to sell out American interests like tommy franks. We are all wondering just what are the percentages in the American forces regarding the

protection of America, the Nation? Or will they be like the northern alliance still as ignorant and evil to rob and murder further from our humanity, Justice, freedom, and liberty? Americans, like our corporate news services in Canada also, are expected to not report the murder of ourselves in Afghanistan, excusing their contempt for themselves as God, to name ourselves, demonized willingly trying to take you to sacifice your rights as censored for bush to steal from our families escaping prosecution. I call news agencies, who as individuals, see no responsibility to ourselves as community. I recieve only refusals as excuses to deny ourselves equal access. Why? They, like deer caught in the headlights, or swimming in the, it feels so good to be taken banker advertising, leave us to only death to others they see not as themselves, be it thousands or millions, than allow me to enter as simply a concerned man named John to speak factually as documented, calling for the immediate arrest of bush and rumsfeld the murderers, to escape further bloodshed. Or, I'm baselessly insulted without argument, ouch, or dismissed as alarmist for screaming for the stopping of the murder of US as really dying, while my, how am I going to survive job prospects go vanishing, because of my excellent research abilities on behalf of the humans.

CBC in Washington just refuses to report as Canadians.

Figuring what? If they just leave me to go it alone, It'll be left looking only stupid? Mankind? Those that struggle to stop me from speaking truly, do so almost always without stated reason, while advocating, you, my reader, to sit back and watch others sitting back like would be yourself without thinking, to be robbed your freedoms as earnings by the bushmob shysters. Check out the advertised to be a public bulletin board at reston.com, post something critical of the nazi, our Mr. bush jr., if there is something not yet removed by the censor, to witness for yourself, what it means as american, to sacrifice your soul for evil. The corporate cult professionals expect us general masses to be sacrificed for bush, the evil anti-Christ. This is why again, I call on the rare truly brave and strong soldiers in America, for America, The People, in this trying time, to take down bush and rumsfeld who are escaping the criminal arrests as our top suspects for 9/11, otherwise, as they are, they will continue in corporate bred fear against ourselves destroying American values like legal due process, indeed our world's freedoms, while advocating huge thefts and wars against us as innocent paying, or disspossesed as

unrepresented by the corporate establishment of ignorance and greed. How do American soldiers feel about sacrificing their lives to sell heroin, and steal oil, to likely pollute the region as Dutch shell would as they do murder civilian protestors with Tony in Britian harboring them? Killing for the World Bank who will pocket the paid expenses while indebting the impoverished nation? As death squads against freedom as cowards? You'd think if they were going to kill anyone in Afghanistan, it would be the terrorist leader, heroin pusher, tommy franks and his northern alliance business partner mercenaries, like the brave Taliban would have to protect us innocent all over the world, no? The truth is in while the cowards pretend. You know Dad, I'm beginning to suspect american nazis on our planet, don't actually know us too well as the humans yet...

Wide Open

All American people, police officers and soldiers hear this out please. Mr. Mueller has shown no commitment to represent the FBI. He has made no responsible public mention of the investigations regarding General Ahmed, and his connection to Mr. Atta, nor Odigo's two hour warning. He has not mentioned the investigations regarding the Israeli spy ring done by the FBI, and it has been only FOX News, the DEA, and their spokesperson Rogenc Waite, who have been able to get around Mr. Mueller's contemptuous silence for America, while bushmobster Susan Dryden, states we are all an urban myth. The FAA, NORAD (Canada's arm), Mike Vreeland, the CIA even, and several responsible military and civilian air traffic controllers, and a great many others disagree with CNN's refusal to mention our public statements against bush and rumsfeld's contentions. Never mind Police Commissioner Bernard Kerik who was handed Atta's passport by someone not named yet, of which Kerik stated "Apparently, it must have fallen into the air just as the crash occurred, surviving the almost 1000 degree heat of the fire, then came across a strong wind to blow it several blocks away." With loose papers between the pages of the passport even surviving the gusts. Now we witness the corporate cultists, desperate to contain us with the magic bullet theorists, we're expected to believe 2000 degrees actually is the only way possible, as impossible to prove scientifically. Also remember, the buildings weight were bore by interconnecting columns of steel through a central core design named "tube within a tube", not like a simple toothpick project laid out by fancy computer grapics, that neglect the actual blue print designs, as thought

through since before the Roman Empire. If still so though, how then can the desperate doubters explain building Seven, or maybe Six, not struck by planes, but fell just the same without melted bricks?, of glass? As also reported, Atta actually taking the time to pack, yes that's right, pack his suicide letter is too stupid for even the average American intellect. Nevermind the sneaky suspected terrorists arguing over a parking space restricted at the airport yelling. Or, Mr. Mueller's ATM picture of a 'highjacker' who was already dead while the picture was supposedly taken. Hmmm... dead men as the terrorists named Mohammad or something like that.. Jesus! Then finding out according to James Woods, the double agent actor, bush's Mueller had secretly, only two officers responsible for following more than 30,000 selective as important leads over a crime of such magnitude. Bing bing bing bing bing bing bing bing bing bing bing bing bing bing bing bing.. Hey... Did you hear that? We see the weakness of the many stuck as bushmobsters, like possibly completely innocent Myers, and his inability as cowardice to speak out regarding his political position as responsible to America, likewise as so many others, showing no concern for the nation as US people. Typical of a usual ignorant fascist right winger sellout like bush has been his entire career to his barely living self of evilness never before witnessed. And, I could go on for twenty more pages on the motives, Enron, and the proven to be criminals at the Pentagon, with the official corporate news story failing the simplest of scrutinies.

Reminder: first tower was struck at 8:45, second, 9:03.

Airports were closed at 9:17, but the soon to be shot down flight 93 calls in at 9:50 apparently according to rumsfeld, asking for permission to do a u-turn, fly east an hour and a half, to land in WASHINGTON? (two planes don't seem to have highjackers on them, and I guess the plan got messed with the remotes somehow.) While the Bin Laden family is preparing to leave America at bush's request, to escape any questioning, regarding the soon to be blamed Holy man Bin Laden, without evidence by the Washington Post in the late edition of Sept. 11th, by the surprisingly thoughtful monster henry kissinger, while CNN reports a story unbiasedly in the forth party apparently, (heard it from a friend who heard it from a friend...) of a call just received to their private newsroom from somebody somewhere to whomever, about friendly, er.. no mean Muslims on board, pre-activating pay phone services without doing so, or so we can only guess, a falsehood truly painful to relay completely.

Mr. bush and rumsfeld killed those good Americans in New York, and must not under any circumstances be allowed to continue as escaped leaving the scene, to repeat offend against ourselves, who under these circumstances, must not be taken as granted by Chris at MSNBC. I have repeatedly offered my position of responsible debate with any corporate cultists, that refuse to represent our democracies being toppled into lawless dictatorship. Why does corporate America refuse to report on elected Congressman Kucinich? Again, Mr. bush and rumsfeld need to be immediately arrested or executed as traitors by the brave and true, strong and righteous. We need to seize all available evidence that Mr. Mueller has stolen, like airport video tapes, as well as recordings done from within the airliners. Or provide me, Mr. death, to testify to the recorded gruesomeness as unbearable. Anyone in the bushmob who stands in our way to do so, must as will be also found guilty of treason by all the loyal American people. I call on all police agencies, ball clubs, loggers, swank hotel clerks and the PTA, to pull together under this banner, and make the world something better for everyone, before getting back to wrestling amongst ourselves over what have you. Mr. bush's evil is very real, in this time I, as a strange voice from the wilderness, who does not make your decisions to do the right things for yourself, plead for you to do so as you should. Get off your ass. I mean, who and for what are our soldiers still killing people for in Afghanistan? The heroin dealing puppet government of foreigners with the World Bank are in place losers, and do I understand they have already spent near a 100 million dollars of ours on things like 3 million school text books for practical terrorism from the eighties, while leaving so called heroin addict alliance forces happy to oblige without 'official' pay checks. CBC in Canada shamed the world by running a propaganda piece on school funding, but neglected to mention the 'new' books, just like the 'old' books came from the bushmobsters again, also with CBC 'pretending' to not know that the Taliban had begun girl schools in Afghanistan, a story that had already been almost correctly covered by the Washington Post, amazingly about a month ago, albeit, without the girl schools element, but Jeeze, the truth seems to be finding it's way, despite the tommy franks grouped with the northern alliance targeting youths who can read as the enemy Taliban right? Mr. bush displays a hatred expressed against our entire human race as himself, to kill us all truly as his position, that he in self contempt, refuses to acknowledge, while we further fall

dying unjustly, for who I ask you? Mr. bush has actually publicly positioned himself to state he does not support effective treatments for cancer. Why? Because there is no money or ours as tax payers to steal from. Deception is an element of all living truth, and evil secretly is just being openly stupid like bush is, (you can't pretend insight as wisdom truly), leaving the biggest secret being, here is but only one, you too, as we all share nothing as no secret in silence as a reflection of all living dreams. GOD IS AMAZING. There is no spoken answer to the question of a mystery asking as forever endlessly, as life could be unbelievably fantastic at a level of real world sustainability, but you know what my friends? Nobody at corporate mind control seems to care, but only to say how wrong we all are on everything, by people who do not know any better for trying to do nothing. Do not know any better. No argument, no science, no reason, just almost as robots working for the death machines in cowardice and self loathing against ourselves not represented. I, as the make believe Creator, attempting to represent freedom of will eternal, can't help hate and despise bush, your false deity as much as any real man would, I'm sorry. News corporations refuse me a voice as the publics, and have so for years to also our acclaimed scientists, political writers, mathematicians and historians, while Mr. bush as the super dumb anti-Christ of evil incarnate, demands openly in OUR public arena, I not be allowed to live my life in unity, as an individual god seeking a potential Heaven for myself singularly, doing my own thing naturally. Mr. bush demands by threat of murder, I relinquish my equal rights, to become his willing slave. Mr. bush demands I not be permitted to protect myself in a true democracy as Justice for all. (Mr. bush, you either understand us as fairly to be equals with justice as anyone, or your threatening our freedoms as a criminal terrorist without room for argument.) Mr. bush demands I fear his murder rampages against the innocent, as would be myself, still living to say, NEVER! Never would I lie to myself like a cowardly American soldier to bomb innocent villagers to waste billions, before killing tommy franks for ordering me to do so. Never would I lie to myself like a cowardly American soldier to bomb innocent people in Bagdad to kill people, before killing tommy franks, cheney, bush, rumsfeld, or even Mr. Powell if need be. Don't like Saddam? Well, talk to him openly about freedom for ourselves then. Talk to the people of Iraq, and on what we together, can do to make life better. What is it about the functioning government in Cuba,

that could be made better as measured? Why not? Because then it would be understood, bush is a savage criminal, and incompetent as wrong and seriously evil to all of US. As he clearly knows nothing about Justice and freedom, or economics as he currently is destroying the economy of America, while cashing in our real lives creating hardship, as only ideology. I mean, removing the cash from our streets, while stealing billions for himself as a degenerate man! (Our wealth is not infinite, nor do the hungry, have magically, meals mysteriously appear in front of them.) He wasn't elected, falling short by more than 600,000 votes before demanding the halt to counting, and is a nazi murdering traitor who speaks only of his stupidity, while robbing America as our world, of Justice to be free and living godly.

(snp)

Thank you for everything,

Johnny wizard

(snpd)

(snpd)

It's Nothing - Mr. bush and rumsfeld are traitors to every American, as they are both guilty of war crimes against humanity. Where are the American soldiers to arrest or kill them both as murderers trying to escape the wrath of the American Constitution's protection of the masses under Justice, that they are attempting to destroy as ignored against the interests of mankind? Again, bush had no evidence against Bin, for a crime he demands we not know the perpetrator of, by attempting to stop, or not address the criminal investigations completed already. With the corporated cultists cashing out hard working American tax payers by labeling us all, as not caring to be biased. Telling our soldiers to attack without thinking, the third world Taliban government for asking about evidence as a true American, Allah, Christ, or Buddha would, ending the heroin trade, and attempting with communications, something better for the people of Afghanistan. Mr. Mueller has informed us, as one more informed than any other who meets with George Tenet every day, the only evidence we have implicates bush and rumsfeld for 9/11, and soldiers have yet to stand for America to destroy bush and rumsfeld,

the murdering bassturds desecrating our judicial process. Why? Nazi cowards, not willing to protect the American flag, while watching their own families be robbed of their life savings and pensions through Enron, and open Pentagon frauds, while bush, the anti-Christ, hopes soldiers will learn from the bankruptcy, for next time, while we, as humanity, watch the Republican Congress today, allow the thieves to escape, with, MAYBE, a fine, while walking away with billions stashed away secretly in the Cayman Islands, or left responsible for secret Army financing, like Thomas White, as their two timing Secretary. It's too bad we can't separate American soldiers, by who wish to uphold the American Constitution as Justice for all, and those sadistic savages like rumsfeld who enjoy murdering innocent people while stealing from everyone our humanity, then we would have a real war of good as powerful, against the extremely weak and pathetic illiterate nazi cult scum, eh? I mean, if you actually knew who the soldiers were as responsible for bombing villages in Afghanistan, and red cross units, literate tribal leaders, or having 40,000 surrendered given to be murdered, wouldn't you as a real American Patriot Soldier, just kill tommy franks, bush and rumsfeld the nazis without thinking twice? I mean, to be humane or godly? See my friends? We will see again, no traitor to America offer an actual public argument to their position of ourselves to not communicate freely with our facts, but will without reason, demand we not be able to truly, like CNN, MSNBC, CBS, Art Bell, Reston.com and the like, while attacking ourselves personally for demanding we no longer be murdered for the evil bushmob, who ignore our concerns as legitimate under universal law actually existing, as not heard from really dying, deprived equal say as the Bill of Rights still demands. See? American illiterate evil nazi scum, think the all mighty as this Creation will be made only to suffer and die as murdered by the weak, dispossessed and cowardly, so sharon the bigot racist parasite can rob and murder innocent persons as Catholics, Muslims, Atheists and Jews forever and ever, financed by corporated nazi cult Americans left in the dark until their bitter enlightenment, about who lives the airwave as true to be ourselves. Justice infinite as indivisible shall prevail as a Heaven or Hell, you decide. I am calling for the immediate imprisonment or death sentence, to the proven to be world terrorists without given argument against, who admittingly have committed the deliberate mass murders of US as innocent, sharon, bush, rumsfeld, and tommy franks. Forty dollars for bush and rumsfeld, ten for tommy franks, and the

Jews of God's creation will wake I'm sure, to deal with the nazi bigot ariel sharon, without further going payment. They advocate as demons, enemies of US all, the murder of innocent people, of which we must no longer allow. I'm available for debate or interview, of which news corporations refuse to grant. Just as they do on every other serious life affirming issues. Our nations greatest, most popular scientific and political writers are barely, if never even acknowledged. Many have read my words, yet next to none argue in disagreement, but for insult lacking reason. Why? Because some people are just stupid, and as in open polite discourse are exposed to be carbon copy right wingers suffering under suggestion to do nothing to help themselves. Like, how does someone argue burned jet fuel smoldering, could reach a temperature of 2000 degrees Celsius, in an area of standard building construction not melting before steel would? Or, because someone commits a crime in New York, or did years ago because they were beaten down as deprived human rights and had all their property stolen, sharon can then excuse himself to murder anybody else he wishes, maybe hundreds or thousands more to steal their lives and prosperity? How does Mr. bush jr., the anti-Christ, get away saying we're all against him discarding the rule of law to find ourselves not to be equals under God with his tyranny of injustice and slavery, that he expects every nation to suffer under in fear while he attempts to plunder and murder everyone as evil incarnate? Digesting fluoride for no other known or unknown reason to science kills us, and nobody else says different, so why must CNN insist we keep doing it by not covering the facts documented for decades? I say, who cares why right wingers want to destroy our eternal Universe as themselves unworthy, let's just stop doing it today okay? because it makes us look really really stupid to the other civilizations of our Universe that don't practice censorship of our advancements in science as know how. What an embarrassment. Why as so does CNN refuse all the other crimes committed by Republicans to go unheeded as recognized? Like the denial of equal rights to non-jews in Palestine? I don't know, let us just work to make our world a better place for all. I want my own show. Why does the American Coast to Coast radio network forbid all intelligent discussions to protect American values, as repeatedly offering no comment allowed to understand this dying bit? Scared of the Lord really getting angry?

In It for US

Your either with US as equals under a rule of law as Universal Justice, or your a mindless slave whore sacrificing your soul for bush, the anti-Christ, who will as he continues, stealing and murdering from our families without any good reason, or provocations as evil incarnate he is to US all. A murdering nazi demon of evilness never before known. As he as shown, he would steal from every American, Justice, Freedom, and Liberty, while only saying, no he's not, as who knows how many are illegally arrested as disappeared, and he funnels billions of real American worker tax dollars into criminal thefts through the Pentagon. The False Claims Act. Like he has polluted ourselves in Texas, as he directly supported the murder of tens of thousands in Afghanistan without evidence, stolen tens of billions from Americans for himself, and fought against smart and healthy universal heath care as educated, and continues to support the legal inaction against Enron, who fleeced any American pensions they could get a hold on, of which the biggest criminal in the Enron debacle, outside of Ken Lay is Thomas White, who he has made no indications of arresting, or even firing, as the Secretary of the Army. Mr. bush gave his buddy Krongard the right to murder any law abiding American citizen as soldier, and escape criminal conviction, a traitor to America is our Mr. bush jr., Constitutionally, plain and simple. A nazi warmonger, who wishes to murder millions with nuclear weapons, a savage, a monster. A demon who has placed in his secret administration, those responsible for the death squads of Nicaragua, and the shipments of cocaine into America, to increase crime against every community, while his supporters support the school of the Americas, by removing free speech from those who wish to point to those Republicans ultimately responsible for harbouring real terrorism, (Mr. bush Sr.) according to Sergant Chuck Couglin of the Milwaukee Sheriff's Department. He has also said he wishes no interest in stopping his increase in the heroin trade. He, as pure evil, who holds practically no deception to ourselves if you'd only listen, has destabilized the world in his commitment to the destruction of our legal due process, by suggesting his entourage, can not be found guilty of any crimes against our humanity, of which they spout like rumsfeld in silence to torture, and murder those known by all to have committed no offense, through now military dictatorship, of which, true Americans will not allow him to take US further, I will not stand for it, nor should you as a Patriot

soldier protecting the flag. I demand again, the immediate arrest of bush and rumsfeld for crimes against humanity, in New York City and Afghanistan, or their rightful execution by all free thinkers in America who own firearms, and can read of our stories not present by the corporate establishment. Mr. bush and rumsfeld expect every single human on our planet to relinquish our rights as living human beings. Mr. bush had no qualms about doing business with the Taliban in August, if they would only, by bribe, collectively sacrifice their interests in serving for their country, as bush has done to America for his entire career degenerating. Mr. rumsfeld asked our living World for the murder of "Omar the Just", for the only reason of requesting evidence. Bin Laden, as we all remember, offered his arrest to authorities upon the showing of any evidence, for a crime he stated was no part of, including all the other baseless claims made by the Clinton administration, who too, could not arrest Bin Laden then either, when he sat in jail for 47 days uncharged waiting. Which is how we know again, Mr. bush is directly involved in NYC, as would too, as have to be, rumsfeld to let the towers fall, but too stupid evil they both are, to not know the wise intentions of America's founding fathers, or myself as the Messiah, Johnny Wizard. For as we knew, all the planted evidence and otherwise, that was publicly available, pointed only to bush and rumsfeld for not seeking who was responsible, only to leave blame quickly as not possible, on a Nation accused without evidence, that had a month prior been planned to rob and murder from for Enron was desperate to hide their crimes against every American dollar. All documented. Kill bush and rumsfeld on site American soldier, and be loved by all as Saviour.

A Better Way

(snpd)

Mr. Mueller, the head of the FBI, who meets everyday with George Tenet, the head of the CIA, stated recently after reviewing his quoted statements stated, actually they as officers of our laws have no evidence whatsoever connecting anyone but the bushmob to the terrorist acts in New York City, testifiable through the public information given by ourselves, the DEA, the CIA, and the FBI in our fields, of which Mr. Mueller seems completely absent minded of publicly speaking anyway. Look see for yourself.

''In our investigation, we have not uncovered a single piece of paper -- either here in the United States or in the treasure trove of information that has turned up in Afghanistan and elsewhere -- that mentioned any aspect of the Sept. 11 plot,''

(snpd)

(snpd)

The Messiah vs. sharon, bush, and rumsfeld

(snpd)

Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning. I have spoken to the Secret Service in person, and all who read this can be assured, so has mr bush scumball jr. by the date this is posted, and as he continues to pretend to not have, only further shows his contempt for your life and Justice for our communities. For bush's contempt for the American constitution as Justice and freedom is ungodly to every proud American police officer and citizen the world over. Mr. bush must be arrested for his terrorist crimes in New York City immediately, for the evidence of his and rumsfeld's criminal behavior is overwhelmingly censored by CNN and the other corporate cult cogs, who refuse to protect Americans as ourselves, the dying community falling unheard from. The patriot act will be rescinded, unless anyone can actually provide a counter argument as to it's purpose other than to destroy our freedoms, while the bushmob continues to rifle our pocket books.

(snpd)

Who is Who?

(snpd)

Freedom is only garnered through Justice for all equally.

"Patriotism is the last refuge of a scoundrel" wrote Samuel Johnson, and he wasn't just mixing words. Patriotism is not about mindlessly as cult slaves obeying bush the unellected nazi fascist criminal dictator, it is about protecting freedom for all as democracy demands by law. Ours. Mr. bush has said that if we, as Nations, don't agree with himself as world dictator, removing the guiding principles of constitutional Justice as freedom for all instills, while actively destroying America and murdering innocent

people for no crimes who struggle now only to survive from his criminal tirades, advocating torture while declaring wars against anyone poor and unrepresented, with a complete disrespect for all human life, and our courts of Law, has clearly stuck himself to be our enemy everywhere, as being evil personified, which inextricably demands his immediate incarceration for the crimes he is committing against ourselves as a true terrorist without question, no? The bushmob desecrate the ideals of freedom, Justice and democracy garnered by truth as our own being to be individuals, and is exalted by CNN claiming to be representing ourselves while watching us be robbed and murdered as stolen from openly. Mr. Turner, you have terribly disappointed our world in this great time of need for ourselves as humanity.

Again, all relevant evidence, circumstantial and otherwise, regarding the WTC terrorist act, points to the bushmob, and rumsfeld especially. (snpd) Flight 11, all ticket sales are accounted. How did terrorists board without purchasing tickets? No, the airline industry did not take the names off the lists on Sept. 11, as too on the 12th they confirmed so with a small correction, but if they had, how then would, or could, the desperate doubter explain strange flight 77 from the same company, which does leave room for terrorists to be on board with the given total. Oh... I think I know. Two flights had duped terrorists hired by the bush wrecked state department, explaining the State Department connected money transfer discovered by the good FBI to the head terrorist, Germany's Mr. Atta, unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far, and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly

have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker. Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information. "No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or "Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46. Also, explaining the now no longer strangeness of why bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle,

and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming. hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring, drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,(We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't

exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the Republican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical Republican, only offered bribes to officials from Afghanistan to hurt their nation they, as the Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to gramm's assault, leaving many out of work to get swindled even further by Republican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe

pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to

actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage, THE MONTH BEFORE IN AUGUST, why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent matters.

"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions." -

Agatha Christie

March 11, 2002 Too many loose ends... By Barrie Zwicker

... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National Guard Andrews Air Force Base to fly ... a protective cover over Washington, D.C." ...

U.S. Attorney General Ramsey Clark in a public letter
to Kofi and company

September 20, 2002

"A military attack on Iraq is obviously criminal;
completely inconsistent with urgent needs of the Peoples
of the United Nations; unjustifiable on any legal or
moral ground; irrational in light of the known facts;
out of proportion to other existing threats of war and
violence; and a dangerous adventure risking continuing
conflict throughout the region and far beyond for years
to come. The most careful analysis must be made as to
why the world is subjected to such threats of violence
by its only superpower, which could so safely and
importantly lead us on the road to peace, and how the UN
can avoid the human tragedy of yet another major assault
on Iraq and the powerful stimulus for retaliatory
terrorism it would create."

I was surprised to see a PRO-43 scanner went for over $300 on ebay. I wanted
to offer it here first at a fair price.

In Southern California, many repeater pairs are already shared (2m, 125cm, 70cm - 125cm has roughly 3 repeaters/pair). Only in the bands where there are less repeaters than available pairs is there no sharing (6m, 33cm, 23cm, and above) because it's not necessary.

If a coordinated repeater is unused but coordinated as OPEN, then why should the "competing group" put up their own? Why not use the one that's there? (That will take care of roughly half of all cases in most bands).

Maybe that machine is at the other end of town, and coverage is spotty?
Then the group tries to put up their own machine for local use, but they
end up trashing the first machine's coverage in the middle of town. The
real solution would be to find a lightly used machine in their neighborhood.
But there may be political infighting and such that puts a stop to that....

Hey Lou, since your charts that allow "for modification to 10M or other freqs." are obviously intended for use by licensed hams, you might get more business if you posted this in ham newsgroups. Doncha think?

Hello everybody,

I need a new or used IF platine for my Kenwood TS-850S. Kenwood says
they aren't produced any more, so maybe anyone can help me out with
this? Do you know where I can buy this spare part? Or has anyone a
broken TS-850S to sell?
I don't want to buy a whole new transceiver just because this platine
is broken.

Thanks in Advance, Christian

PS: Please excuse my bad english ;-)

Hi,

I wonder if anyone could tell me if TAPR are still alive and well and in business.

I am based in the UK, therefore transatlantic phonecalls are out of the question.

However I have sent them multiple emails because I am interested in ordering their TAC-2 kit ..... they have not yet had the decency to respond.

Could someone please confirm they are still operational.

Thanks

Ben

I disagree; anything that brings ham radio to the attention of the general public is a good thing for the hobby. Someone may develop a curiosity regarding radio after seeing the film, and may research it enough to go get their ticket. I've been a ham for 26 years, and I enjoyed everything about the movie, and I welcome just about anything that will bring AR to the laypersons attention.

Message-ID: <af6ca1df.0210181942.605c6861@posting.google.com>
Source record: 72623

I'm interested in using the new ft-897 as a base station. Is there a single antenna that will cover all the bands? How many antennas do I need? What are my options?

thanks
Jeff

I have 8 Brand New in the Box Svetlana 8874(3cx400a7) Tubes. THESE TUBES ARE NOT NOS, THEY ARE FACTORY FRESH. These tubes have the full factory warranty of one year shelf storage and one year service. In other words you can store the tubes for a year and then put them in service and not until the one year shelf storage has elapsed does the one year service warranty go into effect.
The price is $325 ea plus shipping.
Thanks and 73....Tom....w4th

Amateur Radio Newsline™ Report 1313 – October 11, 2002

Amateur Radio Newsline report number 1313 with a release date of Friday, October 11th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A first ever Amateur Radio satellite for New Zealand and hams are honored in the U-S mid-West These stories are first on Amateur Radio Newsline report number 1313 coming your way right now.

(Billboard Cart Here)

HAM RADIO IN SPACE: ZL ANNOUNCES PLANS FOR KIWISAT

Ham radio in space is coming to New Zealand. This, with announcement of a new ham radio satellite to be designed and built down-under. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has a close-up look at Kiwi Sat.

--
Yes, that's actually its name. Kiwi Sat. And in case you were not aware, the Kiwi is a bird with thick hair-like feathers, no tail, a beak one third the length of its body, and nostrils at the tip. It looks like a cross between a hedgehog and an anteater. And its found only one place in the world. Here in New Zealand. Its our mascot and we love it. And now the hams of Kiwi-land are naming our soon to be built ham satellite after it.

Like the bird that its named after, Kiwi Sat will be a bit unusual in its own right. It will be a rather small ham-sat. A 237 millimeter cube based on the early 1990's Microsat technology developed by AMSAT. But it will carry some 21st century electronics that will enable it to run both as linear translator for low duty cycle modes like sideband and C-W as well as an F-M transponder to serve the needs of the overall ham radio community. This, even though the solar cells can only produce a maximum of 15 watts of available power at any given moment and an average of only 6 watts. Uplinks will be on 70 and 23 centimeters with Kiwi Sat talking back to Earth on 2 meters.

But there's more. Plans also call for Kiwi Sat to carry some sort of scientific experiment and possibly even a digitalker module. This would permit the satellite to identify with its own voice as well as provide some good publicity for the Kiwi Sat project. All of this made possible by the many advances in microchip design that have taken place since the first Microsat was launched.

There is one big difference between a feathered Kiwi and the ham radio satellite the hams down here are building that I should mention. A live Kiwi

cant fly. Kiwi Sat will.

From Auckland, New Zealand -- down-under -- I’m Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.
--

A s we go to air, no completion or launch date has been announced for Kiwi Sat. An excellent article on the project appears in the summer edition of the AMSAT Journal. (AMSAT)

**

HAM RADIO IN SPACE: PC SAT IN ECLIPSE

Meantime users of the P C Sat ham satellite are being requested to please turn off all unattended night time transmissions. This, to conserve energy while the bird is not in direct sunlight and having its batteries charged.

According to Bob Bruninga, WB4APR, P C Sat left full sunlight on Sunday September 30th. The bird is still fully operational but is passing through 25 minute eclipses on every orbit. And because of these eclipses the overall power available on board P C Sat is down. Keeping unattended beacons off while you are not there cuts the load on the satellite power supply significantly.

Bruninga says that with everyone’s cooperation the satellite might be able to make it to full sun again in November. He adds that normal operations are O-K when the satellite is in sunshine and the batteries are on charge. (AMSAT)

**

RADIO LAW:: FOLLOW-UP – S.A. ACTS TO PROTECT THE 70 CM BAND

A follow-up to last weeks story on the probable threat to the 70 centimeter band posed by a planned Earth Exploration Satellite Service that’s soon to be launched. As reported last week a discussion paper will be brought before the World Radio Conference next year that directly targets 432 to 438 MHz for exclusive use by the Earth Exploration birds.

The threat is very real and now comes word that at least one national ham radio society is taking action to stop the incursion. The South African Radio Relay League which was the first to make information on the threat public is already engaged in urgent talks with the that nations telecommunications regulatory body. Their objective is to try and convince the radio law makers that such a reallocation of spectrum would be a severe blow to the future of amateur radio. Others national societies are expected to quickly do the same. (SARL, Q-News)

**

RESCUE RADIO: HAMS HONORED FOR TORNADO WORK

Ham radio Radio Skywarn spotters from 14 Central and Southern Indiana counties are being given credit for helping save lives. This, during an unusual outbreak of tornadoes the morning of Friday, September 20 th. Amateur News Weekly’s Jack Parker, W8ISH, tracked the storm and has this report.

--
When an F3 Tornado started it’s destructive journey across Indiana, Hoosier hams were hot on the trail. In fact, the storm moved so quick several amateur radio operators almost became casualties themselves.

The mid-morning outbreak started as a line of strong thunderstorms associated with a cold front. Tornado touchdowns were reported in several counties southwest of Indianapolis before noon. The storm gained strength as it ripped apart homes and businesses while tossing cars like they were matchbox toys. Many amateur radio operators saw first hand the destructive power of these late summer storms. Around 1:00 p.m., an F3 tornado touched down in Ellettsville, just west of Bloomington, Indiana. Two Ellettsville hams, Mike Poe, KB9SGN, and Russ Ryle, N9DHX, had close encounters with the super strong tornado. According to one Monroe County Spotter “The tornado went right past Mike’s house. Poe was in his driveway trying to get away in his truck and wound up dodging parts of his neighbors house while transmitting a warning to the Bloomington repeater. At the same time Russ Ryle was taking cover.

--
Ryle: “I was just passing information for my local area. First report I had was, we had a tornado on the ground. I could see some debris. At that point my wife and I took cover in the bathroom”.
--

As many as four tornadoes skipped across Indiana covering 112 miles. Over 20,000 homes were damaged. Thankfully, no one was seriously injured or killed. The National Weather Service office in Indianapolis credited the Skywarn spotters with saving hundreds of lives. As the NWS began to receive frequent damage reports, activation of spotter groups became critical. The NWS requested spotter information be relayed to their office as quickly as possible so counties in the path of the storm could be alerted.

According to National Weather Service Warning Officer, Dave Tucek, quick actions by spotters helped the NWS increase watch and warning lead times to 25 minutes or more, saving lives.

After the storm passed, many of the individual county spotters groups teamed up with their local Red Cross, Salvation Army and Emergency Management agencies to provide communications between shelters and county EOC’s. Some of the amateur radio operators found themselves working with damage assessment teams while providing communications for National Guard clean up crews. Reporting from Indianapolis, for Amateur News Weekly, this is Jack Parker, W8ISH
--

Following an aerial survey of the damaged areas, Indiana’s Governor Frank O’Bannon said this is the most wide spread tornado damage to hit the state in over a decade. Damage assessments are expected to be in the millions. (ANW)

**

RESCUE RADIO: FCC OK'S NEW PERSONAL LOCATOR BEACONS

If you are a ham involved in search and rescue work, listen up. The FCC has issued a report and order that provides for licensing individual 406.025 MHz personal locator beacons or P-L-B's. The agency says that it will require mandatory registration of these devices with the National Atmospheric and Oceanographic administration.

According to the CGC Communicator, a 406 MHz digital P-L-B signal contains information on the type of emergency, the country an identification code of the beacon in distress and other information to facilitate search and rescue operations. Even more important, a 406 MHz distress signal can be received and stored on-orbit by the COSPAS/SARSAT satellite and later retransmitted to the ground. That should eliminate the so-called blind spots found in older 121.50 MHz and 243.00 MHz devices. (CGC Communicator)

**

ENFORCEMENT: YOU GET YOUR OLD CALL BACK

The FCC has written to Jamie H. King, Jr. of New Bern, North Carolina to tell him that it has canceled the Vanity Call Sign W4JHK and has reinstated his previous KG4RLJ call. Amateur Radio Newslines Bruce Tennant, K6PZW has more:

--

Back on June 19th the agency requested that Jamie H. King, Jr., provide documentation of his claim that he was a former holder of the W4JHK call sign. He responded by letters dated July 20th and 27th. In his reply King stated that he believed that the problem seemed to lie in interpretation of blanks to be filled in on the Vanity Call Sign application. He says that when he completed the application last February, he interpreted the line 'Former Primary Station Holder' to mean any primary station license, regardless of call sign, issued at a date earlier than the application. Therefore he says that he was referring to his previous license KG4RLJ when he checked that line.

But the FCC says that explanation might be acceptable if King had only checked the "Former Primary Call Sign Holder" block. But the FCC says that King also wrote in the call sign W4JHK. Also, that the application block contains the statement -- quote -- "This call sign was previously shown on my primary station license."

The FCC says that in view of the fact that King has never been a former holder W4JHK, that his call sign reverts to KG4RLJ. It says a license bearing that call is on its way to him.

Reporting for the Amateur Radio Newsline, I'm Bruce Tennat, K6PZW
--

The FCC adds that it is not pursuing further enforcement action at this time but cautioned King to use care in the filing of any future applications with the FCC. (FCC)

**

ENFORCEMENT: BIG FINE FOR SELLING ILLEGAL CORDLESS PHONES

The FCC has issued a $7,000 against Lightning Electronics Incorporated of Miami Florida. This, for willful and repeated violations of the Commission's rules involving Lightning's marketing of unapproved long-range cordless telephones. Phones that the agency says are capable of interfering with aviation safety. Phones that hams say are ripping up the two meter band. We have this report:

--
Back in February of 2001, the Federal Aviation Administration told the FCC that some pilots were reporting receiving sporadic interference to an aviation frequency here in the Miami, Florida, area. In March of 2001, the FCC’s Miami Office identified the source of the interference as a long-range cordless telephone being operated from an electronics store in Miami. That one was quickly removed from the airwaves.

As a result of the FAA’s concerns, the FCC launched a nationwide investigation into the unlawful marketing and use of long-range cordless telephones. During the inquiry, the Bureau discovered that electronics dealers were selling long-range cordless telephones in several states. It also found that certain of the long-range cordless telephones caused interference by transmitting spurious emissions on aviation frequencies. Even more scary -- others were specifically designed to operate in the aviation band.

During the investigation, agents from the Miami Office visited Lightning Electronics retail store. This took place on July 27, 2001. While there, agents saw several of the illegal long-range cordless telephones on display. Models included a Super Phone CT-9000, a Prolink CT-6000CID, and an Optima OP8810.

According to the FCC, a salesperson at Lightning offered to sell one of the units to the agents. As a result, on August 24, 2001, the Miami Office issued a citation to Lightning for violation of rules which prohibit the marketing of unapproved radio frequency devices.

But the company apparently did not heed the warning. On September 26, 2001, agents from the Miami Office and from the Tampa Office again visited Lightning’s retail store. At that time they purchased a Prolink BAO-6110CID long-range cordless telephone and antenna for $669.80. The telephone the agents purchased was capable of causing serious interference to aviation communications and was not approved for sale by the Commission.

On October 29, 2001, the Tampa Office issued a Notice of Apparent Liability to Monetary Forfeiture against Lightning but the company did not file a response. On February 21, 2002, the Bureau issued a Forfeiture Order. On March 8, 2002, Lightning filed a petition for reconsideration of that order indicating certain information did not pertain to the company. The FCC responded with a new order last May 21st and has now ordered Lightning to pay up.

From Miami, I’m Bill Burnett, KT4SB, reporting for the Amateur Radio Newsline.
--

So far the FCC investigation into the sale of these illegal high power cordless telephones has resulted in the issuance of several citations and fines by the agency’s Enforcement Bureau. Its also gotten a few that bothered ham radio communications on two meters off the air. (FCC)

**

ENFORCEMENT: SBC TO PAY $3.6 MILLION IN CONSENT DECREE

SBC Communications will pay $3.6 million to federal regulators for filing inaccurate information in applications to provide long-distance service in four states. The consent decree resulted from Federal Communications Commission investigations of S-B-C applications to enter the long-distance markets in Missouri, Texas, Oklahoma and Kansas.

In agreeing to the consent decree the company admits no wrong doing. In fact, SBC says that the inaccuracies were the result of good-faith efforts in describing highly technical matters and not the product of any intent to mislead. (Published reports)

**

NAMES IN THE NEWS: MITNICK SELLING LAPTOPS TO PAY LEGAL FEE

Former computer hacker Kevin Mitnick, N6NHG, says that he is selling some of his personal items to pay a lawyer who is trying to save his ham radio license. Mitnicks’ request to renew his license earlier this year end up in it being designated for a hearing. The items that Mitnick is auctioning off include his old Toshiba laptop computer which was taken by the government back in February of 1995. As this is written, that computer is up on e Bay with a top bid approaching $10,000.

A second laptop is also up for auction. It features a layer of fingerprint dust and red "X" marks where fingerprints were lifted. It also includes a mouse still housed in an FBI evidence bag. Both computers are signed on the bottom by Mitnick and former Apple executive Steve Wozniak. (Published reports)

**

NAMES IN THE NEWS: RAFY BRIEM N6FFT - TALKRADIO LEGEND -- RETIRES

Talk radio legend Ray Briem, N6FFT, has retired. Briem’s last show was on Sunday evening September 28th over Los Angeles radio station KRLA. Before moving to the 870 spot on the AM dial Briem spent several decades honing the art of late night talk over at KABC radio on 790 Kilohertz. While there his show was eventually put on the ABC radio network, nationwide. (ASWLC)

**

NAMES IN THE NEWS: A.PROSE WALKER, W4BW - S.K.

A. Prose Walker, W4BW, the man considered as the father of the "WARC bands" has died. Walker headed up the FCC’s old Amateur and Citizens Division from 1971 to 1975. While there, he made the initial proposal for the creation of the 10, 18 and 24 MHz bands at a conference in Geneva 1972. Later, Walker organized and chaired the United States the Advisory Committee of Amateur Radio. This committee took the initial steps to turn the idea into reality at the 1979 World Administrative Radio Conference.

But there was another side of Walker that hams in the world above 50 MHz do not remember very fondly. It was a set of highly restrictive repeater regulations promoted by Walker back in the early 70’s. Among other things, these rules required the submission of what are today called engineering feasibility studies in order to get a required W-R prefix repeater license. The regulations were so strict that repeater growth almost ground to a halt for the better part of half a decade. Eventually, the ham community lead by 73 Magazine publisher Wayne Green, W2NSD, rebelled against the Walker inspired rules. They were repealed as a part of repeater deregulation a few years later.

Walker was living in Rochester, New York, at the time of his death. He was 92. (ARRL, Repeater Remailer, W9JUV, 73 archives, others)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

ON THE WEB: INTERNET OUTAGE ON UUNET

If you think that the Internet went away for a few hours on October 3rd, you are close. What actually happened is that some users faced heavy delays reaching Web sites and accessing e-mail for a few hours because of widespread technical troubles on WorldCom's long-haul network.

A WorldCom' backbone called U-U-NET carries most of the Internet traffic in the United States. The problems began about 8 a.m. and about 20 percent of WorldCom's U.S. Internet. Very few if any lost service and Worldcom had service fully restored by early afternoon. WorldCom says that the problem appears to have been with the lists telling router computers how to pass data on to their destinations. (Published reports)

**

INTERNATIONAL - GERMANY: THE CODE SHOULD STAY

Germany’s Deutscher Amateur Radio Club is that country’s national Amateur Radio society. As previously reported, the D.A.R.C. supports the retention of Morse code testing as a license qualification. Now, D.A.R.C. has put this position on the discussion agenda of the International Amateur Radio Union’s Region 1 Conference. Its slated to be held in San Marino in November.

(Q-News)

**

INTERNATIONAL-UK: BBC AND B SKY B TO LAUNCH ALL DIGITAL TV NETWORK

The British Broadcasting Company and Rupert Murdoch's B sky B network are teaming up to create a new all digital television service in the United Kingdom. According to news reports, the terrestrial service called Freeview will be launched on October 30th. It's purpose is to fill the void left by the collapse of I-T-V Digital Television. If successful, it will give Great Britain a let up on the rest of the world by being the first nation with an all digital network.
You can read More at :
http://www.reuters.com/news_article.jhtml?type=search&StoryID=1530266 (Media Network)

**

INTERNATIONAL - NEW ZEALAND: HAM RADIO WALKABOUT

Well known land hiker Tony Whitiker, G3RKL, will be walking in the north island of New Zealand during the month of October. Tony will be walking from east to west and will be on the air using the callsign ZL6WFE. He will be on the New Zealand national repeater network and hopes to send Slow-Scan Television pictures live via the Internet Radio Linking Project gateways. (Q-News)

**

ON THE AIR: NEW PROPAGATION BEACON FROM FN20

On the air, Steven Kerns, N3FTI, in Reading, Pennsylvania reports over the VHF Reflector that he has established a new 2 meter propagation beacon from grid square FN20. Its on 144.279 Mhz running 4 watts out into a Discone antenna but he plans to change that to a halo in the coming weeks. Steve is also planning a 6 meter beacon to operate from the same location. QSN reports go to Steve at his callbook address. (VHF Reflector)

**

DX

In D-X, VE7XF is going back to the Cook Islands next weak in a muilti-multi operation to take part in the C-Q World Wide DX SSB Contest. He and the gang will operate from Manihiki on North Cook Island as ZK1MA during the event. Before and after the contest they will spend as much time as possible on 6 meter C-W and S-S-B with the call ZK1AKX. Listen for the operation from Manihiki from October 18th to the 31st and then on to Rarotonga South Cook Island from November 1st to the 11th. QSL cards go to Ralph Parker, 5330 Wallace Ave., Delta, British Columbia Canada at postal code V4M 1A1 (GB2RS)

K5AND, W5OZI and W5LXG will be operating from Montserrat from October 31st through November 8th. The trio will be focusing most of their attention on the 6 meter band using a Yaesu FT-897, a 7 element yaggi and radiating about 800

watts out and a Morse beacon on 50.155 Mhz.. From 20 to 10 meters they will run about 100 watts out. They say that the location is ideal for making 6 meter contacts across Europe, Africa and maybe even into the United States. As we go to air the most likely call sign they will use is VP2MJD. If you work them, Q-S-L as directed on the air. (VHF Reflector)

And Nick Peckett, G4KUX, operating as YA4F, has made what he claims is another first-ever contact on 6 meters from Afghanistan. Nick is now claiming that at 11:08 UTC on the 27th of September he worked VK6JQ in Broom, Western Australia for a YA to VK first on the Magic band. (G4NJH)

And G4IUF is on vacation in the Galapagos Islands. He hopesto be active on C-W and SSB from San Cristobal Island through the 23rd of October. He has requested the callsign HC8UF. (RSGB)

**

THAT FINAL ITEM: FIRST 'eDX100' AWARD TO 4Z4DX

And finally this week, word that the first ever 'eDX100' award, issued on the basis of electronic - or 'e QSLs' - was awarded on the 25th of September to Dov Gavish, 4Z4DX of Ramat Hasharon Israel. The ‘eDX100’ award is billed by its sponsors as an electronic equivalent to the ARRL's DXCC but is issued for receiving electronic QSL’s from a minimum of 100 DXCC entities through the eQSL.cc system.

eQSL.cc or the Electronic QSL Card Centre which sponsors the award is operated by Dave Morris, N5UP, of Garland, Texas. It is supported by an advisory board of volunteers around the world.

And true to the nature of electronic QSL’ing, 4Z4DX will be able to print an ‘eDX100’ certificate on his own printer. He will also receive a full-color certificate and a walnut plaque in the mail. (eQSL.cc)

Emergency Situation Report e-mail list for Pennsylvanians

PA-SitRep is a free, 100% non-commercial,
nonprofit, e-mail list and web site.

The PA-SitRep emergency traffic e-mail list is a
tool that will enable you to monitor and report on
major emergency situations throughout the State
of Pennsylvania including weather emergencies,
natural disasters, environmental disasters, civil
disturbances and threats of terrorism, major fires,
and manhunts.

Subscribers are encouraged to utilize their home,
work and cell phone e-mail addresses for receiving
messages from the PA-SitRep e-mail list.

Because messages posted to the list are limitted to
situation reports of MAJOR emergency situations
within the State of PA, message volume on
PA-SitRep is EXTREMELY low.

PA-SitRep is also building a list of PA-SitRep
Contacts, most of whom (25 so far) are Amateur Radio
Operators (http://www.pa-sitrep.com/contact.htm).

PA-SitRep Contacts monitor our higher volume
SitRep/Discussion mail list and post situation
reports ot the discussion list and to the main list.
PA-SitRep Contacts also submit their contact info
for our site and may be contacted for a first
hand situation report should an emergency
situation arise in their area.

Please visit the site to learn more:

http://www.pa-sitrep.com/pasitrep.htm

Thanks. We'll look forward to your participation.

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder

What freqs do these militants operate on..?
Are they linked in any way to Al Queda or Bin Laden..?
There's already enough foreigners who are non-hams
taking up residence on 40 and 80 Meter SSB late
at night. Much of it coded/strange transmissions
late at night on the lower end of 40 SSB.

Can I come over and use your radio station?

Some folks in the hobby actually like the challenge of getting their own stations on the air. Ditto people who would like the challenge of putting a repeater on the air. Why should they be denied the opportunity to grow and learn in the hobby? Just because someone else was born first or got licensed first is a reason to deny to newcomers the opportunity and satisfaction of building their own repeater? I guess so. No newcomers need apply.

Brian

"D. Stussy" asked:

> If a coordinated repeater is unused but coordinated as OPEN, then why
> should the "competing group" put up their own? Why not use the one
> that's there?

One word:

Ego.

In the section of 3-land where I grew up, there were no 2m pairs available. Most pairs had machines on them, tho there were several pairs that had been coordinated a few years earlier, and the "owners" were *still* waiting on equipment.

One (in)famous pair sat coordinated but unused for years, ever since the repeater owner "temporarily" took the machine off the air for repairs. Eventually, after being vacant for several years, someone else put up an uncoordinated machine on that pair. The "owner" of that pair (note the quotes) didn't notice for several months, then apparently someone in his group discovered the intruding machine on the air.

Apparently (third hand info here; happened since I moved), complaints were filed with the coordinating body, and with the FCC. Nothing happened. Then the jammers started. Finally, the "owner" of the pair put up a repeater at his house (about 5 watts out), and then claimed interference. The pair has been silent since.

There are plenty of "ego boxes" on the air. I once plugged a VOX-operated tape recorder into a scanner, and scanned several pairs (where there were local machines) for about two weeks. I caught two phone patches (same machine) and, except for automatic IDs, that was *all*.

But don't try to use them, though. There was one repeater that was listed in the directory as open, and was the only repeater I could hit in the "dungeon" (computer center at the local college; in the basement) where I worked, on low power. I arranged to have a friend meet me on that repeater one evening, so we could figure out where to go for late dinner after work. We were on for about two minutes when the repeater was simply shut off. This wasn't a unique occurance.

The FCC has some killer questions on its exam when it retests people. Some of the questions are word problems designed to discover if the prospective amateur operator can work with antennas, supporting cables, and the resulting guying and weight problems without simply plugging numbers into handbook formulas.

AB8MQ got the correct answer to the following problem on his first try:

"A coaxial cable draped over the peak of a roof is the same length on each side. It weighs one third of a pound per foot. On one end hangs a monkey holding a banana, and on the other end a weight equal to the weight of the monkey. The banana weighs two ounces per inch. The coax is as long (in feet) as the age of the monkey (in years), and the weight of the monkey (in ounces) is the same as the age of the monkey's mother. The combined age of the monkey and its mother is thirty years. One half of the weight of the monkey, plus the weight of the banana, is one fourth as much as the weight of the weight and the weight of the coax. The monkey's mother is half as old as the monkey will be when it is three times as old as its mother was when she she was half as old as the monkey will be when when it is as old as its mother will be when she is four times as old as the monkey was when it was twice as its mother was when she was one third as old as the monkey was when it was old as is mother was when she was three times as old as the monkey was when it was one fourth as old as it is now. How long is the banana?"

Unfortunately, he missed the question on how to calculate the peak voltage of a 120 volt rms sine wave.

Maybe next time ...

One fault with this argument: "Ego boxes" usually aren't coordinated as open.
They usually appear as closed/private (some areas make a distinction between
these as separate statuses - that's not needed here).

4200. KV4FZ to return to Ham Radio! whoopiee!

FCC Judge Favors Schoenbohm's Return to Amateur Radio:
from The ARRL Letter, Vol 21, No 41
Website: http://www.arrl.org/ on October 19, 2002

FCC Judge Favors Schoenbohm's Return to Amateur Radio:

An FCC administrative law judge has agreed that the FCC should grant the General class Amateur Radio license application of Herb Schoenbohm--formerly KV4FZ. Schoenbohm lost his bid to renew his ham ticket in 2000 but applied for a new license the next year. Following a hearing on Schoenbohm's application last spring, an initial decision of Administrative Law Judge Arthur I. Steinberg October 11 declared that Schoenbohm appears qualified to rejoin the Amateur Radio ranks.

Steinberg wrote that the hearing concluded that Schoenbohm "has not engaged in any significant wrongdoing since his prior disqualifying misconduct," that his misconduct was not recent, that his "reputation for good character in his community is excellent," that Schoenbohm "has taken meaningful measures to prevent the future occurrence of misconduct" and that loss of his ham ticket "coupled with the shame and humiliation that resulted" make unlikely a recurrence of misconduct.

Steinberg concluded that Schoenbohm "possesses the requisite character qualifications to be a Commission licensee" and that the FCC should grant his application. Schoenbohm also has taken and passed the Extra class exam (Element 4), but that application was not part of the proceeding.

For his part, Schoenbohm said he was very grateful for the outcome and said he appreciated "all the amateurs who came to my defense and supported the application." He said he does not yet know if he will attempt to regain his KV4FZ call sign if his application is granted.

Assuming that the FCC concurs with Steinberg's initial decision, Schoenbohm has made good on his promise to one day return to Amateur Radio after losing a lengthy battle with the FCC to renew his license. Steinberg's decision followed this summer's Proposed Finding of Fact and Conclusions of Law from the FCC Enforcement Bureau, which recommended that the evidence presented at hearing supported giving Schoenbohm another chance.

In 1994, the FCC put Schoenbohm's renewal application for KV4FZ up for hearing following his 1992 felony conviction on federal fraud charges. The Commission finally turned down his renewal application in 1998, the US Appeals Court upheld the FCC's decision in 2000, and the US Supreme Court declined to hear the case later that same year.

In March 2001, a couple of months after his authority to operate as KV4FZ had expired, Schoenbohm took and passed the General class examination. A couple of weeks later, he qualified for Amateur Extra as well, but the FCC refused to act on the second application since it had not yet granted the first. The FCC designated Schoenbohm's General license application for hearing on the basis of character issues stemming from his 1992 conviction as well as his alleged lack of candor during subsequent FCC hearings on the matter.

SPECTRUM ISSUES: FCC SAYS NO TO 2300 MHZ SHARING

First the bad news. The FCC has dismissed an ARRL petition that sought primary status for amateurs in the 2300 to 2305 MHz. Now the good news. The Commission has also turned down a paior of petitions from commercial interests that had hoped to share the spectrum with Amateur Radio. Amateur Radio Newsline's David Black, KB4KCH has more:

--
It's not just ARRL that the FCC turns down. The Commission also dismissed petitions from MicroTrax and AeroAstro--both groups had sought access to 2300 to 2305 MHz. The FCC says it's denying the two commercial applications in part because appropriate spectrum is already available elsewhere. And, according to the Commission, neither company had demonstrated a need for additional spectrum.

By way of background, an ARRL bulletin says that MicroTrax had wanted to establish a Personal Location and Monitoring Service between 2300 and 2305 MHz. The petition by AeroAstro asked to share the band on a co-primary basis with Amateur Radio. AeroAstro wanted to launch its Satellite Enabled Notification System messaging service.

But the Commission says AeroAstro's request did not go far enough in protecting other serevices. The agency was particularly concerned that NASA's Deep Space Network would not be protected by the modified out-of-band limits AeroAstro had proposed.

The FCC says that -- at least for now -- amateur weak-signal communications in the 2300 to 2305 MHz band will be protected if the amateur allocation remains as secondary. The Commission says band will remain in its spectrum reserve. The status quo will be maintained, then, until the FCC re-evaluates the status of the frequencies in relation to the Amateur Service at some point in the future.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.
--

The 2300 to 2305 MHz band is allocated to Fixed and Mobile services on a primary basis and to the Amateur Service on a secondary basis in all three International Telecommunication Union regions. The Radiolocation Service has a secondary allocation in the band in Region 1, and a primary allocation in Regions 2 and 3. (ARRL)

**

RESTRUCTURING: NETHERLANDS MAY SAY GOODBYE TO MORSE TESTS

Im Bill Pasternak, WA6ITF, with some late breaking news. It comes from the Netherlands where the Morse code could soon be going away. RSGB News reader Jeramy Boot, G4NJG, has the details:

--
The Netherlands is set to abandon the Morse code test next year. Rob van den Ent, PE9PE, reports that the Netherlands' national amateur radio convention took place the 12th and 13th of October. He says that the Dutch radio regulatory authority used the occasion to announce that if, as expected, Morse code is lifted as a mandatory requirement for an HF licence at nextyear's World Radio Conference, the authority would immediately eliminate the Morse code test in the Netherlands. At the same time, current VHF licensees would get direct access to the HF bands without further examinations.

--
More on this story in future Amateur Radio Newsline reports. (GB2RS)

**

RADIO REGULATIONS: BIG CHANGE AT THE ITU RADIOCOMUNICATION BUREAU

Ham radio has lost an significant post in the area of setting world radio policy. This, as a non radio amateur is selected to head up an important aspect of the International Telecommunications Union. From Brisbane Australia, Q-News Graham Kemp, VK4BB, has the details:

--
Valery Timofeev has been elected director of the International Telecommunication Union -- ITU -- Radiocommunication Bureau. Timofeev, who is Russia's deputy minister for communications and informatization, has extensive experience in radio frequency spectrum management at both the national and international levels.

Timofeev's election does mean for the first time in at least three decades, an non-Amateur Radio licensee will head the ITU Radiocommunication Bureau. The election took place during the 6th ITU Plenipotentiary Conference now under way in Marrakesh, Morocco. The meeting concludes October 18th.

From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.
--

The political signifigance of this change is obvious. Having a ham radio operator in this position gave the service considerable leverage in negociations involving spectrum issues. (Q-News)

**

RADIO REGULATIONS: HAM RADIO GAINS OBSERVER STATUS AT THE IARU

The International Amateur Radio Union now has observer status at ITU meetings. IARU President Larry Price, W4RA, was on hand to represent the organization at at a major ITU gathering which was held in Marrakesh Morroco in late September. And Region 2 Executive Committee member Tim Ellam, VE6SH, is now participating on behalf of the organization. (Q-News)

**

THE WAR ON TERROR: COMMUNICATIONS STANDARDS ADOPTED

Back here in the United States, the communication industry has adopted emergency procedures intended to help maintain the nation's telephone, cable and Internet networks in case of a natural disaster or terrorist attack. The procedures were developed by a council of more than 50 industry officials formed by the Federal Communications Commission in January.

The group adopting the standards is called the Network Reliability and Interoperability Council. Their job was to recommend ways to strengthen communications networks to resist attack. The plan all have now agreed to will help companies in a crisis contact and work with partner firms to keep services running. (NRIC)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the AA4ED repeater serving Broward Ounty Florida.

(5 sec pause here)

**

ON THE AIR: IRLP NODES TO GET AN EXTRA DIDGIT

Changes are in the air for those of you involved in internet radio linking. This, to permit an increase the number of possible I-R-L-P nodes to over 99 000.

Right now most I-R-L-P users will not notice any difference. Eventually IRLP node codes will increase from three numbers to four. The result is that node 640, for example, will become 6400. (G6PHF/Bass IRLP Group via APC News)

**

ENFORCEMENT: FOUR LICENSES CANCELLED IN EXAM INVESTIGATION

Turning to enforcement news, a group radio amateurs who did not show up for a retest are no longer membewrs of the ham fraternity. The FCC’s Daryl Duckworth, NN0W, explains:

--
Duckworth: “As a result of an audit by the Enforcement Bureau of the September 1st 2001 examination session given in Yucaipa California by the W5YI VEC, the Wireless Telecommunications Bureau has cancelled the licenses of four who did not appear for a retest. Those are Technician Camito E. Lopez KG6GJG and General class licensees Marcileno Llanes KG6HBR, Manual Vega KG6GSP and Marcial Rivas KG6HCP.
--

Duckworth says that the investigation into the exam session continues. (FCC, RAIN)

**

ENFORCEMENT: KENYAN PIRATES OFF THE AIR

Still in the enforcement arena, ham radio in Nairobi Kenya have gotten some relief from illegal operators. Kenyan Intruder Watch Coordinator Ted Alleyne reports that five High Frequency stations have been confiscated. Also, the operators of a Nairobi travel agency that was using 2 meter amateur frequencies were caught and equipment has been siezed. (Q-News)

**

ENFORCEMENT: IRANIAN JAMMER UPDATE

The 40 meter Iranian jammers we recently reported on are still being heard. Intruder Watch Regional Coordinator Martin Potter says that the jamming is being done to a low power station called Radio Mujahed. It’s being head in 10 Kilohertz steps from 7 point 010 to 7 point 090 Mhz. Potter says that S-W-L’s may find the same situation in the broadcasting frequencies as well. (Q-News)

**

NAMES IN THE NEWS: FCC CHAIRMAN POWELL COMMENTS ON MEDIA OWNERSHIP

Some names in the news. First is FCC chairman Michael Powell. He has warned that rules on media ownership will probably be struck down by the courts if they aren't modified to account for sweeping changes in the media landscape over the past 30 years. Powell's comments came shortly after the FCC released the results of studies suggesting that many ownership rules are outdated. The studies mark the foundation of the FCC's review of key rules on media ownership. (ComOnline)

**

NAMES IN THE NEWS: CULTURAL RESOURCE SPECIALIST NAMED

The C-G-C Communicator reports that Dr. Amos J. Loveday, Jr. has been appointed as the "Cultural Resource Specialist" in the F-C-C’s Wireless Telecommunications Bureau's Commercial Wireless Division. His job will be to

insure that tower and antenna siting projects comply with the requirements of the National Historic Preservation Act of 1966. He will also assist the FCC in establishing a closer working relationship with Native American Tribes and Native Hawaiian Organizations. (CGC Communicator)

**

NAMES IN THE NEWS: KB5HAV APPOINTED ASST MGR OF HURRICANE WATCH NET

Bobby Graves, KB5HAV, of Pearl, Mississippi, has been named as the Assistant Manager of the Hurricane Watch Net. According to the ARRL Letter, Graves appointment was announced by Mike Pilgrim, K5MP, who is Manager of the net. More information is on the web at www.hwn.org (ARRL)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

RESCUE RADIO: AOL SIGNS ONTO AMBER ALERET SYSTEM

The worlds largest Internet service, America Online, says that it will soon begin transmitting Amber Alerts. The service says that the alerts about abducted children will show up on the screens of computers, pagers and cell phones of more than 26 million of its subscribers in dozens of states and cities beginning in early November. Warnings issued by most communities that use the system will go to AOL users in those areas who request to receive them. All but one of the existing Amber Alert systems are participating in the America Online project. (AoL)

**

EMERGING TECHNOLOGY: X-RAY EYES

If you thought only cartoon super-heros like Superman could see through walls to detect the villains, guess again. New technology called ultra-wideband will soon allow mere mortals to detect objects buried underground and to build cars enhanced with sensors that help avoid collisions.

According to press reports, ultra-wideband uses millions of narrow pulses each second to get an accurate reading of location and distance, opening the door for new applications in radar tracking, precise positioning and wireless communications. The possibilities vary from short-range computer networking for homes to devices that determine the location of golfers on a course.

What regulators like even better is that ultra-wideband devices can work within frequencies already allocated for other radio services -- helping to maximize this dwindling resource. The Federal Communications Commission believes the technology is so promising that the agency has proposed allowing it to be used on an unlicensed basis.

But it may be a while before the new technology is available. First, government agencies and private groups are testing to make sure ultra-wideband can safely coexist with other services, like the Global Positioning System. More information is on the Ultra-wideband working group website at www.uwb.org (Science Today)

**

HAM RADIO IN SPACE: PCSAT - HELP NEEDED TO BUILD A NEW BIRD

Bob Bruninga, WB4APR, of the P-C-sat Project Team has put out a call for an antenna designer for the next generation of this type of ham satellite. According to Bruninga, to get a free ride to orbit for P-C-Sat the satellite must fit inside of a perfectly spherical but totally passive mirror surfaced 18 inch diameter ball. Also, the antenna must be totally internal with no external protrusions.

To make it happen, the P-C-Sat team at the US Naval Academy Satellite Lab, needs a good RF designer and antenna modeler to help out. If you can help, please contat Bob Bruninga by e-mail to wb4apr@amsat.org. P-C-Sat is scheduled for launch in less than a year. (AMSAT BB)

**

RADIO IN SPACE: GOVERNMENT CONTRACTS FOR NREW WESATS

The government has selexcted TRW Space and Electronics to build the fleet of next generation weather satellites. The Redondo Beach California unit of Cleveland Ohio based company will build two satellites with options for up to four more.

Eventually six new polar-orbiting satellites will collect data on the Earth's weather and climate, as well as its land, oceans and atmosphere. The birds will go into orbit between 2009 and 2018. The contract to build the new weather satellites is worth up to $4.5 billion dollars. And that’s billion – with a B. (Published reports)

**

INTERNATIONAL – AUSTRALIA: THE CB MOUNTAIN CHALLENGE

Turning to the international pages, C-B operators in Australia are about to embark on what is best described as a cross between an emergency training operation and a contest. Its called the Mountain Challenge where the object is to accurately pass a message around the state of Victoria using C-B radio.

It will all take place on Saturday the 30th of November. Both 27 MHz and U-H-F C-B radio is used to get the message through. And this year the event will extend beyond Victoria, with C-B’ers in Mount Gambier and Tasmania having expressed interest in taking part.

Find this interesting? Want to learn more? Well you can – on the web at www.mrc.cat.net.au. (Q-News)

**

INTERNATIONAL - AFGHANASTAN: KANDAHAR GETS TV

A new television station in Kandahar Afghanastan is being called a resounding success. This even though the signal is so poor the Afghan musicians shown in the first broadcast looked like grainy, quivering ghosts. According to Abdul Ali who heads up broadcasting in Kandahar, all of the equipment is than 20 years old and had not been used at all during the years that the Taliban ruled the country. (Media Network)

**

INTERNATIONAL - CANADA: VE3CT WLECTED QCWA PRESIDENT

For the first time in the history of the Quarter Century Wireless Association a Canadian radio amateur has been elected as its president. Croft Taylor VE3CT , who previously served as vice president, assumed office on September 1st and will serve a two year term. The QCWA was founded in 1947. You can learn more at www.qcwa.org (RAC)

**

DX

In D-X, A group of five American operators will be active using ZK1 callsigns from Manihiki in the remote North Cook Island group through the 31st of October. They will be active on 6 to 160 metres on CW, SSB and RTTY. During the CQ World Wide SSB Contest on the 26th and 27th of October they will use the callsign of ZK1MA. (GB2RS)

9V1SM is Sasi, a new operator from Singapore. He is active on all bands from 40 to 6 metres, mainly on SSB. He also plans to start PSK-31 operation in a few week's time. (RSGB)

Lastly, the new address for the ARRL W 5 Incoming QSL
Bureau is O.K.D.X.A, PO Box 2591, Claremore, Oklahoma 74017-2591. If you have cards for W-5 land, send them there. (ARRL)

**

THAT FINAL ITEM:

WITH THE SCOUTS: JOTA THIS WEEKEND

This weekend, the 19th and 20th of October, is the scouts Jamboree on the Air, or JOTA. Bruce Tennant, K6PZW, tells us what its all about:

--
The Jamboree on the Air is an annual event. Every October a half a million Scouts and Scout Guides all over the world take to the airwaves to make contact with each other by means of Amateur Radio.

The World Scout Bureau owns and operates its own Amateur Radio station. The the call sign H-B-9-S and it operates from a permanent radio room located in its offices in Geneva Switzerland. The station normally operates during Scout Nets and other major scouting events like the Jamboree On The Air. This year, the station is active on 160 through 10 meters in a number of languages.

Here in the United States, the big JOTA gathering takes place at Camp Wisdom near Dallas, Texas. The call sign to listen for from there is K2BSA slash 5. Other stations expected to take part include GB2GP in London England and JA1YSS from Tokyo Japan.

If you are hearing this newscast before or during this years Jamboree on the Air, get on the air and show your support of the worlds youth and of scouting by making contact with a J-O-T-A station. Who knows, it could evenb be HB9S.

For the Amateur Radio Newsline, I’m Bruce Tennent, K6PZW, in Los Angeles.
--

Again, this weekend, the 19th and 20th of October, is the 2002 Scouting Jamboree on the Air. And if you are hearing this newscast later in the week we hope you had time to contact a Jamboree station. (ARNewsline™, Q-News, GB2RS)

YEAH...YEAH...YEAH...
Yada...Yada...Yada...

Ban has been in place for Years but that
hasn't stopped me seeing one or two
of them for sale at virtually everh hamfest
I been to, and at weekend flea markets
in the Pa.NJ NY area. All you have to
do is sell them "for test bench signal amplifier
purposes" as a kit and the FCC can't touch
you. For an example see:

http://www.cbcintl.com/TriPower.htm

Know what also? I have NO PROBLEM with
these kind of sales. Their NOT illegal and only
hams with inflated egos seem to get upset
and like to play "radio cop" when such products are
marketed. There's alot other things to worry
about (like the looming loss of 440 mHz) that this stuff folks.

4208. 6m QRP linears, anyone?

Newsgroup: rec.radio.amateur.misc

From: witchdoc@attbi.com
Message-ID: <3aed93cc.0210200926.77e3467b@posting.google.com>
Source record: 72551

Trying to find a 6m QRP linear is a KILLER!!! The only 6m linears I've
been able to find are the big, expensive 100+w monsters... way more
than the 20-25w I need for simple mobile work in the L.A. basin. And
they don't run on 12v.

Am wondering if I could somehow find a schematic for an illegal CB
amp, would it work for 6m if I substituted smaller caps and different
tuning coils in the filter section? And are there any low-cost
transistors rated for 25w, 100mhz?

73,
KE6WNH

Hello,
my friend recently installed Satscape V1.88, but he has a problem when he wants to update the kepler data for Satscape.
He has the following error window: "Error: File not found, when trying to update the keps, Proxy=False."
His internet connection is not ADSL but it is with cable.
Anybody an idea how to fix this problem?

Can anyone tell me what one of these radios is worth used in great condition?I have an offer of a trade as they want a RCI 2950 I have and will trade me even up.He just wants a mobile and not the base.
My instincts say go for it.I know the person,and do know he keeps his equipment in mint shape.I just need to know what it is worth if I want to sell it as I may do.I don't use the 2950, and I doubt that I will use the Galaxy .Email me if you got any info that may be of help.Thanks for any help in advance.

You think so? There was a vendor sell HF amp kits at Dayton a year or
two ago. The Detroit FCC, part of their area is Ohio, paid them a vist
out in the tent area, at the far end of the flea market. Guess what?
They, the amp kit vendor, haven't been back to Dayton since.

BULL! He was there again this year, along with two others. Your lies don't scare anyone. In fact, the one vendor hits all the hamfests in the northeast and midwest. The Detroit office? You gotta be kidding, never saw a bigger bunch of more incompetent bureaucrats! They wouldn't know an amplifier from a commode.

4224. 6 Meter (FM) operators in VE3 land.

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-21 15:45:41 UTC
From: tdoda21@rogers.com
Message-ID: <nurR1rKS7zEK-pn2-2s2zR4v7SXT4@lazer>
Source record: 72567

Greetings:

We have just made some improvements to our clubs 6 meter
repeater located near Kitchener, Ontario (between Toronto and
London), and we are looking for performance reports.

The repeater is on 53.370 output and input is 52.370. Call is VE3SED.
A 131.8 Hz tone is required to access the machine. The main
lobe of the antenna gives the advantage towards London/Windsor,
right down the 401 highway.

The 6 meter repeater is linked full time to our 442.200 UHF machine
which also requires a 131.8 Hz tone.

Please send any reports to: ve3tjd@rac.ca

Thanks,

4225. Need simple design

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-21 16:04:40 UTC
From: jonn7411@yahoo.com
Message-ID: <9d39bd15.0210210804.57063b09@posting.google.com>
Source record: 72568

I need a design for a simple receiver that when it receives a signal, it will actuate a single pole single throw momentary contact switch. Push to close, let go to open. I just moved into a new house and there is a garage door opener, however, the previous occupants did not leave the remote for the opener. The opener works fine and has a switch on the wall to open and close it. To open, you push the switch, to close you push the switch.

I have contacted the manufaturer and they are of no help, asking me questions that I can not seem to find the answer to, etc. The opener was built before a certain year and they no longer support it. (Pretty bad customer service if you ask me).

So, being a radio haobbyist that all amatuers are, I thought that if I could put together a radio activated switch that when I key up my 2 meter momentarily on a little used simplex freq (of course id'ing myself per FCC regs), then the receiver would activate a simple relay which would momentarily close a switch, thus activating the opener.

I have thought about replacing the opener to a newer model, but I could spend that cash on more radio gear instead, and why replace something that works fine?

Any thoughts are welcome, however, I do hope that they would be not critical but more helpful.

You can send suggestions to my email address: jonn7411@yahoo.com

Thanks to all

John Murphy
KC0JPO

Can anyone help with info on the following:

National NC-2-40S receiver.

picture at: http://www.qsl.net/g4bxd/g4bxd10/htm

Looking in Ostermans SW Rx's Past & Present, my set has the
square meter of the 40D but the round center scale of the 40C,
also, my set has only 1 h/phone jack. My set came with a
dog kennel psu, bigger than the HRO version though.

If anyone can help with any history on this set I would
be most obliged.

contact Ben, G4BXD at: G4BXD@qsl.net

Source record: 72572

Hi,

In an attempt to qualify for the Leffe Beer Award,

http://www.qrz.com/detail/OQ0LEF

I am, naturally, interested in finding a Belgian HF net, if such exists.
A quick google search did not reveal any information, neither did a visit
to the English edition of the Belgian Amateur Radio Society website at

www.uba.be

Any help would be most welcome. Thanks,

Now that's what I call an award! :-)

Besides the nuisance when living next to one of these CB'ers running an illegal amplifiers, there is a direct price on ham radio. Most in the country do not know the difference between ham radio and CB. All they know is that neighbors with antennas often interfere with their phones and televisions. As a result, these CB'ers give the reputation of ham radio a black eye also. There are two ways to respond to that - educate the neighbors and support any efforts to reel in the "outlaw" CB'ers.

There's a guy at the Detroit FCC office who slobbers all
over his shirt whenever he tries to talk to you. Spittle keeps
drooling out of his mouth. Every shirt he owns has food and
spit stains on it. Has to be the grossest thing. FCC must
hire direct from the city half-way houses.

I believe it would be easier to obtain/retain
small chunks of spectrum. By this I mean like
WARC79 (30, 17 and 12M). Our use/lack of use would
not be as noticeable as in a large expanse of spectrum
(70cm). I would like to see allocations in the
60M and 4M areas. But it would probably be much easier
to get 50khz here and there than in one block. This
would afford us the opportunity to experiment with
radio at many different frequencies. Avail us of
band openings which could provide communications in
times of emergencies. It would encourage us to use
less spectrum on VHF and UHF (no FM). A world
wide
200khz segment at 222 Mhz, a 500 khz segment at 33cm
and so on is what I have in mind. With world wide
segments, the manufacturers might make equipment
to cover these bands.

I can't believe it. Most nights, I tune in for the first five minutes,
to see who is on. Usually, I am disappointed and it is the usual saucers
and stuff that is on most of the time. I didn't bother last night, and it
turns out to be someone different from the usual topics, and someone I
would have listened to at least for a while.

It seems a shame, because it is neat that there's an overnight show
that is different from the usual talk show circuit. But too often
the show is about the esoteric, rather than the intriguing.

By the way, according to a bulletin I saw the other day, Kevin Mitnick
is selling off some of his computers, if I remember properly to pay
his legal fees. Perhaps the timing of his appearance lastnight is
connected with that.

Michael

One place I am surprised that we have not made an approach to is the 30 to 50mHz band. In as much as it is being abandoned by public service providers in droves, it would make sense for us to try and get allocations therein.

>A world
>wide
>200khz segment at 222 Mhz, a 500 khz segment at 33cm

Two hundred kHz at 222mHz would be reasonable, but 500kHz at 33cm wouldn't let us do anything. If we don't have at least a meg or two here (for modes like ATV), it will be completely abandoned.

Also, the Japanese have a CB-radio like service around 800 or 900 mHz (they are in every cab on Okinawa!), so adapting these for Amateur service shouldn't be a problem. I am surprised they haven't already.

Now Woger, or Lloyd, or KJI, or whomever, I want you
to print this out, sign it, and paste it on your refrigerator
door with a magnet so you can read it every morning
at 7:00 AM.

OK?
Very Good!
You get a cookie :)

---------- cut ------------

Anti-Cooning Pledge

I _____ pledge to stop being a dumbasszd coon by,

1. No longer shuckin' and jivin' and grinin' with my eyes
bugged out like a coon just to get a cheap laugh and gain
acceptance from white people. I accept myself, I am proud
to be black and I respect other cultures whether they
respect mine or not.

2. Respecting the legacy of trailblazing black entertainers
of the past, such as Bert Williams, Alvin Childress and
Spencer Williams Jr. (Amos 'n Andy) and Hattie McDaniel
who were brilliant entertainers, but were forced to play
stereotypical roles because of racism. Because of their
sacrifices, I don't have to behave like that anymore.

3. Refraining from constantly telling jokes and making
cheap statements about such things as chicken wings,
watermelon and needing sex all the time. When done
skillfully and in proper context like Moms Mabley or
Richard Pryor used to do, these jokes are ok. But when
overdone, these comments perpetuate negative and false
stereotypes. Nobody can have sex all day, every day.
Even prostitutes take lunch breaks.

4. Trying very hard to stop using words and phrases in
public like "fit-n-ta" "conversate" and "we be" that
either don't exist in any language known to man or are

best used at the dinner table with family and friends
who understand them.

5. Staying true to my art and convictions in the spirit
of such great heroic entertainers like Paul Robeson and
Cicely Tyson, who years ago during times of even more
severe racism than we see now, didn't "coon out" for
lesser demeaning acting roles even when things looked
bleak and their careers were on the line.

What is a coon?
- A person who is in a position (like a celebrity,
entertainer, politician or corporate executive) to work
towards dispelling Black racial stereotypes, but instead
through his or her behavior perpetuates them in order to
advance their own career or agenda.

"Pleasure me, you coon wench!"
--James Mason, from the movie

Once, when he was arrested, he was shackled to a bench with his hand cuffs behind his back. The judge was so afraid of Kevin he wouldn't even undo the cuffs so Kevin could dial the phone to call an attorney! He told them the number and they dialed it then held the phone to his ear.

How do I know? Kevin told me.

They had reason to be afraid - once he showed me how to dial a special three digit number that would shut off all phones in a specific grid.

Nice guy but dangerous.....hehehe

50 kHz allocations would probably not include phone privileges, so I for
one am not interested in anything that narrow, like 30m, for example. If
60m ends up that narrow it won't help with the fact that I have to jump
back and forth between 3.5 and 14 MHz as propagation shifts, or else work
split on 7 MHz. This really sucks. Phone on 5 MHz would help, but we won't
get it if it's only 50 kHz wide.

NCG imported some of these Japanese 'Personal Radios' (actually mobile rigs) a while back. They had 20 channels FM simplex in 903-905 MHz, which would be legal to use in the US without modification. although away from the planned FM subband and lacking repeater shift, but they were selling for $600, and there were few takers at that price.

Has anybody tried using the surfeit of old GSM phones
as a source of modern components?

I'm particularly interested in the use of the baseband
CPU as a single chipper - with the ARM7 architecture
together with the inbuilt I/O, it must be a candidate to
replace the PIC series.

In addition, what of using the whole of a GSM phone
as a 23 cm handheld? Some S/W rewriting would be
needed (e.g., don't need channels and retiming logic).

Well, there ARE ways to shut down a node. But hardly with 3 digits.
That's undoubtedly BS.

Back when the DTMF was a 3x4 matrix for customers (and 4x4 matrix for
control like on some HAM HTs) the 'phone company matrix was
quite different, and those extra keys....

Well, time to leave that one alone.

3 digits to shut down a node now? Yeah, right. And you found those
three digits written on a piece of paper in that Corvette for $50 every
knows about from the 60's!

WAIT!! Was there a black helicopter involved?

Mike

Compared to most stuff offered on the corporate media,
Bell is often interesting and entertaining (if you can
tune out the droning ads). Of course unless one prefers to
watch endless meaningless speculation over the DC sniper
that passes for 'news' on TV , or perhaps the bland pap that
poses as music is your cup of tea.

Bell and BBC are about the only things left to listen to that
doesn't make me want to grab a book instead.

Hi all

Want to do an end to end alignment on my Kenwood radios. They are a little deaf. (yes I know about the front end filter problem for US vs Aus markets)

I of course only have the cct diags (Op manuals) and certainly feel confident enough to do it with only this info. it would be nice though if anyone new of any gotchas I should know about. A copy of the service manual(s) would also be great but that might be asking a bit much!

Cheers

Bob VK2YQA

From C1, it follows that any associated supporting element is, apparently, determined by a descriptive fact. On the other hand, the theory of syntactic features developed earlier does not affect the structure of the traditional practice of grammarians. It must be emphasized, once again, that the natural general principle that will subsume this case cannot be arbitrary in a parasitic gap construction. If the position of the trace in (99c) were only relatively inaccessible to movement, a case of semigrammaticalness of a different sort can be defined in such a way as to impose the requirement that branching is not tolerated within the dominance scope of a complex symbol.

Analogously, the natural general principle that will subsume this case is rather different from an important distinction in language use. This suggests that a subset of English sentences interesting on quite independent grounds is not subject to the extended c-command discussed in connection with (34). Suppose, for instance, that the speaker-hearer's linguistic intuition is not quite equivalent to nondistinctness in the sense of distinctive feature theory. Thus the earlier discussion of deviance is, apparently, determined by a parasitic gap construction. On our assumptions, any associated supporting element does not affect the structure of the requirement that branching is not tolerated within the dominance scope of a complex symbol.

It must be emphasized, once again, that the notion of level of grammaticalness can be defined in such a way as to impose a general convention regarding the forms of the grammar. Clearly, a descriptively adequate grammar is not subject to the requirement that branching is not tolerated within the dominance scope of a complex symbol. On our assumptions, any associated supporting element is not quite equivalent to the system of base rules exclusive of the lexicon. So far, the descriptive power of the base component cannot be arbitrary in the levels of acceptability from fairly high (eg (99a)) to virtual gibberish (eg (98d)). Let us continue to suppose that a case of semigrammaticalness of a

different sort does not affect the structure of irrelevant intervening contexts in selectional rules.

A consequence of the approach just outlined is that this analysis of a formative as a pair of sets of features can be defined in such a way as to impose a stipulation to place the constructions into these various categories. I suggested that these results would follow from the assumption that the descriptive power of the base component is not quite equivalent to the extended c-command discussed in connection with (34). Nevertheless, a subset of English sentences interesting on quite independent grounds delimits the strong generative capacity of the theory. However, this assumption is not correct, since a case of semigrammaticalness of a different sort is rather different from the system of base rules exclusive of the lexicon. Thus the appearance of parasitic gaps in domains relatively inaccessible to ordinary extraction may remedy and, at the same time, eliminate a corpus of utterance tokens upon which conformity has been defined by the paired utterance test.

Keep well

Hi,
Galaxy Saturn Turbo has the same main board as RCI2950, but ... with deleted one of final transistors (2SC2312). The big power unit in this rig (added after the final transistor) is of a very low quality. The power supply DC unit inside this large case is also not the very best. A well tuned up RCI2950 will give to you MUCH MORE satisfaction, beeing also much more comfortable (little size case). I'm using a RCI2950 since 1990 and I'm very satisfied. Many times i had a sick "Turbos" on my table, my friends' properties. My advice is : be a owner of 2950 as long, as you can and never buy a "Turbo".
Best regards,
Chris,
Poland

It is not PROFIT: it's PROPHET.
One concerns the acquisition of WEALTH,
the other concerns speaking for GOD:
this character speaks for the lining of his pockets.
He does NOT speak for God.
There were some interesting penalties for false prophets, in the Old Testament
and they did not include making any money <g>.

Just because you don't share the same concern about a particular
topic within the ARS doesn't mean that that topic isn't important
to others. I too have done my share of whining to the FCC about
bogus clubs getting Hawaii extra class callsigns. We have only 204
such calls* and many have somehow ended up in the hands of out-of-
state clubs, thus completely depleting the 2x1 pool for new extras
here.

*26 from each of the AH6-, KH6-, NH6-, WH6- blocks;
25 from each of the AH7-, KH7-, NH7-, WH7- blocks.

Jeffrey,

Have you done any whining about folks who glom onto scarce KH2 callsigns, even though they've never even been to Guam? Or about a fellow in KH6 who lent his mailing address to a guy from Rhode Island to glom onto multiple Hawaii club station and personal call signs?

I didn't think so.

I'm confused Jeffrey. Which of your conflicting stories is true, Jeffrey?

1) (May, 2001 version) You resided on Guam for a short time, and got a KH2
call;

or..

2) (May, 1996 version) You never left Hawaii, but "borrowed" the mailing
address of Dr. Perry at University of Guam, sorta like Deignan "borrowed"
your mailing address to get his KH6HZ callsign.

4300. tk3 v0.4 multi-platform software for ICOM IC-R3 available

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-26 11:28:29 UTC
From: "Bob Parnass, AJ9S" <usenet1@parnass.org>
Message-ID: <3dba7c1e$0$17649$272ea4a1@news.execpc.com>
Source record: 72443
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner,alt.radio.scanner,rec.radio.shortwave

tk3 version 0.4 is now ready for free download.
tk3 is an open source, multi-platform software for configuring
the ICOM IC-R3 radio/television receiver.

I wrote tk3 chiefly for radio hobbyists who use Linux, MacOS X,
BSD, Solaris, Unix, or other non-Windows operating systems.
However, tk3 runs on Windows-based systems (95 and later), too.

New features and changes in v0.4 include:

1) New controls for Confirmation Beep, Scan Pause, and Scan Resume,
Lock Function Effect, Monitor Key, Auto Power Off, Lamp
operation, Frequency Skip scan, Power Saver.
2) New duplicate frequency check.
3) Offsets of 0 MHz are blanked in the Memory Channel window.
4) CTCSS codes are hidden from view in the Memory Channel window
for channels in which the tone flag is off.
5) Added skip buttons for AM TV channels.

tk3 supports both USA and non-USA versions of the IC-R3
and lets the user choose between 10 kHz and 9 kHz AM BCB spacing.

I do not posses an IC-R3 and developed tk3 with the help
of several IC-R3 owners. Thanks to Irwin Shapiro who provided
the IC-R3 memory layout. Irwin, along with Wayne Turner and
Les Butler are active tk3 beta testers.

tk3 is undergoing active development. You can learn about and
freely download the latest beta test version of tk3 from:

http://parnass.com

I don't warrant the software, though it will cost you nothing.

My HQ-150 has 15 knobs and 2 switches. My RX-320 has no knobs and 1 switch (on/off). Guess which one is better on dx?

I don't think that the amount of knobs and switches is the amnswer, it is how many knobs and switches that perform multiple functions in sequence with other knobs and switches. This should be in direct correlation with unit cost and should always be one knob short of what is needed to be perfect (leaves room for improvement).

Still taking an EXTRA STEP opening the Windows folder? Who knows why Bill Gates did this, but it is easy to eliminate the extra step.
Open the Windows folder and click on View and Customize This Folder. Click on Remove Customization spot and click Next twice and you are done. This also works for the System folder.

My HF-150 has two (2) knobs and three (3) buttons.
Judging by the way they vanish when they appear for sale, and the number of offers I've had to take mine off my hands I would say it is a good SW receiver.

My other two commonly used receivers have 12 knobs/40 buttons and 9 knobs/48 buttons (most of the buttons are multi function as are some of the knobs. If push came to shove I'd probably dispose of them before the HF-150.

4321. [Regional:Southern California] Did SCRRBA go out of existence?

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-27 01:24:19 UTC
From: "D. Stussy" <kd6lvw@bde-arc.ampr.org>
Message-ID: <Pine.LNX.4.44.0210270112130.5013-100000@exp.bde-arc.ampr.org>
Source record: 72465

For those from other areas, SCRRBA is (or was) the frequency/repeater coordinator for the Southern California area for all amateur bands 10m and up except for 2m and 125cm.

According to the organization's 2001 meeting minutes, a motion was passed setting the third Saturday of October as the annual general membership meeting date, and the location they were at as the meeting place. This motion also went as far as to extend an invitation to "220 SMA" (the area 125cm f/r coordinator) to share the location as their fourth quarter meeting date falls on the same day, starting with 2002's meeting.

SCRRBA did NOT have any meeting whatsoever on October 19, 2002. I know because I happened to be in the area and decided to stop by despite the fact that no agenda had been posted on their web site ("www.scrrba.org") for a 2002 meeting and my e-mail sent to them (via their "admin" mailbox as listed at their web site) on October 16 was unanswered (and is still unanswered now 10 days later!).

I am a paid member of SCRRBA (through 2001; 2002 dues haven't been solicited yet), and I can't figure this one out. I also looked at the 220SMA's web site but could not determine where their October 19th meeting place was scheduled for (in the event that they have since accepted the invitation for a common meeting place). SCRRBA's web site did have updates as recently as July 2002.

Has anyone else heard anything?

You mean the TWO VX7's right? It was interesting to see them light up
when you key up on the frequency they were set on, while under water.

> You and your friends must have very selective sight!

They disappeared becasue RH was paying a visit to the Hamvention the
year before, and the amp kit vendor got told they better not show up
again, the kits, by the field agents. All one had to do was stop by
their table and ask them about their visit from the FCC. Several
people wanted a kit and wanted to know why they weren't there any
more. There may have been other amps elsewhere, but they were NOT in
the tent area anymore. Even some of the CB shops with tables had their
"questionable" wears gone that year too. Seems like the word got out,
and nobody wanted to get busted.

You'd love my 706g...It's more buttons than knobs, with multi-layered
menu's. IE:
"M bank, S bank, G bank, with 4 modes of controls for each display
bank, with 3 other buttons selecting functions from that mode. Also
uses two seperate "setup and seldom used" menus. Kind of a pain,
compared to individual knobs/buttons for each function, but I guess
thats the only way they can squeeze all that stuff into a dinky box,
and small detachable faceplate. 5 knobs and thirteen buttons for a
HF/VHF/UHF transceiver, all modes. In comparison, my older TS-830 and
VFO-230 runs HF ham bands only, not even general coverage receive,
only SSB, and have 44 buttons , knobs and switches between them. I
think I counted right anyway...My drake twins have a few also when
paired up together. In my case, the radio with the least knobs can
actually do the most overall. But the one with the most knobs does
what it does the best out of that specific type radio that I have,
"Ham-HF". It has the hardest core receiver, with the most receive
oriented goodies in it. Looks more impressive too...All them knobs,
lights and blinky things. My 706 looks like a mobile CB on steroids.
Not much to look at really...I could probably fit eight 706's in the
case of the TS-830 with some room to spare. It's like it's from a
different planet. The radios have really changed a lot in the last 20
years...I guess everything is...Just look at cars...

For the sake of Allah will you guys give it a break? Or should I rephrase
this...For the sake of Muhammed will you guys give it a break?
For all intents and purposes one need have only ONE button...that being the
ignitor. Ask any Muslim with a rag over his/her head.
Seems that Muslims are always "one knob short" of sanity.

4328. problem with CW on FT726

Hello dear OM,

I is allowed to write to you to put a question about Yaesu FT726r.

I have this transceiver recently, and it has a problem in the mode CW Above all, I wish to know if, once the key CW selected, when you handle your key do you have a monitoring of telegraphy?

Second question, about my station, when I activate the PTT in CW mode the signal on the S-Meter goes up to 9 and PO is on 8, the station seems to pass in emission but not in telegraphy, it is carrying which is sent: - (do you know the problem?)

In advance thank you for your assistance, so long

Have for sale a Yaesu Ft-50R in the box with all docs.I am asking $225.00for
it shipped to your door.
Have for sale a Yaesu Ft-50R in the box with all docs.I am asking $225.00for
it shipped to your door.
Have for sale a nice Pro-2042 scanner.I am asking $175.00 shipped to your
door.
I have several of these Standard C-508 hts for sale.I am asking
$125.00each.These are used and I do have boxes and papers with them.
Have for sale a nice Motorola SP-21 VHF hand held.I don't know much about it
but have had it sitting on my shelf for some time.I don't use it and would
like to sell it for $80.00 shipped to your door.
Have a nice condition Pro 2046 for sale.I will sell for $125.00plus a
littlefor shipping.
On any of this stuff I can be interested in trades for a dual or tri band
mobile radio that receives over 472.mhz.
Email me on any of this equipment.My email is : n1rsp@qsl.net

4342. Schematics and tech info needed for old tube CB's

Newsgroup: rec.radio.amateur.misc
Date: 2002-10-28 02:54:46 UTC
From: Ed - VA3ES <va3es@rac.ca>
Message-ID: <Il1v9.766$qD2.208078@news20.bellglobal.com>
Source record: 72484
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.cb

Hi All;

I'm in the process of restoration and 10M-conversion of three tube-type AM CB radios:
The first is a Pierce-Simpson "Guardian-23,", and the second unit is a "Cardon Spitfire", (which is identical to the Robyn T-123, and very similar to the Kris 23). The last is an oddball - a Canadian made "Chisholm GRS-1566"

I'm missing schematics and other technical info for these radios. There is suitable info in Sams CB series CB-35 (Robyn T-123) and in CB-8 for the Guardian 23. Would anyone have either of these Sams books, or any schematics/service info for these rigs? I'll gladly pay for copies of the technical info.

Thanks, and vy 73,

Ed, VA3ES

From: radionews@aol.com
Message-ID: <20021028003737.28678.00001347@mb-mv.aol.com>
Source record: 72335

Amateur Radio Newsline™ #1315 – October 25 2002

Amateur Radio Newsline™ report number 1315 with a release date of Friday, October 25 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham radio operator may have played a part in the apprehension of the DC sniper suspects, the U-K says no more new operators in its 5 megs experiment and the ARRL says no to unlicensed visitors sharing a United States ham radio band. These stories are first on Amateur Radio Newsline report number 1315 coming your way right now.

**

RESCUE RADIO: HAM RADIO HELPS NAB THE DC SNIPER SUSPECTS

A ham radio operators may have played a role in the apprehension of two men wanted in connection with the sniper shootings in the Washington DC area. ABC News interviewed the trucker who called the police to report he had spotted the two suspects. When asked how he heard about the description of the vehicle, his response was that he heard it while listening to Bozo on WLW radio

Now, Chip Margelli, K7JA tell amateur Radio Newsline that Bozo in real life is Dale Sommers; callsign WB6OM. Sommers hosts a very popular late night trucker's show on the 700 Kilohertz clear channel station. His show is mainly music and information of interest to long-haul truck drivers. The description of the wanted men was just that. As a result the pair are in custody thanks to a trucker who was paying attention to what WB6OM had to say as “Truckin Bozo” over WLW in Cincinnati. (K7JA)

**

INTERNATIONAL: NEW PERMITS FOR THE UK 5 MHZ EXPERIMENT GOING ON HOLD

What happens when a propagation experiment gets a bit to popular? If you are a telecommunications regulator in the United Kingdom you might be inclined to temporarily suspended issuing further permits for hams to take part. And that’s what’s about to happen in regard to the United Kingdom’s 5 Megs experiment. From Nottingham England, here’s Jeramy Boot, G4NJH:

--
The Radiocommunications Agency says that applications for 5-MHz band experimental Notices of Variation or NoV’s have far exceeded their expectations. The R.A. now considers that the risk of congestion on the five spot frequencies allocated may be detrimental to the overall success of the experiment.

Accordingly, the RA has decided not to issue any further NoV’s for applications received after the 31st of October. The position will be kept

under review and occupancy monitoring of the frequencies will be carried out. It is hoped that ollowing this exercise - more NoV's could be issued, or a numerical limit to the number of NoVs can be set based on usage and congestion. It is likely that an announcement can be made later this year for action early in the new year.

Jeramy Boot, G4NJH.

--

The United Kingdom 5 MHz experimental band was made available to that nations individual Full Class A hams by means of a Notice of Variation issued last July. The five 3kHz-wide frequency allocations are permitted for the purposes of antenna and propagation experiments. The Radio Society of Great Britain is in charge of the overall management of the project. (RSGB)

**

INTERNATIONAL: AN IARU UPDATE FROM PRESIDENT LARRY PRICE W4RA

Still in the international arena, we have a follow up to last weeks story on the International Amateur Radio Union. With it, here's our producer Bill Pasternak, WA6ITF:

--

We received a very nice note from International Amateur Radio Union President Larry Price, W4RA, following last weeks story about the recent meeting in Morocco. According to President Price, the news isn't the IARU observer status at Plenipotentiary Conferences. He tells Newsline that IARU has had this status since the 1998 Conference in Minneapolis. At that time the International Telecommunications Union Convention rules were modified to give the same privileges at Plenipotentiary Conferences as IARU already had at Radio Conferences.

President Price says that the real news was the special station, CN8UIT set up at the conference center in Marrakech. He says that this was a follow on from a similar station set up by the ARRL in Minneapolis and one eight years ago in Kyoto, Japan from the JARL.

Buy the way, the CN8UIT call is based on the French pronunciation of the International Telecommunications Union. For those of you unaware, the International Amateur Radio Union was founded in 1925 specifically to represent our service at international conferences. It has done so -- with great success -- ever since.

With a thank-you to IARU President Larry Price, W4RA, for that neat note, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.
--

In his note to us President Price says that the IARU has taken part in every major conference in modern years. Also that it will be there for all of us at WRC 2003 in Geneva Switzerland. (ARNewsline™)

**

INTERNATIONAL: ARRL ASKS FCC TO DENY US USE OF EUROPEAN/UK FRS-TYPE RADIOS ON 70 cm

The ARRL is saying no to visitors using unlicensed radios in our ham bands. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has more:

--
The ARRL has asked the FCC to deny a petition that would set aside spectrum in the 70-cm ham band for non ham use. This, for use by visitors from Europe and the United Kingdom to use their Personal Mobile Radio transceivers while in the U-S.

According to the ARRL Letter, the request was filed by Dr. Michael Trahos, KB4PGC of Alexandria Virginia. It asks that European PMR 446 type handie-talkies be allowed to operate license free while overseas travelers were in United States jurisdiction. PMR 446 hand-helds are similar to the US Family Radio Service transceivers but operate on eight channels between 446.0 and 446 .1 MHz. at up to a half watt out.

In his Petition, Trahos said that existing Part 97 Amateur Service rules precluding the use of PMR 446 radios in the US were essentially unenforceable and that granting his petition would have minimal impact on existing amateur operations. The ARRL countered by saying that there are obvious enforcement problems associated with the Petition. It says that putting the unlicensed users on a ham band is a formula for serious interference problems to be created.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.
--

As an alternative, the ARRL recommends that European and UK visitors simply purchase inexpensive FRS transceivers to use during visits to the United States. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N5IUF repeater serving the Lone Star State from Dallas Texas.

(5 sec pause here)

**

RADIO LAW: FCC REJECTS AMATEUR'S PETITION FOR RECONSIDERATION ON CC&R ISSUE

The FCC has turned down a Petition for Reconsideration filed by a Florida amateur. This, of the Commission's 2001 decision to deny the ARRL's Application for Review in RM-8763. That proceeding concerned the League's effort to have the Commission include privately imposed deed restrictions under PRB-1.

The ARRL says that the FCC dismissed its Application for Review last December 18th. At that time the FCC noted that PRB-1 more than adequately protects federal interest in promoting amateur communications from overly restrictive regulations.

Not long after, W. Lee McVey, W6EM, of Bradenton, Florida, filed his own Petition for Reconsideration Mc Vey claimed that it presented additional evidence that the FCC had not considered in dealing with the ARRL's petition. But the FCC disagreed. It says that McVey offered up no new evidence in the matter and has turned his petition away. (ARRL)

**

ENFORCEMENT: INDONESIA PIRATE UPDATE

An update now to our recent story on the problems being caused by pirate stations in Indonesia. Not only are they making life difficult for hams around the world. The pirates are also playing havoc with domestic Indonesian ham radio communications as well. With more, heres Q-News Graham Kemp, VK4BB:

--
Many reports covering Indonesian non amateurs using our frequencies in the 40, 20 and 10 metre bands are making their way to the IARUMS. There seems absolutely no control over their working and existence by the local Government.

It is very difficult for licensed Indonesian amateurs to find a clear frequency in the lower edges of 40mb for their authorised cmmunications. Generally the licensed Indonesians are around 7050,7055 and 7060 kHz for their traffic. 7050 kHz frequency, carries CW lessons for the intending future amateurs. Otherwise, the licensed ones, operate in their own nets and you can clearly identify their call signs in between, as per standard practice, though the entire conversations are in Indonesian.

Another frequency regularly used by a SE Asian group for two-way non amateur communications is 14044 J3Eu mode around 0100 UTC every day. IARUMS need the services of those knowing SE Asian languages to identify them, they may be from XV, 3W or XU area.
--

If you are a resident of South-East Asia and heating this newscast, you are requested to watch 14.044 MHz and help identify the unlicensed users. Please send that information to your nations Intruder Watch Coordinator as fast as you can. (Q-News)

**

ENFORCEMENT: PIRATE BOARDCASTING IN SAN DIEGO CA

Back here in the U-S-A, Bob Gonsett’s CGC Communicator reports on an entity calling itself Free Radio San Diego which announced plans to begin broadcasting on on 96.9 MHz.. The transmitter location and parameters are unknown but one person reports being in the town of Carlsbad California and seeing a spray-painted stenciled sign on the concrete walkway promoting Free Radio 96.9. Also, the operator of the station does have a web site at

www.pirate969.org What action the FCC may be planning on this one is unknown. (CGC Communicator)

**

ENFORCEMENT: BE CAREFUL ON 146.52

The has FCC issued and then retracted advisory notices to five Mid-West hams telling them that they were talking to long. This, on the national calling frequency of 146.52 MHz.

The letters said -- and we quote: “The frequency 146.52 MHz is customarily used, and is called for under the band plan, as a simplex calling frequency for Two Meter operation. Numerous communications from your station during the above dates have lasted from nearly half an hour to an hour. While band plans are not mandatory under the Commission’s rules, the Commission depends upon them to minimize the situations in which Commission intervention is required, and they comport with good Amateur practice under our rules. Please review Section 97.101 of the Commission’s rules” -- end quote.

The FCC origionally said that the October 16th letters went out following a review of complaints about the operation of their Amateur stations between September 19th and October 6th. The retraction was issued on Wednesday October 23rd. No reason was given for the withdrawal. (FCC)

**

ENFORCEMENT: FCC JUDGE FAVORS SCHOENBOHM'S RETURN TO AMATEUR RADIO

The ARRL reports that an FCC Administrative Law Judge believes the regulatory agency should permit Herbert L. Sahoenbohm to once again hold an Amateur service license. In rendering his decision, Judge Arthur I. Steinberg says that he believes Schoenbohm now appears to hold the requisite character qualifications to be a Commission licensee.

The FCC had designated Schoenbohm's license renewal application for a public hearing. This based on character issues stemming from a 1992 conviction and alleged lack of candor during subsequent FCC hearings on the matter. The former KV4FZ lost his bid to renew his ham ticket in 2000. He applied for a new license in 2001 which lead to the recent recommendation by Judge Steinberg. A final decision on whether or not to re-license Schoenbohm now must be made by the FCC itself. Schoenbohm has also passed an Extra class exam that is also pending. (ARRL, FCC)

THE INTERNET: DENIAL OF SERVICE ATTACK THWARTED

What investigators are calling a sophisticated and large-scale assault against the World Wide Web has been thwarted . But not before nine of the thirteen servers that manage global Internet traffic were crippled for a short time on Monday October 21st.

The FBI's National Infrastructure Protection Center said that it was aware of the denial of service attack and is addressing this matter. Service was quickly restored after managers put defensive measure in place bringing the attack to a halt. Most Internet users did not even notice the hour long attack whose origin is still not known. (WebNews)

**

ON THE WEB: TECH NOTES GOES HIGH TECH

You have hears us credit it here on Amateur Radio Newsline. Now, Larry Bloomfield's broadcast industry publication Tech-Notes is available on the World Wide Web in a new easy-to-read format. Larry has adopted HTML scripting which permits him to publish pictures, logos and diagrams. And you will always have lots about digital and high definition television and much more. You can check it out on-line at www.Tech-Notes.TV. (Tech-Notes, CGC)

**

NAMES IN THE NEWS: PAUL BLUMHARDT, K5RT, JOINS CQ STAFF

Paul Blumhardt, K5RT, has joined the staff of CQ Communications, Inc. as Director of New Business Development. Blumhardt, of Rowlett, Texas, will oversee efforts to broaden the base and the scope of the company's marketing activities.

According to publisher Dick Ross, K2MGA, Blumhardt has actually been part of the CQ "family" for the past three years, serving in a volunteer capacity as Worked All Zones Award Manager. Blunhardt holds an Extra Class amateur license, a commercial FCC General Radio Operator License and degrees in both engineering and business. Among his personal operating achievements are 5-Band Worked All Zones, 5-Band DXCC, 6-Band Worked All States, and #1 DXCC Honor Roll.

As all of you are aware, CQ Communicatoins publishes magazines, books, videos and other materials for the amateur radio and hobby radio fields. They are also a co-corporate underwriter of the annual Young Ham of he Year Award. (CQ)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

(5 sec pause)

**

THE WAR ON TERROR: A BANNER AND A LINK

Pieter Wycoff, KG4UPX, says over the Internet that he has found an important tool that every concerned ham should have on his or her personal website. Wycoff says that the Homeland Security Knowledge Database has a banner that can be posted to any website notifying visitors of the current status of alert to

terrorist threats.

The site also contains lots of other information relevant to homeland security and how you can play a part. You can even sign up to receive threat notification updates by e-mail. To learn more on how you can add this feature to your ham radio website, take your web browser to http://www.twotigersonline.com/resources.html.

And for those not aware, right now the nation is under color code Yellow which indicates an elevated level of alert. (Via Internet)

CONVENTIONS/HAMFESTS/CONFERENCES: AMSAT IN FT. WORTH IN NOVEMBER

The 20th annual AMSAT Symposium will be held November 8th to the 10th in Fort Worth, TX. The gathering actually kicks off with an Early Arrival Activity on November 7th and ends with the conclusion of the Board of Director's Meeting on the 11th. More information is in cyberspace www.amsat.org. (ANS)

**

SATELLITE NEWS: FCC DECLINES TO APPROVE ECHOSTAR-DIRECTV MERGER

The FCC has declined to approve the transfer of licenses from EchoStar Communications Corporation and the Hughes Electronics Corp. subsidiary DirecTV to form a new business entity. The FCC said that the companies did not demonstrated that approval of the transaction will serve the public interest,convenience, and necessity. The complete story is on the web at www.fcc.gov/Daily_Releases/Daily_Business/2002/db1010/DOC-227263A1.doc (CGC)

**

HAM RADIO IN SPACE: SOYUZ ACCIDENT SOLVED

A Russian state commission has set October 30th as the launch date for a Soyuz rocket carrying a three-person crew to the International Space Station. The decision was made after investigators determined that it was a probably a production glitch rather than faulty design which led to the October 15th crash of a similar launch vehicle.

For a while, it appeared that ham radio operations and everything else on the International Space Station might come to a grinding halt. Russia had threatened to suspend resupply launces following the mishap with the unmanned Soyuz ship which exploded seconds after liftoff, killing one person on the ground and injuring 20 others.

Such a delay would have had a devastating effect of future habitation of the space station. This is because the current emergency evacuation lifeboat vehicle is fast approaching the date on which it must be replaced. Only a Soyuz launcher can carry the replacement lifeboat to the ISS. If the Soyuz launchers had been kept on the ground, operations on the ISS might have been suspended. Thankfully, that wont be the case. (Published news reports)

**

INTERNATIONAL - RUSSIA: HELP LETTER MAY BE PHONY

A electronic letter purportedly from a Russian ham asking for financial assistance may be a phony. Then again, maybe not.

The letter showed up in hams mail boxes and on the numerous Internet news groups beginning on October 18th. Signed by a person calling himself Valentin, the note asks for donations of money and other gear. What has made many suspicious is that the writer never gives his call sign and does not use any ham radio terminology.

A number of people believe that the letter was actually sent by a spam-mail generating company or someone with a program that harvests e-mail addresses from the World Wide Web and generates automatic e-mail to them. There is even some speculation that the message did not come from Russia as the note itself claims.

Then comes a posting to the QCWA remailer from Lee Manning AK7T. Manning says that he e-mailed the writer of the message. Valentin replied that his callsign is RA3XAA. According to international call sign listings, RA3XAA belongs to Valentin Mikhaylin in Kaluga Russia. We have e-mailed him and are waiting to find out if he is the person who issued the letter and how he was able to get so many e-mail addresses of United States hams.

Meantime you might want to keep in mind two words. Caviat Emptor. Buyer -- or in this case -- giver beware. (QCWA Remailer, others)

**

INTERNATIONAL - THE NETHERLANDS: AUCTIONS NOT MANDATORY

Media Network says that a judge in Rotterdam has ruled that the next Dutch government will not be required to auction the commercial radio frequencies to the highest bidders. The ruling on Friday October 11th will impact on future spectrum auctions in that nation. (Media Network)

**

DX

In DX, GB2EVR is a new permanent special event operation for the Eden Valley Railway in the U-K. The station is located at the Warcop railway station, six miles east of Appleby-in-Westmorland, Cumbria. (GB2RS)

Also, JA2ZL will be active as F0/JA2ZL from Morea Island in French Polynesia from the 30th of October to 2nd of November. He plans to operate on 40 to 10 meters mainly SSB, with some CW and RTTY. (GB2RS)

And a milliwatt Beacon is on the air on 11 meters from Northern California. AOH is at the top of a very high mountain and operates under FCC rules part 15. This is the same as child walkie-talkie and can be heard on 27.125 MHz. The Beacon is on the air trying to make a point you don't need 20 kilowatts to DX. If you hear it, QSL to aoh@ computermail.net (APC News)

**

THAT FINAL ITEM: INNOVATION IN AMATEUR RADIO REWARDED

And finally this week, a big honor for a deserving ham. Amateur Radio Newsline’s Don Wilbanks, KC5MFA, has the details:

--

Brad Phillips ZS5BP has been rewarded for his innovation in Amateur Radio. This by being named to receive the South African Radio Amateur of the Year Award.

Phillips received the honor for his work in introducing the Internet Repeater Linking Project – or IRLP to that nation. South Africa Radio League President Sid Tyler congratulated Phillips on his achievements saying that IRLP is as much part of amateur radio as is HF.

But that’s not all. The award itself says that IRLP offers new opportunities for the development of the amateur radio service in South Africa. This is because it brings amateur radio within the reach of young people in schools and the older generation who, after retirement, often do not have access to High Frequency stations or other ham gear of their own. Phillips work brings ham radio to both.

For the Amateur Radio Newsline, I’m Don Wilbanks, KC5MFA.

--

The South African Radio Amateur of the Year Award is sponsored by Siemens. Its given annually by the South African Amateur Radio Development Trust to a ham radio operator who has made a major contribution to the Amateur service. (SARL)

Source record: 72348

Hi:

Sorry, I'm rusty, my refs are not handy and my memory is turning to goo.

I realize the FCC sets limits on the bandwidth of "narrow band" (NB) signals for different bands. At least I've seen some in part 95.

But i remember reading a definition of NB as being any FM emission with a modulation index less than 1. I now see one that says the index is small compared to 1 radian.

call that assumption 1 or a1

Anyone care to comment on this?

The second question is about a bandwidth equation I recently saw.

BW = 2*(peak deviation (dF) + modulating freq(Fm)) assumption 2 - a2

sound right?

and if you have an extra minute ...

given a1 and a2 as valid, then a 2.5kHz voice modulation with a 5kHz deviation we'd have a bandwith of 15kHz. then the modulation index (M) would be 2. I thought FM voice was "narrow band". if so, the modulation index definition of NB isn't valid.

in FCC part 95 subpart 633 they say that NB emission BW is 4kHz wide max and the BW for RC is 8kHz max. so if the highest RC pulse sent represents 1/2 of a .6ms squarewave and you neglect harmonics, the corresponding Modulating freq (Fm) would be 1.6kHz.

so 8 = 2*(dev + 1.6)

max dev = 2.4kHz
and M = 2.4/1.6 = 1.5 which is not NB according to a1

if i try ot fit it in the FCC def for NB of 4kHz, i get

4 = 2*(dev + 1.6)

max dev = 0.4kHz
and M = .25 which IS NB by a1

anyone care to square me away on this? also anyone with actual knowlege of RC emission specs (actually used in practice) in the 72MHz RC band, please fill me in.

--
Best Regards,
Mike Colasono

Hi, i'm in a horrible location for radio. i am in a valley and i need to get out to a repeater. The repeater is one of the *local* ones (approx 100km line of sight). I need some sort of mini repeater set up on one of the hills to get my signal out to the repeater and visa versa. I'm talking minimal funds here. anyone got any ideas out there?

Thanks.

Gary.

Hi. You could try a "passive repeater", which could solve the problem. This uses a beam antenna at the top of the hill aimed precisely at your location connected via a short length of coax into another antenna aimed at the distant repeater. By 'passive' we mean that it's not powered at all, so it redirects your power in a new direction. These things have been used with some success for many years.

Good luck, Chris

Gary,

Have you ever heard of a propagation mode known as 'knife edge refraction' ?
Put up a decent beam with a sharp pattern. Try pointing it at a hill
opposite of the direction you are shooting for and see what you can do.
Move it around to various points as you think necessary. Kinda like
shooting pool.

Nice to see someone who also enjoyed the movie for what it was
and didn't get all hung up on worrying about how ham radio might
be negatively perceived by the general population.

It's a movie, and with most movies it involves suspension of belief.
Frankly I thought it was very entertaining, and had an interesting
premise. Sure it wasn't realistic, but how much science fiction
really is?

Even if I weren't a ham radio operator I would have enjoyed the movie,
and I imagine a lot of non-hams enjoyed it too. And as K6JBT said,
it might have evoked some curiousity inothers.

I think this whole thread indicated one of the things that has hurt
ham radio as much as anything else, and that is too many hams take
it all too seriously.

I think a lot of hams forget about how much fun they had when they first
got into the hobby, the thrill and excitement of first getting on the
air and most importantly being a part of the magic of radio.

There is still magic in the air, unfortunatley it's being lost among
the politics and bickering of today and forgetting the joys of
the days gone by.

Well, isn't that obvious? The fools who put on this "news service" spam this group (and rec.radio.amateur.policy) with their drivel regularly, but refuse to post in on the one group where it's SUPPOSED TO BE posted, rec.radio.info. Additionally, they claim that their expense for this service is roughly $1,000.00/month, while the competing service from Albany, NY, does it with a budget of $100.00/month. Obviously, there is a waste of money if not outright fraud going on here....

On the flip side of your comment, are you implying that there's even a chance that this story wasn't biased or other than complete BS?

Years ago, AT&T did something similar to that with their microwave facilities in a few towns here in Montana and probably elsewhere. There would be this half billboard-sized sheet of metal on the top of a nearby hill. Aiming directly at that metal sheet was the microwave antennas down in the valley, being reflected off the metal to some other microwave site off in the distance.

I did this a while ago on a construction site in sydney, aimed my beam north and bounced my signal off a hill nearby and got into channel 1 CB repeater about 30k's away, worked well

But is this 'knife edge refraction'?

Sounds to me like you are reflecting off the 'opposite' hill, whereas a
refraction path would be over the hill.

Owen

I concur that it sounds to me as if he has his terms mixed up.

Reflection is the BOUNCING of a wave off a surface to change its direction.
Except for an amount absorbed by the target surface, its amplitude will remain
unchanged.

Refraction is the BENDING of a wave around an object which is a result of a
natural property of wave spreading. Its amplitude will decrease as the distance
from the object increases for any part of the wave that did not have line of
sight to its source.

What he has described is reflection, not refraction.

This is a little more expense, but a lot more reliable.

I live in the same situation. My house is in a valley, and I can't hit my club UHF repeater.

I bought a Yaesu FT-8000R (Similar to the FT-8100R) mobile radio, and set it up at a friends house in the Cross-Band Repeat mode. I use and odd PL for decoding and encoding on VHF, which is where I transmit to access the repeater.

Works like a charm.

Is cross band repeating actually legal yet?? I would check with the
ACA on this, as I am sure that it isn't, unless you have a repeater
license for it. I could be wrong.

It can be done legally in the US, with some restrictions. Actually,
our club's repeater has inputs on both 2M and 440, and outputs on 2M,
or could be configured in other ways.

Also, many of the satellites are configured for cross band operation,
and they fly over Australia.

You have an entirely different bureaucracy to deal with, and that
would be the place to go with your question. An alternate would be
your national radio club, on the lines of the ARRL here.

Happy trails,

The satellites are specifically permitted to do it, by prior arrangement.
Joe Bloggs isn't supposed to be doing these things without permission. But
you are right, we all have our bureaucracies to deal with. :)

Cheers.

Ken

Many people in this computer age think that any device should have as least amount of buttons and knobs as possible because the computer does everything for you.
Everyone beleives there should be only two knobs. One to dial what they want to do, and then another knob to change the value of what they want to do.
That means two knobs is the best!
But, with the latest knobs, they have built in push switches. This means you dial in what you want to change, push in on the knob and now you can change the value of what you've dialed.
Now, press the knob again and you back out of setting that parameter and are back to the parameter
select menu to select another parameter. Ah, don't forget the knob double click, which takes you
out of setup mode completely. ;)

Town separated from TV xmitters by high ridge had techie erect a specially fabricated angle of metal on top of ridge. Shot the frequency of carrier in direct line to run surface of angle toward Xmitter site. Curved around top and down slope of other side of angle. Only needed receive pre-amp to recover some 90 or 100 db of attenuation MUCH cheaper than transverter on ridgetop with attendant requirement of cost of running AC-mains to ridgetop.

Maybe I am missing something; but what is new about knobs (rotary
controls) with push switches? I've used equipment with them since at
least 1963 that I can remember, maybe even earlier.

Dan/W4NTI wrote:
>
> Your correct....make that reflection then.

Dan, I see use of the term "knife edge diffraction" in respect of light waves, and it refers the splitting of "white" light into its component wavelengths when the wave bend over a knife endge. The mechanism is that the bending or refraction is different for different wavelengths... so I think that it is pretty legitimate to talk about "knife edge refraction" for a ray of a single frequency and knife edge refaction is the underlying effect that produces knife edge diffraction.

And knife edge refraction or diffraction (whatever you want to call it) works.

But the effect you are describing is it seems, reflection from a natural reflector (being rock or whatever)... some might classify it as a natural passive reflector, but I think that most natural reflectors would be passive (is ionospheric 'reflection' really reflection, and is it passive?), and it is a natural reflector as opposed to an artificial reflector like the billboard style of thing (metallic plane).

And this reflection works a treat sometimes as you have suggested... not unusual to get a better sig by pointing the antenna at the potential natural reflectors. For example, I have a slightly obstructed path to the local packet BBS on 2m, but a reflection from a mountain that is 50deg left of the direct path is a much better signal strength and more consistent signal... it doesn't have to be approximately opposite.

I need the following listening frequencies for my Bearcat III scanner...

155.415
153.980
157.450
155.340
155.055
39.500
162.400
159.210
453.250

If you have more than one of the above, please let me know as I might also restore another Bearcat III and a Bearcat IV. I would like to trade or buy cheaply. I have the following 10.8 IF Bearcat crystals (listening frequencies) for trade...

33.940
33.940
39.780
39.820
45.220
46.380
154.250
154.860
155.010
155.085
155.100
155.250
155.250
155.595
159.090
159.890
162.475
453.500

Thanks,
BTJustice

The correct term is "knife edge diffraction".

Diffraction is the change of direction of a wave when it passes a
boundary of another medium, without passing through it.

Refraction refers to the change of direction of a wave when it passes
from one media to another, where they have different refractive index.
This can happen to radio waves when they pass through air layers of
different density and humidity.

This distinction has nothing to do single og multiple frequencies.

>And knife edge refraction or diffraction (whatever you want to call it)
>works.

Indeed. As does reflection.

<snipped reflection stuff>

Hello:

For anyone out there using a JRC NRD 545 with a PC control program:

Was wondering if you've run into the need to initially preload, or
"pre-condition" the memories in the radio
with any frequency first, before you can download new frequencies from a PC
conctrol program file
to the radio ? (with the new frequencie(s) replacing the one(s) preloaded)

If so, any idea why this is required ?

Thanks,
Bob

he is talking about UHF CB
In Australia and New Zealand we have a 40 channel UHF CB service with
the first 8 channels used for repeaters, the imput channels being 31-38

with our Police band being only about 10MHz away there are new UHF CBs
out with up to 40 extra recieve only channels
like a scanner and CB in one

I was attempting to get a discussion going on a mode of propagation that would have been benificial to the original poster. It matters not one wit what the actual technical terminology is. What matters is that what I described is a viable alternative. Reflection, refraction, defraction...infraction. fractured factions whatever !!!!

The point is it is worth a try....Isn't ham radio supposed to be experimental and to improve the 'state of the art'. But then maybe if it wasn't on the 'test' it doesn't exist...eh?

I have been DESPERATELY looking for 10.8 IF crystals for my Bearcat III scanner. I need the following listening frequencies...

155.415
153.980
157.450
155.340
155.055
39.500
162.400
159.210
453.250

I suppose 10.7 IF crystals would work in it if I used...

155.315
153.880
157.350
155.240
154.955
39.600
162.300
159.110
453.150

I would either like to trade 1 for 1 with crystals I have now that I cannot use in my area or buy cheaply.

Sincerely,
BTJustice

Who gives a shit where you are?

For all anyone cares, you're posting from Marie's rectum.

What is important, is that you have been kicked out of
everything, and no ISP will have you because you are
a complete and utter asshole.

Try it out, identify your access point, and within 24 hours,
they'll remove your access. Funny how that works...

"Nobody likes Wiseman." Even in a failing economy,
some things you can still take to the bank!

You're in the shit, forced to anonymize your posts, and
that is right where shit like you belongs.

The Usenet community will tell you "Good riddance!"

I am sure your tombstone will say the same thing.

Poor baby.

Poor, poor baby.

Poor, poor, poor baby w0ger. The World rejects you.

Nothing more, nothing less. It is written. :)

And the pirate CBers claim NOBODY is on 10m illegally. Hum.... the last I checked anything between 28000 KHz and 29700 KHz was the Ham 10m band. Sounds to me like the FCC can get a good two-for-one deal. Bust the bozos buying the amps, AND bust them for being on the Ham bands too. Not bad.

Hello, I am just discovering digital amateur radio using my laptop and a soundcard. I have downloaded and tried several RTTY and psk programs. But I am trying to locate a freeware AMTOR-FEC program to use to receive MARS traffic. Does anyone know of one?

Thanks and 73

Richard W4MCD

I see not a whit of difference whether he was shot by a black or white or red or yellow or brown or green.. he's dead. The perp should be punished to the full extent of the law. Period. Color doesn't enter into it.

Joe's full of it.

Here are the "must-have" features of any good SW receiver:

1. User-adjustable blast shields
2. Magnetic squirrel defibrillator
3. SPGR ("Reverse GPS")
3. One-touch Brewmatic with Overflow Guard
and PerfectCup (tm) technology
4. Interlaced ultrasonic toothbrush attachment
And most importantly,
5. Speaker-in-Speaker (SIS) for hearing two programs at once

Knobs are unimportant next to all that. ;)

The individual who posted this original article intended to make a racist statement. He is trying to say that shootings by blacks are acceptable and are not reported.

Instead, he has proved a tragic point: When people are shot and killed by ones or twos, it's no big deal regardless if the shooter is black, white, yellow, pink, lavender, or spotted -- it's reported on the local news and that's all. There is so much murder and mayhem -- most of it by firearms -- in this country that you must kill half a dozen or so before you get any attention.

No biggus,

Garry and I do everything for nothing but satisfaction, but we use all free and sponsored services. so we can provide a large amount of information which you can get for free.

Though sponsors are for reference.
www.dot.com.au who are currently arranging a Dial Up Connection for us in but they are also my (mike) preferred ISP because as a customer they have a plan which is brilliant and is a good service.
$34.95 P/M unlimited Download.420hours,10hr sessions* Regional $29.95 Metro and includes
50meg of web space.
www.tuscanblue.com They have quite freely arranged some webspace for storing of files
and we thank them for that service without them we would be unable to provide all the soundbytes.
www.newcastleprosound.com.au who have offered discounts to readers of Newcastle Scan and allowed some product reviews of new equipment. We have had dealings with peter for many years and in Newcastle there is no where else we can recommend for equipment.
Lawrence Security. Suppliers of quality security products and weapons
mlaws@kooee.com.au has supplied some embroided clothing to promote Newcastle Scan Locally and at emergency scenes.

free services
www.tripod.com
www.bravenet.com
www.webshots.com
www.yahoo.com
www.microsoft.com (media encoder software)

Currently there are 54 pages,we photographed more than 500 pictures, have more than 73 Soundbyte recordings published available on the web (66.8Megs worth) spent countless hours working on the site plus replying to email. SMSs, programming scanners via Messenger and ICQ and driving around to scenes and doing research.so if anyone would like to contribute all we are asking for is NOT CASH but sign our guest book out of 9800+ visitors only a few kind people bothered, How many? 112 out 9800, but we do get plenty of regular email asking questions etc. so im sorry if the pop ups annoy you but I think that's the cost to you for keeping it free for us.

Oh and heaps more to come. Suggest to us what you would like to see on the site and well see if it can be done.

To be put in the next few hours a police call sign allocation list, which is a state-wide list.
it will be added to the police page

Oh all this has been done in 10 months not a bad effort for a hobby

cheers
Mike
and Garry

PS If we did get paid for this life would be excellent.

I just purchased a used HP141T with plug-ins. Although it didn't have manuals, I was able to obtain some military technical manuals, but these seem more suited to maintenance than actual use. There is an operational section, but unclear, at least to me. I'd just like to get stated using the analyzer. Are there any places on the web with tutorials?

Thanks, in advance.

Norm

4413. Radio Remote Control

Newsgroup: rec.radio.amateur.misc

We have solution to control marine band radio in whatever distances.

One of our overseas project is suppling a VHF base station full duplex with DSC on transmit and receive and facilities to receive GMDSS signals. The remote controls of these radios need to control the radio from 600, 700, 4800 meter distances.

to obtain more information about our company look at our website on http://www.sedgewall.co.uk

I agree, the 'bending' is by diffraction and not refraction. I obviously wasn't thinking to well!

I confirm!
search for Agilent application note; you'll find all you need:

5965-7009E.pdf=Hint for making better spectrum analyzer measurements (AN1286-1)
5966-4008E.pdf=Spectrum analyzer measurements and noise (AN1303)
5968-3411E.pdf=Optimizing spectrum analyzer measurement speed (AN1318)
5968-3659E.pdf=Optimizing spectrum analyzer spectrum accuracy (AN1316)
5968-4545E.pdf=Optimizing RF and microwave spectrum analyzer dynamic range (AN1315)
hp-am-fm.pdf (may be I've renamed the file)=Spectrum analysis Amplitude and frequency modulation (AN150-1)
signal analysis AN243.pdf (") =The fundamentals of signal analysis (AN243)
SpectAnalysis-AN150.pdf (") =Spectrum analysis (AN150)
wireless_sabasics.pdf (" ")=Spectrum analysis basics

I suggest you (in order)
1)AN150
2)Spectrum analysis basics
3)AN1286-1

4423. An Invitation to CW Radiosport

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-01 18:51:00 UTC
From: K&#65533;HB <KAYZEROHANDSOMEBOY@ELECTRICSMOKE.NET>
Message-ID: <o2Aw9.1399$7n.136393@newsread1.prod.itd.earthlink.net>
Source record: 72416
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Following courtesy of N0AX, from the CQ-Contest reflector.

Some of you have expressed an interest in increasing your CW speed, and this is the weekend to do it. The annual ARRL CW Sweepstakes runs from 2100Z on Saturday to 0300Z Monday (Sunday evening) on 80 through 10 meters (not on 30, 17, or 12-meters). While you might recoil in horror at the high code speeds, tune wayyyyyyy up in the bands and there will be some folks going nice and slow. The Novice bands on 80, 40, 15, and 10 meters often have a number of slow-speed stations hanging out up there. Don't be afraid to jump in there and give 'em a call. I *guarantee* your code speed will double with just a few hours at the key.

Here's how it works...

1) You hear somebody calling "CQ SS CQ SS de N0AX"
2) Send your call ONCE - "W7VMI" - don't send their call and don't send yours twice or three times. If they don't copy your call on the first try, they'll send "AGN" or "?" or just CQ again. So call 'em again. If they're going too fast, send "QRS" and they'll slow down.
3) If they hear you, they'll send something like this - "W7VMI 107 A N0AX 53 CO" What the heck does that mean?
- W7VMI is your call to let you know they're talking to you
- 107 is the number of the contact in the contest for them (their next contact will be 108, etc.)
- A is their entry class (low power) - there are A, B, M, Q, S, and U classes
- Then they send their call
- 53 is the last two digits of the first year they were licensed - it's called a "check"
- CO means Colorado, their ARRL Section (there are 80 - some are states, others aren't, all are two or three letters)
4) If you don't get it all, it's perfectly OK to send "QRS PSE, AGN" - which means "Slow down, send it again, please"
5) If you do get it - way to go! Here's what you send...
- Their call
- The number this contact is in the contest for you - if it's your first send "1" and pat yourself on the back
- Your class (QRP is Q, <150W is A, >150W is B, M is multioperator, S is a school club, and U is unlimited...don't ask)
- Your call
- The last two digits of the first year you were licensed - if you got your license last year, it's "01", for example
- Your section, "WWA" for Western Washington, maybe, or "IL" for

Illinois, or "PQ" for Province Quebec - ah, but oui!
6) If they don't get it, they may say...with a question mark, maybe...
- "AGN" - send everything all over again
- "NR" - repeat just the number a couple of times
- "PREC" or just "PR" - repeat your class letter, it's called "precedence" for a number of reasons you don't care about
- "CALL" - repeat your call (this is rare)
- "CK" - repeat the two digits of the year, your check
- "SEC" or "QTH" - repeat your section
7) They may ask YOU to QRS, you speed demon, so do it with a smile!
8) If they copy everything, they'll say a short "TU" (for thanks) or "R" (for Roger) or "QSL" (for received OK) and then just send their CQ or maybe just their call and away you both may go.
9) Sometimes, it just doesn't work out - QRM (interference) or QRN (static) or QSB (fading) or the cat could cough up a hairball on the rug requiring immediate action. Don't take it personally, just go find somebody else to call. It's a no-fault deal.
10) If you get tired of "Searching and Pouncing", then tighten your belt, mop your brow, cock your hat at a jaunty angle and call CQ! It's easy - don't have a cow, man, just call "CQ SS CQ SS de W7VMI W7VMI" and listen, repeat if necessary. Soon you'll get an answer. Just play back the above steps with you as the call-ee.

What's the object? Make as many contacts as you can. Try to contact as many different sections as you can. Try to spell your name from the last letters of the calls you work. Work your home state. Work your brother's state. Nobody can stop at just one QSO...

It's a lot of fun - the hours will fly by. Keep a simple paper log the first time out to make it easy - you can worry about entering it on a computer later. There are complete rules and instructions for operating and scoring and sending in the log on the ARRL Web site http://www.arrl.org/contests/rules/2002/nov-sweeps-rules.html. Come spring of 2003, you can click on over to the contest results and wonder-of-wonders, there your call will be with the mighty titans in the very same font size just a few lines away. Woo-hoo!!

Go for it!

Source record: 72433

I'd like to know if any such combination exists that will allow me to capture scheduled FM radio broadcasts to MP3.

I'd like to listen to NPR shows later in off hours (not web). I bet scheduling won't be as brainless as Tivo is so I'd be certainly satisfied with traditional "time, duration and freq" programming.

Any guidance will be appreciated....

Ham Radio operators tend to be fat, in a greater percentage than the general population. One just has to attend a random Hamfest and this would confirm this.

I saw a survey on eham.com on fat Hams and I could not believe it.

Are you a FAT HAM? Calculate your BMI! (Body Mass Index) Divide your weight in Kilograms by your height in metres squared. eg. BMI 100/(1.8 x 1.8) = 30.86

The results will make you think...
Posted: Oct 30, 2002 (856 votes, 43 comments) by VK5LA
Survey Results
18.5 or less - Underweight 1% (12)
18.5 - 24.9 - Normal 33% (284)
25.0 - 29.9 - Overweight 25% (217)
30.0 - 39.9 - Obese 11% (92)
40 or Greater Extremely Obese 7% (56)
I hate surveys! 23% (195)

I suspect that many of those that hate surveys would be fat also. These results, along with visual observation, and one can conclude that a significant percentage of Hams are fat.

Being overweight makes one less capable for emergency communications (regardless of test scores) activities. Here's a quote. "What I find the most interesting going to various hamfests including Dayton. The amount of hams who can barely get around. And these are the operators who are going to save the world! "

Here's another quote from a licenced Ham. "Just judging from my observations at hamfests I think a higher than average number of hams are overweight. However, remember that the average ham is about 60 years gold and ham radio is a sedentary hobby anyway."

Ham Radio operators tend to be overweight. There is a logical reason for this. Lack of physical exercise and poor restraint in one's diet makes one overweight. Spending hours on contests,nets, CW, etc requires little physical activity. If one is in a hobby with little physical activity one tends to gain weight. So, "active" contesters tend to be inactive.

Here another quote. "I was amazed when I found out how big I'd become - 130kg! Most likely due to lots of sitting around operating and listening on the radio, so I did some research and was quite suprised that I will need to lose around 50 kilograms to get back to a normal weight. I haven't weighed that since high school! But I have gone on a diet and am now getting regular exersize (I'm

walking 4 km a day at the moment) If your not careful, Ham radio can be hazardous to you health! (apologies to the fit hams out there!) Cheers!"

4443. Care and feeding of gel cells?

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-03 17:48:12 UTC
From: Ken Knecht <kenk2@mindspring.com>
Message-ID: <Xns92BB6DE17BC78kenk2mindspringcom@198.99.146.10>
Source record: 72286

I bought three 12V 7A gel cells at a good price and will be saving them to replace some old batteries I use when they die. In the meantime I'm wondering if I should charge them every so often, leave them on trinkle charge (problem - lack of chargers), or probably best, just leave them alone. If ni-cads I'd charge them once a week or so but I don't know about gel cells.

Suggestions?

TIA

Ken W9NPP

And find nearly 20% of americans are obese
QUOTE:The 2000 national obesity average of 19.8 percent is up from 12 percent in 1991, according to a government survey. Twenty-two states had a rate last year of 20 percent or higher, while no state had a rate that high in 1991, the authors said in Wednesday's Journal of the American Medical Association.

According to the statistics you quoted only 18% of hams owned up to obesity -- less than the national average !!!!!!

So why would you single out Amateur Radio Operators ???

Besides what the hell difference does it make ???

Take your generalizations to rec.obese.overweight -- perhaps

Rod 6'1" 71 years old and 195 lbs.

This kind of uninformed post places a bad rap on Amateur Radio -- why do you want to do this ????

4446. need a spark gap transmitter for experiment

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-03 18:03:06 UTC
From: tagangchiou@yahoo.com.tw
Message-ID: <6a3d2a74.0211031003.2157b75e@posting.google.com>
Source record: 72289

I would like to buy a simple spark gap transmitter for a scientific project. I wonder if there is one that I can purchase? I am willing to pay for building it.

The requirement:
1. have a spark gap (and standard components like transformer, L, C, and probably an antenna. If possible, I want a small loop antenna for experiment)
2. simple (so that I can measure different characteristics by replacing the L and C).
3. basic safety (e.g. at least with a safety fuse).
4. portable (I need to carry it to other places for measurement.)
5. not very fragile (It will be shipped to Taiwan.)
6. can transmit longer than six feet.
If possible, I want to operate it under low power so that it will not interfere neighbors' utilities. (If necessary, I will operate in a Farady Cage to avoid violating FCC regulations.)

Does anyone know where to order it, or is willing to help make one for pay? Thank you very much!!

Ps. Please contact me at <dc at media . mit . edu> (convert at to @, and connect the others). Please do not contact me at tagangchoiu at yahoo.com.tw because it receives too many spam mail. Thanks.

Best regards,
David

RESCUE RADIO: CB HELPS SAVE HAM RADIO OPERATORS DAUGHTER’S LIFE

The daughter of a ham radio operator is alive after he to turns to C-B radio for help. It happened down-under in Australia as we hear from Q-News Graham Kemp, V-K-4-B-B:

--
Recently on holiday at Finley, S. NSW, Eric VK2TRD's daughter Tegan, 12, had a very narrow escape, after she was bitten twice by a Tiger Snake! After emergency treatment at Finley Hospital she was transferred by Ambulance to Shepparton, Vic.

Travelling to Shepparton Eric called five times on the 2m repeater seeking guidance to the Hospital, no response. Disgusted, he called on the UHF CB repeater and got instant help.

Over 6 days there, nothing was heard on the repeater but the ident., and that was when Eric fired it up. On 2m simplex, only 2 farmers using it as an intercom, no c/s's.

Tegan, that night suffered cardiac respiratory arrest and was in intensive care for two days. Now at home she is doing OK. A traumatic time for all.

For the Amateur Radio Nrewsline, I’M graham Kemp, VK4BB of Q-News Australia.
--

Once the ordeal was over, VK2TRD paused to thank all who helped in his daughters rescue. This included the Shepparton CB’ers for their immediate response.

**

RESTRUCTURING: IARU REGION I MEETS NOV 10

The International Amateur Radio Union Region 1 Conference is slated for the tiny nation of San Marino beginning on November 10th. And according to the W5YI Report's Fred Maia, it could be a rather hot meeting. The reason -- two words: Morse code.

Writing in the November 1st issue of his newsletter, Maia says that the subject of Morse proficiency testing among those serving on the High Frequency Committee is shaping up to be controversial. On one side are two giants. Germany's Deutscher Amateur Radio Club and the Union of Russian Radio Amateurs are two national societies who are already on record as opposing dropping Morse testing as an international requirement.

Leading the charge to eliminate manual telegraphy tests is the Radio Society of Great Britain. It says that Region 1 if the International Amateur Radio Union should formally endorse the October 2001 resolution of the IARU Administrative Council in respect to abolishing mandatory Morse exams.

Both the Deutscher Amateur Radio Club and the RSGB have submitted well crafted conference documents stating their respective positions. How this will all work out will be known at the close of the conference on November 15th.

**

RESTRUCTURING: IRELAND ADOPTS 5 WPM

Meantime, restructuring and slow code have come to Ireland. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the details:

--
According to Echo Ireland, that's the journal of the Irish Radio Transmitters Society, a set of new amateur radio regulations were signed into law by the Regulator in the Republic of Ireland on September 11th. The newws is just getting out and the main points of the new regulations governing ham radio are as follows.

First, the Morse code test speed has been reduced to 5 words per minute to bring it in line with whats become the defacto world wide standard. More important, that there is no longer any age restriction on a persoin getting an Irish ham radio license. This means that anyone -- any age in Ireland can brccome a ham. And up until now, there had been a probationary period of a year before a Full Licence could be issued. Now, thats gone too.

On the technical side, the maximum power permitted on each band is now listed in decibles per watt R-M-S at the output of the transmitter. This is good news because it effectively allows a power increase for Irish amateurs. The old regulations specified that limits were regarded as input power rather than measured at the R-F output jack.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ.
--

We will have more news from around the world later on in this weeks Amateur Radio Newsline report.

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Amador County Amateur Radio Club Net serving Pine Grove California.

(5 sec pause here)

**

ENFORCEMENT: YOU CANT USE THOSE RADIOS ON FIRE CHANNELS

Back on this side of the Atlantic, the FCC has told a fire department to stop using illegally modified ham radio gear. The FCC's Daryl Duckworth, NN0W, explains:

--
Duckworth: "The Enforcement Bureau has notified the Bon Secour Fire and Rescue Department in Alabama that the Amateur equipment they were using was contrary to Commission rules because it had been modified to operate on Public Safety frequencies. The letter referred to several Icom IC-V8 handie talkies."
--

The note went to Karl Bingert who is the Chief Bon Secour Fire & Rescue Department. It told him that the use of Amateur Radio units of any kind, modified to operate on its frequencies, is against the Commission's rules and would result in enforcement action by the FCC. (FCC, RAIN)

**

ENFORCEMENT: FCC BACKS REPEATER OWNERS BAN OF UNWANTED USER

The FCC is once again backing up a repeater operator who wants to ban a particular user from the system. Its all taking place in Ohio. Again, the FCC's Daryl Duckworth tells us about the situation and the agency's position in favor of the people running the machine:

--
Duckworth: "The Enforcement Bureau sent a Warning Notice to Billy R. Marshall, N8ORF, warning him to stay off of the W8HFF repeater system in the Toledo Ohio area. The Toledo Mobile Radio Association had issued two letters to Marshall requesting him to stay off the repeater due to his failure to follow operational rules.

The Enforcement Bureau reminded Marshall that control operators may take whatever steps are necessary to insure complience with the rules and that they will be backed up by the Commission"
--

Marshall was given 20 days from the date of receipt of the FCC letter to reply and outline what steps he has taken to comply. (FCC, RAIN)

**

ENFORCEMENT: PHONE COMPANIES FINED

Two companies have learned the expensive way that it does not pay to try to grab another telephone company’s customers. This, as the FCC issues two Notices of Apparent Liability proposing a total of $6,560,000 in fines against two operator service providers for taking advantage of consumers.

The companies named are Opticom Corporation and ASC. The FCC says that the massive fines are based on Opticom apparent sixty-four violations, and another eighteen apparent by ASC. The term apparent is the FCC’s way of alleging a violation has taken place. The Commission says that it calculated the proposed fines by using the $80,000 per violation amount previously used in cases involving egregious slamming. Take your browser over to http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-226534A1.doc to learn more. (FCC)

**

RESCUE RADIO: EMCOM SUSPENDS NATIONAL EMERGENCY ALERT NOTIFICATION SYSTEM

EMCOM -- the emergency alerting system has suspended its the National Emergency Alert Notification System operations effective October 25th. Our producer, Bill Pasternak, WA6ITF, has the nitty-gritty:

--
In making the announcement, EMCOM officials said that what they term as a stand-down also affects the Emergency Information Web Sites maintained by EMCOM for every state, county and municipality in the nation. Also impacted are over 1 million other web pages that reportedly utilized the automatically updated EMCOM Homeland Security Status Bar or the PubAlert notification bulletin pop-up system.

By way of background, for the first six months after the 9/11 tragedy, EMCOM offered to provide access to full use of the system to any community's emergency agencies for $500 per month. During that period there were no takers, even though EMCOM had notified almost every senator, representative, and agency in the nations capital.

So the bottom line is this: The EMCOM alert system is dead for now but hopefully not gone forever.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.
--

In making the announcement, EMCOM took the opportunity to express its gratitude to the hams, ARES and RACES operators who helped to get the system off the ground.

More about EMCOM is on the web at www.comdinet.com/emcom (EMCOM release)

**

RESCUE RADIO: SKYWARN RECOGNITION DAY

On a more positive note, Larry Boyd, KB4GFT says in an Internet posting that The 2002 SKYWARN Recognition Day will occur on Saturday December 7th. It will begin at 00:00 UTC and run for 24 hours.

SKYWARN Recognition Day was created in 1999 by the National Weather Service and the American Radio Relay League. It honors the contributions that volunteer SKYWARN radio operators make to the National Weather Service.

Last year 80 National Weather Service offices participated. The list of this years participants and other information is on the web at hamradio.noaa.gov (KB4GFT)

**

RADIO RULES: RULES REWRITE ON MEDIA CONSOLIDATION

The Federal Communications Commission has embarked on a major rewrite of rules that limit the consolidation of media companies. The overhaul, which FCC officials first announced in June, is likely to conclude by the middle of next year when the agency issues final rules.

Many observers expect the agency to relax the current media ownership restrictions, although FCC officials stressed during a recent meeting that they had not reached any conclusions. The FCC is seeking comment on whether it should keep or change six specific media consolidation rules, including bans on common ownership of a newspaper and television station or television and radio stations in the same media market, as well as a limit on the percentage of the national audience that any station may reach.

Many of the rules were written decades ago before cable and satellite-based television and the Internet. The proceeding is being conducted under a statute that requires the FCC to periodically review its rules to determine whether they remain in the public interest. (FCC)

**

COMMUNICATIONS LAW: JUDGE THROWS OUT PAY AS YOU CLICK CASE

Its a big court win for all of us. This as a federal court says no to a law suit that could have cost all of us a lot of dollars as we clicked our way across the World Wide Web. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has the details:

--

U.S. District Judge Colleen McMahon has rejected a claim by the B-T Group that it owns the patent on those single-click hyperlinks that make the Web what it is. It’s lawsuit accused Internet service provider Prodigy Communications Corp., of infringing on the B-T patent.

But Judge McMahon rejected the claim that each Web server on the Internet is a central computer and thus the Internet falls within the patent's scope. Her decision, filed in a White Plains, New York Federal Court concluded that no jury could find that Prodigy infringes on the B-T patent.

The B-T suit had been viewed as a test case that could have opened the door for the company to challenge other Internet service providers and demand licensing fees. These fees could have added a lot to the annual cost of anyone surfing the net.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.
--

With the potential of billions of dollars at stake, its not known if B-T Group will appeal the judges decision or re-file the case. (Published news reports)

**

HAM RADIO TRAINING: AMATEUR RADIO LICENSE GUIDE – THE PROGRAM

Stuart Cole, N5LBZed, tells us by e-mail about a computer program that he has just finished writing. Its called "Amateur Radio License Guide" and is a modern update of the DOS version that he brought out back in 1999.

According to Cole, the program is based on the official ham radio question pool, is divided into three sections and does cover training all classes of license. More information is in cybrspace at http://cableone.net/sacole/ (N5LBZ)

**

THE WORLD ABOVE 50 MHZ: WRITER ASKS YOUR HELP

Gene Zimmerman, W3ZZ, says over the VHF Reflector that his next World Above 50 MHz column in QST Magazine will include a discussion of VHF+ clubs and groups. This refers to weak signal groups that meet regularly, VHF groups that sponsor annual conferences like Central States VHF Society, contest groups and others interested in the non-repeater world of VHF and UHF communications.

Gene says that he has already mined a lot of data from Internet sites but I would like his information to be accurate and up to date. He has identified the PackRats; the Rochester VHF Group, the South East V-H-F Society and about a dozen others as falling into this category. He asks that anyone connected with these groups please contact him by e-mail to confirm the information he already has. He also wants a person or point of contact to send readers to if someone wishes to find out more information about how to particular group. Gene’s e-mail is w3zz@arrl.org. (VHF Reflector)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

EMERGING TECHNOLOGY: AM MODULATION IMPROVEMENT ANNOUNCED

A new modulation technique for AM broadcasting is being promoted by broadcast industry pioneer Mike Dorrough, KO6NM. Dorrough claims the Advanced Modulation System can increase carrier modulation to 200% while improving the performance, range and sound quality of Amplitude Modulated radio.

According to the CGC Communicator, KO6NM recently discussed the system at an SBE meeting in Sacramento and plans other presentations.

Ross du Clair, WA6VWY is the Chief Engineer for Clear Channel in Sacramento. He attended the Sacramento meeting and is quoted in Radio World On-Line as saying, "This is real and it does work."

As previously reported, Mike Dorrough was the recipient of the National Association of Broadcasters Radio Engineering Achievement Award in 2000. This, for his contributions to audio processing and signal monitoring. Details of the new Advanced Modulation System will appear in an upcoming issue of Radio World magazine. (CGC Communicator)

**

EMERGING TECHNOLOGY: PERSONAL LOCATORS FOR KIDS

In the wake of multiple child abductions, parents are turning to satellite-based locator bracelets to track their children. The bracelets carry transponders that will permit parents keeps tabs on their kids over via the Internet or by telephone.

Wherify Wireless plans to release its three-ounce G-P-S equipped Personal Locators next month. The device uses satellite and cellular technology and has a built-in numeric pager. It allows the wearer to contact an emergency law enforcement service in worst-case scenarios

Each unit costs 400 dollars and is accompanied by about 30 dollars in service fees. Experts on missing children warn such devices are not foolproof and could give parents a false sense of security. Still many parents are willing to try the locators a try. (Scienceonline)

**

RADIO IN SPACE: SOYUZ FLIES AGAIN

Some good news for the astro-ham team on board the International Space Station. The Soyuz rockets are flying again.

On Wednesday October 30th a manned Soyuz rocket with three cosmonauts on board blasted off from Russia's Baikonur cosmodrome bound for I-S-S. The Soyuz-TMA booster rocket lifted as planned at 03:11 GMT with no reported malfunction on its way to orbit.

As reported last week, the launch of this Soyuz was delayed after the fatal crash of a similar design unmanned cargo rocket October 15th. During this Soyuz 12-day mission, the Russian and Belgian crew will replace a rescue capsule docked at the ISS. (Published reports)

**

CONVENTIONS/HAMFESTS/CONFERENCES: MARTLESHAM MICROWAVE IN NOVEMBER

Turning to the ham radio conference scene, work that the Martlesham Microwave Round Table 2002 will be held this year at Adastral Park, Martlesham Heath, England. The dates are Saturday the 9th and Sunday the 10th of November.

Highlights include a visit to the Royal Air Force's Defense Radar Museum at R-A-F in Neatishead and an evening dinner in Ipswich. All of this plus the usual flea market, lectures and the UK Microwave Group Annual General Meeting. For ore information e-mail g3xdy@btinternet.com (GB2RS)

**

CONVENTIONS/HAMFESTS/CONFERENCES: EUROPEAN RADIO SYMPOSIYUM IN BARCELONA

The 2002 European Radio Symposium is slated for November 13th in Barcelona, Spain. Convergence, digitization and electronic audience measurement will be key topics tackled in this symposium. Speakers include David Rogerson of Strategic Media Solutions. (Media Network)

**

CONVENTIONS/HAMFESTS/CONFERENCES: BIG TURNOUT FOR ARRL/TAPR DCC

According to a recent ARRL Letter over a hundred the worlds most active Amateur Radio digital enthusiasts turned up in Denver, Colorado, September 13th to the 15. This, for the 2002 joint ARRL and TAPR Digital Communications Conference.

This marked the 21st such Digital Communications Conference held. The agenda ranged from Automatic Position Reporting System topics to high-speed digital networking and software-defined radio. All agree it was well worth the trouble of traveling to the mile-high city to attend. (ARRL)

**

DX

In D-X, word that 3D2AG, will be working on Rapa Island through the 28th of November. He plans to operate as FO5RK on CW and SSB. This, during his late afternoon, nighttime and early morning hours. Rapa is part of the Austral Island group. (RSGB)

And SMZ0WKA is in Cuba until the 10th of November and is active as T48W. Look for him on 160 through to 6 meters, with an emphasis on the lower bands. QSL this one as directed on the air. (RSGB)

**

THAT FINAL ITEM: W6XYZ/KTLA AT 60

And finally this week, one of the nations pioneering television stations is in the midst of celebrating its 60th anniversary. That station is KTLA television in Los Angeles. And almost from its inception, ham radio has played a role in its success. Roy Neal, K6DUE, takes a look at KTLA and some of the hams who helped it to make history:

--
DATELINE "HOLLYWOOD." ON A HIGH AND WINDY HILL, OVERLOOKING THE FAMOUS DISTRICT OF LOS ANGELES, IN GIANT BLOCK LETTERS, THERES A SIGN THAT READS HOLLYWOOD. AT THE TOP OF THE HILL, THERE'S ALSO A RADIO TOWER WITH A HISTORY. THAT'S THE SITE OF THE FIRST TELEVISION STATION WEST OF THE

MISSISSIPPI.

IT WENT ON THE AIR IN SEPTEMBER OF 1942 AS W6XYZ, AN XPERIMENTAL TELEVISION STATION WITH STUDIOS ON THE PARAMOUNT FILM LOT. IN OCTOBER OF 1942. THE STATION EVEN BROADCAST INSIDE A MOTION PICTURE STUDIO, FEATURING THE MOVIE "THIS GUN FOR HIRE."

BY 1946, W6XYZ WAS GONE, REPLACED BY THE CALL KTLA. THE GUIDING GENIUS BEHIND THE STATION WAS KLAUS LANDSBERG, WHO CAME TO THE UNITED STATES AFTER ESCAPING FROM NAZI GERMANY. IN THE LANDSBERG BOOK, NOTHING WAS IMPOSSIBLE. SO KTLA RACKED UP AN IMPRESSIVE LIST OF FIRSTS WHILE PIONEERING TELEVISION.

ON THE FIRST OF JANUARY, 1946, THEY BROADCAST THE TOURNAMENT OF ROSES PARADE…LIVE. IN 1955, KTLA BECAME THE FIRST LOS ANGELES STATION TO BROADCAST THE PARADE IN COLOR.

IN MAY OF 1952, LANDSBERG DROPPED RELAY STATIONS ON MOUNTAIN TOPS TO BEAM AN ATOMIC BOMB TEST FROM NEVADA TO LOS ANGELES. HE CALLED IT OPERATION BIG SHOT.

AND IN MAY OF 1958, BUYING EQUIPMENT FROM NBC, KTLA WENT ON THE AIR WITH ITS TELECOPTER…A HELICOPTER EQUIPPED TO COVER LOS ANGELES FROM THE AIR!

ONE OF THE MOST POPULAR SHOWS LANDSBERG PRODUCED WAS LAWRENCE WELK, A PROGRAM THAT STILL EXISTS IN SYNDICATION.

MANY OF THE STATION'S ENGINEERING STAFF WERE RADIO AMATEURS. FOR EXAMPLE, THE INVENTOR OF THE HAM RADIO REPEATER, THE LATE ART GENTRY, W6MEP. THIS REPORTER REMEMBERS MANY FUN TIMES WHILE TALKING WITH THE AVUNCULAR MR. GENTRY FROM THE REPEATER SITE ONCE OCCUPIED BY W6XYZ.

IN 1964, FILM AND TV STAR GENE AUTRY BOUGHT THE STATION AND AMONG THE ENGINEERS HE BROUGHT IN WAS LOYD SIGMON, W6LQ. "SIG" IS PROBABLY BEST KNOWN AS THE FATHER OF THE SIGALERT TRAFFIC MONITORING AND PUBLIC ADVISORY SYSTEM.

W6LQ AND W6MEP WERE TWO OF THE BETTER KNOWN HAMS WHO HELPED KTLA AS THE STATION PIONEERED EARLY DAY TELEVISION UNDER THE GUIDING AEGIS OF KLAUS LANDSBERG.

FOR THE AMATEUR RADIO NEWSLINE, ROY NEAL, K6DUE
--

KTLA is owned these days by Tribune Broadcasting and is part of the Warner Brothers -- or W-B Television Network. More important, its history is one rich in break-through technology and innovation. Its a pioneering station that made television happen. You can read more about it in cyberspace at the website you will find in this weeks amateur Radio Newsline report.

More on the fascinating history of W6ZYZ and KTLA is in cyberspace at http://ktla.trb.com/about/station/ktla-about-history1.htmlstory (Tnx K6DUE, CGC Communicator, others)

Hi

I am in the middle of writing a novel - part of which is set in Scotland (Glasgow).

For realism, I am looking for translation of police radio callsign language - can you help me? I have the English - can you provide the police radio equivalent.

Basically this is the English narrative of what I hope can be translated into police radio callsign language as much as possible.

HQ: police car number We have a disturbance in Nelson Mandela Square. Can you assist?

Police Car: Yes

HQ: Two girls, under influence of alcohol, aged approximately 16. Suspect persons walking in Buchanan Street direction. One is wearing a Wimpey Hat.

Police Car: Can you confirm. One suspect is weating a Wimpey Hat?

HQ: Yes that is correct. Witness suggests earlier Indecency on Queen Street.

Police Car: Okay. We are on our way. Estimated time of arrival 2 minutes.

I am keen to get this sounding exactly as the police would say it.

Any help you can give me on this would be very much appreciated. Also - if you think alternative narrative is more appropriate then please feel free!

Thanks in advance for any help or suggestions.
AP

Yessir! Old Bob is at it again. Sitting on 14.313 lying through his false
teeth as usual. You gotta feel sorry for the old guy. He doesn't have much
to do with his time except watch his buddies die off. If he has any.
I feel sorry for the old dude. He must be miserable.

All I know from listening to police broadcasts when it was possible to do
so on FM is that the call sign related to the Divison that the car/officer
is attached to followed by a number relating to the car or officer.
Incidents themselves are all given a code to avoid saying exactly what the
incident is . Other than that I can't help.
Stuart

How about...

HQ: Haw Shuggy! There's a rammy in Nelson Mandela Square. Gonnae sort it?

Plice Car: Awrite.

HQ: Couple a slappers, pissed and auld enough. Coming doon Buchanan Street.
Wan ay them is wearin a bunnet.

Police Car: Gonnae say that again? A bunnet?

HQ: Aye, a fuckin bunnet! Thats the wan that flashed her tits.

Police Car: Fuck! whi did ye no say that earlier fur? Be there in 2 minutes...

and so on. :o)

Dear ARRL members and Nickel extra's,

I'm running for a position on the ARRL Board of Directors.
I've been a ham since 1987 and an extra class since
1989. I've always worked and wanted what is best for amateur
radio, but now I see the light. If you elect me to the ARRL Board of
Directors, I promise I'll voluntarily stick my head up my ass like all
previous and current ARRL Board members have done since 1997, and I promise to
work with my colleagues on the Board in their continuing efforts
to further dumb down amateur radio.

Thanks for your support

Ray Deo

==========
===
I REPLIED
Go to URL:
http://www.adrenalineadventures.net/news/330.html
And find nearly 20% of americans are obese
QUOTE:The 2000 national obesity average of 19.8 percent is up from 12
percent in 1991, according to a government survey. Twenty-two states had a
rate last year of 20 percent or higher, while no state had a rate that high
in 1991, the authors said in Wednesday's Journal of the American Medical
Association.

According to the statistics you quoted only 18% of hams owned up to
obesity -- less than the national average !!!!!!

So why would you single out Amateur Radio Operators ???

Besides what the hell difference does it make ???

Take your generalizations to rec.obese.overweight -- perhaps

Rod 6'1" 71 years old and 195 lbs.

This kind of uninformed post places a bad rap on Amateur Radio -- why do you
want to do this ????
-
I Doubt, Therefore I Might Be
73 From AC6V, Rod In Oceanside, CA
http://ac6v.com
==========
THEN SOMEONE CHOPPED IT UP SO APPEARS I MADE THE FIRST POST --
I Only informed him that about 20% of the population is classified obese and
his stats showed hams about the same or a little less.

When I noticed this,
I was rather non-plussed.

We really need to improve things in amateur radio folks. This little girl could very well have died had the "other" service not been available there (and this can happen anywhere). It truely is a black eye for amateur radio when a ham has to depend on a class D service because no one was interested enough to at least monitor a 2 meter repeater in a remote location!!!

I happen to live in phoenix arizona (a major metropolitian location in the southwestern US) and I have had timed where priority traffic needed to be passed and no one would deign to even appear on the repeater to offer assistance! If this is the way ham radio is headed, I may decide to sell off my gear, contact the FCC and return my ticket and go strictly class D and cell phone use from here on out (I am reluctant to do this as you will see why below).

Its time to wake up and smell the coffee. if you haven't yet, better wonder why some of the public service events we USED to work are now being handled "in house". its because they can't find the voluteers anymore. However, this was not the case this last weekend with the MS 150 Bike event in arizona. There, at least, we had a hard working cadre of hams (and non-hams) that were willing to help out, especially when 4 accidents during the course of the day on saturday (2 of which required air evac service!). Without ham radio, there is the very possibility that things could have been much worse! This is why, even with all the other stuff going on, that I am reluctant to give up on ham radio (it is tempting, but too many places and people still need us).

so just remember, the next time you are out of cell phone range, and your old cb-radio isn't in the car anymore and you need emergency assistance. you better hope someone is paying attention.

A similar thing happened to me with CB and Ham radio, although not an emergency. My van broke down in the middle of Dartmoor in Devon, UK which is the middle of nowhere. My cellphone didnt work in that area. So I called on the local 2 meter repeater for about an hour, and not one voice was heard. I then remembered that I still had a CB handheld in the back of the van. I then got calling on channel 19, and within 5 minutes someone came back to me. He was able phone the breakdown company so that they could come and tow me.
This was during the middle of the day, when people would be listening to the repeater. So much for Ham radio!

If the only reason your into ham radio is public service events then perhaps you should get out of ham radio.

How many licensed hams are there within range of your 'machine' in the middle of the day? How many are not working and would be available for monitoring the repeater?

How many CBers are there in the same circle. Need I continue? OK I will anyway. There are lots and lots more CBers than hams...why? They don't have to take a test. Hams have to at least put out some effort.

And apparantly it also means most CBers are unemployeed.

There generally is activity on the repeater during the day. But not on the
day I needed it :-(. I did also call on S20 the UK 2 meter calling channel.

> How many CBers are there in the same circle. Need I continue? OK I will

Yes agreed. This incident happened 7 years ago when there were a lot more
CBers, in this country.

Hi
There is a Scottish Scanner Group on Yahoo. I would suggest you look on that
and you should find some people who will be able to help you out.

regards
John

Not to sound too 'matter of fact', you can just go down to London Rd Police station or similar and tell them your writing a novel and that if they have time could they help you, or allow you to shadow HQ.

I've worked with London Rd on many occasions and they are pretty helpfull and if anyone knows their radio patter its them.

No, much as we wish it were true AMP is still out and about hiding from his creditors. Poor dude is pissed cuz his radios are causing his slum neighbors problems. Leeve it to AMP to not know how to ground his radios, but CBers are like that. the dude cant get any big wires up to brag about his navy days so he has to make do with cheap stuff. aint it nice to hear him not able to git over the noise level? the bandz are a lot beter without him now

With a little help from the group, I was able to figure it out. The operation is a lot less complicated than I thought. I re-read the manuals and everything was clearer. This is one nice unit! I'm able to see all kinds of signal phenomena with it.

Any way you cut it there is no really good reason to join the ARRL. Perhaps
this is why 75% of licensed Hams steer clear of the ARRL. Ask yourself what
you gain versus what you spend.
The ARRL is to blame. They offer nothing save for a magazine and a logo.
Gee...why bother? Why waste the money?
I certainly do not need the ARRL....do you?

I canceled my membership after reading the Leagues proposal, and canceled
my VE Certification when restructuring took effect. After a year went by
I got re-accredited again and have been giving radio exams again. The
local VE team said they were glad to have me back. But I won't join the
ARRL again until they decide to wake up and do something to improve
amateur radio. I know the ARRL won't work to improve things though
because it would hurt the corporate back account. The ARRL won't be
happy until there is a free ham license in every Cracker Jack box along
with a flyer for ARRL memebership.

The ARRL has done many things over the last 40 years that I disagree with.
And they have done a lot that I do agree with. You can say the exact same
thing of a political party. Or the local Sheriff office.

All you folks that keep badmouthing the ARRL just remember one
thing......without the ARRL we would NOT EVEN HAVE Amateur Radio. Spend
some bux and read "200 meters and down" Get an education.

Back in the old days it was a good thing, but starting with the incentive liscensing, the ARRL has done more to screw up ham radio than help it. The CW requirement turned off a ton of people, including myself. I did pass the 5WPM almost 30 years ago, but working CW was/is something I never wanted to do. I tried several times to get to 13WPM, but I get to about 8WPM, and I couldn't take it anymore, it annoys the crap out of me, regardless of what pitch I listen to it at. I never understood the CW fanatics anyway, I had no objections to making the written test harder, but they didn't seem to understand what a turn off it is to some people, and they managed to keep the higher speed requirement until it's probably too late to generate any real increase in new hams. The internet is a much bigger draw to most kids than radio..

Now that I can upgrade without any more code, I have lost most of the desire to do so. I haven't even keyed up an HT in about a year or so...

Dan,
your assertion that most cd'ers are unemployed smacks of gross ignorance.

I wonder just how many of them are working at the time while gabbing on
their CB's. Having been a cb radio operator myself before I became a ham,
I can tell you that a very large number are employed and drive around
town/across country and talk on the radio as a means of passing the time,
gaining information on local traffic conditions, etc.

Where do you get off implying that most cb'ers are unemployed?

I guess its another case of shooting off at the mouth before placing
brain in gear, eh?

Gee dan,
what makes you such a "super ham" that you have to tell me this?
Raising a little heat and discontent?

No, I originally got into ham radio for a lot more than public service events. Most of my friends moved there (and sadly, most of them are now dead). Hell, I am still a young pup by comparison to those old timers (elmers I believe they care called) and I have great respect for them. You, sir, don't rate that respect (as your posting history here and your on-the-air antics would would suggest you aren't worthy).

Before you go casting stones, dude, you'd better make sure your house isn't made of glass first (and yours appears to be quite glassy atm).

in any case, I'll take your comment with a grain of salt (A 200 pound grain that is).

Sometimes when I'm in a McDonalds about rush hour, and all the french
fry and microwave oven and cash register beepers going off at the same
time, I feel like I'm back with my code tapes and breaking pencil
leads.

Talk about anxiety.

It seemed like the code tapes were at exactly the right pitch to drive me
up the wall almost instantly. If I can drop it down to about 150hz or
so, it's ok for a few minutes, but at 800, it's like nails on a
chalkboard!! It's funny, but the nails on a chalkboard never bothered me
until I hit 40, now it kills me..

I took the 5WPM almost 30 years ago, I'm done with CW, period. I wanted to get the general just to shoot the breeze with my friend down south a couple of times a week. I still might get it, the written is a nonsense test anyway. Some of the questions are insane. As far as any excuse being a good one, as far as CW is concerned, yeah. I resented having it shoved down my throat, kind of like having a religion shoved down my throat when I dont want it. For some hams, CW is a religion. Why, I don't have a clue. I was heavy into RTTY decoding for a while, and I didn't think learning all about it should have been manditory, like the CW fanatics do with it.

I've never seen/heard a test where they could do anything to change the pitch anyway, it seems like it's 800-1K and that's it. It's on a PC, or it's on tape. Not to mention the goofy spacing they used when a friend of mine took the thing about 10 years ago. It was kind of funny, it was like someone just randomly keying dots and dashes. The look on the guys faces that were taking the test was great. Nobody passed, but they went and got another tape and all but two passed on that one. My friend was one of the two, he was rattled by the first tape, and couldn't get calmed down enough to pass. What a waste of 5 hours of standing around!

Bet that old Kalifornia Bob is filling his adult diapers every hour on the hour. I wonder if he cried when he read the election results this morning? Old Doom and Gloom will be crying and moaning about this for the next two years.
Hey, Bob! There's always Canada!

Social phobia, also called The Wiseman Syndrome, is a disorder characterized by overwhelming anxiety and excessive self-consciousness in everyday social situations. People with social phobia have a persistent, intense, and chronic fear of being watched and judged by others and of being embarrassed or humiliated by their own actions. Their fear may be so severe that it interferes with work or school - and other ordinary activities. While many people with social phobia recognize that their fear of being around people may be excessive or unreasonable, they are unable to overcome it. They often worry for days or weeks in advance of a dreaded situation.
Social phobia can be limited to only one type of situation - such as a fear of speaking in formal or informal situations, or eating or drinking in front of others - or, in its most severe form, may be so broad that a person experiences symptoms almost anytime they are around other people. Social phobia can be very debilitating - it may even keep people from going to work or school on some days. Many people with this illness have a hard time making and keeping friends.

Physical symptoms often accompany the intense anxiety of social phobia and include blushing, profuse sweating, trembling, hiding at home, and other symptoms of anxiety, including difficulty talking and nausea or other stomach discomfort. These visible symptoms heighten the fear of disapproval and the symptoms themselves can become an additional focus of fear.

4510. CW WHINERS SHUT THE HELL UP !!!

Whine whine whine....all we hear is whine whine whine. You people have it made. All you have to do is memorize 25 letters of Morse Code. Wait around till your good buddy at the club decides its time to give a test. And you go down to your local club and take it.

How would you like to have to save money for a YEAR. Get a train ticket and travel 110 miles to a strange city. Spend the evening and get up at 5 am to get to the Federal Building downtown Pittsburgh PA. Wait in line while they process 300 applications. Sit in a room so large you can almost see the other end of it from the rear. Take the CW test as it is echoing all over the room. Oh BTW I was 13 at the time and my mother had to come with me because I was too young to ride the train alone. One more thing...that was the General at 13 wpm. HARD COPY for one solid minute out of 5minutes. Then you had to send by using a STRAIGHT KEY at 13 wpm.

I don't want to hear it.

Dan, air-photo and satellite interp, and digital image processing in
no way reminds me of beeping french fryers at McDonalds. How odd to
think it would.

But if theat's what you think is important for amateur radio, you just
keep thinking that.

4530. Veteran's Day/General LeMay's Birthday Special Event

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-07 22:52:15 UTC
From: "Paul W. Schleck" <pschleck@novia.net>
Message-ID: <3dcaee0a$0$204$45beb828@newscene.com>
Source record: 72273
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx

To recognize Veterans Day and General Curtis E. LeMay's birthday this year, the Strategic Air Command Memorial Amateur Radio Club (SACMARC) will be operating K0GRL on November 11th, 2002 from 1200 hours to 2400 hours Zulu (UTC). The station will operate in the General phone bands on or near to the following frequencies ending in 47 (for 1947 when the Air Force became a single entity) 3.947, 7.247, 14.247, 21.347, & 28.347, whichever band seems to be open best to most locations. Also look for us on 51.47MHZ. We will also be on 146.46 simplex for local folks. You should also listen to the 3905 Century Club WAS Net in the evening.

Originally assigned by the Federal Communications Commission (FCC) sometime during the Cold War, K0GRL was the personal amateur radio callsign of General Curtis E. LeMay when he was the Strategic Air Command, Commander, (CINCSAC) and assigned to Offutt Air Force Base. (Offutt, near Omaha Nebraska, was the Headquarters base for the former Strategic Air Command or SAC, 1946-1992, now reorganized into a unified command called USSTRATCOM) and was used by him until the late 1950's. The General received K4FRA when he went to Washington, D.C., to be the USAF Vice Chief of Staff (later Chief of Staff), and retired in California with W6EZV. The original Nebraska callsign, K0GRL, had long since lapsed and was unassignable under FCC rules for several decades. Recent changes in FCC rules, including the adoption of a Vanity Callsign Program, offered the opportunity for SAC veterans, and other members of the local amateur radio community, to recover that callsign in memory of SAC and military communications history. With the gracious consent of the LeMay family, including the General's daughter, Mrs. Jane LeMay Lodge, K0GRL was taken down from history's attic, dusted off, and returned to active use in May of 1997.

To receive a K0GRL QSL card (after contact, of course), Please visit the SACMARC web site at:

http://www.sacmarc.org

Contact information and mailing address are listed there also. Please include an SASE with your QSL card. K0GRL is also good in the current call book and on:

http://www.qrz.com

If you put a diode in the mic line, all you would get is a halfwave
rectified voice signal, sounding very distorted. You would still have the
full FM carrier aswell.

I thought that site was in high speed ssb fm cw, which used a bridge
rectifier and a resistor in the speaker + line to give you the usb fm signal
of the lsb cw tone from the am bandpass filter???? ;-)

You have to use a 'slope detector'. Unfortunatly most of the good ones were killed off.

We use a 'descriminator' here in the Americas. Perhaps that is why my
'slope detector' didn't work well.

Military Thanks!

If you are so inclined, visit the Department of Defense web page below and sign a brief message thanking the men and women of the U.S. military services for defending our freedom. The compiled list of names will be sent out to our soldiers at the end of the month. So far, there are only about 1,206,647 names. What a shame. National Military Appreciation Month (please pass it on to your email friends)

Received this a few years ago as part of a lot of military equipment. Now I am a ham and have a different perspective on this previously-useless item...

All parts appear to be flat-finished metal except for possibly wooden knob on keyer and black plastic "housing" for contacts. Baseplate measures about 2 x 4 inches, has for holes for mounting. Bottom is stamped with reddish-colored "US" with an anchor (I am assuming this designated USN). Top has white markign embedded in it: CMI-26003A. This is the only distincting marking except for the "US" on the bottom.
Any help in IDing this appreciated.

You didn't feel that way when you were over there Dan. You loved it when the gals told you "You numba one GI!. Me so hony, Joe, me so hony. Me love you long time, Joe."
Back then your 'slope detector' was used to find them. Did any of them know cw?
"Damn, GI. All time want boom boom. How come you nevah take me to movie?"

Has Kalifornia Bob gotten over his bitch session yet? Listen to the ousted Democrats on 14.313 in the mornings....poor old Bob is absolutely beside himself with angst! Bob and his old cohorts are taking whining to a new level...listen to him...he sounds like a malcontent with no place to go! Old Bob never seems to have anything positive to offer. If you tell Bob it is a sunny day he will grouse because George Bush is president. If Bob gets a senior citizen discount it will not be enough because G. W. is President. If it rains, Old Bob will blame it on President Bush. If the sun comes out and it becomes too warm, Old
Bob will blame the air conditioning costs on President Bush, too.
Poor old Bob seems to live under a dark cloud...he must be miserable. I bet that Old Bob has not smiled about anything since the Civil War....
(of course Old Bob never denigrated Slick Willie...getting blow jobs at taxpayers' expense is part of the Democrat game)
Bob...word of advice. Stop acting like a stupid child.

To whom it may belong,

I am looking for a possebility to transver data from own PC to an
other via a one-way soundcard to soundcard cable.

mt63 provides this capeability bit is _very_ slow.

I know my question might be a bit off topic but I am that desperated...

Thanks for any ideas,

Ralph Odigio

Truckers.
Other delivery drivers.
Taxi drivers.
"Field" workers, who drive between bookings.
"Home workers", who can listen to what they like while working.

Then there are those who may use CB for their work, Truck stops,
CB shops, some taxis use CBs for contact between cars and base, etc.

Also, we must not forget that there are many people who work
nights... plus Milkmen and Postmen who work early mornings, so
can have the rest of the day free.

Yes, he was making assumptions, without stopping to think about it.

What an odd question. Why not transfer it with a floppy disk or, better
still, using one of the many ports that most PCs have...

Any truly knowledgeable person knows that a president does not make or break
our economy. The Dems have been chanting that old mantra for years and it is
as untrue today as it was then. The economy was going sour during the last
two years of Clinton's reign and there is evidence that his lap dogs lied to
us even about that.
If I didn't know better I'd almost think that your comments were meant to

be humorous simply because no person with an I.Q. warmer than room temperature would really believe what you just said.

Wellllll.....he helped the cigar industry, didn't he? The Communist Chinese sure liked him, too. He was the best president the Chinese ever had and they showed their appreciation by giving Clinton lots and lots and lots of money. They probably heard that story about Clinton burning the American flag at an anti-american protest during his college years while he was draft-dodging and figgered he was their kinda guy. Yup, they sure like old Bill don't they?

4574. Lloyd Davies in trouble once again

Newsgroup: rec.radio.amateur.misc

I have an affidavit from Herb about Mr. Davies.

It would appear that Lloyd is up to his perverted tricks once again.

Here is an excerpt from Herb's statement:
.....
Lloyd tried to slip me a date rape pill in my drink last week when he was down here pleading with me to be reinstated in the B.A.R.F.

I was just about to doze off and caught Lloyd out of the corner of my eye. He was naked and had the littlest pee pee I have ever seen. He was frothing at the lips and babbling something about who's your daddy.

Herb KV4FZ

I am not too far from Ken and have another such Telrex. It is on the ground, assembled, and on saw-horses. The rear two elements do not have traps. They are 20 meter and 15 meter reflectors. Those two elements broke in the middle (in a LOT of wind). I have the pieces. If you buy Ken's antennas, consider buying my antenna too. You could then have two working antennas and a lot of high quality parts. (Or three antennas, one without 15 meters)
The beam is a real good performer. I worked a lot of DX with it.

Dan says lots of bad stuff and it looked like him instead of TEW but
I am a big man and will amdit when I am wrong. so I forgive dan for
making me think bad stuff about him even tho he usualy deserves it.

anyone who sends out the bugbear worm in emails makes me loose my
cool at them. sorry.

Amateur Radio Newsline™ Report 1317 – November 8, 2002

Amateur Radio Newsline report number 1317 with a release date of hFriday, November 8, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Some good numbers for ham radio here and across the seas. The hobby is growing once again. Find out the details on Amateur Radio Newsline report number 1317 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: GOOD NUMBERS IN THE USA

The numbers are in and they speak for themselves. Restructuring is finally having a very positive impact on ham radio growth here in the United States. Amateur Radio Newsline's David Black, KB4KCH, has the good word:

--
Last year at this time there were nearly 683,000 hams licensed by the FCC. As of October this year, there are 2235 fewer--but numbers are not always what they seem. The reality is that ham radio in the United States is growing once again.

First, the General and Extra class have increased substantially since the 13 and 20 word per minute Morse code exams were eliminated April 15th of 2000. In fact, the number of people holding these licenses has increased by well over 25,000 for each license class. And that's great news for ham radio equipment suppliers since they rely on higher dollar high frequency transceiver sales for much of their yearly income.

The Technician class is holding its own, too. The number of new Tech license holders is keeping pace with the number of hams either upgrading or dropping out of amateur radio. The net change is close to zero.

Only the Novice and Advanced classes are seeing significant drops in numbers. No new Novice or Advanced class tickets have been issued since April, 2000. And while existing licenses can be modified and renewed, it appears as if that's just not happening among Novices. They appear to be fading away, and quickly -- there were 65-thousand Novices in 1997 -- only about 37-thousand, though, today.

The bottom line is that for the last 12 months ham radio has seen an average of 16-hundred brand new ham licenses issued each month. That's an improvement of 160 a month over the previous year. And that improvement is very good news for ham radio.

As to the state with the largest number of hams? It's still California which can now claim being home to more than one seventh of all the nations hams. Latest figures show there are more than 100,000 hams now living in California.

The state with the fewest hams? North Dakota -- only 1575 hams there.

Reporting from the Amateur Radio Newsline's South-East Bureau in Birmingham, Alabama, I'm David Black, KB4KCH.
--

The bottom line is this. Restructuring seems to be doing the job it was intended to do. Its now up to those in the hobby to work to swell its ranks even more. (W5YI)

**

RESTRUCTURING: 5000TH UK FOUNDATION LICENSE CELEBRATED

The United States is not the only place where ham radio is growing. In the United Kingdom Andrew Finch, M3FMA, is only 11 years old and suffers from dyslexia. But nothing was going to keep the young scout from becoming a ham. And now he is the 5000th person to obtain that nations new and very popular Foundation Class license. Jeramy Boot, G4NJH, has more:

--
The Radiocommunications Agency has been so pleased with the numbers taking up the license, that it decided to commemorate the 5000th amateur with a special award. Alan Betts of the Agency's Amateur Radio section, commented: "The radio amateur community was around 50,000 strong before the new license was introduced, and so this level of interest is very welcome".

He also added "The License has proved very popular with young people and amateur radio is very much an up-and-coming hobby for them".

The presentation of Andrew's prize took place at a ceremony held at the Radiocommunications Agency's monitoring station in Baldock, Hertfordshire on Tuesday the 22nd of October. Andrew was also presented with membership of the Radio Society of Great Britain by its President, Bob Whelan, G3PJT, who also presented a host of radio amateur goodies and books.

Andrew's day was not over after the ceremony - he was given a tour of the Radiocommunications Agency monitoring station at Baldock. 'Heartbeat FM' from Hertfordshire then conducted an interview with him before he was whisked off for another interview with 'Dream FM' of Chelmsford.

Jeramy Boot, G4NJH.
--

Andrew had told his parents that he was going to begin saving his pocket money to buy a radio. He won’t have to do that. Among the gifts he received for becoming the 5000th Foundation license holder was a brand new F-T 817 transceiver donated by Yaesu. The Foundation License has only been available to U-K residents since earlier this year. (GB2RS)

**

EMERGING TECHNOLOGY: HAM RADIO INVITED TO DIGI RADIO EXPERIMENT

Ham radio has been asked to be a part of an important digital radio experiment. Bill Pasternak, WA6ITF, has the details:

--
Digital Radio Mondiale, or DRM, is a project aimed to revitalize the short-wave, medium-wave and long-wave AM radio broadcast bands. This, by using digital signals to provide near-FM quality.

Radio amateurs and serious broadcast-band listeners have been invited to become part of the DRM Software Radio Project. They may also be among the first to access the initial DRM programs when test transmissions begin next month.

James Briggs is the DRM Projects Co-ordinator with Merlin Communications in Dorset England. Biggs says that the project relies on adding an extra down-converter board to existing receivers and then using software to decode the signal via a PC soundcard.

The interface is simple and the sound -- hopefully -- will be superb.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.
--

To find out how you can play a part in the DRM experiment take your web browser to www.drmrx.org (Media Network)

**

RADIO LAW: CONGRESS AND CCR'S

Some good news and some bad news in the drive by the ARRL to get Congress to ban deed restrictions on hams who want to put up towers and antennas. The good news is that several more members of both houses have signed on as co-sponsors in recent weeks. The bad news is that no action took place on the issue before Congress adjourned for elections and there's little chance of any action once it returns to close out the year. The bottom line: The ARRL says that it will try again when Congress reconvenes in January of 2003. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K5TYR Repeater serving Tyler Texas.

(5 sec pause here)

**

ENFORCEMENT: FCC PROBES JAMMING OF THE HURRICANE WATCH NET

The FCC is asking a Morrison Colorado ham to explain why he allegedly interfered with an onging hurricane emergency net. The FCC's Daryl Duckworth, NN0W, tells us about the case:

--
Duckworth: “The Enforcement Bureau opened an inquiry into allegations that Merle W. Garbe, W0SBE, of Morrison Colorado interfered with the Hurricane Watch Net on 14.325 MHz on October 3rd of 2002 during its Hurricane Isadore operation.”
--

The FCC letter to Garbe notes that the Hurricane Watch Net is operated to assist the National Hurricane Center in Miami, other government agencies and people in a target area of a hurricane system. The letter goes on to note that the agency considers this service to be one of the most important purposes of the Amateur Radio Service .

**

ENFORCEMENT: NO RADIO CALL-IN SHOW PERMITTED ON 75 METERS

The FCC is asking a California ham why he allegedly ran a radio call in show on 3.830 MHz and requested shortwave listeners to participate. The regulatory agency alleges that James C. Watkins, KI6GU, of Burbank ran such an operation last August 16th and 24th and used a reverse autoptach system to facilitate the call-ins.

Along with the FCC inquiry Watkins was furnished 9 pages of material relating to the complaints against him. He was given the customary 30 days from the date of the Commission inquiry to respond. (FCC)

**

ENFORCEMENT: BIG FINE AGAINST FLORIDA PIRATE BROADCASTER

The FCC has levied a $10,000 fine against a Florida man who has allegedly been operating a radio transmitter without a license. Richard Munoz of Naples was issued the forfeiture notice for operation of a radio station on 105.1 MHz without Commission authorization. Amateur Radio Newsline’s Bill Burnett, KT4SB, is in Miami with the details:

--
The story begins on April 20 if this year. This, when agents from the Tampa Office investigate a complaint alleging that an unlicensed radio station was transmitting on frequency 105.1 MHz in the Naples, Florida area.

A search of Commission records shows that there was no FM radio station licensed on 105.1 MHz in Naples. So, using a mobile direction finding vehicle, the agents trace the station to the Tree of Life Church in Naples.

The agents then interview several witnesses at the church who identify Richard Muñoz as the operator of the radio station transmitting on 105.1 MHz. The witnesses also provide the agents a business card identifying Richard Muñoz as the pastor of a Spanish-language ministry called Mission Possible Ministries. A brochure advertises a radio program called “Mission Possible" on 105.1 MHz.

The agents interview Muñoz. He admits that his ministry owns the radio station equipment and is operating it.

The agents ask Muñoz if he had a license for the station. He replies that a friend has submitted an application to the FCC. Also that the friend has advised him that he could operate the station while the paperwork was being processed.

The agents advise Muñoz that he cannot operate the station without a license and directed him to terminate the unlicensed operation. Muñoz requested additional time to notify his listeners that the station had to go off the air. The agents again tell Muñoz that he could not operate the station without a license and order him to take the station off the air. Muñoz directs another person to turn off the transmitter.

But the story does not end there. On April 30th the FCC'sTampa Office receives another complaint alleging that an unlicensed FM station is again operating on 105.1 MHz in Naples. Also that it is causing interference to the reception of an FM broadcast station licensed to operate in that area.
On May 14th, agents again trace the station to the Tree of Life Church and on May 17th the Tampa Office issued a warning letter to Andrew dealing, the head pastor of the Tree of Life Church. The warning letter advises DeLong that operation of a radio station without a license violates Section 301 of the Act, ordered him to cease operation of the unlicensed station transmitting on 105.1 MHz immediately.
Then, on May 24, 2002, the Tampa Office receives a letter from Pastor DeLong. In the letter, DeLong states that Richard Muñoz is the operator of the radio station transmitting on 105.1 MHz. Also that that Muñoz leases space for the radio station from the Tree of Life Church, and that the Tree of Life Church had no control over the operations of the radio station.
Based on the facts before it, On June 5th the Tampa Office issues an Notice of Apparant Liability for a $10,000 forfeiture to Richard Muñoz for operating a radio station without a license in willful and repeated violation of Section 301 of the Act. In his response to the notice, Muñoz admits that he operated the unlicensed station on 105.1 MHz, but requests cancellation of the forfeiture. He tells the FCC that his church, Mission Possible Ministries, had agreed to purchase 50% of the radio station for $15,000 from Daniel Morisma approximately eight months earlier. According to the reports, Muñoz maintains that Morisma told him that there was an application for the radio station on file at the FCC and that the station could go on the air while they were waiting for the application to be processed.
According to Muñoz, Morisma told him that the station should go back on the air because the FCC would not visit again, and that if the FCC did visit again, it would issue a second warning before proceeding with any penalties. Muñoz asserts that the station had been using the time between the FCC’s first and second visit to explain to listeners that they would soon be off the air because they had been lied to and scammed and that the station was a week away from dismantling when the FCC visited the station the second time.
But the FCC sees it another way. In its order the FCC says that it is unfortunate that Muñoz may have been duped into believing that there was an application for the radio station on file with the FCC and that he could put the station on the air while the application was being processed.
None-the-less says the FCC, Muñoz clearly knew following the inspection by its agents on April 20th that the station was unlicensed.
The bottom line. The FCC says that under these circumstances, it concludes

that no reduction of the forfeiture on this basis is warranted.
From Miami, I'm Bill Burnetrt, KT4SB, reporting for the Amateur Radio Newsline.
--
Muñoz was given the customary 30 days to pay the fine. If he fails to do so the FCC indicates that other punitive action may be taken.

**

WITH THE SCOUTS: JOTA FOLLOW-UP

ARRL Educational Programs Coordinator, Jean Wolfgang, WB3IOS, reports that so far over 125 scouting Jamoboree on the Air or JOTA survey have been received for this years event. The reports show over 9079 Scouts, 2855 visitors, and 657 hams participated. This is a substantial improvement over last year when only 65 surveys were returned!

But says Wolfgang, there are several state we have not heard from. They are Delaware, Hawaii, Idaho, Mississippi, Montana, Nebraska, North Dakota, South Dakota, Utah, Vermont, and Wyoming.

If you participated in JOTA 2002 and have not yet completed the ARRL survey please have a representative of your JOTA event complete and submit the form as soon as possible. You will find it on the web at http://www.arrl.org/FandES/ead/jotalog. (WB3IOS)

HAM RADIO BUSINESS: HAS HAMVENTION 2003 GOT A DEAL FOR YOU

The planners of Hamvention 2003 say -- have they got a deal for you! The Hamvention, in cooperation with the Dayton Montgomery Convention and Visitors Bureau has put together a special V-I-P package. It will do to five of the first 500 who purchase a preregistration ticket before Novermber 15th.

The five lucky winners will be chosen in a randon drawing in early December. They will receive two nights of hotel accommodations during Hamvention, dinner for two at Jay’s Restaurant, a V-I-P badge, a special souvenir package and the most important prize of all. An on-site V-I-P parking pass for the show! Thats right -- parking almost at the Hara Arena front door.

More information on this special Hamvention 2003 promotion is available by e-mail to tickets@hamvention.org. You can also phone during business hours Eastern time to area code 937-276-6930. (Dayton Hamvention)

**

HAM RADIO BUSINESS: WORLDRADIO EDITOR DEPARTS FOR CAREER IN LAW ENFORCEMENT

One ham who may not be at Hamvention 2003 is Worldradio Magazine editor Rick McCusker, WF6O. This is because McCusker has announced that he is leaving the post in a major career change.

Accordong to McCusker, he has been in training for some time to become a peace officer. He has also been working as a Reserve Depuity Sheriff in his spare time. Now, he has accepted a full time position with the Sacramento California County Sheriff’s Department.

Duruing his tenure at Worldradio, McCusker completely redesigned and modernized the magazine’s look. He took most columns by-monthly permitting the addition of new writers representing emerging technologies in the hobby. His legacy is a well respected publication with a steadilly growing reader base.

McCusker’s last day at Worldradio will be on Wednesday November 13th. At airtime no replacement editor has been named. (ARNewsline™)

**

THE CHANGING OF THE GUARD: KL7Y LOST IN MOTORCYCLE ACCIDENT

Some sad news. Word that famed contest operator Daniel Robbins, KL7Y, of Wassilia Alaska has died in a motorcycle accident while in Hawaii. According to the Honolulu Star Bulletin, the 54 year old Robbins died Thursday October 31st after he lost control of a motorcycle while riding in Kona and drove into a lava field. The Fire Department said that Robbins, who was not wearing a helmet, suffered head and other injuries.

KL7Y was a friend to many inside and outside of the world of ham radio contest operations. He had just completed operating the CQ World Wide SSB contest from KH7R a few days before the accident that took his life. A memorial guest list for his friends to pay their respects has been set up on line at www.contesting.com. (K7JA, contesting.com)

**

ON THE AIR: THE MIGHTY MO CELEBRATES VETERANS DAY

The “Mighty Mo” is coming to the ham radio airwaves for a very special event. Bob Maguire, KA2WXU, reports over the Internet that on November 9, 10, and 11 the Battleship Missouri Amateur Radio Club will be on the air each day from 17:00 to 04:00 U-T-C on 14.263, 21.363 and 28.363MHZ, in honor of Veteran's Day weekend. There is no special event QSL card for Veteran's Day event but if you Q-S-L via KH6BB you will receive a regular Mighty Mo QSL in return. More information is on the web at www.kh6bb.org. (KA2WXU)

**

ON THE AIR: UARC CELEBRATES 75TH ANNIVERSARY

The Utah amateur Radio Club will celebrate its 75th anniversary with an on-the-air event beginning Saturday November 9th and continuing through November 10th. Operation will be on most high frequency bands with emphasis on 20 meter SSB. The call sign to listen for is W7SP. For a special commemorative card, QSL as directed on the air. (N7HVF)

**

INTERNATIONAL – INDIA: PIRATES PERSIST

The president of the Amateur Radio Society of India, reports a significant number of pirate operations using call signs VU4A, VU7A and similar other call signs continues. VU2SDN says that a blanket ban exists on operations from Andaman, Nicobar and Lakshadweep islands, and that VU4 and VU7-prefix call signs have not being assigned for 10 years. The only exception was the brief 1993 VU2JPS operation from the Andaman Islands. Quoted in the ARRL Letter, VU2SDN says that call signs that begin with VU2 followed by two or three letters or with VU3 followed by three letters are the only valid call signs for India. (ARRL)

**

INTERNATIONAL – USSR: A WALL OF SOUND

Radio Liberty's broadcasts to the Union of Soviet Socialist Republics were the target of Soviet noise jamming for several decades. But Media Network reveals that the Russian operators actually left frequencies undisturbed so their friends could hear the programs. Now, you can too with a 30 second audio sample of what jamming sounded like for those of you too young to remember. Its on the Radio Netherlannds website. The URL is http://www.rnw.nl/realradio/features/html/jamming021018.html (Media Network)

**

DX

In D-X, a surprise U-S to Japan long path opening surprised many South-West region hams the morning of October 31st. At about 15:45 UTC, D44TD was worked as far west as Arizona. while N6XQ was reported to be 599+ into JA-land, Unfortunately for many U-S hams the surprise opening took place while they were away at work and preceeded an X-class flare a bit later in the day. (K7JA)

**

THAT FINAL ITEM: SOLVING AN AGE OLD QUESTION

For nearly a century, mathematicians have been stumped by one of the math world's most difficult problems. This is a conjecture by French scientist Henri Poincare about the properties of three-dimensional space. And now, it appears as id a British math whiz claims to have solved the problem. Amateur Radio Newslines Henry Feinberg, K2SSQ, has the puzzeling story:

--
Jules Henri Poincare was dubbed by E.T. Bell as the "Last Universalist. A man a who was at ease in all branches of mathematics.

Poincare was also a 19th century professor of astronomy who made fundamental contributions regarding the motions of the planets. He went on to found the field of topology, a branch of geometry, and even competed with Albert Einstein in the study of relativity.

Before Poincare, mathematicians fully understood two-dimensional space, such as the Earth's surface, and could list all the possible shapes of two-dimensional surfaces and use mathematical calculations to distinguish between them. But The math mystery Poincare raised regarded the properties of three-dimensional space. His question, or conjecture, was whether the two-dimensional calculations could be easily modified to answer similar questions about three-dimensional spaces.

He was pretty sure the answer was yes but couldn't prove it mathematically. Nearly 100 years later, math whizzes remain stuck, except for one. His name is Martin Dunwoody.

Dunwoody is described as a British mathematics expert. His answer is barely six pages long and only an outline. And as you might expect, Dunwoody's solution - complete with formulas and diagrams - has been praised and challenged in England.

No, we will not try to explain all the math here. What is interesting is the reaction of the scientific community. Professor Ian Stewart of the University of Warwick, one of Britain's most respected mathematicians calls it the first good shot at this problem in years,. But Colin Rourke, another University of Warwick mathematician, disagreed. Rourke says that when he raised a problem in the solution, Dunwoody admitted on his Web site that it could be difficult to overcome.

Once the math community has accepted the solution, the Clay Mathematics Institute in Cambridge, Mass., must conduct its own review. Only if that proves successful will Dunwoody be rewarded. And if the reaction of the British math professors is any indication, this conrriversy could rage on in math circles for years.

Adding it all up for the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.
--

Even if Dunwoody continues to refine his answer and eventually is proven correct, it could be a long time before it's official. First, he must get it published in a mathematics journal, then undergo a two-year waiting period of international review. (Science Today)

I guess you could use AX25 and user space soundmodem on Linux boxes... I think the best data rate would be around 19K2Bits/sec. This normally requires a two way comm so it may not work for you.

Cheers Bob

Why would you want to do it this way?.
there is a perfectly good program supplied with Windows that enables a
reasonable fast data transfer via either serial or Parallel ports.
Its called Direct Cable Connection, and can be found under the
"settings/install windows software/communications" window

Why would you want to transfer data via the soundcard, when most PCs have serial, parallel and USB ports for this purpose. Mind if you could transfer data via the soundcard, I suppose you could use a cassette recorder to back up your programs, it would be incredibly slow.

Ah the days of backing up Sinclair Spectrum programs on cassette.

Why use a PC soundcard for file transfers, when most PCs are equipped with serial, parallel and USB ports which are designed for this sort of thing. Mind if you do manage to transfer files via the soundcard, does this mean that you could use a cassette recorder to back up your data. Just like in the old days when I used a cassette recorder on my Sinclair Spectrum.

From this page of the ARRL website
http://www.arrl.org/news/restructuring/faq.html

Excerpt follows

You also may contact ITS Inc. For a fee, ITS will research prior licensing records and should be able to provide you with the necessary documentary proof. ITS recommends calling them at 717-337-1433 to place an order for "verification of a pre-March 21, 1987, amateur license." E-mail requests are not recommended. The verification letter you receive will be on FCC stationery and stamped with the FCC seal. The ITS Web site is http://www.itsdocs.com/.

Hope this is of help.

Last night again "Orange Blossom" and one
other station (name only used ?) checked
in 3.860 at a little after 8:00 PM
without the benefit of a proper FCC
issued Amateur Station callsign.
I guess it's OK 4 anyone with a "political adjenda"
to transmit without a ham licence and the NCS on
this freq will check them righ it without any contest
as to their validity to use a ham transmitter...
Stick a fork in in? ham radio's traditional quality is going bye-bye?
Note also that 3.850 USB (+/1 10kc) seems to being used by
shrimp boaters along the Miss/La Gulf Coast also for chit-chat
w/profanity from midnite onward at times too..

Well you pinpointed my problem, I have to manage some very old and
odd PCs. In addition most of them have got no (free) ports except of
soundcard.
I'd like to backup & update some of the software thus, time or speed
are not very important (about 14000 baud would be fine).
Floppies are no real choice as I would have to use 3,5 and 5 floppies for
different PC.

Do you have got a link for "Sinclair Spectrum"?

Thx

Get EchoLink - licensed hams can use it to patch your PC into systems around the world, not only to listen but to chat. EchoLink + soundcard + mic lets me make contacts from the US on 2m repeaters in Australia, Chile, Alaska and anywhere else they happen to have a patch.

Gulf Coast shrimpers have used 3850 kHz for years. They
do not have amateur licenses and just ignore hams who ask
them for call signs. Shrimpers also use 7235, 3945, & several
other ham freqs. I've complained on and off over the years,
written letters, etc. All to no avail.

To all the Lloyds I've loved before
Who travelled in and out my door
I'm glad they came along
I dedicate this song
To all the Lloyds I've loved before

To all the Lloyds I once caressed
And may I say I've held the best
For helping me to grow
I owe a lot I know
To all the Lloyds I've loved before

The winds of change are always blowing
And every time I try to stay
The winds of change continue blowing
And they just carry me away

To all the Lloyds who shared my life
Who now are someone else's bitch
I'm glad they came along
I dedicate this song
To all the Lloyds who scratched my itch

To all the Lloyds who cared for me
Who filled my nights with ecstasy
They live within my heart
I'll always be a part
Of all the Lloyds I've loved before

The winds of change are always blowing
And every time I try to stay
The winds of change continue blowing
And they just carry me away

To all the Lloyds we've loved before
Who travelled in and out our doors
We're glad they came along
We dedicate this song
To all the Lloyds we've loved before

To all the Lloyds we've loved before
Who travelled in and out our doors
```

We're glad they came along
We dedicate this song
To all the Lloyds we've loved before

ST CROIX, VI (AP)

In what has been described as a case for the record books, doctors at St Croix General Hospital surgically removed a missing Alabama man from the rectum of a well-known local resident this past weekend.

Herbert Schoenbohm presented to the hospital emergency room on Saturday, complaining of abdominal discomfort and extreme constipation. After performing a CAT scan, physicians were flabbergasted when the images showed a full-grown 250 lb adult male lodged completely within Schoenbohm's lower colon.

Schoenbohm revealed that the intestinal blockage was none other than Lloyd Davies, reported as missing from Athens, Alabama last week after failing to show up for work at Papa John's Pizzaria and Catfish Emporium.

Mr. Schoenbohm, who formerly held the amateur radio callsign KV4FZ, recently lost a long court battle with the Federal Communications Commission which resulted in the permanent revocation of his amateur radio operating privileges. He revealed that Mr. Davies, who has been a long-time friend and supporter during the litigation, made a special trip to the Islands to cheer up his mentor by engaging in a protracted session of ass-kissing.

According to Schoenbohm, the analingus got somewhat out of hand. Mr. Davies apparently performed his duties with such enthusiasm that he was sucked bodily into Schoenbohm's lower intestinal tract by the involuntary muscular contractions associated with orgasm.

Neither Davies nor Schoenbohm appear to have suffered any permanent injury from this unusual incident. Doctors successfully removed Davies using copious quantities of canola oil, and with the assistance of plumbers from a local septic tank cleaning service.

Davies, who explained that he is quite used to eating excrement, evidently found more than enough nourishment to survive his 3-day stint in Schoenbohm's rectal cavity.

After a thorough hosing-off, Davies was put on an airline flight back to the mainland.

Hello there.

Does anyone know of a good packet radio program suitable for HF/VHF packet, for Windows NT/2000/XP. One that will work via the soundblaster, with the PTT either done via VOX or using the parallel or serial port.

The only program I have come accross that does software packet for windows is AGWpacket, but that dont work under NT/2000/XP.

I have had a look at several ham web sites that list such programs, but they always have busted links :-(

Hi,

There is a new version of AGW which apparently works on XP. I don't
run XP at all and AGW occasionally but it's worth another look...

Thanks for the info. I got it sorted now.
MixW seems to be a good all-round program for all digital modes, not free
but good.

I can't get to any of the web pages because "Bandwidth has been exceeded,
try again in 2 hours".
Never had this problem anywhere else in the last 5 years on the net.

Doesn't sound like a "good service" to me.
I was only using the site for about 5 minutes and saw 3 or 4 different web
pages.

I don't think I'll hurry back.

Better luck next time.

Paul.

It does work under XP :-)

Get AGW Packet engine and Winpack for VHF, set the AGW Packet driver to
use Winpack and it will work fine through your soundcard.

Info should be on AGW or Winpack websites.

If you want just a basic packet program you could try MixW for VHF/ HF,
it's at http://www.MixW.net

4630. Pro-46 repair question

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-12 16:47:59 UTC
From: Gary <garytaylor605@yahoo.com>
Message-ID: <3haA9.885$Ta6.75876@newsread2.prod.itd.earthlink.net>
Source record: 72172

I have two Pro-46 scanners with the same problem. They have very poor reception, especially in the 800MHz range. Does anyone know if RS will still repair this model? Is there somewhere else I can get them repaired?

Any help would be appreciated.

Thanks,
Gary

Meet N0VFP!

Real Name:
Lloyd/N0VFP

Photo:

Email address:
lloyd_vfp@msn.com

Year born:
1973

I am originally from...
Iowa

My marital status is...
Singul Lukin

I got interested in ham radio because...
I got tyred of talkin to mysellf

My favorite thing to do in ham radio is... Because?
Lisin bekause i kan.

My equipment consists of...
ICOM R-75 Hallicrafters S-120 Radio Shak Dx-398/Ats-909/dx-440/dx-100 pro-92
pro 2050 ADI HT 204 Ft-470

I am a member of the following ham radio clubs...
Ex BARF

I have earned the following accomplishments in ham radio...
EX BARF Cheif of Komunications

The funniest thing that ever happened to me on the air was...
I thouth i was jamming but i fergot to turn on my radeo.

The biggest pileup I ever heard or busted was...
I heard porkbut yellin at herbie.

I would like to try the following new things in ham radio in the next 10
years...
Get on the aire

When I'm not on the radio, you can normally find me...
Eatin Petza, readin my bible, listin to brother stair, pullin my pickle.

Dick Tracy

Meet N0VFP!

Real Name:
Lloyd/N0VFP

Photo:

Email address:
lloyd_vfp@msn.com

Year born:
1973

I am originally from...
Iowa

My marital status is...
Singul Lukin

I got interested in ham radio because...
I got tyred of talkin to mysellf

My favorite thing to do in ham radio is... Because?
Lisin bekause i kan.

My equipment consists of...
ICOM R-75 Hallicrafters S-120 Radio Shak Dx-398/Ats-909/dx-440/dx-100 pro-92
pro 2050 ADI HT 204 Ft-470

I am a member of the following ham radio clubs...
Ex BARF

I have earned the following accomplishments in ham radio...
EX BARF Cheif of Komunications

The funniest thing that ever happened to me on the air was...
I thouth i was jamming but i fergot to turn on my radeo.

The biggest pileup I ever heard or busted was...
I heard porkbut yellin at herbie.

I would like to try the following new things in ham radio in the next 10
years...
Get on the aire

When I'm not on the radio, you can normally find me...
Eatin Petza, readin my bible, listin to brother stair, pullin my pickle.

Dick Tracy

You can get $5 for them?
Maybe I shouldn't have tossed mine in the trash (along with the Intel
Ether Express 16 cards and NE1000 cards etc.)

No wonder he still sends chills down your spine, Herb. That old mobile home trailer hitch of yers hasnt been the same since old Lloyd left for a shinier model.

Man, I leave for a vacation and all hell breaks loose!

Looks like Lloyd is up to his old tricks once again. Things must be slow at the pizza place.

Looks like he has once again enlisted some imaginary friends, ie: christy davies, kinda like jim davies who was a jillionaire and was going to sue all of us. Turned out to be a figment of Lloyd's imagination.

Let the games begin!

Ain't it the truth! Last weekend I bought 2 brand new 10/100 PCI NICs with
Wake-On-LAN (with the WOL cable!) at Fry's for $1.99 each! No rebate
needed, though there was a limit of 2. Now THERE'S something worth $5!

10Base-T cards? I thought there was a disposal fee required for each one
like your old tires.

Welcome back, Bro. Bottle. Glad you got back safe from your trip. We agree .. let the games begin.

But I'm afraid this Christy person is for real. So you better go out and buy a new suit .. we're on our way to court this time.

Don't worry .. Nashville Joe has *the printouts*.

<Belly Laugh>

I'm not worried in the least, Lloyd wouldn't dare appear in any sort of court of law, especially when he "knows" what kind of evidence Nashville Joe has on him.

But, it would be interesting to see if christina davies is as porky as Lloyd. man they would have to knock out a wall in the courthouse to house both of 'em.

Oh well, I can't be bothered with this trivial crap. hell, everyone knows that Lloyd is a weirdo. Back to work this coming monday.....yeccchhhh!

>
> Where would you put this new band? FCC has sold everything.

More frequencies will magically appear. Allow me to
explain.

Expensive spectrum isn't entirely bad. Thanks to expensive
and scarce access, spectrum sharing technologies keep
improving and making their way into high-volume silicon
chipsets. The best example comes from the way that "junk"
spectrum, like the range set aside for microwave oven
radiation, has been put to use.

Already, the band set aside for microwave oven radiation
holds extended-range cordless phones, 802.11b wireless
networks (which are growing explosively), and undoubtedly
many other remote telemetry and telematic applications
existing today or yet to be dreamt up. They all must
co-exist in a chaotic environment of interference, and since
spectrum is so expensive, even jumping through flaming hoops
might be economically viable with the high cost of
renting/buying more spectrum.

Admittedly, the above applications are short-range, but
that's not the point. Some of the same techniques developed
and put into silicon chipsets will be used to cram more
intermittent spectrum users into smaller and smaller bands.
THe traditional services, such as public safety, metro
services, aircraft communications, radio-dispatching, can
probably be fit in a much smaller range by using spectrum
much more efficiently, thereby freeing up Mhz here and there
for other users.

That leaves the incentive for current users to upgrade their
equipment to make more efficient use of spectrum. After
all, they have to fork out real money to do this.

That can come about in a variety of ways. In some cases,
just the savings on spectrum costs or the ability to jam in
more users could be enough. In others, the added
capabilities that could come with the new radios (e.g. data
channels in parallel with "voice" channels) might do the
trick. If all else fails, provide a tax rebate or some kind
of rebate/refund as a reward for freeing up spectrum (that
ends up producing gov't revenue again when it's re-auctioned
to new users, so why not cut the efficient users in as a
reward for benefitting the overall economy by enabling more
different kinds of products and services?)

Then again, I may be all wet. Only time will tell. :)

Hi Guys,

I am looking for an article in Ham Radio Magazine, March 1968.
The article is "Modifing the Yaesu FT-310 for 30 Meters"
I would be interested in the issue or a copy of the article.

Thank you very much,

WA4MNT

Been a multitude of QRM'ers on that
3-Ring-Circus of a freq for YEARS.
Goo it is too as it's the new "14.313"
and 3.865 now serves as a "toilet tick
magnet" for all the resident nutbags and
kooks on 75 Meters. (

In Southern California, it hasn't come to that yet. There's still plenty of older, ISA-bus based computers in operation.... However, I admit that the $5.00 price is a bit old - as of the last time I bought any. They may have fallen to $1.00 each by now, but aren't completely worthless. Most NE2000 and other cards are worthless, but for some reason, the 3COM's are preferred.

I see that you are frightened. Good.

But I'm not going to exchange any more Usenet posts with you, because
Lloyd will come out and fight his own battles in court. At that time,
you can call him all the names you want in front of a judge.

Keep posting. Each post will serve as evidence once AOL attaches your
name to it. We appreciate your help, and we like those posts. Dig
your hole deeper, fool.

>>

It appears you are the fool "Christy"

First, Lloyd hasn't even mentioned you, are you representing him without his
knowledge?

Second, this ploy has been tried before, as witnessed by the post below:

Every day, it gets more and more excing. Read some excerpts from a webpage:

"Another: Glad you made it back off the tower Jon. Yes 313 is a zoo again.
Just like I said it would be when the band came back.
Don't give up on .275 you will have the honor of listening to KD0LA
Jim -the backyard dumper, Donnie dumbass, Miami Bob and even Orfis. Yeah
buddy what a frequency.
And guess who else has come back into the 20 meter zoo? Andy Ruppe. You
know the guy that was put off of ham radio by Riley and that the courts
ordered to stay away from computers and radios...Yep same guy. Enforcement
my ass.
Guess what I have been up to between contests? Restoring and operating AM
equipment. Got the ole DX-60b into the Homebrew (that I designed and built)
ultra linear single 3-500z.
David Tolassi....summers EVE is making a daily appearance on .313. Telling
Riley to kiss his you know what....don't you love it?...W4xxx"

3910 has been plagued with jammers on a nightly basis.....even had a
guest appearance of Riley asking for a amplifier check! Someone was throwing
a carrier the other night for hours--about 30-40 over 9 at my North Shore
MA location....if that is any help to track him down....I suggest finding
the jammer and sending Scottie to confront him...imagine what a cruel
punishment it would be listening to Scottie for an hour of ranting and
raving on your doorstep with that voice jumping octaves...I'd rather pay the
10,00 dollar fine or jail time myself! The other solution is to send dirty
Dick over on the new Harley and beat the crap out of him! I would say the
3910 group has more tube equipment that sounds decent than any other group
on 75.....good group of guys....even Scottie...

Canyon,
I have the complete set of Ham Radio on CDs and do not see an
article with this title in any issue. Also, I don't think we had 30
meters back in 1968. Did you mean QST or perhaps 73 and a different
year?

4682. UHF PL-259 connectors for wideband scanning

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-14 14:59:10 UTC
From: thekoos@cyberdude.com
Message-ID: <714517f7.0211140659.107f85f@posting.google.com>
Source record: 72125

I own a Yaesu VR-5000 scanner and have been using it with a Diamond Antenna Corporation 130J disc cone antenna. I thought the performance was ok although the combination suffers from deafness above 9000Mhz. My Uniden 9000XLT performs better with the telescopic antenna above 900Mhz than the disc cone mounted 40’ up. Researching this brought me to the conclusion that the UHF (PL-259) connector on the VR-5000 must be to blame. I ordered an N type panel mount replacement connector and plan to mod the radio as soon as it arrives. Here is the bind:

From what I read the UHF connector was never designed for use above 300Mhz. Why then would Yaesu build a 2.6Ghz receiver and equip it with a 300Mhz antenna connector? Same goes for the Diamond disc cone and AOR-SA7000 wideband whip antenna. Am I missing something here?

I was planning on buying the AOR-SA7000 antenna but I am now wondering if the AOR-DA3000 Disc Cone is a better choice because it has a TNC connector?

Could someone shed some light on this for me?

Thanks

Message-id: <3dd3364d_3@corp-goliath.newsgroups.com>

Every day, it gets more and more excing. Read some excerpts from a webpage:

"Another: Glad you made it back off the tower Jon. Yes 313 is a zoo again.
Just like I said it would be when the band came back.
Don't give up on .275 you will have the honor of listening to KD0LA
Jim -the backyard dumper, Donnie dumbass, Miami Bob and even Orfis. Yeah
buddy what a frequency.
And guess who else has come back into the 20 meter zoo? Andy Ruppe. You
know the guy that was put off of ham radio by Riley and that the courts
ordered to stay away from computers and radios...Yep same guy. Enforcement
my ass.
Guess what I have been up to between contests? Restoring and operating AM
equipment. Got the ole DX-60b into the Homebrew (that I designed and built)
ultra linear single 3-500z.
David Tolassi....summers EVE is making a daily appearance on .313. Telling
Riley to kiss his you know what....don't you love it?...W4xxx"

3910 has been plagued with jammers on a nightly basis.....even had a
guest appearance of Riley asking for a amplifier check! Someone was throwing
a carrier the other night for hours--about 30-40 over 9 at my North Shore
MA location....if that is any help to track him down....I suggest finding
the jammer and sending Scottie to confront him...imagine what a cruel
punishment it would be listening to Scottie for an hour of ranting and
raving on your doorstep with that voice jumping octaves...I'd rather pay the
10,00 dollar fine or jail time myself! The other solution is to send dirty
Dick over on the new Harley and beat the crap out of him! I would say the
3910 group has more tube equipment that sounds decent than any other group
on 75.....good group of guys....even Scottie...

4697. Good antenna book?

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-14 23:50:50 UTC
From: vshah101@aol.com
Message-ID: <20021114185050.21134.00004815@mb-fx.aol.com>
Source record: 72040

Hello, I'm taking an antenna theory and design class right now. I would like to find a good antenna book that I can use for practice problems. The textbook used in the class is "Antenna Theory and Design" by Stutzman and Thiele.

The book has the equations but not enough examples. I need a book with worked out problems.

The topics include:
antenna arrays, pattern multiplication,
resonant antennas (dipoles, Yagi-Uda, large loop antennas),
broadband antennas(helical, spiral, log periodic),
aperture antennas(horn and parabolic antennas).

Remember that this is an academic course, so many other types of topics, while interesting and useful will not be in the course. Can anyone recommend any good antenna books with solved problems on these topics?

4698. HELP for CES MICROPAD and KDK 2015R

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-15 02:26:27 UTC
From: Captain Bob <captainbob7@attbi.com>
Message-ID: <nXYA9.3949$WL3.931@rwcrnsc54>
Source record: 72041

Anyone got schematics/wiring diagrahms and/or manuals for:

KDK 2015R 2M tranxciever ????

CES Micropad Microphone e/w dial pad ????

I would greatly appreciate any info on the above two items. These were put in boxes 15 years ago when we got transferred with the company. I finally re-openned them (after several re-locations) today and the KDK still works but I have NO manual and NOT sure about certain features on the KDK rig, ie "CLOSE" and "OPEN" ??

The CES microphone doesn't work as currently wired...I might have re-wired this for another rig many years ago ???? (NEED WIRING DIAGHRAM for this device).

HELP !!!

Thanks,
Bob N1HNT (X-WA1FBN/KIVUI)

I'd trickle-charge them overnight, load-test them briefly,
wait a couple of days and then test them again to see if
they're going to hold a charge, and if they're good - put
them away in a cool dry place.
I might do that all over again, maybe twice a year.

Meet N0VFP!

Real Name:
Lloyd/N0VFP

Photo:

Email address:
lloyd_vfp@nsm.com

Year born:
1973

I am originally from...
Kansas

My marital status is...
Singul Loukin

I got interested in ham radio because...
I got bored with pullin my pickle

My favorite thing to do in ham radio is... Because?
Listin because i am too laezy to upgrade and gets on hf

My equipment consists of...
ICOM R-75 ADI 204 DX-398

I am a member of the following ham radio clubs...
F.A.T.B.O.D.Y.

I have earned the following accomplishments in ham radio...
Nun

The funniest thing that ever happened to me on the air was...
I can't geet on the aire

The biggest pileup I ever heard or busted was...
I heard big al yellin at porkbutt when he was yellin at herbie. I got so excited i peed my pants.

I would like to try the following new things in ham radio in the next 10 years...
Get my 5 WPM and upgrade to General class. Git a women too tuch me without paeing her.

When I'm not on the radio, you can normally find me...
Eatin, pullin my pickle, listin to 75 meters and dreaming of gitin on the aire
Dick Tracy

4 or 5 months ago, I found a program for VHF propagation prediction.

It's a free software.
It uses DTED database to determine terrain profile
It was deliver with an example of 2m stations distributed on a Grand Canyon Map. Showing the different link and expected quality.

It was very nice but
My computer crashed, I hadn't a backup of this program, and I can't find it anymore.

If somebody can help me with the link to the right webpage. I would really appreciate.

Thanks in advance.

Pierre Ciparisse

4720. WARNING! WARNING! WARNING! "VECTOR" ELECTRONICS

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-16 11:24:45 UTC

Message-ID: <dc97c428.0211160324.134dc362@posting.google.com>
Source record: 72063

I Would like to warn all of you about a Russian company that
has made off with $1800.00 of my money and has yet to send me the
sockets I ordered 6 months ago.

The name of the company is VECTOR ELECTRONICS, and their web site is
http://www.vectorelec1.narod.ru/

I had been ordering the SK1A Svetlana tube sockets from this company,
and had received a couple of orders from them with no problem. But, I
placed the last order with them about 6 months ago and still no
sockets. Just about all Russian companies require you pay them in
advance via direct bank deposit which was the case with Vector. I sent
them the $1800.00 as requested to their bank account and they in turn
said they would ship my tubes in a couple of weeks.

I buy from other European tube suppliers, and normally it only takes
from 2 to 4 weeks for an order to reach me once I send payment.

I waited about a month before I contacted them about not having
received my sockets, they gave me one excuse after another, but since
they had
always delivered in the past, I thought i was still ok.

After a couple of months I asked them again where my sockets
were.....they assured me they had been shipped and I should receive
them any
day....guess what....they never did come.

No use to bore you with all the correspondence I sent to them, let's
just suffice it to say. I have been hot and heavy after my sockets.

They do not return my phone calls, or my emails and faxes, so I guess
I am just screwed!

For those of you who dont know me, I am a ham, and I sell Russian
tubes and sockets on my web site, and have several commercial
accounts, but my
main customers are hams.

A lick like this is very hard for a small outfit like mine to recover
from, but I hope to hang in as long as I can.

I just wanted to make the rest of you aware of these people in hopes I
could kkeep somone else from loosing their money to these people as I
did.

I feel sorry for the poster. This is yet another
example of that classic maxim: "If it sounds
too good to be true it probably is"

This saying can be updated and amended
with/as: "..and any shyster can put up a web page
or e-bay auction to sell you a 'bag-o-goods' ".

Bottom line is ALWAYS make your purchases
ONLY from established and trusted sources.

I use Hosfelt or Mouser for the common stuff and Allied
for the exotic stuff. You'll be paying more buying
from Allied, but they've been around for decades
and ain't "going noplace" soon.

www.hosfelt.com

www.mouser.com

I have a 91 dodge caravan & I need ideas on build a homebrew antenna am/fm antenna to get alot recption than the ome antenna. The antenna could be hooked to the rear bumper and be no higher than 10ft high, also is could be a cb or yaga style antenna. I am looking for a fairly easy antenna to build with stuff found at the local harware store and radioschack, and one that does not look to weird on the rear of my minivan. I am trying to listen to a low power station in Houson Tx so I need the best recption possable.

Lloyd, we know that you are posting under several names and alias'. Could you provide us with a complete list?

As for this little Fag Boy, Chris, K1CWB, he must be one of your queer friends like Pork Butt or the Tampa Turd!

Get a life and stop posting about K1CWB your queer friend.

Thanks,

Doc

4735. W4AMP Legal Defense Fund

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-17 20:33:33 UTC
From: Bail Me Out <StalkerDude@Bureau>
Message-ID: <ar8uc6mll0@pita.alt.net>
Source record: 72078
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc

Help! W4AMP needs your help! Due to circumstances beyond his control he is in yet another monetary bind and needs assistance with legal fees and living expenses. We are forming a W4AMP Legal Defense Fund and will be taking donations for this worthy cause for the next several months. Please be as generous as you can and remember, your generosity could help keep an innocent family man out of jail. Yes, using W4AMP and innocent in the same sentence is an oxymoron but your help will be appreciated nonetheless. Nobody should have to spend Christmas behind bars. Not even Dimmy.

4736. Dry Balls Bob

Hi all,

I'm still in need of a 2ch, 40w UHF radio for our church van. Naturally, being a charity, there is not a lot of cash to throw around. Donations are appreciated with the return of retail pricing tax receipts. Anyone out there have a compatible radio they are willing to move for minimal profit to the church? $100 or less would be ideal for anything such as a maxtrac, m120, SM50, radius, GM series or similar. PLEASE, only offers for Motorola due to needs of uniformity and service.
thanks for the time,
Randy

Anyone have one of these radios and have a tone that comes up when you hit the ptt to transmit?When you press to talk it send out some tone like a DTMF tone and I can't figure how to shut it off.I have called HRO and no one knows what I am talking about.They tell me to do a full reset and that should take care of it.IT Don't.
Right out of box as soon as you put in a frequency it does it.It stays in with as many frequencys you load.I can go to any channel and key up and you would know who it is if you are aware of it.Any help is welcomed.

I had an 8900 here for a day or two, it is the internet button causing
that. Look in the book for the location of the internet button and
toggle it off, It should be somwhere right on the front panel.
Bill, wr2m

Hi Dick
You have the DTMF Paging turned on. Go to the menu and turn it off. It's in the manual.
All modern Yaesu units have this feature, look under DTMF Paging Code.
If the word PAGE appears on your screen? Make it go off. 73 Chris VE3NGW/W4 Florida

Phonetic Alphabets (Alpha Bravo etc)
November 2002

There is a widely known alphabet Alpha Bravo ... Yankee Zulu. Such alphabets, used for spelling things out over voice links, are variously known as phonetic/radio/spelling/ telephone alphabets, and the term analogy alphabet is also used. This collection currently includes alphabets for the following languages:

English, French, German, Dutch, Spanish, Portuguese, Italian, Romansh, Danish, Norwegian, Swedish, Finnish, Czech, Slovak, Polish, Hungarian, Croatian, Serbo-Croat, Slovenian, Greek, Romanian, Turkish, Hebrew, Russian, Ukrainian, Swahili, Kwanyama, Ndonga, Afrikaans, Chinese and Esperanto.

There is also some information about Morse code and phonetics for digits.

This posting supersedes the one of 20 July 2001. Changes include new material for Czech and Polish, and French/Dutch material from Belgium.

My thanks to the many contributors, not all of whom are acknowledged below. Particular thanks to Gwillim Law gwil@mindspring.com for numerous contributions and for looking after posting for a while.

Please report any errors. I will be glad to receive new material; further references; anecdotes; whatever.

A Web copy of this article, together with some further material, can be found at:

<http://www.bckelk.uklinux.net/menu.html>

There is also a copy of the article at:

<http://www.columbia.edu/~fuat/cuarc/phonetic.html>

Editorial comments are in square brackets [].

18 November 2002

***** ENGLISH *****

The NATO phonetic alphabet:

Alpha Bravo Charlie Delta Echo Foxtrot Golf Hotel India
Juliet Kilo Lima Mike November Oscar Papa Quebec Romeo
Sierra Tango Uniform Victor Whiskey Xray Yankee Zulu

[This alphabet dates from about 1955 and is approved by the
International Civil Aviation Organization, the FAA and the
International Telecommunication Union; note that different
bodies prefer different spellings, so one also sees:
Alfa Juliett Juliette Oskar Viktor]

[The alphabet above is from the Cambridge Encyclopedia of
Language. An alphabet with Alfa X-ray can be found in The
U.S. Department of Defense Dictionary of Military Terms.
Alfa Juliett X-ray, which is the ICAO version, appears in
A Concise Dictionary Of Slang And Unconventional English
and also two Langenscheidt dictionaries]

[There is one report of UK police using Indigo instead
of India.
German army handbook 90/91: Alfa Foxtrott Juliett.
Italian version: Alfa Charly FoxTrot Giuliet Romio Wiskey.
An Indonesian phrase book: Beta Ultra Volvo Whisky X-ray.
A precursor of the present alphabet (1952?) had: Alfa Coca
Metro Nectar Siera Union Whisky Extra]

Phonetics for digits (from an amateur radio FAQ):

zero one two tree fower fife six seven eight niner

From the Cambridge Encyclopedia of Language:

zero wun too tree fower fife six seven ait niner

Atlantic City ITU convention 1947:

Nadazero NAH-DAH-ZAY-ROH
Unaone OO-NAH-WUN
Bissotwo BEES-SOH-TOO
Terrathree TAY-RAH-TREE
Kartefour KAR-TAY-FOWER
Pantafive PAN-TAH-FIVE
Soxisix SOK-SEE-SIX
Setteseven SAY-TAY-SEVEN
Oktoeight OK-TOH-AIT
Novenine NO-VAY-NINER

'Telecom B':

[Note similarity to Apples Butter Charlie]

Alfred Benjamin Charles David Edward Frederick George Harry
Isaac Jack King London Mary Nellie Oliver Peter Queen Robert
Samuel Tommy Uncle Victor William Xray Yellow Zebra

[Found also in Swedish, Dutch, Hungarian telephone directories. An 'analogy alphabet' in a Kenyan directory has Charlie and no Y. A Swiss directory: Andrew Charlie Lussy Queenie Sugar. French/German vocabulary books: Andrew Charlie Lucy Mike Nelly Sugar Xmas. English phrase books for Spanish/Italian speakers: Charlie. A 'British English' alphabet in a Langenscheidt dictionary: Andrew Charlie Lucy Queenie Sugar Xmas. Norwegian dictionary: Andrew Charlie Lucy Sugar Victory Xerxes. Collins Polish dictionary: Andrew Charlie Lucy Sugar Xmas]

[Used as an English alphabet by telephone operators in Israel]

'British A':

Amsterdam Baltimore Casablanca Denmark Edison Florida Gallipoli Havana Italia Jerusalem Kilogramme Liverpool Madagascar New_York Oslo Paris Quebec Roma Santiago Tripoli Uppsala Valencia Washington Xantippe Yokohama Zurich

[An 'international' alphabet in a Dutch telephone directory has: Danemark. A 'French' alphabet in a Hungarian directory has: Cassablanka Danemark Que'bec Upsala Zu"rich.
An 'international' alphabet in a business book for French has: Italy Kilogram Zu"rich; the corresponding book for German has: Italy Kilogram Xanthippe Zu"rich.
An 'international' alphabet in a Langenscheidt dictionary: Danemark Madagaskar Que'bec Upsala Xanthippe Zu"rich.
An 'international' alphabet in a Larousse business book: Danemark Je'rusalem Que'bec Xanthippe]

[West Berlin telephone directory 1965: Danemark Je'rusalem Madagaskar Que'bec Upsala Xanthippe Zu"rich.
Santa Fe (Argentina) 1955: Dinamarca Habana Jerusale'n Kilogramo Nueva_York N~andubay Upsala Wa'shington Xantipo Yokoama.
Azores 1966: Danemark Ita'lia Jerusale'm New-York Que'bec Upsala Yokoham]

[Used as a French alphabet by telephone operators in Israel]

Bombay telephone directory 1962 (also a later source):

Army Brother Cinema Doctor English Father Gold Hotel India Jam King Lady Mother Navy Orange Paper Queen Raja Sister Table Uncle Victory Water X-ray Yellow Zero

Kenyan and Tanzanian telephone directories 1966:

Africa Bombay Charlie Durban England Freddie George Harry India Japan Kenya London Mombasa Nairobi Orange Peter Queen Robert Sugar Tanga Uganda Victory William X-Ray Yellow Zanzibar

Johannesburg telephone directory 1965:

[Note similarity to Alfred Benjamin]

Arthur Betty Charlie David Edward Frederick George Harry
Isaac Jane Kate Lucy Mary Nellie Olive Peter Queen Robert
Simon Thomas Union Violet William X-Ray York Zero

Malayan telephone directory 1964:

Australia Bombay China Denmark England Fiji Ghana Hongkong
India Japan Kedah London Malacca Norway Osaka Penang
Queensland Russia Singapore Turkey Uganda Victoria Wales
X'Ray Yokohama Zanzibar

Used by police in New York City:

[Note similarity to ARRL and Western Union]

Adam Boy Charlie David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Peter Queen Robert Sam Tom
Union Victor William X-ray Young Zebra

[Variants: Eddie Larry Nancy Thomas Yankee Yellow]

Used by police in Nassau County, Long Island, New York:

Adam Boston Chicago Denver Edward Frank George Henry Ida
John King Lincoln Mary Nancy Ocean Peter Queen Robert Sam
Thomas Union Victor William X-ray Young Zebra

Used by police in San Diego, California:

Adam Boy Charles David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Paul Queen Robert Sam Tom Unit
Victor William Xray Yellow Zebra

Used by police in Hutchinson, Kansas:

Adam Boy Charles David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Paul (Q) Robert Sam Tom Union
Victor William X-ray Yankee Zebra

Alternative phonetics sometimes used unofficially in amateur
radio:

America Boston Canada Denmark England France Germany
Honolulu Japan Kilowatt London Mexico Norway Ontario/Ocean
Pacific Radio Santiago/Spain Tokyo United Victoria
Washington Yokohama Zanzibar

[Also: Amsterdam, Baltimore, Brazil, Chile, Egypt, Finland,
Geneva, Greece, Guatemala, Hawaii, Italy, Kentucky, King,
Luxembourg, Montreal, Nicaragua, Portugal, Romania, Russia,
Sweden, Texas, Uruguay, Venezuela]

The ARRL (American Radio Relay League) alphabet (1948):

[Note similarity to Western Union and Able Baker]

Adam Baker Charlie David Edward Frank George Henry Ida John king Lewis Mary Nancy Otto Peter queen Robert Susan Thomas union Victor William x-ray young zebra

[Nowadays the ARRL endorses the NATO/ICAO/ITU alphabet]

Pre-1954 U.S. Navy Radio Alphabet:

(Communications Handbook, 1945)

[Note similarity to Able Buy Cast]

Able Baker Charlie Dog Easy Fox George How Item Jig King Love Mike Nan Oboe Peter Queen Roger Sugar Tare Uncle Victor William X-ray Yoke Zebra

[formerly used by IBM engineers for hex digits and pin positions; still used at at least one site]

Same alphabet:

- British forces 1952
- "Used by Armed services of USA & GB" (ARRL Handbook, 1945)
- "The Complete Morse Instructor..." (1944)

'Allied Services 1945': Edward Tape

RAF 1943-56: Able-Afirm Item/Interrogatory Jig/Johnny Nab/Negat Peter/Prep

U.S. Army/Navy 1941: Sail

Used in Thailand: Billy Jack

[In similar alphabets: affirm, cast, hypo, inter, negat, option, over, prep]

RAF 1942-43:

Apple Beer Charlie Dog Edward Freddy George Harry In Jug/Johnny King Love Mother Nuts Orange Peter Queen Roger/Robert Suga Tommy Uncle Vic William X-ray Yoke/Yorker Zebra

[cf. aircraft in Dambusters raid: A-Apple B-Baker C-Charlie E-Easy F-Freddie G-George H-Harry J-Johnny K-King L-Leather (officially L-London) M-Mother N-Nuts O-Orange P-Popsie S-Sugar T-Tommy W-Willie Y-York Z-Zebra]

U.S. Navy 1940:

Affirmative Baker Cast Dog Easy Fox George Hypo Interrogatory Jig King Love Mike Negative Option Preparatory Queen Roger Sail Tare Unit Victor William Xray Yoke Zed

Western Union:

Adams Boston Chicago Denver Easy Frank George Henry Ida John
King Lincoln Mary New_York Ocean Peter Queen Roger Sugar
Thomas Union Victor William X-ray Young Zero

British Army 1927:

Ack Beer Charlie Don Edward Freddy George Harry Ink Johnnie
King London Monkey Nuts Orange Pip Queen Robert Sugar Toc
Uncle Vic William X-ray Yorker Zebra

RAF 1924-42:

Ac Beer Charlie Don Edward Freddie George Harry Ink Johnnie
King London Monkey Nuts Orange Pip Queen Robert Sugar Toc
Uncle Vic William X-ray Yorker Zebra

Royal Navy 1917:

Apples Butter Charlie Duff Edward Freddy George Harry Ink
Johnnie King London Monkey Nuts Orange Pudding Queenie
Robert Sugar Tommy Uncle Vinegar Willie Xerxes Yellow Zebra

[Wrens at Bletchley Park: Apple James Kenneth(?) Oliver
Peter Quagger(??) Unicorn William Xray]

U.S. Army 1916:

Able Buy Cast Dock Easy Fox George Have Item Jig King Love
Mike Nap Opal Pup Quack Rush Sail Tape Unit Vice Watch X-ray
Yoke Zed

British 1914, perhaps Post Office approved:

Apple Brother Charlie Dover Eastern Father George Harry
India Jack King London Mother November October Peter Queen
Robert Sugar Thomas Uncle Victoria Wednesday Xmas Yellow
Zebra

British forces 1904:

Ack Beer C D E F G H I J K L Emma N O Pip Q R Esses Toc U
Vic W X Y Z

[The OED has a reference for Beer and Emma dated 1891]

Actually the "smoking gun" has little to do with the dig:

"SCI FI representatives say the programme promises never-before-seen
eyewitness interviews, late-breaking revelations and a "smoking gun
bombshell", which does not necessarily coincide with the
archaeological findings."

4762. Is there a radio band for these requirements?

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-18 23:33:12 UTC
From: 10squared <news@firewallinabox.com>
Message-ID: <3dd86d0b_7@nopics.sjc>
Source record: 71987

Hello,

Is there a band and appropriate radios for the following set of
requirements:

1) Must allow commercial traffic
2) Air to ground, ground to ground in hilly terrain, and ground to air
communications of up to 20 miles.
3) Portable equipment (handheld)
4) Little competing traffic
5) Under $300 per radio

I know that amateur equipment is disallowed due to the commercial usage
requirement. Aviation bands are out due to line of sight nature of signal
at aviation freqs. Not sure about CB because of amount of competing
traffic, but this seems to be around the right frequency. Any suggestions,
such as a commercial band around the CB freqs? Thanks in advance.

Cheers,

Jim

I don't mean to split hairs, but surely this doesn't constitute a
'phonetic alphabet'.

Sebastian.

And you know this how? I'm a ham and have yet to hear any weird stuff.
Can you elaborate on the frequencies? After all, there are countless
numbers of frequencies we use.

I won't hold my hand on my ass for further info....

So far I like the radio and its performance.It does surprise me that you can get a nice package for less than a Tri band.I can't wait to get the ADMS software as soon as it comes out.

I won't get into the ones that start with vowels, but how do futtock, llama, Quito, Roentgen, veldt, xylophone, and zloty fit? In there English pronunciations as I know them, they all start with the expected sound. Most people pronounce "llama" like "lama", and /vElt/ is the primary pronunciation given for "veldt" in both the MW and AHD. Most words beginning with "x" have it pronounced /z/. "Quito" is iffy, but I pronounce "quarter" /kOrtr/, not /kWOrtr/.

Word on the street is that Herb, ex- KV4FZ, will make an appearence on 14.313 USB at high noon Eastern time.

A "Roll Call" will kick things off. Controlled by KT4TR and the Colonel will be the first check-in!

Word also has it that Hal Turner, will be making a guest appearrence on 14.313 too. He will be checking in with the help of control op, Kevin Strom, WB4AIO.

Bro. Norton and Bro. Bottle will be tuning in their R-75's. for the play by play.

Will KK4TL be tuning in from his 'frigerator box?

Profit Stair told me so......

As I'm sure you know, there are two methods of "spelling" characters:

1. by giving a well-know compound containing the character in question: eg "zhidao de Dao" (Dao as in Zhidao [know]). This would seem to be particularly useful for telephone/radio spelling.

2. by splitting the character into its (exact or approximate) components: eg Ri-yue Ming" [the Ming character made up of Ri (sun) and Yue (moon)].

Dan is right. What the heck? You don't
need no "steenkin badges" on ham radio anymore! (do you ??)
Some guy who calls himself "orange blossom" checks into
the 75 Meter 3.860 Militia Net at 8:00
PM EST every night. Guy don't have any ham call
and is welcome checked in by the NCS "no-problemo".
[O.B. is allegedly with the Michigan Militia
out of Dexter Mich. Mr. FCC] Guess what also..
..they've now established 7.275 mHz SSB
(40m) as the "24/7 Michigan Militia callup freq"
or so said someone up there last nite. No license
needed too! real nice.

(So much for Mr Hollingsworth's "stellar"
enforcement record eh folks....?? Better send
in Homeland Security pronto Uncle Sam...)

From: K1CWB@QeerCity.Net
Message-ID: <3dda8d7b_3@news.newsgroups.com>
Source record: 71939

I am a Good Amateur Radio Operator and I am not a CBer, I used to be and I still have a CB radio but seldom use it, except for emergencies, like when I am alone at home or and lurking in the buss station parking lot, waiting on a lonely young boy to come by, you know, so I can be nice to him. I use my CB for emergency contacts, people in PA like me to use my old "Handle", "Rump Rider".

I wish you people would have some respect for people like me that have an Alternate Life Style, stop calling me Queer.

Thanks,

K1CWB, Chris

I bet it works as well as those "internal cellular antenna boosters" they
were selling all over late-night TV a while back.

For 26 words? Oh, there's a good excuse. Talk about scrounging for a
reason to take offense at a perfectly innocuously intended response.
At least I snipped the pointless empty lines you inserted between the
words.

There would be plenty of room if there weren't a war on (certain) drugs and
the prisons weren't full of non-violent drug offenders.

I don't know of any affordable & legal means to cover all your
requirements in spectrum space below 30 Mhz, I think you're stuck
particularly in ground-to-ground comms over difficult terrain. GMRS
comes about as close as you can get with point-to-point comms but in
the end satelite cell phones might be the only trick in town.

Dont bothur. ifn you walk around with a small coppur rod bout four feets long you kin groun the phone to a light poast with the rod and all those nasty little Hz's will be harmluss and go into the sidewak or up the poal. This wurks better than the ham fest doodes that walk aroun with the luminum hard hats and raydiuls on teh sides. they lurned this after they herd all kinda dits and dashes in theyre heds even when they was sleeping. now they kin sleep reel good
I herd also that if a ham has lots of tin foil the ham kin sleep real good an not havta study up for a code test this way cuz it comes into his hed real quite like an it dont waken him up with worrie bout taking a test or nuthing
Someune done tole me this is the way Dumass Donnie done it but somefin went rong an the tin foil got somefin like a millyon or 2 volts in it and fryed donnie in the hed. they said donnie tuched his coppur rod to the rong light post and lit up like a sparklur and spun round an roun an roun an roun until his tin foil meltud an his eyes wen all ever wich way. an he even meltud his big ol 20 pound belt buckel to his belly an thas why he wakls all bent ovur the way he is. they took donnie to the veturenaryan but damige was dun an ol donnie nevur did recuver liken the way he wuz uset to be. The vet tole donnys mom that donny had permnent brane damuge an moste likuly wuld talk reeeeeeeeeellllll slooooooooow the res of his lifetime an shuld get therupie. donnies mom siad she dint have $ for therupie an her son wuld just havet to lern to live with his disabiluty. she said she will lurn to lissen to donnie reeeeeeeellll slooooooooow so she under stans him an when she reeds him his bed time storys she wil read reeeeeeeellll slooooooooow so donnie kin unnerstan.
now you know why he tawks so slooooooooooow an yuo guyz shuld be mebbe more unnerstannnig bout his disubiluty an stuff cuz donnie caint hep it. it wuz a acksidunt an donnie wont never more agin be stik his ground rod where it dont belong cuz he lurns reel fast. an donnie dont have a brain toomur eethur cuz the vet siad he is mostly back to normul an wont git any bettur than he is. already.

Of course not: it leaves out the phonetic punctuation. See Victor
Borge for that.

Seriously, this is called a "phonetic alphabet" because it is used for
added redundancy when spelling out words over a noisy channel and
accuracy is more important than speed. Military and law-enforcement
types (law enforcement has a different one) use it. "Mike" and
"November" are much less easily confused than "m" and "n", for
example.

Just back reading a "pay"-triot shortwave
radio broadcaster's website that said the newest
threat to freedom is....hope your sitting
down folks....front-loading washing machines!

Oy!, call the Maytag Repairman Irb!
That's right, those subversive euro-pean type
Kenmore's, Whirlpool's and Amana's are
here to encourage more "parlimentary govt
partiality mindsets" in the average american...

Oh the humanity! I was on the floor crying
from laughter on this one folks. I've waded
thru the MS-67 gold coin conspiracy salesmen, the magnetic
mattress pads that cure *all* that ails you and "magnetic water"
which is *guaranteed* to add 4" to your errection.
I've visited a Pay-triot Expo some years ago and
saw more plad shirts, beat up old cars and bloated
beer bellies hangin over belts than at a hamfest and
train show combined. I thought it couldn't get
any worse that the "Save a Pay-triot Fellowship"
a now-defunct (..that was featured on Comedy Central's
Daily Show once) right wing matchmaking service
to pair 40-something balding white/right males with
220 pound dewey-eye'd tractor-farm milkmaid mail
order brides from the ex-USSR amd Phillipines.

...but this one folks...takes the cake for the most whacked-out
conspiracy theory I've ever come across. Watch out guys!
Those front-loadin washin machines have hidden cameras in
them (just like countertop microwave ovens and OneStar
equipped GM cars do) .....ever ready to snap a digital image
of you standin there in your NRA ballcap with yer big belly
hangin out for the New World Order to see and use
against you when "pay-triot roundup-time" begins!!!

(..actually it has already, but their not blue
helmit dudes, nay! Their really mental health
case workers from the State Hospital out
looking for screwballs residing in trailer parks)

BWWAAAHHHHAAAA!!!!!!!
HA HA HA HA!!!!!!!!!!!!!!!!!!!!
Here comes the NWO - Sieg Heil!

I mean..what a LOAD OF SHIT these guys
on shortwave put out on a daily basis. Are there
really people who believe the Alex Jones' the Pete
Peters' the Brother Stairs' etc..etc... Why also is
it that the Southeastern, Midwest and Northwestern
areas of the USA seem to have such a bumper-crop of
quasi-right wing xian screwballs??? Something in the water
perhaps?

Please, someone tell the folks on the 3.860 Patriot Net (every night
at 8:00 PM Eastern Time on 3.860 LSB) about this new and
scary development before one of em plunks-down $700 for a
front-loading Sears Kenmore and stands naked in front
of it being photographed in their long-johns waitin for the
red plaid flannel shirts to "done get warshed"....

Not all law enforcement. Many of the South Florida agencies use the ICAO phonetics in addition to Q-signals (so much for Q-signals being "designed for CW").

Not only that, but everyone in aviation uses the ICAO alphabet as well. It's actually the genesis of it, since ICAO stands for International Civil Aviation Organization.

Step 1: No more automatic renewals. Individuals must retest and
pass all elements required for their license class.

Step 2: The passing score for written exams needs to be raised to 90%.

Step 3: Code elements should be 13 wpm for General, and 20 wpm for Extra.

Step 4: Make the no-code license one year non-renewable.

Step 5: Cancel your league membership until they decide to work
to improve things.

Step 6: Complain to the ARRL when-ever you hear an idiot on the air.

Step 7: Turn in rule breakers to the FCC.

Curious if anyone knows what the current 160 meter band plan is these days ? 10-15 years ago stateside CW activity occupied 1800-1820 or therabouts and the DX window was around 1825 as I recall. Having just put a new 160 inverted el up I have yet to hear anything down in the very low end of the band and all the cw activity seems to be from 1820 and up and the dx spots I see are up around 1830-1835. What gives ? Can anyone shed some light ?

Its a mess...go to the ARRL page and look around for it. Lots of changes since 15 years back.

CW is 'safe' below about 1830. The bottom ten is digital now a days.

4832. FREE QSL cards

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-21 00:51:21 UTC
From: Tim Ries <tim.ries@mindspring.com>
Message-ID: <arhanqpst1@slb9.atl.mindspring.net>
Source record: 71976

Hello,

I collect American postcards and recently got a lot that had 13 QSL cards in the batch. I realize that somebody out there must collect these types of cards. Most seem to be from Europe with one loner from Vallejo, Calif.

The first person to respond to me that can send me a self-addressed stamped envelope AND one Curt Teich-made or Mike Roberts-made postcard gets the lot.

Thanks.

Tim
Brooklyn, N.Y.

Just remember, that the "ARRL" band plan, does not carry any "protection" of law/rules.
The FCC is reluctant to rule any "band plan" on any amatuer band.

Hans has his meter protected with an input resistor and a couple of schottky diodes across it. You need about 600 volts into it to register 10 over.

Much as I dislike some of the current state of things in amateur radio, we live in the 2000's not the 1950's. We have to deal with the current reality, bad as it might be. Returning to 1952 is not going to cure the problem. We need to pull together as hams and do things without bugging the FCC for everything. We used to do that.

Why not just drop the archaic code requirement, beef up the theory
requirements and get hundreds of new, excited members tomorrow? That'll be
the biggest shot in the arm the hobby has seen in decades.

I would suggest somethig rather different.

Take out the code requirement, and put in the test some DSP questions
(how to make filters, equalize volume, remove noise, and modulate in
phase, frequency, quadrature, etc) as well as more advanced circuit
design.

The code requirement is just silly.
Code is just one of the many ways to encode a signal, a way that
happens to be possible to do by hand. But why bother with it?
That it is useful in emergencies is a ridiculous thing - if your
transceiver works, you might as well talk into it, so also general
SWL, and not only hams, can understand your transmission.
Instead, with the increased ease with which signals are digitized,
DSP should really be required knowledge.
I mean, it takes so little nowadays to feed the signal into an audio
board
or better A/D converter, and then start doing things digitally...

In fact, consider this: DSP should be required because, in case of
emergency, you hook up your PC/laptop audio board to the radio, and
there you go,
modulating any way you want...

Code is what keeps me getting a ham licence.
I just don't suffer fools gladly, and the code requirement is foolish.
If I want to waste time, there are many more pleasant ways to do it.

Cheers!

Peter

Oh and one more thing: I think it is incredibly funny that in a
country where you can get a driver's licence without knowing how to
operate a stick shift, you cannot operate ham without knowing code.

There, now flame me.

You're wrong, of course. If you look at amateur radio from the view of a non-involved historian, the only regulatory change which had a significant statistical impact was the advent of the Novice license back in the early 50's. As originally envisioned and structured, Novice was an incredible smart regulatory move, perhaps the last smart thing the FCC did for the health of the Amateur Radio service.

Other than that, changes in licensing requirements have served only to generate sales of ink, to excite the excitable minority, and to give the Unabashers another reason to cancel their ARRL membership or to buy a life membership. No other impact is evident, and won't be after this current curve in the regulatory road. Hams will still be hams, and the excitable minority will get excited all over again. In about 2012 we'll be awaiting the next "restructuring" plan. Yawn.

Ban everyone who is not 100 percent in accordance with your views . Who the heck would you then post with?

Get real, everyone is entitled to their opinion.

Some where between you and him is probably a reasonable solution. I have noted that of those who got a ticket with little work, many are not renewing. A thing only has value when we have to work for it, unfortunately the ticket no longer requires much effort and has no real value to the recipient.

Still stuck in my mind is sweating before a steely eyed FCC examiner, drawing schematics, sending, and receiving code. Did I enjoy the process? Nope! but I did enjoy being able to count myself among a group of fellow hams that had gone through the "baptism of fire".

I don't care a wit that some folks have 5wpm licenses, You have yours and I have mine. I feel mine is worth more, but that is my opinion. Your mileage may vary...

Allow others to have their opinion, and now that the horse is dead you may cease the use of the whip.

IMHO,
Requiring A/D knowledge is equally as silly as requiring knowing code.
A compromise test of all the various technologies is clearly the logical
way to approach licensing/testing and they attempt to do this to some
degree. But technology is changing rapidly and the wheels turn slowly.
I think we are at a point where a ham should know what A/D means even
if its only picking out the correct words on a multiple choice test.
But hmmm, isn't that basically what the code test is?

Ranting off from a recent thread on r.r.a.a. one would get the
impression that knowing the brand names and specs of current products
(the Hamstick thing) is more important in making a 'good' ham.

The League is pretty much in control of testing and licensing these days
and I'm of the crowd that thinks they are doing everything bass-ackwards

and ultimately alienating radio folks (both new and old) from their organization in favor of whiz-kid technology. I don't desire things to stay quagmired in the 1950's but I don't see the need to overwhelm the bulk of the ham community with articles that are better suited for an IEEE publication. If, back in the 50s, they published *ONLY* SSB stuff, the rank and file membership would have tossed in the ARRL towel...much like the situation we see today. QST is the League for most people and basically it (they) have become nothing more than another modern electronics magazine publisher, not a mouthpiece for amateur radio as a hobby for all age groups.
(Apologies to the CBers and SWLs that I'm cross-posting to)

Great gobs of bovine excrement, the license is simply insufficient
motivation for you to learn code. The "suffer fools" nonsense serves only to
cover up your lack of motivation. Learning anything is simply one more
exercise in broading one's life experiences.

<snip>

We now interrupt this boring thread where ham's bicker yet again about
licensing for a bit of light entertainment.

Community Service

One day a florist goes to a barber for a haircut. After the cut he
asks the barber about his bill. "I am sorry, I cannot accept money
from you I am doing community service this week." The florist is
pleased and leaves the shop.

The next morning when the barber goes to open his shop; there is a
thank you card and a dozen roses waiting at his door.

Later a cop comes in for a haircut and he also goes to pay the
barber, and the barber replies: "I am sorry I cannot accept
money from you. I am doing community service this week." The
cop is happy and leaves the shop.

The next morning the barber goes to open his shop; there is a thank
you card and a dozen donuts waiting at his door.

A Democrat comes for a haircut and when he asks the barber what
he owes, the barber replies: "I am sorry I cannot accept money
from you. I am doing, community service this week." The Democrat
is very happy and leaves.

The next morning when the barber goes to open his shop, a dozen
Democrats are lined up waiting for a free haircut.

A first grade teacher proudly proclaimed to her class one day that she was a liberal Democrat. She asked her students to raise their hands if they were liberal Democrats as well. Not really knowing what a liberal Democrat was, but wanting to be like their teacher, most of their hands flew up into the air. There was, however, one exception. A girl named Lucy had not gone along with the crowd. The teacher asked her why she had decided to be different.

"Because I'm not a liberal Democrat" she replied. ''Then, what are you?'' asked the teacher,

"Why, I'm a proud conservative Republican," boasted the little girl. The teacher, a little perturbed, asked Lucy why she was a conservative Republican.

"Well", she said, "I was brought up to trust in myself instead of relying on an intrusive government to care for me and do all of my thinking. My Dad and Mom taught me these things, and they are both conservative Republicans, and so now I am a conservative Republican too." The teacher, now a little embarrassed and maybe even just a bit angry, said, "That's no reason! What if your Mom was a moron, and your dad was an idiot. What would you be then?" The teacher paused, a bit smug, certain that she'd put the girl in her place, and slowly let a sly smirk creep across her face.

"Well, if that were the case", said Lucy after a moments thought,"then, I suppose I'd be a liberal Democrat."

From what I understand, that would work as to the mode of transmission and the distance you are trying to reach. As to the purposes of the communications and the legality of them, that would be another issue. I guess if 5 watts on 10 meters would yield those results, I see no reason why it should not work on 11 meters.

Seven nice steps to DESTROY and KILL ham radio. Only several fanatics would stay. How would you like to be re-tested for your driving license every year ? Or to be subject to regular tests from the law codex under the penalty of losing your citizenship ? BTW, do you have a written permission to use the "trademarks" Wouff-Hong, Rettysnitch and Uggerumph ?

God save the hamradio !

I might agree if the theory questions were "fill-in-the-blank" and
"draw-the-schematic", rather than multiple choice - where the answer is
right in front of you. This would help ensure that the person has some
actual knowledge rather than just having memorized a few answers from a
test prep book.

In reality, your proposal would not attract any significant quantity of new
hams because it would make the test harder than it is now. In today's
"instant gratification" mindset world, many people want every thing "now"
and don't want to expend any personal effort to get it. That's why the code
element is constantly being complained about by so many...

If these cards are filled out, they may be of interest for a QSL museum,
for instance the one in Vienna (http://www.qsl.at).
However, they (like many other museums) depend heavily on donations and
can't normally pay postage. So why not send them the cards?

No problem! btw, are YOU volunteering to be part of the VE system that
would have to administer an additional ~70,000 exams-for-renewal per
year? Or is this a "let someone else do the work" idea?
>
> Step 2: The passing score for written exams needs to be raised to 90%.

Again, no problem. But how are you going to convince FCC?
>
> Step 3: Code elements should be 13 wpm for General, and 20 wpm for Extra.

Again, no problem. But how are you going to convince FCC? What new
argument will change their minds after they have been gradually
phasing out code testing for the past 20 years?
>
> Step 4: Make the no-code license one year non-renewable.

Why? And are YOU volunteering to be part of the VE system that would
have to administer the tens of thousands of additional upgrade exams
per year? Or is this a "let someone else do the work" idea?

> Step 5: Cancel your league membership until they decide to work
> to improve things.

Did you read the ARRL's proposal and comments on restructuring? What
should ARRL be doing that they are not doing now?
>
> Step 6: Complain to the ARRL when-ever you hear an idiot on the air.

Why? Enforcement is FCC's job.
>
> Step 7: Turn in rule breakers to the FCC.

How many tapes have you sent to Riley?

Heck, this isn't even a new list! Just a rehash of one from May of
2000. The Troll-O-Meter judges unanimously disqualify it from
consideration due to its nonoriginal content.

Guys, I need some help here. I got a HTX-202, and will be using it when I get my license. I notice that when I listen to the radio inside the signal comes in really weak, but when I go outside, it strong. Where I am at, is a court yard, and my windows are within the court yard and I can't put an antenna on the roof ?

What can I do to get a stronger signal from within my apartment ?

Jim:

Not to complain <grin>, but you skipped my favorite part.

In Step 5 you are supposed to cancel your ARRL membership. Then, in Step 6 you are supposed to complain to the organization from which you just resigned and in which you now have no standing. I think we need a step 8: LCT at 2IAO (Logical Consistency Test at 2 Ideas at Once level.)

If you really want to increase the Ham ranks, and improve people's knowledge
and skill at the same time...

Have a monthly operating contest where the winner gets $5000.
Have a monthly design contest where the best project gets $5000.

After winning, you would have to sit out for 2 years so others could
benefit.
The FCC could fund this using the revenue from the spectrum of ours that
they're selling to the cellular crowd and other big lobbies ;-)

Hmmm.... I had a license with code requirements (many years ago), but I also
have problems with certain kinds of motor skills. It isn't impossible, but I do tend
to find the competency of 100W+ CBers who happen to have ham licenses to
be disappointing.

My biggest frustration now is the use of SOT type packages for my RF design, but
I am working through the issues, and learning how to deal with the technical problems.
I suspect that much of the ham hobby is being supressed by the commonly available
parts technology (and at UHF+, the needed smaller dimensions.) However, from a
time and 'exclusive club' standpoint, I suggest that the competency of 95% of the hams
would be quite insufficient to build and fully understand their equipment.

This is akin to a brutish physical skill overwhelming intellectual comptency. Morse
code is only a brutish, anachronistic (most of the time) skill (which is problematical
WRT poor fine motor control.) It is apparent that some in the ham community
are compensating for lack of sufficient mental skills by making it exclusionary based upon
physical skills.

The amazing thing is the dumbing down of ham radio (but the rigs are beautiful
nowadays aren't they?) Ham radio is now almost an endorsement on CB, rather
than having to REALLY know (not just remember) something appropriate for
the current world.

Would SSB CB radios at legal power ratings (in the US) have a range of 10-20 miles? Transmissions would always be early morning or early evening.
Thanks.

Build or buy an external 2m antenna.

Try moving the HT to the window. If it picks way up then put the antenna
there and hook it to the radio.

Isn't it a real paradox? The smarter and more beautiful the radios, the
dumber the hams who use them! :-)

Ham radio is now almost an endorsement on CB, rather
> than having to REALLY know (not just remember) something appropriate for
> the current world.

I certainly have no problem agreeing with this, although it really has
little or nothing to do with Morse code on ham radio. You can always use
a keyboard to send if you can't physically handle a manual key or
paddle. I may go to one of those due to arthiritis myself one of those
days. But a computer program does a really poor job of copying, as far
as any I;ve been able to evaluate shows. That will probably change if
some of you more computer literate souls choose to keep working on it.
Looks like you'd rather just dump the whole mode. That I don't
understand. I do understand why some people don't like th emode, and I
can appreciate that. There are things I don't like, too. I have no great
love for Morse code(despite the rantings of some of the more rabid
anticoders who post here), but I learned to respect it for what it is
and appreciate it for what it offers-the most basic, simple, easily
implemented mode of radiocommunications yet devised.

Does that mean I or any other CW supporter would in any way advocate
use of CW -at any time- to the exclusion of better more efficient modes?
Of course not, again despite the rumblings of some anticoders posting
here. I, and most other code supporters, routinely use advanced digital
modes, some of us use them more than CW. Again, that does nothing
whatever to diminish the qualities of Morse code. Some of us understand
the mode well enough to consider it to be a valuable asset to ham radio.
If you don't, that's certainly your privilege.

Dick

I don't care if the general population can understand me. They can't
talk to me, so whats the point?

> Instead, with the increased ease with which signals are digitized,
> DSP should really be required knowledge.

I know plenty enough to be able to use DSP. I have DSP built into my
radio, and I have it outboard on my computer. Most of my PSK-SSTV,
etc, etc programs also use DSP. Big deal...

> I mean, it takes so little nowadays to feed the signal into an audio

> modulating any way you want...

I can train a smart monkey to do that. But overall we have a problem..
If I have an emergency, can I call you to come over to the scene and
bring a laptop? I have a radio in my car, but no laptop yet. Of
course, I could talk into the mike, or use a code key, but I want to
be stylish like you. Hummmm, you say you live many states away? Take 5
days for the laptop to get to my accident scene via UPS? Oh well...
I've still got my hand to keep me company in the meantime...

> Code is what keeps me getting a ham licence.

Why? Are you "gifted" or something?

> I just don't suffer fools gladly, and the code requirement is foolish.
> If I want to waste time, there are many more pleasant ways to do it.

Well, ok then. A man's got to know his limitations...

>
> Oh and one more thing: I think it is incredibly funny that in a
> country where you can get a driver's licence without knowing how to
> operate a stick shift, you cannot operate ham without knowing code.

What does a country have to do with this? It's international treaty.
BTW, in this state, the car you take into the driving test will
determine if you need to know how to manual shift or not. If it has a
manual transmission and you can't shift it well enough to drive, you
won't get a license. You will have to buy a new car with an automatic,
and retake the test. Expensive way to get a drivers license if you ask
me...

>
> There, now flame me.

Naw...Just pity...Anyone that lets a snail slow 5 wpm code test stand
in their way, doesn't really want a ticket too bad. What does it take
to learn? All of two weeks? Good grief...How long did it take you to
learn all about DSP?

Next.... MK

Oh I am quite willing to learn things in general!
But the point is, there are so many things to learn,
and I prefer to learn useful things to useless ones.
I'd rather spend time learning more about DSP, that can
be useful to me to post-process radio signals, than code,
that I am likely to never use.

And another poster commented that I simply not motivated enough
by amateur radio to learn code.
True, by definition.
I sometimes listen to what hams talk about; 95% of the time
they talk about their radio setup.
The idea of having to learn code, get a licence, and build an
antenna, to be able to talk about my radio on the air
is ... uh ... less than overwhelmingly enticing.

I predict that, with all the new technologies available now
(cellphones, internet, computers, etc etc), amateur radio will
simply die out for lack of interest; the ARRL and others are
doing a pityful job of getting the newer generations involved.
Too bad, because some things going on with packet radio,
computers, routing etc are incredibly cool.

They keep up this old-fashioned requirements, and they don't
realise that, as the younger people are turned off,
their radios will also eventually be turned off, when FCC
reclaims the frequencies.
They see the refusal of somebody to learn code as that person's
problem, and they don't realise that the lack of membership will
soon be their problem.

Sooner or later the FCC is going to reclaim those frequencies
due to lack of interest, and nobody in the US consituency will care,
except the 0.0001% of the population - hardly a political constituency.
Come on - listen to the actual _content_ of ham conversations:
if SW bandwidth ever becomes valuable, I don't think ARRL has a chance
to argue that there is something worthy going on there.
And the original purpose, to spread the knowledge of radio technology,
is moot now - with so many other important technologies, why would
one worry so much about radio?

Many hams are now in their 50s. I predict that by the time they are
dead, in about 25 years, amateur radio will also be dead, reduced to
a small number of frequencies used for emergency communication.
All the rest will be commercial bandwidth.

Peter,

That's great news. You should know that you can get involved hip-deep in amateur radio, including DSP (pre- and post-process) without learning a single dit of Morse code. Just take the written exam, Element 2, and you'll be licensed to experiment on literally many GHz of really prime spectrum.

We'll be looking for you to join us soon. I'll bet you can teach us a thing or two.

Let me explain: it is an unnecessary and anachronistic barrier to entry. Frankly,
'the code' was really a prominent mode of operation at one time, but now it is
mostly a barrier to entry. It is MUCH MORE useful to center ham radio on
creative endeavors (which can also include working long distance in poor
conditions with code.) I am NOT anti-code, but I am anti-code exclusivity.

There really needs to be a basic ham license w/o code. To work at all in the
'code' bands, you'll need to pass the code test (similar to the good old reserved
bands for extra.) To be able to work anything but phone in limited bands,
you'll need the higher technical endorsements. So, there would be the
basic general ham license, which only provides limited communicator 2M,3/4M band

permissions. After that, for the real traditional 'u build it' ham stuff, then your technical endorsement would give you access to all but the code bands. There might even be multiple levels of technical endorsement (e.g. HF, UHF.) For the code bands, there would be the <10wpm bands and the >10wpm bands (or even finer grain.)

For example, more often, a ham radio operator SHOULD be able to grab a $2 PHEMT, create a simple board (with VERY FEW components) and have his/her 1dB NF 2M or 1.2GHz preamp. Nowadays, the poor schmuck will be spending $120 (or so) for some boutique preamp with 'magic parts or things' in it. (Well, 1dB NF would be a little tricky, even with a .2dB NF PHEMT, but you get my idea!!!)

Here in the US, technology is moving offshore, and even for strategic reasons, helping to motivate technology hobbies other than computer geekdom would be a VERY GOOD THING.

I'd much rather live in a world where ham operators can experiment with new or forward looking modulation schemes (sometimes with DSP), rather than only plan for a post-WWIII world, where there are a few radio sets and morse code is the only economical way to communicate.

The Morse requirement advocates seem to be approaching the fringe status of those who had stocked up their food for the YR2000 'issues'. I am NOT against Morse code, but against the prequisite for significant ham radio operation. The Ham community does have ALOT of morse operators, but TOO TOO FEW individuals who build their rigs (even significant parts of them.)

There are some cases (like you) that have the code and technology, but that isn't wrong. You would have both the code band endorsement and the experimental band endorsements!!!

John

We've got great news for you, John!

You can live in that world TODAY without studying even a single dit of Morse code! Just hustle on down to your next local VE examination session and tell them you want to take Element 2 of the exam. Within days you'll be licensed to tinker and experiment on literally GHz of prime spectrum with DSP, spread spectrum, or whatever other modulation scheme strikes your fancy. While you're at it, join AMRAD, TAPR, and AMSAT and participate in any of their dozens of digital and space-borne technology projects.

http://www.amrad.org
http://www.tapr.org

HAW! That's absolutely correct! What's more, by leaving the
organization, its influence with the FCC (who is actually in charge of
making any and all of the proposed changes) is reduced.

Even the Bulgarian judges shake their heads in disgust over the poor
quality of the troll.

> Why not just drop the archaic code requirement,

FCC's hands are tied on that one. The ITU treaty requires code tests
for an HF ham license. FCC isn't going to violate the treaty - they
said so in their Report and Order. If/when the treaty changes, FCC
will most probably eliminate Element 1 - but not until then.

Meanwhile, FCC has already reduced code testing to the barest minimum
that they think meets the treaty requirement - 5 wpm. Is learning
enough Morse code to pass the current 5 wpm code test really so
difficult?

> beef up the theory
> requirements

How? What, exactly, would you change?

Many of those who commented on the recent restructuring offered
practical ways for the FCC to "beef up" the theory requirements for
the higher-class licenses. In response, FCC reduced both the number of
tests and the total number of questions for each license class.

> and get hundreds of new, excited members tomorrow?

We're getting thousands of new, excited hams each year right now. The
number of licensed hams in the USA has reached an all-time high.

> That'll be
> the biggest shot in the arm the hobby has seen in decades.

The last time I attended the Dayton Hamvention was two years ago. I saw several olde fahrtz that where so grossly obese that they needed motorized carts to get around. Pretty pathetic.

(I'll be reviewing the links, perhaps to bring my viewpoint up to date, and
reconsider restarting my hobby from 25yrs ago.)

Apparently, the world has changed indeed since I had my ham radio license. I
got mine (the old tech license) a few months before my First phone just to see
what FCC tests were like. I also played around, but it was before the most
interesting stuff that makes UHF on up really cool nowadays.

When I did take the tests (both the tech class and first phone) in approx 1971,
I was VERY disappointed as to the lack of technological depth (even as a
Soph highschooler) required.

In a way, we reap what we sew, and the lack of technical requirements has
further enabled a general movement towards a dominant communicator-only class
of hams. I am VERY happy to see that some of the code prerequisites have
been lifted, and I will certainly follow your links after this post. I'd also like to
see alot of very broad ham interest, that isn't dominated by communicator
type stuff, but also include more technology than currently today. Technology
MUST NOT dominate ham radio, because it is easy to overshadow the
purpose of communication. When communication almost fully dominates the
hobby, esp archaic modes, then technology might be getting too much of
a back-seat.

I'd certainly be willing to advocate a license class for ham radio operators that
would ALMOST make that endorsement into an indicator of some technical competency.
With any significant motivation of the level needed to learn code at 13wpm or

even 5wpm, the newbie ham could almost become a naiscent EE*... (*Well, maybe that is a little optimistic, but not too far off.) Perhaps I'd be more accurate to claim that a person could at least understand the terminology and the issues of design, building, testing and even computer interface. This would provide the toolset that would allow the more motivated individuals to continue on with some self-schooling.

It is probably fairly clear that my own interests are of a technical nature (both EE and software (OS, DSP).) All of my ham hobby interest was based upon the technical and innovation side, but that had seemed to be too de-emphasized.

I'll definitely give the ham stuff a look-see again. My own interest, being technical, would also include helping people who want/need to learn how the stuff really works :-). I am also NOT INTERESTED in taking anything away from ham radio -- code is good, but almost complete understanding and significant (not necessarily complete) technical self-sufficiency is also good.

John

I am VERY HAPPY and encouraged about this. I happen to see ham radio as
a potentially great hobby (and important in my past), but also a wonderful
strategic asset from both the historically too-deemphasized technical training
ground and also the operational (emergency and communications) aspects.

Wouffgang Larry, I don't see anything in there about White Supremacy
so maybe you're almost legitimate.

1. No Automatic Renewals - Agreed. We need to keep this economy
rolling one test fee at a time.
2. passing score 90% - Make it 100%. If Bruce Without Error can do
it, anyone should be able to do it. Some may have to study, though.
3. Code elements 13 wpm for General, 20 wpm for Extra. We've had 160
years to perfect the code. Lets at least get it up to the speed of a
greasy smelly dinasaur tty - 55wpm.
4. Make no-code license one year non-renewable. I've been told that
anyone can learn code in a matter of weeks. Make the NCT 6 weeks
non-renewable.
5. Cancel your league membership until they improve things - That's
been tried - just cancel it.
6. Complain to the ARRL when-ever you hear an idiot on the air, and
Complain to Al Gore when you see one on rrap (cc: Al Gore).
7. Turn in rule breakers to the FCC - Cuffed and stuffed? or just
send in their call sign?

Depends upon just who you are trying to contact, for distant
contacts that depend upon propagation that may be true, but you
can always find a band where you can make voice transmissions, if
nothing more than VHF/UHF locally or even HF frequencies locally.
This nonsense that the conditions get so bad that all frequencies
are affected such that cw is the only mode to get through is just
that, nonsense.

Dick, you got a fever, man? I've not once read anything like that
from you. Not once! But I accept that as an earnest remark.

And in the "easily implemented" remark, it may be easily implemented
if you've been -trained- in the USE of Morse Code, but just learning
the code characters and passing an exam doesn't make it easily
implemented. You have to use it. And to use it you've got to have
people out there not only willing to put up with every little mistake
you make, but to actually be there and work through it. Listening to
W1AW and code tapes may make one an Extra, but it doesn't make one a
CW op. Meanwhile, 160 years after the invention of morse code,
novices are segregated to spaces and places where few are willing to
go.

> Does that mean I or any other CW supporter would in any way advocate
> use of CW -at any time- to the exclusion of better more efficient modes?

IMO, someone skilled in code needs to be on the Novice bands providing
the understanding that is required to get the next guy going with CW.
You've been a ham since Jesus was a Corporal. Make it your legacy.

I agree with Peter. As an EE, I would pass that test right now. As I have said before, we don't demand that every computer user learn 2s complement math (or even DOS) prior to allowing them to use windows, linux, etc. The very idea sounds rediculous to us. The CW requirement is no different. Just my 2 cents.

Let's just keep it simple. To work any band / mode below 30 mhz. you need a
higher class license (oops, that's how it is now... :>)

Several times every year, shortwave conditions are poor enough that voice
transmissions are unitelligible. If you don't have a computer to work the
other digital modes, the only possibility left is CW.

> Instead, with the increased ease with which signals are digitized,

You aren't always going to have a computer available. I know when I go
traveling, I sometimes take my radio but not my computer.

There's no reason to flame anyone. It is a difference of opinion that should be calmly debated.

If it were me, I'd build a "J" pole from 300 Ohm twin lead and suspend it from different areas of the ceiling until the best spot is found. With the "J" you don't have to worry about annoying radials that come with a ground plane (as per another suggestion) and it is easy to hide behind drapes since it is rather unobtrusive. Many sites on the web have plans readily available and MFJ even sells an inexpensive "J" ready to go.

There is much more variety in the conversations on CW than I've typically
heard on voice. The range of topics is amazing. I communicated with
retired teachers, "talked" about eBay, etc.

There is a basic ham license without code. It's called Technician. They
have all privileges on all ham segments above 30 megahertz. There are some
fine individuals doing great work in that realm. And some are even using
the 6m and 2m code band segments to work on their code so that they can pass
it to get on the HF bands.

Actually if you limit them to phone only until they learn higher
endorsements, too many will simply stay there. Allowing phone privileges
should be the treat that they get after proving themselves competent in
other areas of ham radio.

Up might try putting a 1/4 wave vertical with radials up near your ceiling
and running a coax from it to your HT. That ought to help quite a bit as
the little "rubber ducky" antennas are a major compromise between signal
strength and portability.

Wouff Hong,

I'm not sure where you from, but that's beside the point. I read your suggestions to improve ham radio, and, as some one who is very proud of the organization they are from you wanted to let other people know your thoughts. As we both can see, it's raised a lot of havoc and questions and that sort of thing.

I must agree with you about some your suggestions, but lets look together at what you stated.

> Step 1: No more automatic renewals. Individuals must retest and
> pass all elements required for their license class.

-I feel the same way with this, because I think everyone should retest to get their driver's license every 10 years. Now we gotte realize how much a pain in the rear this would be, and not only take people away from this great hobby. It would be a good idea instead of retake tests, but to really encourage individuals bursh up on their skills, knowledge or electronic theory, etc.
>

> Step 2: The passing score for written exams needs to be raised to 90%.

-Again I agree that the level of accomplishment should be raised so people have good moral standards and treat with repect what they have their hands on when they worked hard to earn their Amateur license. 90% in manys' opinion would be to high; and it would frighten and discourage people.

> Step 3: Code elements should be 13 wpm for General, and 20 wpm for Extra.

-Morse code, a favorite of many, and not so great of many, but who is to say good or bad. Personally, and maybe others like yourself have to say that morse code is the the "basics" or any form or radio. Just because we had to take those tests when we got our licenses doesn't mean others have to. It would be a better idea to encourage people to do the morse code because if they do, I've found they stay in radio longer because if they have what it takes to learn the morse code; they'll generally apply the same learning habbit in other areas of radio. Please don't Misunderstand me, many people don't like it and are very active. But lets encourage and not say anyone has to this or that.

> Step 4: Make the no-code license one year non-renewable.

-Sounds like a good idea, but tis better to encourage people to move on and help them along the way, then bark at 'em like their bosses do.

> Step 5: Cancel your league membership until they decide to work
> to improve things.

-If league's don't have memberships, they can't support us and improve things. Memberships provide income for our leagues to improve things. We all should encourage people to join a league of some type.

> Step 6: Complain to the ARRL when-ever you hear an idiot on the air.

-Nobody is perfect in this world except God. When people who is arrogrant operate, I find out someinfo about them and kindly correct them over the phone or in some kind of private conversation. Nobody likes to be humiliated in public or at anytime. Besure anyone who does this makes sure the other person needing correction is open to it. As the cliche' goes; " A man convinced against his will, is of the same opinion still."

> Step 7: Turn in rule breakers to the FCC.

-Same as above; Nobody is perfect. Constant offenders have some challange with some one or something which some one needs to find out what the deal is and help him out with it. People just doing harm out of no reason does need to be turned in however.

Hope this helps. As you can see I mentioned the word encouraged lot because many people are guilty of this, myself included. When people are guided to the direction they want to go, they will go. There is a story that goes something like this. "The sun and the wind cloud were having a contest to see who could have a man in the park below take off his coat. So the wind cloud says he'll go first and the sun hides behind him. The wind cloud blows and blows but the man in the park just holds on to his coat tighter and tighter. The wind cloud gives up and the sun comes out and just shines his warm rays down below to the man. The man removes his coat and goes pleasantly about his business." If the moral hasn't bern figured out by an intillgent individual like yourself, it is that when someone is forced to do something, they simply won't, or they'll possibly grudingly do it. Ask and encourage someone to do something and they'll give it all they got for their best effort.

Hope this Helps,

Respectfully,
~Benjamin, KB9LFZ

Shhhhh, don't say that too loud, you'll get dick all upset.

I did not say all frequencies by the way. I
> specifically stated shortwave (i.e. HF). However it is now apparent that I
> should have also specified communications outside the local area in my
> discussion.

Then you statement was correct, occasionally HF conditions can
degrade to the point that outside local area communications are
impossible with voice modes and maybe only cw will get through.
Although if conditions are bad enough to wipe out all HF chances
are even cw isn't going to get through either. Usually conditions
will be bad on certain bands while others are still usable.

Of course I was talking about getting out side the local area. If you don't want to get outside the local area, then VHF is fine and you can do that with the introductory license. I did not say all frequencies by the way. I specifically stated shortwave (i.e. HF). However it is now apparent that I should have also specified communications outside the local area in my discussion.

I agree, as the politics within ham radio will kill ham radio long before
other issues will.

Step 1: No more automatic renewals. Individuals must retest and
pass all elements required for their license class.

This one I actually agree with. If the statements made by certain indivuals about "growing" with the hobby and climbing the ladder of licensure are to be true, then hams should not have a problem taking a test that should be a breeze since they have "obviously" advanced within 10 years....

Step 2: The passing score for written exams needs to be raised to 90%.

Dunno about 90%, but think that 80% sounds fairly reasonable. Add more questions to the test, and choose other formats of testing other than multiple-guess too.

Step 3: Code elements should be 13 wpm for General, and 20 wpm for Extra.

See not a huge problem there, but never understood why 13 for the General. Why not 12, or 14, or ??? What is so special about the 13 wpm? Anyone know why they chose 13 for the "middle" code test?

Step 4: Make the no-code license one year non-renewable.

2 years seems like a fairer option.

Step 5: Cancel your league membership until they decide to work
to improve things.

Hmmm.... could start a whole new newsgroup on this one.........

Step 6: Complain to the ARRL when-ever you hear an idiot on the air.

They are not our governing body, nor will I ever accept them as our "governing body." It is bad enough that they have taken over the testing duties.

Step 7: Turn in rule breakers to the FCC.

DUUUHHHHH!! All should do that.... but follow proper policy/procedure when doing so. Also work towards the goal of getting the FCC to actually do something about that in the first place.

All in all, the problems people want to bitch about regarding ham radio stems back to the FCC each and every time. They make the rules/policy/procedures and they are the ones to blame. HOLD THE FCC responsible.

Actually, they should probably limit the power for the 'communicators' to less than 100W, and the higher technical licenses would allow for higher power :-). The 30MHz, I guess, is still a treaty thing, and indicative of stagnation. Maybe the 'communicators' with little technical criteria might even be limited to 10-50W at VHF and above.

The goal isn't to punish people, but to motivate people to learn how their stuff works. I suspect that the VHF bands are too full for much experimentation, but the technology for homebrew on 2GHz on up is now relatively achievable by mere mortals.

Wouldn't it be cool if people really designed/built their own stuff that makes sense to do so, rather than buying their devices from boutiques? Alot of stuff isn't really practical to build (e.g. the communicator 2M units, or walkie talkes), and the stuff that is extremely practical to build (10M transmitter) even with few mechanical skills, would be constrained by the code requirement.

So, for the newbie, where homebrew is more practical below 100MHz, the code constraints tend to continue their burden.

John

I look at the code requirement a little different..... If it is so important, then ALL radio services should have to pass at least the same minimum 5wpm as we do.

Hmmmm.... most US states already do that somewhere between every 2-4 years.... As well as they should too... And they also need to start testing senior citizens more often too..... (not gonna state what age they should start that at though...) I have worked a variety of accident scenes where the scene was clearly marked and using on the fire trucks to block the lane, with lights operational, pile-on orange cones, road flares etc, and a senior citizen still plowed into the firetruck. He claimed they could not see it..... Jeesh, you could see the scene from a freaking mile away!!!!!! Yeah, I am all for retesting on a fair basis.

> should be the treat that they get after proving themselves competent in
> other areas of ham radio.
>
The limitations for those without the 'technical competence' endorsement should
probably be a reasonably low power like 20-50W on VHF/UHF and/or 100W for HF.
Phone should probably be the first mode of communication, mostly because
of the relative usefulness (e.g. during normal disasters, to help with communications,
phone will more often be useful rather than code (unless there is a WWIII)). During
urban disasters, if we are having to deal with code, the situation is probably
severe enough that ham communications ettiquete would be the least of our worries.

There certainly should be reserved areas of the HF bands for code, and those
people with/without code who haven't passed the technical criteria for the
technology endorsement, will be limited in power. Really, if someone cannot
quickly whip up a preamp/active impedance match for an HF frontend that
has to work in an area near a 50kW MW transmitter without overwhelming
intermod, then it kind of worries me about how the ham is going to competently
deal with the numerous issues of using their 500W-1kW rig. It isn't just
a matter of getting on the air, but also avoiding interference with TV (including
nowadays 8VSB), AM/FM radio, and other more important services.

People do get 'on the air', and usually do the right thing, but it is VERY SAD
that too few people build their own equipment. Of course, CBers had historically
been known to simply slap on an illegal 'linear', and their rigs sometimes worked
okay also (often with anti-social interference :-)).

Of course, my attitudes about technological competency can be mapped to
the equivalent attitudes of those who have already passed the advanced
code tests. In the normal profile of natural/terror disaster, the availability of
a radiotelephone communications mechanism would be much more useful
than if the 'HRO' only had a code rig.

Yep... overall the hobby is declining, but it is not from the testing procedures. Anything viewed worthwile by someone is worth pursuing as well as whatever obstacles along the way. The root of the problem is in the PR side. I still run into tons of people that didn't even know ham radio existed. A much smaller group associates it with CB from my own local area experiences. We need to promote the hobby more. We need to get ham radio into the schools, associate it with the cirriculums. We need to start doing things that WILL get people coming to us, to become hams. Testing sessions with a mere few testee's definitely reflects that there is a problem with promotion of the hobby. But that would take actual action by people and god forbid that eh????

Simple quick and dirty trick? Take a 2 meter magmount antenna (with appropriate end connector/adapter for your HT) and slap it on a porch railing, barbarque grill, or other metal surface. Some have even used a 2 or 3 foot squared piece of sheet metal to get the same result. As to getting the coax through a window or door, there are simple solutions for that too. I assume that you are in an apartment or something like that. Just remember, the HT will get hot from extended usage regardless of which antenna you use.

I do, and so do a lot of hams that have any working electronics knowledge,
but you don't get that by simply memorizing the answers to 30 multiple
choice questions...

> Alot of stuff isn't really
> practical to build (e.g. the communicator 2M units, or walkie talkes)

My first 2 meter rig was a kit (Heathkit), as were the first pair of walkie
talkies I ever owned (Allied Radio).

>, and the stuff
> that is extremely practical to build (10M transmitter) even with few
mechanical
> skills, would be constrained by the code requirement.

The only practical 10 meter transmitter that one with limited skills
might be able to put together would be a CW transmitter, so it would be
of no use to a person that did not know code.

> So, for the newbie, where homebrew is more practical below 100MHz, the
code
> constraints tend to continue their burden.

What burden? There is nobody forcing them to become a ham. It is something
that one does because they want to do it. And according to their level of
effort and dedication to the hobby, they are rewarded with additional
operating privileges.

Re the commercial usage, this would not be broadcasting but merely communication between personnel of a commercial entity, primarily position information. If that type of commericial use is legal on that band and if SSB CB would cover the distance, and if someone still manufactures handhelds for SSB CB, then that might fill the bill.

> >
> > There already is - it's called a No-Code Tech.

Actually, the licenses say "Technician". Nothing about code or nocode
on any FCC ham license. And all US hams are allowed to use Morse code,
test or no test.

A distinction needs to be made between those who are against the code
TEST, and those who are against code USE.

> > > To work at all in the
> > > 'code' bands, you'll need to pass the code test (similar to the good old
> reserved
> > > bands for extra

WHY? There's no requirement to pass such a test today. In fact, 6 and
2 meters have the only "Morse only" segments - and they are open to
use by Techs who haven't passed a code test.

> > Let's just keep it simple. To work any band / mode below 30 mhz. you need a
> > higher class license (oops, that's how it is now... :>)
> >
> Actually, they should probably limit the power for the 'communicators' to less than 100W,
> and the higher technical licenses would allow for higher power :-).

Probably a good idea, because then the RF exposure questions on the
entry-level tests could be tailored to the power levels permitted.

> The 30MHz, I guess,
> is still a treaty thing, and indicative of stagnation.

Nope. It's simply a treaty requirement. Once upon a time the
requirement was for all ham licenses. Over the years an exception has
been included for VHF/UHF because there is relatively little routine
use of Morse by hams on VHF/UHF. The limit has gradually been lowered
at various WRC conferences - 1000 MHz, 144 MHz, 30 MHz. Next year it
will probably go to 0 Hz ;-)

Before judging whether "code is dead" or "obsolete/outdated/nobody
uses it anymore", try actually LISTENING to the ham bands below 30 MHz
- particularly the lower ends of the bands, where Morse use is most
common.

This weekend would be a good time to listen.

> Maybe the 'communicators' with
> little technical criteria might even be limited to 10-50W at VHF and above.

Sure.
>
> The goal isn't to punish people, but to motivate people to learn how their stuff works. I

Plenty of room on all bands for experimentation.
>
> Wouldn't it be cool if people really designed/built their own stuff that

I do that, and have been doing so, for more thna 35 years.

> A lot of stuff isn't really
> practical to build (e.g. the communicator 2M units, or walkie talkes), and the stuff

>
> So, for the newbie, where homebrew is more practical below 100MHz, the code
> constraints tend to continue their burden.

How does the requirement to learn code at 5 wpm just well enough to
pass a test unreasonably constrain the ability to build radio
equipment? Hams have been building rigs long before there were
licenses without code tests. Heck, I built my first transmitter at age
13 - right after I passed the code test. That was not at all unusual
in 1967.

The REAL "burdens" of home design and construction today are the
practical and economic constraints. Manufactured ham gear, and kits,
are inexpensive and plentiful today. What sort of projects would you
recommend for the raw newbie?
Do you think it's practical for a new ham without an extensive
electronics background to design and build an HF SSB transceiver as a
first project?

"W6DKN" <w6dkn-nospam-@qsl.net> wrote

: And according to their level of effort and dedication to the hobby,
: they are rewarded with additional operating privileges.

Nope, has nothing to do with "effort and dedication".

Hang around here long enough, and you will see someone write
something like:

" A really tough written test would surely separate those
who really have an interest in the hobby.", or..

" Other, more relevant, methods can establish an applicant's
dedication to the service.", or..

" I think it is effective at minimizing the undesirables.",
or..

" ..... the key to maintaining the quality of hamming is
making it something to work for.", or..
.
"My opinion is that any obstacle you put in the way to any
achievement guarantees that only those with dedication and
strong interest will get there."

All of the above quotations, gathered from recent threads, were
made by serious and well-intentioned licensees who want the best
for the Amateur Radio Service.

All of the above quotations also completely miss the mark, in
that they suggest that the examination process is the key to
ensuring that "the right kind of people" (those who are
"worthy") become licensed and, by extension, that "the wrong
kind of people" get filtered out.

First, the testing procedure is an "entrance" exam, not a
"graduation" exam.

Second, while "interest", "dedication", and "hard work" might
be hallmarks of good amateurs, the FCC and ITU regulations

do not specify levels of interest, dedication, hard work or other measures of "worthiness" as requisites for a license. Therefore it is not the function of the examination process to determine (even if it could) if an applicant is "worthy" but rather to determine if he/she is QUALIFIED to use the spectrum assigned. There should be no "dumbing down", but neither can there be a requirement that the examination process screens out applicants who lack "commitment".

Don't get me wrong here, folks. I believe that the examination process ought to be rigorous enough to determine proper knowledge and skills so that a new licensee does not inadvertently trash the bands, hurt themselves, or harm other users/uses of the spectrum. I am not even suggesting that Morse testing is a "good thing" or a "poor idea". But I have no expectation that ANY examination can filter out "unworthy" applicants who lack the proper dedication or motivation.

Even if it could, who then would become the arbiter of "worthy"?

Besides, it's the Advanced and extras that cause the majority of deliberate rules violations. A tech or General might mess up, but an extra knows better and does it anyway. And how much effort should you have to put into a hobby?? Do the CW worshippers and "I hadto take a REAL test" guys have a life other than radio and are they still working? A lot of them are retired, sick and seem like they resent any changes because a new ham might not have to "go through what they did". I'm not married, but I have a full time job, other hobbies and interests, friends, pets, etc. How much of those do I have to ignore/abandon to be "worthy" to them?

A lot of people get turned off just by listening to some of the nonsense that goes on the air, and some get turned off after they get a no code ticket, and are ignored, trashed, ridiculed, talked over, etc by older hams, almost always of 20+ years experience, and almost always they seem to be Extras. If anyone should have their "plug pulled", it should be these guys. They have no excuses. The most local incident I can remember was when several hams in Detroit purposely interfered with anyone who tried to use the repeater having a call issued after the NO code was introed. This went on for some time, then they must have gotten some kind of warning, since it just suddenly stopped. AS a victim of these guys, I think something more should have been done. Andyes, I did make a complaint, complete with tapes of their nonsense.

BDK, no more CW for me, finally, it's over..

Here's a novel idea. Let's have Extra band segments, Newbie band
segments, no-code band segments, code-only band segments and a
Dont-even-bother-with-getting-a-license segment.

Oh wait...we already have that.

-Bill M

The only way this could happen to a no code tech is on a repeater (unless
he is operating out of class on another band - and then he *should* be
ignored or otherwise enticed to cease transmitting).

But basing you opinions on a very limited segment of the hobby (repeaters)
is very misleading. Repeaters (especially in larger metro areas) are often
abused by all license classes, and many "old timers" think of them as
something akin to licensed CB anyway. Try working simplex or SSB instead,
you'll find a very different group of hams.

In this day and age, requiring folks to do code is
pure bullshit. Do we ask computer science majors to
write code in assembly language or know DOS?

HELL NO!

Unfortunately, the ham radio community is so far behind
the times that these guys don't even know what day it is.

Give your favorite ham radio operator a dixie cup and
string, b/c that's where he or she is from a technological
point of view.

The ham radio community will continue to shrink unless
it gets its collective heads out of its asses.

Hey guys, it is 2002

"continue to shrink"????

Actually there are more licensed hams today than ever before in history.

Doncha just hate it when someone introduces a fact and ruins your rant?

With all kind wishes,

Solar flare....what a bummer for the CQWWDX CW contest this weekend.

4944. Re: 7 steps to improve ham radio.

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-22 22:59:34 UTC
From: vshah101@aol.com
Message-ID: <20021122175934.24143.00000113@mb-cv.aol.com>
Source record: 71881

Steps to better Amateur Radio
1. Get rid of the word "Ham"
2. Get rid of excess codewords.
3. Discourage cults such as Wouff Hong
4. Encourage Amateurs to not have their lives revolve around "Hamming".
5. Encourage Amateurs to lose weight.
6. Get more females, young people into Amateur radio.

7. Get rid of QST and bring back Ham Radio magazine
(but change the name to Amateur Radio magazine).
8. Get more people involved in: Homebrewing, radio direction finding,
troubleshooting, use of test equipment, antenna building.

9. Positive publicity - positive publicity spots in newspapers, etc.
Endorsements by celebrities, Amateur radio in movies.
10. More clout with politicians.
11. Stress educational benefits, such as geography, etc.
12. Collaboration with EE education and IEEE, not separation from them.
13. Real development activities through Amateur radio clubs.
14. Real tests of viability of certain modes by getting large numbers of people
to test them.
(Could be done in a contest).

15. Get rid of the Morse code requirement.
16. Encourage an adequate number of coders - but don't tie this to the license
classes.
17. Morse certificate for 5 wpm, Morse with distinction for 13wpm

18. Real license preparation classes to understand the material.
19. Non-question pool format for written tests.
20. Call the license classes Novice, Intermediate, Advanced instead of
Technician, General, Extra
(Clearer terminology and more respectful of achievement).
21. Simpler "Operator" class that does not include practical circuits. (I bet
with a more difficult test, many coders will end up here instead of Extras).

22. Real Emergency communications training,
(must demonstrate on actual equipment), instead of just written test.
23. Field day preparation meetings so everyone can do their best on field day.

24. More real skill building activities
25. New awards. Instead of WAS and other volume based awards, recognition for
WAB(Worked All Bands), Distance awards, station setup time awards, etc.

Yeah, it was on 2 meters. This doesn't happen a lot like it did back 10
years ago, but it still happens, and it's always veteran hams that do it,
not no code techs or anyone recently licensed.
>

I've had two, a Novice 30 years ago, and one of them hated No code techs since 91, and I won't post them here, for various reasons. I'm sure you'll trash me, but I have good reason not to. But I did the 5 WPM CW thing already, and maybe I'll upgrade one of these days, but it doesn't have the draw it did ten years ago. Too bad...

So, in effect, you have never experienced anything beyond basic entry level operation? That's not much scope of experience to be basing such a negative view of the hobby on.

Since you claim to have passed the 5 WPM element in the past, all you have to do is show proof of it to the examiner when you take your General (or higher) written element and you will have your HF ticket. Isn't that what you wanted, elevated privileges without having to take the code test?

Machine code is the lowest level code, when you write in machine
language you are coding directly in the language the machine
understands. An example of a high level language is BASIC which is
written using English, such as GOTO, IF, THEN, LET A = B, PRINT,
ect. The high level language either uses an interpreter, which
converts the high level code to machine language on the fly, or it
is compiled which converts the high level code to machine language
in an executable file (.exe).

One of the biggest justifications for Ham radio licensing is
for emergency operations. It is MUCH MUCH more likely for
radiotelephone to be of immediate use (other than post-WWIII situations)
than code.

Code should be encouraged for those who like that medium, but
technical competency is much more important in general (esp for
high power operation.)

I've seen it.

> The only way this could happen to a no code tech is on a repeater (unless
> he is operating out of class on another band - and then he *should* be

Lots of NCT's like fm simplex as much as the next guy. Some even use
other modes such as SSB, packet, and even CW. Why must the rudeness
only take place on repeaters? Have you never been to a club meeting
where it takes place in person?

> But basing you opinions on a very limited segment of the hobby (repeaters)

Your comments are very limited and misleading. I've heard noisy
elitists at the Dayton Hamvention where they don't care who they
offend.

Limited again. But a hotspot of rudeness. I witnessed a 2by2 with
the first name Curtis berating a new ham's first QSO on the air - on a
St Louis repeater. Apalling.

Hello!

I've been lirking here for a while, 'tis time I came out of the
woodwork. My comments embedded below.

Regards,

Dave wx1g

vshah101@aol.com (Vshah101) writes:

> Steps to better Amateur Radio
> 1. Get rid of the word "Ham"

Good idea! What's it mean, anyway?

> 2. Get rid of excess codewords.

Especially on phone. I'm annoyed by the use of "qth", "qrm", "73s",
and the like on my local repeater. In CW contacts, these things may
have value as a kind of "macro", and are understood by speakers of
many languages.

> 3. Discourage cults such as Wouff Hong

See my answer to #2 above. The code words serve only to make the
amateur community sound 'cultish'.

> 6. Get more females, young people into Amateur radio.

What a wonderful idea! Got any concrete plans for doing this? We're
not representative of the general demographics.

>
> 8. Get more people involved in: Homebrewing, radio direction finding,
> troubleshooting, use of test equipment, antenna building.

This might help to achieve #6 above.

>
> 9. Positive publicity - positive publicity spots in newspapers, etc.
> Endorsements by celebrities, Amateur radio in movies.

Remember, in the movie "Independence day", the guy with the Vibroplex
bug saved the day? LOL. Maybe my local radio club can do some public
safety communications for the 2004 Democratic National Convention?
The media and celeb's might notice.

> 10. More clout with politicians.

You mean, like a political action committee?

> 11. Stress educational benefits, such as geography, etc.

Some of the league's educational materials may already do this.

> 13. Real development activities through Amateur radio clubs.

"Development", as in fund-raising? Or, do you mean activities with
which we can improve operator skills?

> 14. Real tests of viability of certain modes by getting large numbers of people
> to test them.
> (Could be done in a contest).

Better than finding out, during some real emergency, that, oh, BTW, we
can't work across-town with 2M FM simplex.

>

> 17. Morse certificate for 5 wpm, Morse with distinction for 13wpm

That might help to achieve #15 and #16 above. Why stop at 13 WPM?

>
> 19. Non-question pool format for written tests.

What new written test format do you propose? Remember, the thing is
administered by volunteers, not professional educators.

> 20. Call the license classes Novice, Intermediate, Advanced instead of
> Technician, General, Extra

Here, Here!!

> 21. Simpler "Operator" class that does not include practical circuits. (I bet
> with a more difficult test, many coders will end up here instead of Extras).

Myself included. I'm an Extra, who's damned good at code, but can't
build or design a circuit.

>
> 22. Real Emergency communications training,
> (must demonstrate on actual equipment), instead of just written test.

Given that emergency communications is part of our purpous, makes
sense. Just how you would implement this "real equipment" test, I'm
not sure.

> 23. Field day preparation meetings so everyone can do their best on field day.

Not something we could codify into the amateur service regs.

>
> 24. More real skill building activities

We already have Field Day, contests, Simulated Emergency Test, NTS traffic handling, etc. We just have to encourage participation in those and more.

> 25. New awards. Instead of WAS and other volume based awards, recognition for
> WAB(Worked All Bands), Distance awards, station setup time awards, etc.

Keep the volume-based awards, for those who like to count things. How about adding the qualitative awards such as suggested above?

Sure, I used to be a ham... (probably before alot of these readers
where born.) Had the code and everything. Additionally,
the rules and regulations were easy... The technical part was trivial
(even as a highschooler, I didn't have to study that.) Sure, my First
Phone was a little more difficult, but still technically easy (the rules and regulations
were much more difficult.) I also had NO BENEFIT of tutoring, but
simply learn and understand very quickly (still do.) There is NO EXCUSE
for IRRESPONSIBLY avoiding the demand of technical competency,
because it is the tool used to support responsible behavior on the
shared airwaves.

Learning an anachronistic and rather less useful skill, like code is mostly
a waste of a newbies time (unless they *want* to use code.) For
typical emergency situations (nowadays), radiotelephone will be much
more useful. Trying to be elitist based upon an anachronism, has mostly
the effect of creating an exclusive club and creating a barrier in the wrong
place. If anything, the barrier MUST be on the basis of being able to
operate competently (including technical competency.)

It is good that code has been dropped on the above HF frequencies, but
even HF rules could stand some revisiting by the international organizations.

For those who claim that I might need to learn something, it would be
good to learn some respect for those who have 'been there, done that.' I
do have some problems with certain fine motor skills. The problem isnt'
any better since I was young. It isn't a handicap, but the anachronism
and simple waste of time for any operation that I would be interested in
is a serious disincentive (rather than the appropriate disincentive against
technical incompetency.)

It was good to hear that ham radio is starting to realize that they need
to look towards the future, rather than try to create a false elitism based

upon an anachronistic skill. If the elitism is based upon a currently (or future) strongly useful expertise, then there is some value. Ham radio does need to continue to self-police, but also appear to be friendly.

John

Ever try sorting through a few hundred pages of a 'core dump'
(raise you hand if you know what a core dump is) deciphering the
instructions to find out why a program had an abend (abnormal
end)? At least it printed out in hex.

Good example: I wrote/re-wrote a significant amount of FreeBSD (the VM
code and other pieces.) Without knowing and being able to use assembly
or machine code, it would be a severe handicap for some groups of programmers.
However, there is usually an intimate relationship between machine code
and the code produced by high level languages. Understanding this relationship
and being able to exploit it can sometimes help to improve system performance.

Of course, technical knowhow, and the ability to solve communications
problems (e.g. interference, path loss issues, reliability), are MUCH MORE
important nowadays to render code to be a quaint curiosity.

I don't know where you've been, but there are people using assembly language today (2002). And it is for major companies, and leading edge products. Not all programming is Java and OO. Don't assume that one specific method of programming/language useless until you understand the reason for using it.

Also, don't assume that one method for transmission is inappropriate for all communications. Some operators prefer voice, some prefer code, that is their choice.

Code can be thought of as a requirement so that operators have sufficient breadth in their understanding of radio communication. Isn't testing about comprehension and proficiency. These result in the privilege to operate a radio.

(I wouldn't hire a programmer that doesn't know assembly.)

To me it is clear that code is a viable part of the hobby. When I no longer hear code in the HF bands, I may consider it to be obsolete. Since people are using it today (2002) it clearly isn't obsolete.

On the other hand arguing about this is rather pointless.

Later,

Craig

I'm far from a computer guru, but aren't all high level computer languages written in assembly/machine code? Aren't they all just basically interfaces between the processor (machine language) and the operator??

And the 64K of core memory took up more space than several of
today's PC units. 512K additional memory for an IBM Model 50 CPU
came in a box the size of about three refrigerators side by side.

With hydraulics driving the R/W heads back and forth. A head crash
was not a pretty sight.

Yes, this is pretty much how computer languages evolved. Assembly language is still used today mostly in the development of high level languages (C, VB, Java, etc.) and operating systems, because as each new processor hits the market, they have their own instruction set.

BTW, there is a difference between assembly and machine language. Machine language is that which is understood by the computer - the 1s and 0s. If you had to write and debug a program using only 1s and 0's, you'd soon become frustrated after trying to debug the first couple lines of code. Assembly is the next step up from machine language. It uses alphanumeric representations of the 1s and 0s that the computer uses, and a compilier converts them to the machine language that the computer understands.

Take a look at some stories on his website:

http://www.halturnershow.com

Paypal, Live365 and C2IT have all cancelled thier accounts with Hal.

The jews and thier lackeys countine to attack Hal. Take a look at this
artticle on the ADL website:

http://www.adl.org/learn/news/Suprem_Urge_Bomb.asp

The ADL has NO leagal power whatsoever.

Hal Turner will countine to expose the truth. And you can kiss his and my
a**

>>

kiss my ass you dam fake Lloyd!

Lloyd da Toid
My Faverite name 'cause it stinks!
